

Fuel Injector Service

Australia's most comprehensive & up to date diesel injector catalogue

Diesel Injector Catalogue

Diesel Catalogue

New Catalogue

This is the first diesel catalogue of it's kind in Australia as it combines all the different diesel injector manufacturers including Bosch, Denso, Stanadyne, Zexel, Delphi etc into a very easy to look up format.

The catalogue covers brand new genuine diesel injectors as well as reconditioned sets and individual injectors, depending on what is available.

How To Use This Catalogue

Simply search for the injector using make and model to look up the correct part number. In a lot of cases **you will need the number off the injector** to look up the correct part number and simply cross check the number with our part number at the back of the catalogue.

Where you see "Requires Change Over Units" that means that there will be a deposit charge and we need your old injectors back as they are changeover.

More To Come

The injector program will be expanding in the coming months to incorporate diesel pumps, seal kits, fuel rails, and glow plugs. Keep an eye out for any updates.

Keep Updated

To keep updated so you know when we have added to the range of Diesel, follow us on Facebook or sign up to our Newsletter on the website.
