

# "Full Coverage": Percentages

This worksheet is designed to cover one question of each type seen in past papers, for each GCSE Higher Tier topic. This worksheet was automatically generated by the DrFrostMaths Homework Platform: students can practice this set of questions interactively by going to  $\underline{\text{www.drfrostmaths.com/homework}}$ , logging on,  $\underline{\text{Practise}} \rightarrow \underline{\text{Past Papers/Worksheets}}$  (or  $\underline{\text{Library}} \rightarrow \underline{\text{Past/Past Papers}}$  for teachers), and using the 'Revision' tab.

[Edexcel GCSE Nov2013-2H Q2b Edited]

Katie has a tin of chocolates.

There are 80 chocolates in the tin.

45% of the chocolates have toffee in the middle.

Work out the number of chocolates that have toffee in the middle.

#### **Question 2**

Categorisation: Determine a percentage of an amount involving a percentage above 100%.

[Edexcel GCSE June2016-2F Q23c, June2016-2H Q6c]

Tom is a ski jumper.

The maximum length of skis he can use is 145% of his height. Tom's height is 1.80 m.

(c) Work out the maximum length of skis Tom can use.

|  | m |
|--|---|

Categorisation: Solve wordier multi-step problems involving finding the percentage of an amount.

# **Question 8**

Categorisation: Determine a value after a compound increase.

[Edexcel GCSE June2007-4I Q18, June2007-6H Q6]

James invested £2000 for three years in an Internet Savings Account. He is paid 5.5% per annum compound interest.

Work out the total interest earned after three years.

| £ |  |
|---|--|
|   |  |

Categorisation: Determine a value after a compound decrease.

[Edexcel IGCSE May2015-4H Q12]

The value of a boat depreciates by 16% each year.

At the end of 2012, the value of the boat is £65000.

Work out the value of the boat at the end of 2015.

£ .....

#### **Question 10**

Categorisation: Determine a value after different compound increases.

[Edexcel IGCSE Jan2016-3H Q14a]

Liam invests £8000 in a savings account for 4 years. The savings account pays compound interest at a rate of

4.5 % for the first year

2.75 % for all subsequent years.

Work out the value of Liam's investment at the end of 4 years.

£ .....

Categorisation: Determine the number of years before a value increases to some multiple given some known percentage increase. (Note: Calculating the exact answer would require logarithms from A Level! Using some starting amount, keep multiplying by the multiplier, making use of the ANS key on your calculator, until you reach the desired amount)

Helena invests a sum of money into an account that pays 6% compound interest per annum.

Work out after how many years Helena will have trebled his investment.

Give your answer as a whole number of years.

|  |  |  |  |  |  |  |  |  |  |  |  |  | у | ea | ar | • |

## **Ouestion 13**

| Categorisation: As above, but reaching some fraction of the original amount.  |
|---|
| [Edexcel GCSE Nov2006-6H Q17]   |
| Gwen bought a new car. Each year, the value of her car depreciated by 9%.   |
| Calculate the number of years after which the value of her car was 47% of its value when new.   |
| years   |
| Question 14 Categorisation: Determine the combined percentage change from two changes.  |
| [Edexcel GCSE(9-1) Mock Set 2 Spring 2017 1H Q10]   |
| Here are three rectangles.  |
| A B C   |
| The area of rectangle $B$ is 10% greater than the area of rectangle $A$ . The area of rectangle $C$ is 10% greater than the area of rectangle $B$ . |
| By what percentage is the area of rectangle ${f C}$ greater than the area of rectangle ${f A}$ ?  |

..... %

Categorisation: Use the overall scale factor combined with a given time period to determine each percentage change in a compound change.

(Hint: If after 10 years a value had doubled, then we solve  $r^{10}=2$  where r is the decimal multiplier for each year.  $\dot{r}=\sqrt[10]{2}=1.072 \rightarrow 7.2\%$ )

I invest £1000 in a bank account which offers a fixed percentage interest per year. After 5 years I have £3000.

Determine the percentage increase each year, giving your answer to 1 decimal place.

..... %

#### **Question 16**

Categorisation: As above but with a percentage decrease.

[Edexcel GCSE(9-1) Mock Set 1 Autumn 2016 3H Q14]

The number of fish in a lake decreases by x% each year.

Given that the number of fish halves in 8 years, work out the value of x.

Give your answer correct to 1 decimal place.

 $x = \dots$  %

#### **Question 17**

Categorisation: Determine a value before a percentage increase.

[Edexcel IGCSE May2014-3H Q12b]

Joe's savings increased by 4.5%.

His savings are now £125.40.

What were his savings before the increase?

£ ......
