Just the Way You Like It

Did you know?

Did you know that the ancient Egyptian pharaohs had dentists?

It's true! About 4000 years ago, Egyptian dentists drilled teeth with tiny hand-powered drills, and filled teeth with a paste containing plant resins and ground colored stones. They used mixes of herbs to help cure infection and alleviate pain. Some of the basic principles of dentistry were known.

We've come a long way! With excellent dental care from Dr. Strong, you will protect your teeth, look great, and feel even better. With dental implants, you can now keep your smile for a lifetime! Dentistry with a difference!

Questions about COVID-19 vaccines? We have answers.

BY DR. MICHELLE McMURRY-HEATH

Many Americans have questions about COVID-19 vaccines – and rightfully so. There’s lots of information out there, and researchers are learning new details about the virus daily.

But the science is very clear: Getting communities vaccinated is a crucial step to returning to “normal” life.

Here are some answers to frequently asked questions about COVID -19 vaccines:

Should I get the vaccine with pre-existing conditions?

People with certain pre-existing conditions, including cancer, diabetes, obesity and heart disease, are more likely to experience severe complications from contracting COVID-19. For this reason, they’re strongly encouraged to get vaccinated.

In clinical trials, the COVID-19 vaccines showed similar safety and effectiveness in folks with some underlying medical conditions as in patients without pre-existing conditions. Talk to your doctor in more detail about your specific concerns before getting vaccinated.

Are there side-effects to the vaccine?

Yes, it’s possible to have

COFFEE BREAK

side-effects to the COVID-19 vaccine. Side-effects vary depending on the individual and the vaccine. Many people may have mild side effects, including pain or redness at the site of the injection, fatigue, headache, muscle ache, fever and chills. Most let up within a day.

Although rare, some people have reported allergic reactions to the vaccines. An extraordinarily tiny fraction of vaccine recipients have experienced anaphylaxis - a severe allergic reaction that can impair people’s breathing. However, you’re about six times more likely to be struck by lightning than you are to experience anaphylaxis from a COVID-19 vaccine.

Speak with your doctor or visit the Centers for Disease Control and Prevention website for more details.

Where do I get vaccinated?

The federal government is delivering vaccine shipments in bulk to states, which are then responsible for distributing the doses to different vaccination sites, such as pharmacies and clinics. Therefore, the vaccine is available in different places in different states. Depending on your state, you may be able to get the vaccine at a healthcare site (like a doctor’s office, pharmacy, hospital) or a temporary

clinic (like a school gymnasium, community center, church or library).

Visit your state health department website or www.covidvaccinefacts.org/states to learn where and when you can receive a vaccine.

Will I still need to wear a mask and practice social distancing after I get vaccinated?

Yes. Research shows vaccines protect individuals from contracting and experiencing severe reactions to COVID-19. However, it’s possible to spread the virus to people post-vaccination. Until we know for sure there is minimal risk of infecting others post-vaccination, you should continue to wear a mask and practice social distancing.

More questions?

Visit www.covidvaccinefacts.org to find a comprehensive list of answers related to vaccine technologies, clinical trials, the FDA-approval process, and more.

Michelle McMurry-Heath, a physician scientist, is president and CEO of the Biotechnology Innovation Organization. She previously served as a senior official in the FDA’s Center for Devices and Regulatory Health, the top science and health legislative aide for Sen. Joe Lieberman, and on President Obama’s science transition team.

Your Birthday:

Friday, March 19, 2021

Gather information. Sign up for courses that encourage personal growth, better health or skill expansion. Think outside the box, and your hard work and innovative approach to survival will pay off. Let emotions and frustrations fuel your desire to be successful.

PISCES (Feb. 20-March 20)

-- Keep your mind on what's important. Be responsible and finish what you start. Keep your cool, and refuse to get into an argument. Putting your energy where it counts will bring you the highest return.

ARIES (March 21-April 19)

-- Getting all worked up won't solve anything. Take a deep breath and consider what you can do to make a difference. Positive action is required if you want to move forward.

TAURUS (April 20-May 20)

-- Your best bet is to carry on with your responsibilities, regardless of what others decide to do. Today is about what you accomplish, not convincing others to do things your way.

GEMINI (May 21-June 20)

-- Stretch your imagination, but don't let gullibility be your downfall. Look for opportunities to show off what you have to offer without giving someone the chance to take control or steal your ideas.

CANCER (June 21-July 22)

-- Complete your responsibilities, and move on to pastimes that encourage you to relax and enjoy the people you love most. Refuse to let anyone back you into a corner or push you into

an emotional argument.

LEO (July 23-Aug. 22) -- Associate with people who have as much to offer as you do. Strive for equality at work, and don't feel you have to pick up and follow someone you don't agree with or like.

VIRGO (Aug. 23-Sept. 22)

--If you don't like a situation you encounter, step away. Your happiness is up to you, so make a point to surround yourself with people who bring out the best in you.

LIBRA (Sept. 23-Oct. 23)

-- Learn all you can and follow a path that's in your best interest. Use your skills to improve your lifestyle and your relationships. Home improvements should make your life better, not more stressful.

SCORPIO (Oct. 24-Nov. 22)

-- Think matters through and make changes that will help you put an end to uncertainty. It's time to focus on what's possible and look for creative ways to build a life that offers you peace of mind.

SAGITTARIUS (Nov. 23-Dec. 21)

-- Look at every angle. Don't promise anything you cannot deliver. Refuse to let someone's emotional manipulation affect you. Stick to a plan that works for you, regardless of what others want you to do.

CAPRICORN (Dec. 22-Jan. 19)

-- Stand up for your beliefs. Offer insight, hope and help to people who are open to turning over a new leaf. Walk away from emotionally draining situations and seek out positive people.

AQUARIUS (Jan. 20-Feb. 19)

-- Listen and learn. Don't take part in conversations that will promote more harm than good. Be positive, diligent and committed, and your reputation will precede you.
