GSA Comment Regarding Service Enabling Devices

The GSA schedule contractor has modified the contract to include zero dollar (no-cost) service enabling devices (including, but not limited to cellular phones), bundling the devices with service. The service enabling devices are offered on an as-available basis and may or may not be domestic end product or end product of a designated country. The devices are not available through this contract apart from ordering cellular service.

Cellular service is one of several services excluded from the World Trade Organization Government Procurement Agreement and the other Free Trade Agreement executed by the United States Government. See FAR 25.401 (b). The wireless service offered under this contract has been determined by the GSA Schedule Contracting Officer to be domestic in origin. See FAR 25.402 (a)(2).

As cellular service is excluded from TAA coverage, GSA has used the group offer analysis provided by FAR 25.503 (c)(1) to determine that the value of the domestic end product exceeds 50 percent of the total proposed price of the group; therefore, the bundled cellular service and service enabling device group offer is evaluated as domestic.

Terms and conditions applicable to the FSSI Wireless International Unlimited Data /AT&T Domestic and International Data – Select

AT&T Domestic and International Data – Select				
Data Plan	Monthly Service Charge	Included Domestic Data Access	Included International Data Access (in select countries) ³	International Data Usage Per KB (in other countries) ⁴
AT&T Domestic and International Data – Select ^{1,2,5,6}	\$51.99	<ul style="list-style-type: none"> • Internet browsing • Intranet access • Corporate and personal email 	<ul style="list-style-type: none"> • Internet browsing • Intranet access • Corporate and personal email 	\$0.00195

¹ Subject to the terms and conditions for domestic and international data services set forth in the AT&T GSA Federal Supply Schedule GS-35F-0297K and the FSSI Wireless BPA GS00Q13NSA3000 including, without limitation, terms regarding prohibited/permissible uses, eligibility, usage/billing and other conditions and restrictions.

² This plan is not intended for Government Users with primary or full-time usage outside the U.S., Puerto Rico and USVI. Therefore, if: (a) Government User’s use of data services on international carriers’ wireless networks (“international data usage”) in any one month during the prior twelve month period exceeds 25% of Government User’s total data usage; (b) Government User does not have measurable voice or data usage on the AT&T-owned network at least once per calendar month; or (c) Government User engages in a prohibited use of data service as referenced in footnote 1. AT&T may: (i) change the Government User’s plan to one imposing metered usage charges for international data usage up to \$0.015/KB in Canada and up to \$0.00195/KB in other countries, or (ii) reduce the international data throughput speed. AT&T will exercise commercially reasonable efforts to notify Government Users prior to changing Government User’s plan to one imposing metered usage charges for international data usage. If AT&T is unable to establish contact with Government User, AT&T may change Government User’s plan to one imposing metered usage charges for international data usage. AT&T will send written notification to the FSSI Wireless BPA GS00Q13NSA3000 Program Manager when AT&T changes rate plans to one imposing metered usage charges for international data usage

³ Data access is only for use within a “roam zone” comprised of select carriers in select countries, which is subject to change in AT&T’s sole discretion. For current roam zone information, visit att.com/globalcountries. Cruise ship roaming is not included. Pay-per-use cruise ship roaming rates apply for calls placed while on the ship. Rates are available at att.com/worldpackages.

⁴ 1,024 kilobytes (KB) = 1 megabyte (MB).

⁵ Eligible wireless voice plan must also be activated and maintained on the eligible device. Eligible devices include Blackberry 3G/4G UMTS, Blackberry 4G LTE, iPhone 4G LTE, iPhone 3G/4G UMTS, Smartphone 3G/4G UMTS and the Smartphone 4G LTE.

⁶ AT&T Domestic and International Data – Select includes access to AT&T Wi-Fi Basic. Wi-Fi enabled device required. Other restrictions apply. See attwifi.com for details and locations. International roaming not included. In addition, if Government User has a messaging-capable device, the default rate is \$0.20/message for Text/Instant Messages and \$0.30/message for Picture/Video Messages. Charges for international messages from the U.S. are \$0.25/message for Text Messages and \$0.50/message for Picture/Video Messages. Charges for messages sent while roaming internationally are \$0.50/message for Text Messages and \$1.30/message for Picture/Video Messages. Additional charges for premium content apply.

IMPORTANT INFORMATION:

Available only to eligible Government Users. All prices are billed monthly. **Other monthly charges:** In addition to the monthly cost of the rate plan and any selected features, AT&T imposes the following charges, on a per line basis: (1) a Regulatory Cost Recovery Charge of up to \$1.25 to help defray its cost incurred in complying with obligations and charges imposed by state and federal telecom regulations; (2) a gross receipts surcharge; (3) state and federal universal service charges; and (4) other government assessments on AT&T, including without limitation a Property Tax Allotment surcharge of \$0.20 – \$0.45 applied per Government User's assigned number. These fees are not taxes or government-required charges. See att.com/additionalcharges for details. **Data Plans:** Streaming Video and Music Applications require a data plan. Additional subscription and download charges may apply. **Coverage:** Check coverage in Government User's area at wireless.att.com/coverageviewer. Mobile Broadband not available in all areas. Government User's phone display does not indicate the rate Government User will be charged. Please review coverage map for areas included in and out of plan. Map may include areas served by unaffiliated carriers and may depict their licensed area rather than an approximation for the coverage there. Actual coverage area may differ substantially from map graphics, and coverage may be affected by such things as terrain, weather, foliage, buildings and other construction, signal strength, customer equipment and other factors. AT&T does not guarantee coverage. Charges will be based on the location of the site receiving and transmitting the call, not the location of the subscriber. 3G phone required in some areas. **Roaming:** Services originated or received while outside Government User's plan included coverage area are subject to roaming charges. Use of Services when roaming is dependent upon roaming carrier's support of applicable network technology and functionality. Check with roaming carriers individually for support and coverage details. Billing for domestic and international roaming usage may be delayed up to three (3) billing cycles due to reporting between carriers. **Domestic Roaming:** If Government User's usage of the Services on other carriers' wireless networks ("offnet usage") during any month exceeds Government User's offnet usage allowance, AT&T may, at its option, terminate the CRU's wireless service or access to data services, deny the CRU's continued use of other carriers' coverage, or change Government User's plan to one imposing usage charges for offnet usage. Government User's offnet data usage allowance is equal to the lesser of 24 megabytes or 20% of the kilobytes included with Government User's plan. **International Roaming:** See www.att.com/wirelessinternational or dial 866.246.4852 for more information and for a list of currently available countries and carriers. Compatible international-capable device required. Certain countries and/or carriers within a roam zone may be unavailable with certain plans or services while roaming. Availability, quality of coverage and services while roaming are not guaranteed. Certain tenure, billing and credit restrictions and additional charges may apply. Many devices, including iPhone, transmit and receive data messages without user intervention and can generate unexpected charges when powered "on" outside the U.S., Puerto Rico and the U.S.V.I. AT&T may send "alerts" via SMS or email, to Government Users of data usage. These are courtesy alerts. There is no guarantee Government Users will receive them. They are not a guarantee of a particular bill limit. **Export Restrictions:** Government User is solely responsible for complying with U.S. Export Control laws and regulations and the import laws and regulations of foreign countries when Government Users travel internationally with Government User's device.

International Voice Roaming: Government User's device may include the capability to make and receive calls while roaming internationally. AT&T, in its sole discretion, may block Government User's ability to use Government User's Device while roaming internationally until eligibility criteria are met. International roaming rates, which vary by country, apply for all calls placed or received while outside the U.S., Puerto Rico and U.S.V.I. Please consult att.com/global or call 611 or 1.800.331.0500 for a list of currently available countries and carriers. All countries may not be available for roaming. All carriers within available countries may not be available on certain plans or packages. Availability, quality of coverage and services while roaming are not guaranteed. When roaming internationally, Government User will be charged international roaming airtime rates including when incoming calls are routed to voicemail, even if no message is left. Substantial charges may be incurred if Device is taken out of the U.S. even if no services are intentionally used. Billing for international roaming usage may be delayed up to three billing cycles due to reporting between carriers. Taxes are additional. If Government User wants to block the ability to make and receive calls or use data functions while roaming internationally, Government User may request that by calling 1.916.843.4685 (at no charge from Government User's wireless phone). Receipt of Visual Voicemail messages are charged at international data pay-per-use rates unless customer has an international data plan/package, in which case receipt of Visual Voicemail messages decrement Kilobytes included in such plan/package.
