## Age has its advantages...

especially for a business focused on personal relationships.

**Founded in 1892, Frigid Fluid Company is one of the oldest manufacturers and suppliers of embalming fluids and related materials.** Owned & operated for over 120 years by members of the same family, with the fifth generation actively involved, Frigid Fluid has the experience and ability to provide their customers with superior products and dependable service.

- 1892 — FRIGID is born when Adelbert R Krum starts the business under the name of Chicago Chemical & Manufacturing Co. Operating out of a 14 x 14 barn, he made and marketed an embalming fluid to which he gave the trade name "Frigid".
- 1901 — FRIGID FLUID COMPANY officially replaces Chicago Chemical & Manufacturing Co. as the name of the firm to coincide with the "Frigid" trade name.
- 1902 — INCORPORATION of Frigid Fluid in the State of Illinois.
- 1916 — INVENTION of the first Frigid casket lowering device is accomplished by Adelbert R. Krum.
- 1917 — FEMALE PRESIDENT Jennie M Krum is known as an innovator in the funeral industry. She increases business and expands the product line after Adelbert's death.
- 1930 — PATENT granted to Frigid Fluid for an Aspirating and Embalming device.
- 1945 — PRESIDENT ROOSEVELT is buried using the Frigid "Standard" Lowering Device.
- 1949 — INVENTION & PATENT of the "Master" model lowering device.
- 1955 — INVENTION & PATENT of the "Imperial" model lowering device.
- 1959 — INVENTION & PATENT of the mobile lowering device stand known as the "Streamliner".
- 1959 — PATENT granted for the Frigid "Vault Lid Placer".
- 1968 — FIRST INTERNATIONAL SHIPMENTS of lowering devices (first recipient was South Africa).

Adelbert R. Krum

President Franklin D. Roosevelt's Burial in April, 1945

- 1982 — DEVELOPMENT & INTRODUCTION of the "Premium" line of embalming fluids: Premium Cavity and Premium Jaundice.
- 1987 — FIRST SHIPMENT of lowering devices to Australia and New Zealand.
- 1991 — DEVELOPMENT & INTRODUCTION of the "Guard" line of embalming fluids: Tissue Guard, Dry Guard, Color Guard Jaundice, Leak Guard, Water/Clot Guard, Viso-Guard Gel and Orifice Guard.
- 1994 — FIRST LATIN AMERICAN DISTRIBUTORS established, starting in Argentina and Chile.
- 2009 — FIRST SHIPMENT of lowering devices and stands sent to Poland.
- 2010 — DEVELOPMENT & INTRODUCTION of the Frigid "Silicone Technology" line of embalming fluids: 36 Plus, Perfect Tone, Natural Tone and X-20.
- 2011 — DEVELOPMENT & INTRODUCTION of the "Imperial 2.0" lowering device, a lightweight version of the original "Imperial" device.

- 2011 — FIRST INTERNATIONAL TRADE SHOW PARTICIPATION in Dusseldorf, Germany.
- 2013 — CELEBRATION of 120 YEARS as a family owned/operated business
- 2013 — "SILITECH" TRADE MARK awarded to Frigid Fluid for its "Silicone Technology" line of its top selling line embalming fluids.
- 2013 — 5th GENERATION of the FAMILY takes the helm with Brian Yeazel, President/CEO.

# Table of Contents

Frigid currently produces a selection of more than 25 fluids to meet the specific needs of the embalmer. These are complemented with an array of supporting preparation products.

The Power of <i>SILITECH</i> ™.....	4
Arterial Fluids .....	5-7
Cavity Fluids.....	8
Pre- & Co-Injection Fluids .....	9-12
Supplementals .....	12-17
Sundries and Instruments .....	18
Frigid Fluid Cemetery Division .....	19

For embalming fluid usage instructions, please visit our website at [www.frigidfluid.com](http://www.frigidfluid.com).

## The Power of **SILITECH™**

Silicone lubricates the arterial system to help distribute formaldehyde deeply into the capillaries, thus promoting:

- Deeper Diffusion
- Wider Profusion
- Enhanced Saturation
- Superior Periphery Preservation

## The Benefits of Silicone

### **Silicone is extremely stable**

- Able to withstand extremes of heat and cold
- Acts as an insulator to protect the formaldehyde and other chemicals within the embalming solutions
- Unaffected by aldehydes, alcohol, lanolin and other embalming chemicals

### **Silicone is very non-reactive**

- Does not dehydrate
- Colored dye remains stable in the presence of silicone

## Non-Hazardous Material Formulations

### **Non-HAZMAT**

Frigid Fluid Co. arterial and cavity fluids are classified as non-hazardous materials under current US specifications. These fluids can be shipped by common carrier under the classification ORM-D. This reduces freight costs and does not require the imposition of a hazmat fee by the freight company.

### **Phenol-Free Frigid**

Frigid Fluid Co. embalming products are totally free of phenol. Phenol is a hazmat classified chemical that is highly toxic and known to cause lung irritation.

### **MSDS Documents**

Our Material Safety Data Sheets can be obtained from our website - [www.frigidfluid.com](http://www.frigidfluid.com), or by contacting us directly at 800-621-4719.

### **Limited Hazmat Products**

Only these supplemental products are classified as hazardous:

- STOP – contains ethylene dichloride
- Safe (25 lb container) – contains paraformaldehyde
- Paulex Powder (only applies to 25 lb size) – contains paraformaldehyde
- Feature Builder (only applies to 1 gallon size) – due to methanol quantity in package size

# Silicone Based Arterial Fluids

Frigid Fluid's "Silicone Technology" enhances the results you can attain with arterial fluids. The Silicone Advantage is delivered through a family of four arterial fluids.

## 36 PLUS (33 index)

1-36PL (24/case)

### Our best selling fluid.

36 PLUS assures preservation and pleasing results with both normal and difficult cases.

It is particularly effective on frozen, decomposed and other challenging cases.

### The formulation combines:

- The lubricating, diffusing and penetrating advantages of Silicone
- The addition of "Frigid Stop" to prevent the causes of tissue gas
- A water conditioner to neutralize calcium ions and soften hard water
- A drainage enhancer

### Resulting in a body that:

- Retains moisture and color for a very natural appearance
- Is free of tissue burn and "pruning"

**Note:** 36 Plus is not recommended for a prep room attached to a septic system, for which we recommend lanolin-based Tissue Guard 32.

All products on this page feature Frigid Fluid's New

**SILITECH™**  
FRIGID SILICONE TECHNOLOGY

## Perfect Tone (18 index)

1-PERFTONE (24/case)

### A lower index fluid that offers:

- The distribution advantages of silicone
- The softening effect of lanolin
- A pliable, smooth, life-like appearance
- A medium firm texture
- No dehydration risk

## Natural Tone (20 index)

1-NATTONE (24/case)

### Silicone Technology combined with:

- Mild but very effective buffers
- The addition of humectants
- Resulting in a cosmetic effect that furnishes a uniform, life-like texture and color to the skin with a natural feel that is soft and smooth

## X-20 (20 index)

1-X20 (24/case)

### A blend of six ingredients:

- Including the highest Silicone content
- For a thoroughly embalmed body of mild firmness
- Displaying a natural, soft, feel to the skin
- That has uniformity of color with a slightly pinkish tint

# Lanolin Based Arterial Fluids

## Tissue Texture

### Lanol-Tex (22 index)

1-LANOLTEX (24/case)

- The Frigid arterial fluid with the highest level of lanolin
- Plus two modifiers to furnish pliable tissue for a body of medium firmness
- Ideal where the soft, smooth skin texture supplied by lanolin is desired
- Superb for dry, emaciated cases needing protection against dehydration

### Tissue Guard 32 (32 index)

1-TISSG32 (24/case)

- For use in place of “36 Plus” where the prep room is attached to a septic system
- Armed with a particularly effective wetting agent that assures thorough distribution and deep penetration of body tissues for lasting preservation
- Incorporates a special blend of humectant and dye to give a warm, even cosmetic effect, not the harsh effect sometimes obtained from unmodified dyes
- Results in a firm body that retains some flexibility and natural feel

Frigid fulfills a full range of funeral home, cemetery and crematory needs.

Church & Chapel Metal Arts, Inc.

#### Sundry Items

- Disposable/Reusable Protective Garments
- Microflex and Nitrile Gloves
- Coveralls, Unionalls, Sleeves, Pants, and Jackets
- Cottons, Webril Towels and Wipes
- Disposable/Reusable Head Blocks
- Linen and Cotton Thread
- Sanapron Sheets

#### Accessories & Instruments

- Cosmetics
- Trocars and points
- Tubes and Drains
- Injectors, Adapters and Aspirators
- Scalpels and Blades
- Forceps and Scissors
- Needles

#### Funeral Service

- Flags, Crucifixes, Candles
- Signs, Posts, Directories
- Lecterns, Stands, Desks
- Ferno Church Trucks, Cots and Stretchers
- Chairs, Racks and Covers

Call or visit our website to order a current catalog featuring our full line of products!

# General Purpose Arterial Fluids

## For a Variety of Needs

### Flotone (25 index)

1-FLOTONE (24/case)

- A unified, multi-balanced, general purpose arterial fluid for medium-firm results
- Contains three disinfectants and three preservative agents
- Modified to prevent dehydration, giving a soft appearance
- Special buffers hold the pH close to the optimum for good formaldehyde action
- A blend of dyes furnish a natural skin tone without blotching

### Eotone (27 index)

1-EOTONE (24/case)

- Mid- to-high range index for when slightly more firmness is desired
- Contains buffers and humectants to modify the formaldehyde level
- Results in a pleasant, even, light pink skin tone coloration

### Standard (32 index)

1-STANDARD (24/case)

- Recommended for the most difficult cases
- It also is a solid, higher index fluid for normal cases
- Formulated and buffered to control dehydration
- Contains special salts that enhance the action of its preservative results
- Suitable for “hypo-injecting” areas of the body not receiving adequate distribution

### Rigid (35 index)

1-RIGID (24/case)

- Well suited where a firm, well-preserved body is desired
- Includes a unique blend of buffers, humectants and plasticizers to modify the harshness of formaldehyde
- Ideal for aggressive applications, especially advanced cancer (counteracts nitrogenous waste) and decomposition cases
- The fluid of choice when there will be an extended period of time between death and disposition
- Can be added to any arterial solution to increase firmness
- Frigid's highest index arterial fluid

# Cavity Fluids

## Premium Cavity (7 index)

1-PREMCAV (24/case)

- Low odor cavity fluid providing:
  - Excellent deep penetration
  - Effective preservation
  - Broad spectrum disinfection
- Contains “Frigid Stop” to control tissue gas and vermin
- Excellent disinfectant properties of glutaraldehyde
- Cavity of choice for difficult cases

## Dry Guard (21 index)

1-DRYG (24/case)

- Quick action with excellent penetration and preservation resulting in tissue that is very firm and dry
- As a surface pack, helps to firm and preserve areas of skin slip and spongy tissue
- When used externally or just under the skin, it will help to bleach darkened areas and reduce swollen areas

## Cavity 55 (8 index)

1-CAV55 (24/case)

- A low odor cavity fluid with especially good disinfection and deodorizing capability
- Features four proven preservatives and disinfectants
- Quickly penetrates to areas where putrefaction and odor production are taking place and stops them

## Cavity King (25 index)

1-CAVKING (24/case)

- Quick action with excellent penetration and dispersion for maximum protection, especially when arterial embalming is difficult
- At 25 index this cavity fluid furnishes excellent preservative power to protect against visceral putrefaction and odor development
- Highly recommended when circulation is destroyed:
  - Cancer, gangrenous and ulcerated tissue
  - Other disease damage
  - Crushed or mutilated bodies
  - Especially applicable for treating infant cases where arterial embalming is difficult to accomplish

## 5-Purpose Cavity (8 index)

1-5PUR (24/case)

- Preservation with disinfectants and deodorizers
- Usable as a surface pack to quickly reach the areas of decomposition so it can act to neutralize the sources of odor and putrefaction, thereby effectively preserving the tissue
- A much safer bleaching agent than the usual phenol-containing bleaches
- Low formaldehyde level means the skin will not tend to pucker when used hypodermically to preserve areas lacking distribution and firmness

# Pre- & Co-Injection Fluids

## Jaundice

### Color Guard 1 Jaundice Fluid

1-COLOG1 (24/case)

- Intended for use with a low to moderate index arterial fluid and cool water
- It chemically reacts with bilirubin to change its yellow coloration to a red or rosy tone
- The yellow of jaundice can be significantly reduced, especially in visible body areas
- However, in cases of “black” or “green” jaundice, where the bilirubin/biliverdin has diffused into the tissue, Color Guard 1 may be ineffective
- Color Guard 1 does not contain preservative properties

### Premium Jaundice (8 index)

1-PREMJAUN (24/case)

- Includes multiple agents to promote distribution throughout the body for effective flushing and bleaching of bilirubin, the pigment responsible for the yellowing tissue
- Contains a low level of formaldehyde (8 index) so that large volumes of diluted fluid can effectively be used to flush the body
- Counters the effect of formaldehyde on bilirubin, which many embalmers feel is the cause of “green” bodies that sometimes develop after embalming
- Even when large volumes of diluted fluid are injected, water-logging is not a problem because of the moisture balancing chemicals formulated into Premium Jaundice

## Excess Moisture

### Leak Guard

1-LEAKG (24/case)

- Specifically designed to prevent leakage of body fluids and to pull excessive moisture from the body through the combination of:
  - An effective pore closer
  - A proven moisture reducer
  - A tissue hardener
- To assist the preservation of the body, a powerful, non-formaldehyde disinfectant (glutaraldehyde) is included so that Leak Guard can be injected directly into tissue or used in conjunction with an arterial fluid
- Especially applicable with badly bloated or water-logged bodies

# Pre- & Co-Injection Fluids

## Moisture Retention / Anti-Dehydration

### Tissue Aid

1-TISSAID (24/case)

- Formulated with natural colloids that are particularly effective moisture retainers
- We highly recommended Tissue Aid for:
  - Emaciation and dry skin cases
  - When moisture loss from the body needs to be delayed
  - Filling out tissue sunken by dehydration
  - Embalming under very low humidity conditions
- Tissue Aid restores the cells to a proper level of hydration resulting in:
  - Recovery of a more natural appearance and form
  - Skin that regains a soft, smooth texture
  - A more natural, pliable, life-like feel to the body

### Humectant

1-HUMECT (12/case)

- Co-injection for cases showing signs of dehydration
- An emulsion of several special oils and moisturizing agents helps to return sallow tissue to a life-like appearance with excellent cosmetic skin texture and body pliability
- Wrinkling is controlled and a proper moisture level is restored
- The moisture loving ingredients of Humectant work to prevent further dehydration by delaying the escape of water from surface tissues and restoring the moisture level in deeper tissues
- In addition to its ability to rehydrate tissue, Humectant modifies the harsh action of formaldehyde and softens the color of the dyes used in arterial fluids

## Skin Tone Enhancer

### Rose Colortone Dye

1-ROSECOL (16 oz bottle)

- Non-formaldehyde, concentrated dye
- Compatible with all arterial and supplemental fluids
- Produces a natural, long-lasting, life-like color and cosmetic effect

# Pre- & Co-Injection Fluids

## Circulatory Flush / Anti-Clotting

### Solvol (6 Index) (pre-injection)

1-SOLVOL (24/case)

- As a pre-injection it is excellent for a mild fluid flushing of the arterial and capillary system to allow better distribution and penetration of an arterial fluid
- Useful as a bleaching agent, it penetrates readily into affected tissues to reduce and flush out objectionable discoloration
- Special ingredients help prevent water-logging by promoting good drainage
- Superior fluid for embalming infants: its low formaldehyde content, modifiers and mild formulation provide adequate preservative without harming delicate tissues

### Plasma Flo (pre/co-injection)

1-PLASFLO (12/case)

- For embalming bodies when congealed and clotted blood is anticipated
- Clears and prepares the vascular system for optimum fluid distribution and penetration
- Its special alkaline formula loosens and breaks up coagulated blood so that drainage can be established even in difficult cases such as burned or frozen bodies, or when extensive chemotherapy has taken place
- As a co-injection fluid, Plasma Flo can be used with all aldehyde type arterials to enhance drainage, distribution, and penetration with a milder action by the arterial fluid

### Free Flo (co-injection)

1-FREEFLO (12/case)

- Improves distribution and drainage by freeing capillaries of congealing blood
- Used with an arterial fluid, it markedly improves the ability of the diluted fluid to displace the blood and allow the preservatives to do their work
- Enhanced distribution of the arterial fluid into all areas of the body results in a uniformly embalmed body with even dye coloration on the surface of the body
- Mildly alkaline, Free Flo buffers the arterial to an effective pH to prevent grey bodies
- Special additives act to soften the potentially harsh effects of formaldehyde apparent in some arterials by retaining proper moisture thus giving the body a more natural feel

# Pre- and Co-Injection Fluids

## Water Quality

### Water / Clot Guard

1-WATCLOTG (24/case)

- For outstanding control of hard water salts, which are frequently the cause of a blotchy appearance and fading color
- Hard water salts work against the embalmer and the arterial fluids by:
  - Reacting with some of the dyes to reduce or eliminate their color
  - Reacting with anionic surfactants to negate their distribution and penetration ability
- Because calcium ions are required to clot blood, Water/Clot Guard neutralizes calcium salts to prevent further clotting and to assist the break up clots and congealed blood

## Tissue Gas / Vermin Infestation

### STOP

1-STOP (16 oz bottle)

- STOP is the chemical of choice for controlling the sources of tissue gas
- Two powerful disinfectants penetrate deeply and rapidly to the source of tissue gas
- On contact, a small amount of STOP destroys anaerobic bacteria and kills all maggots or insects which may have infested the remains, eliminating vermin-caused embarrassment
- A special additive provides lubrication so tissue does not dry out or become brittle

## Supplementals

### Formaldehyde Neutralizer

### Spill Guard

1-SPILLG (1 Gallon)

- Developed for spills of arterial and cavity fluids
- Immediately neutralizes formaldehyde and glutaraldehyde so no harmful vapors can be produced
- Spills can be flushed away or soaked up depending on local regulations
- Contains no regulated chemicals and is not designed to neutralize phenols or chlorinated hydrocarbons

# Supplementals

## Disinfectants & Deodorizers

### Orifice Guard

1-ORIFG (24/case) / 1-ORIFG (16 oz bottle)

- An effective disinfectant for pre-embalming treatment of the eyes, mouth, nose, and other parts of the body where surface disinfection may be necessary
- Contains a generous amount of isopropyl alcohol, as well as additional disinfectants, for broader germicidal coverage

### X-O Odor Neutralizer (all-natural)

2-X08 (8 oz) / 2-XO16 (16 oz) / 2-XOG (1 gallon)

- An all-natural odor neutralizer, X-O is safer than chemical alternatives
- While some products mask unpleasant odors, X-O eliminates odors permanently
- Spray into the air or directly onto a surface to obtain an odorless environment
- For airborne and other odor control in the prep-room, casket, and other sources, plus moisture absorption from spills and body leakage, see our “Vm3 Purefier” product below

### Vm<sup>3</sup> Purefier (all-natural)

(see multiple product numbers)

- All-natural, ecologically friendly, multi-solution odor control and moisture absorption
- Its natural earths and floral ingredients capture the liquids in the air that carry odors, then neutralize the odor-causing substances they contain
- Available in loose and “quilted” forms depending upon the need
- In the funeral industry it is used to:
  - Absorb fluids, body leakage, and accidental spillage
  - Reduce formaldehyde, decomposition, and other odors in prep room
  - Eliminate odors from bodies in the casket, especially if stored or when transported
  - Attack the other sources of malodor inherent to this industry

- 2-VM3-FMM - Mini mat, set of 4
- 2-VM3-BFCC4 - 4 lb. jar
- 2-VM3-FMT - Funeral mat, top
- 2-VM3-FMB - Funeral mat, bottom
- 2-VM3-FMS - Funeral mat, set
- 2-VM3-WOR - Oedema roll, 8' roll

Contact Frigid Fluid to receive the Vm<sup>3</sup> Purefier Guidebook with full product descriptions.

# Supplementals

## Moisture Retention

### Lanol Care

2-LANOCARE (5.5 oz)

- Lanolin-based spray that helps keep tissue moisturized and life-like
- Provides an excellent base for the application of cosmetics
- Ensures powder will never cake or crack on the skin, or look pasty
- Results in skin with a smooth, natural look

### Velva Cream

1-CREAVELV (16 oz)

- Used externally to retain moisture in the skin, giving it a smooth, velvety texture, and to help eliminate wrinkles
- Velva Cream can also be employed with cotton when forming mouth features to prevent dehydration of the lips and on the surface of eye caps to retain moisture in the eyelids

## External / Surface Treatments

### Safe Powder

2-SAFEDRUM25 (25 lb pail)

- The economical choice for external embalming
- Can be applied over gangrene, cancer sores, mutilation, etc
- For autopsy cases apply a pound or more of Safe to the cavity walls and among viscera

### Contact Embalming Spray

1-CONTACT (16 oz)

- One of the strongest embalming sprays available
- Use on bedsores, gangrene, putrefactive areas, cancer, floaters and more to embalm and deodorize on contact
- Trigger sprayer available upon request

### Formalin Cream

2-CREAFORM (1 lb jar)

- A surface embalming cream that penetrates deep into tissue to preserve and disinfect
- You control tissue hardness precisely by varying the quantity used and the period it is in contact with the body
- Light pink color will not stain or bleach so you can apply to the face with confidence

### Vis-O-Guard Gel (15 index)

1-VISOGUARD (2 lb jar)

- Developed for cases requiring deep penetration and odor control
- A surface embalming material of high viscosity designed to cling to tissue
- Deodorizes and preserves putrid tissue as well as areas of the body that lack arterial distribution
- Use to preserve the contents of viscera bags

# Supplementals

## Soaps & Cleansers

### Kreme Protec Soap

2-SOAPKREM (1 gallon)

- Cleans, protects, and deodorizes with the softness of lanolin
- Use it on hands before and after embalming to help protect against infection and contagion
- Applicable for bathing bodies and to shampoo hair, wash tables and instruments, etc.

### Wavicide-01

2-WAVICIDE (1 gallon)

- Fast acting, 30-day thorough working glutaraldehyde solution
- Sporicidal, virucidal, bactericidal, tuberculocidal, pseudomonacidal and fungicidal
- Effective against HIV (AIDS)
- Can be used at room temperature so no need for heating baths; No activator needed
- Has a mild, fresh scent
- Recommended for disinfecting embalming instruments and tools
- It is 2.5% aqueous glutaraldehyde sterilant/disinfectant, pH 6.3 to 6.4

### Maxima

2-MAXIGALL (1 gallon)

- A germicidal detergent that disinfects and deodorizes
- Formulated for institutional use, this product can be used to disinfect floors, walls, metal surfaces, medical devices and other nonporous surfaces
- Effective in hard water up to 400 PPM
- Maxima is effective against HIV (AIDS), and is staphocidal, pseudomonacidal, virucidal, fungicidal
- Will neither leave a film nor dull floor finishes

### Alcare Surgical Scrub Foam

2-ALCARE (11 oz can) 2-ALCARE-D (blue dispenser rack)

- An antiseptic foamed alcohol that applies the protective properties of ethyl alcohol without drying out your hands
- Mild on your hands, but powerful and effective against pathogenic microorganisms
- Emollients make Alcare suitable for frequent professional use

# Supplementals

## Tissue Treatment & Feature Building

### Feature Builder

1-FEATBGAL (1 gallon) 1-FEATB (16 oz)

- Congeals rapidly to make tissue building quicker and easier
- Expands more fully to eliminate uneven application problems
- Especially useful for rebuilding damaged facial features

### Feature Builder Solvent

1-FEATBSOL (16 oz)

Used to thin Feature Builder and clean instruments

### Frigid Hardening Compound

1-HARD25LBS (25 lb box) 1-HARD50LBS (50 lb box)

- Three actions in one preparation: Absorption, Hardening, and Disinfection
- Indispensable in cases where circulation has been totally destroyed
- Apply directly to affected parts to remove odors caused by sores, cancer, gangrene, or abscesses
- Add cold water to use as a bleaching paste to eliminate surface discoloration

### Paulex Powder

2-PAULPOWD1 (1 lb) 2-PAULPOWD25 (25 lb)

- A fine powder containing paraformaldehyde
- Use it to pack orifices, eliminate odors, or as a hardening compound
- Also for cancer cases, edema, gangrene, infection, burning, drowning, and stillbirth
- It is great for cremations, disinterment, autopsies and shipping

### Frigid Autopsy Compound

1-AUTOP25LBS (25 lb box) 1-AUTOP50LBS (50 lb box)

- Absorbs excess water and firms tissue
- Very quick acting
- Preserving agents make it extremely effective in destroying pathogenic germs
- Dustless, pleasant-smelling, and contains no wood products

# Supplementals

## Sealants

### Skin Seal

1-SKINSEAL (8 oz jar)

- Liquid sealant used to cover sutured or glued incisions
- May be applied as a base for cosmetic application where tissue is compromised or weeping
- Clear drying

### Thano-Seal

2-THANOSEAL01 (2" x 20') 2-THANOSEAL02 (4" x 20')

- For use on incisions, lacerations, abrasions, punctures and skin slip
- Provides a complete seal to dry tissue that eliminates leaks
- Easy, peel and stick application; avoid sewing or other injury risks
- Highly aggressive adhesive ensures no slips
- Once applied, exterior can get wet without compromising the seal

### Aron Alpha

2-ARONALPH (five 2 gram bottles)

- Effective way to seal lips, eyelids, small punctures, and incisions
- A high-strength, instant adhesive that dries clear and colorless in less than 45 seconds

### Thano-Glue

2-THANOGLUE (20 gram bottle)

- Intended for bonding eyelids, lips, incisions, lacerations, abrasions and punctures
- Precise application with the non-clogging, easy to hold applicator
- Bonds instantly; no delays from long drying times
- Provides a complete seal to dry tissue that prevents leaks
- Can be covered by Thanoseal Tape for additional protection

### Frigid Sta-Seal

2-STASEAL (9.2 oz bottle)

- Seals incisions to prevent seepage
- Sets instantly and shapes itself
- Adheres flawlessly and dries quickly

# Sundries and Instruments

## Webriil Prep Towel

One towel will absorb up to 10 times its weight in liquid

50 8" x 14" towels per roll  
2-PREPTOWE

## Roll Cotton

One pound roll of 100% absorbent cotton

2-COTTROLL

## Natural Expression Mouth Formers

The contoured design of these clear vinyl formers provides a close, natural fit

1 dozen per box  
2-MOUTFORM-N

## Perfection Eye Caps

Clear eye caps available in small, medium, and large

1 gross per box  
2-EYECAPSPC-S-G  
2-EYECAPSPC-M-G  
2-EYECAPSPC-L-G

## Oculist Eye Caps

- Oculist eye caps will bond to the eye on contact with moisture
- Available in small, large, clear, and flesh

1 gross per box  
2-EYECAPS45-S  
2-EYECAPS45-L  
2-EYECAPS47-S  
2-EYECAPS47-L

## Restor Skin Spray

- Spray on to mask burns, bruises, and other discolorations
- Available in neutral & beige

2-RESTSKIN  
2-RESTSKIN-N

## Snip Tip Trocar Buttons

Flesh colored and compatible with 2-prong applicators

1 gross per box  
2-TROCBUTT-ST

## Pink Trocar Buttons

- Finely threaded trocar button with a sharp point
- Compatible with 2-prong trocar button applicator

1 gross per box  
2-TROCBUTT-P

## Trocar Button Applicator

Allows for quick and easy application of any trocar button that requires a 2-prong applicator

2-TROCAPPL

## Multi-closure Trocar Buttons

- Clear plastic trocar buttons
- Compatible with 2-prong applicator

50 per box  
2-TROCBUTT-M

## AV Closure

Anal/vaginal plug  
Available each

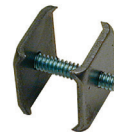

2-CLOSURAV

## Calvarium Clamps

Screw-type calvarium clamp

20 per package  
2-CALVCLAM

## Cranial Caps

- Concealed moisture repellent cap prevents stains by catching head leakage
- Adjustable and trimmable

Available each  
2-CAPSCRAN

## Nitrile Examination Gloves

The economical choice, these gloves are powder and latex free with textured finger tips (100 glove box)

2-GLOVDERM-S  
2-GLOVDERM-M  
2-GLOVDERM-L  
2-GLOVDERM-XL

## Microflex Safe Grip Gloves

- Powder-free, blue latex gloves with textured fingertips
- Extra coverage over the wrist and forearm offer enhanced safety
- Great for situations requiring intense pressure and strain on hands

2-GLOVMFSG-S (50 glove box)  
2-GLOVMFSG-M (50 glove box)  
2-GLOVMFSG-L (50 glove box)  
2-GLOVMFSG-XL (50 glove box)

## Plasto Wax Packing Wax

### Plasto Wax - Firm

A favorite among restoration professionals for rebuilding features damaged by disease or accident.

### Plasto Wax - Soft

Used to rebuild, but is more commonly used to cover discoloration and wounds

R-PLASWAX1 - firm (8 oz can)  
R-PLASWAX2 - soft (8 oz can)

## Lip Wax

- Apply Lip Wax to treat cracked, dehydrated, and otherwise traumatized lips
- Provides excellent base for cosmetic application

R-LIPWAX-N - neutral (3 oz can)  
R-LIPWAX-LP - light pink (3 oz can)  
R-LIPWAX-P - pink (3 oz can)  
R-LIPWAX-R - ruby (3 oz can)

# Frigid Fluid Cemetery Division

Frigid Fluid also has a great line of quality Cemetery Products.

For over a century Frigid Fluid has been a leader in manufacturing lowering devices and cemetery products for burial set up and moving of equipment.

## Lowering Devices

Frigid Fluid was the first company in the U.S. to manufacture the casket lowering device. Since the early 1900's Frigid has continued to manufacture, and improve upon, the original model.

All Frigid lowering devices are precision tooled for smooth, quiet operation with cast aluminum and stainless steel construction for durability and corrosion resistance.

## Cemetery Equipment

Over the years Frigid Fluid has expanded its line to meet the needs of their customers. And, just like the lowering devices, each is hand-assembled using the highest quality materials.

The 1491 truck is perfect for all your in-house needs, so you can keep your expensive church trucks loaded in the hearse.

The Pallbearer Casket Carriage provides a dependable method of moving the casket from hearse to graveside.

Placing and lowering heavy concrete vaults and lids is a one-person operation with the Hercules Lift.

The Streamliner works with our lowering devices and placers for a safe and mobile graveside set up.

## Frigid Fluid's Custom Sewing Shop

Have you considered specialty draping for caskets, trucks and lowering devices, or would you like to improve your family areas with custom window or chair coverings?

Frigid Fluid's highly qualified, experienced seamstress can provide the solutions you need - you provide a drawing or instructions and she can sew it!

Perhaps a loved one was in the military, or was proud of their national or ethnic heritage. If there is a fabric

with these or other themes, we can sew it, and you can offer this specialized service to honor loved ones.

Frigid keeps a wide selection of materials and colors in stock, however, if you need something we don't have, just let us know! **We'll be happy to find it for you.**
