# Which do **you** prefer?

## AMALGAM

- Currently banned in Denmark, Norway and Sweden; in Costa Mesa, CA there is resolution for dentists to voluntarily switch to non-toxic alternatives<sup>2</sup>
- Twelve states currently require the use of amalgam separators for waste<sup>3</sup>
- Shade - metallic with zero translucency
- Requires additional tooth preparation
- More recurrent caries with amalgam<sup>1</sup>

## ChemFil Rock<sup>†</sup>

- Designed for semi-permanent restorations of cavities in posterior teeth with limited indications
- Opaque, non-aesthetic white (five shades)
- Limited clinical studies
- Must wait six minutes after activation to finish

## EQUIA<sup>™</sup>

- First self-adhesive posterior restorative system
- Apply EQUIA<sup>™</sup> Coat for a permanent restoration in Class I and conservative Class II cavities<sup>1</sup>
- High aesthetics (eight shades) and translucency
- Maturation hardens (strengthens) over time<sup>1</sup>
- Great for high caries risk patients
- EQUIA<sup>™</sup> offers it all: faster placement, easier finishing, wet-field compatibility, reduced post-operative sensitivity and filling reliability

**EQUIA<sup>™</sup>**

Cannot be combined with any free goods offers.

# Revo-S™, getting to the root of the problem!

**MICRO-MEGA®**, specialized in endodontics since 1905, has succeeded over the years to always provide more innovations, service, know-how and comfort to worldwide practitioners. Its last innovation is an example of it...

Revo-S™ is a unique and innovative high performance sequence with **only three instruments (SC1, SC2 and SU)**. It is adapted for most root canal anatomies and provides safety and simplicity.

## ENDO Revolution!

- One of its advantages: its asymmetrical section enables a “snake-like” movement of the instrument inside the canal which reduces the stress on the file.
- The files can be used up to 10 times\*!
- No need to buy an additional endo motor: simply use your traditional endo handpiece.
- Cost saving: less than 2.5 CND\*\* per canal!

\* Check the files after each use and discard them if they present premature sign of fatigue or unwinding.

\*\* Average cost based on 10 uses.

There are always innovations with MICRO-MEGA®...

### G-Files™

G-Files™: Rotary NiTi glide path instrumentation with complete safety! These new NiTi files safely enlarge the glide path in preparation for RCT with rotary instrumentation system.

Two instruments are offered:

- **G1:** N12 - .03 - L21, 25 or 29 mm
- **G2:** N17 - .03 - L21, 25 or 29 mm

The **G-Files™** can be used in combination with the **Revo-S™** system or any other NiTi system.

*Flash this code with your smartphone to discover the Revo-S™ video.*

XIOS sensors

X-ray images

Sidexis XG software

# Heliodent<sup>PLUS</sup>

## Easy intraoral X-raying

Just how well a system supports you in routine X-ray diagnostics has less to do with the number of functions it offers than with the image quality it produces. The definition, details and distinct structures of X-ray images are vital for the reliability of your diagnosis. In connection with the established Sirona sensors, HELIODENT<sup>PLUS</sup> supplies first-class digital images. SIDEXIS XG software displays these images in real time – and simplifies your workflow with image processing and archiving tools. These three optimally matched components help you achieve an ideal workflow in your practice.

Special Price

**\$101**  
/month

Promotion valid from  
October 1<sup>st</sup> to December 31, 2012

## DISINFECTANT TOWELETTES

Asepti-Wipe II is a saturated wet wipe delivering a pre-set amount of disinfectant. It is available in a practical size of 8" x 14" and in a standard 6" x 6" size. Wipes are made of rayon with superior absorbency properties - more soil is absorbed and it stays on the wipe - for a faster procedure.
