Prologue

All praise is due to Allah (ﷻ), Creator of the universe. Peace and blessings be upon His final and noble messenger, Muhammad (ﷺ).

Traditionally students of sacred knowledge began by learning the tenets of Arabic verb conjugation. Each independent lesson was mastered before a teacher allowed students to advance. Once proficient, students then focused on the principles of Arabic grammar.

I was blessed to attend a school of religious learning in Pakistan that still employs traditional methods. My instructors studied under sincere teachers and carried themselves with similar devotion. Furthermore, they led their students, step by step, along a trail softened by fourteen hundred years of scholarship. Although I was able to spend only a few years in the company of such guides, my progress was rapid. Such is the fortune of the debris that manages to land itself on a rapidly flowing, pristine river.

Few Arabic textbooks in English are modeled after traditional Islamic educational methodologies. In this book, I have combined the notes and resources used by my teachers to present an overview of Arabic verb and noun conjugation. *Insha'llah* (God willing), future volumes will address other principles of classical Arabic grammar.

My fear in compiling this work is that I have soiled a pure chain. My teachers sacrificed their lives, wealth, and families to achieve perfection in their respective fields. I was permitted to sit in, and eat from, their vast gardens despite my obvious deficiencies and lack of commitment. This is the mercy of a teacher toward his student. I pray that Allah (ﷻ) overlooks this last link and allows the seeker to benefit from the

devotion of the great scholars of the past. Please pray for me, my teachers, and all those who transmitted this tradition from one generation to the next.

Lesson One: Mapping the Arabic Language

Figure 1.1 presents a map of the Arabic language. This chart provides an overview of the task at hand and establishes a framework for future learning.

PRINCIPLE ONE

The term *articulation* (لَفْظٌ)¹ refers to all words that are produced by the tongue. *Articulations* (لَفْظٌ) are divided into (1) words that are *meaningful* (مَوْضُوعٌ) and (2) words that are *meaningless* (مُهْمَلٌ). *Meaningful* (مَوْضُوعٌ) articulations have established, understood meanings. For example, the Arabic word *kitab* (كِتَابٌ) means, “a book.” On the other hand, *meaningless* (مُهْمَلٌ) articulations lack established meanings. Consider, for example, the word “Pepsi.” If articulated five hundred years ago, before the advent of this now famous beverage, this word would have had no meaning.

PRINCIPLE TWO

Meaningful (مَوْضُوعٌ) articulations can be further divided into (1) *single* (مُفْرَدٌ) and (2) *compound* (مُرَكَّبٌ). If an articulation is composed of one word, it is called *single* (مُفْرَدٌ); whereas, if it is composed of more than one word, it is called *compound* (مُرَكَّبٌ). For example, the word *kitab* (كِتَابٌ) is *single* (مُفْرَدٌ), while the phrase *rasul-Allah* (رَسُولُ اللَّهِ),² made up of two words, is *compound* (مُرَكَّبٌ).

¹ *Lafad* (لَفْظٌ) is derived from the verbal noun “to throw.” Arabic grammarians use this term to refer to articulations because speech involves “throwing” sounds from the tongue.

² رَسُولُ اللَّهِ means, “Messenger of Allah.”

PRINCIPLE THREE

All *single* (مُفْرَدٌ) words are classified into one of three types:

- 1) *noun* (اسْمٌ)
- 2) *verb* (فِعْلٌ)
- 3) *particle* (حَرْفٌ)

Stated otherwise, every word in the Arabic dictionary fits into one of these three categories.

PRINCIPLE FOUR

Compound (مُرَكَّبٌ) articulations are made up of two or more words. Such combinations are either *beneficial* (مُفِيدٌ) or *non-beneficial* (غَيْرُ مُفِيدٍ). *Beneficial* (مُفِيدٌ) groups of words express a complete idea and join together to form a complete sentence. *Non-beneficial* (غَيْرُ مُفِيدٍ) groups of words express an incomplete idea and join together to form a phrase,³ or an incomplete sentence.

This volume deals with *single* (مُفْرَدٌ) words and emphasizes conjugating verbs and nouns.

³ A *phrase* is defined as two or more words that form a syntactic unit that is less than a complete sentence.

Lesson Two: Introducing Arabic Words

PRINCIPLE ONE

The Arabic alphabet consists of twenty-nine letters and three short vowels (*figure 2.1*). This text assumes that the reader is familiar with the alphabet and its short vowels.

PRINCIPLE TWO

Most Arabic words are formed from three base letters. These three letters join together to establish a meaning. For example, the base letters ك-ت-ب (*read from right to left*) express the meaning of “to write.”

PRINCIPLE THREE

The letters ف-ع-ل are used as model base letters.⁴ The first letter is called the “*fā*’ (ف) position.” The second is called the “*ain* (ع) position.” The third is called the “*lām* (ل) position.” The base letters ف-ع-ل express the meaning of “to do.”

PRINCIPLE FOUR

Most Arabic nouns and verbs are derived by placing the three base letters on designated patterns. These patterns involve vowelings⁵ the base letters and often require the addition of non-base letters. Each of these patterns reflects the meaning of the base letters in a unique way. For example, the pattern فَاعِل describes a person who enacts the meaning of the base letters.⁶ This pattern involves vowelings the *fā*’ (ف) position

⁴ The letters ف-ع-ل are used throughout the text to illustrate verb and noun patterns.

⁵ *Vowelings* refers to the addition of the short vowels: *dammah*, *fatḥah*, and *kasrah*.

⁶ The English language also makes use of patterns. Consider, for example, the word “teacher.” Adding the suffix “er” to the verb *teach* produces the word “teacher.” This pattern describes a person who enacts the meaning of the verb (i.e., one who teaches). Similarly, consider additional English words that follow this pattern, such as “builder” (one who builds) and “thinker” (one who thinks).

with a *fathah*, adding an ‘*alif*, and vowelizing the ‘*ain* (ع) position with a *kasrah*. If the base letters ك-ت-ب (*to write*) replace the *fā* (ف), ‘*ain* (ع), and *lām* (ل) positions in this pattern, the word كَاتِب (*one who writes*) is formed (*figure 2.2*). Similarly, replacing the *fā* (ف), ‘*ain* (ع), and *lām* (ل) positions with the base letters ع-ب-د (*to worship*) forms the word عَابِد (*one who worships*).

Lesson Three: The Past Tense Verb

[الْفِعْلُ الْمَاضِي]

The *past tense verb* (الْفِعْلُ الْمَاضِي) describes actions or events that have already occurred.

PRINCIPLE ONE

The pattern فَعَلَ (*he did*) is used as a model for the *past tense verb*. In this pattern each of the base letters is voweled with a *fathah*.⁷

PRINCIPLE TWO

Verbs in the English language are conjugated to reflect the subject⁸ of the verb. For example, “he did” and “we did.” Here, the pronouns “he” and “we” indicate the subject. Arabic verbs are conjugated in a similar manner. In particular, the Arabic verb is conjugated to reflect three aspects of its subject:

- 1) person⁹ (first, second, third)
- 2) gender¹⁰ (masculine, feminine)
- 3) plurality¹¹ (singular, dual, plural)

⁷ The pattern فَعَلَ is one of several patterns used for the *past tense verb*. Others are presented in *Lesson Sixteen*.

⁸ The subject denotes the *doer* of the action described by a verb.

⁹ The first person is used to refer to the *speaker*. For example, “I did” or “we did.” The second person is used to refer to the individual *spoken to*. For example, “you did.” The third person is used to refer to the individual *spoken of*. For example, “he did” or “they did.”

¹⁰ The masculine is used to refer to *male beings* or *masculine objects*. For example, “he did” or “it did.” The feminine is used to refer to *female beings* or *feminine objects*. For example, “she did” or “it did.”

¹¹ The singular is used to refer to *an individual*. For example, “he did.” The dual is used to refer to *two individuals*. For example, “both of them did.” The plural is used to refer to *a group*. For example, “they did.”

PRINCIPLE THREE

While English verbs are conjugated by placing a noun or pronoun before the verb, Arabic verbs are conjugated by adding designated letters to the end of the verb. Carefully study the *past tense verb* conjugations (*table 3.1*), noting the changes in person, gender, and plurality.

PRINCIPLE FOUR

English verbs may express either the active or the passive voice. The active voice is used when the subject of the sentence performs the action expressed by the verb. For example, “Zaid wrote a book.” Here, the verb “wrote” is in the active voice because Zaid is indicated as the writer. The passive voice, on the other hand, is used when the subject of the verb is not indicated. For example, “A book was written.” Here, the verb “was written” is in the passive voice because, although a book was written, the writer is not indicated.

Arabic verbs also express either the active or the passive voice. Earlier, *principle one* illustrated *فَعَلَ* as a model for the active voice of the *past tense verb*. The pattern for the passive voice of the *past tense verb* is formed from the active voice by (1) changing the vowel of the first letter to a *dammah* and (2) changing the vowel of the second to last letter to a *kasrah*. Thus *فَعَلَ* (*he did*) becomes *فُعِلَ* (*it was done*).

PRINCIPLE FIVE

Principle two established that verbs in the active voice are conjugated to reflect the *subject* of the verb. When conjugating verbs in the passive voice, each conjugation reflects the person, gender, and plurality of the *object*,¹² and not the *subject*, of the verb. For example, consider the statement *ضُرِبَ* (*he was hit*). Here, the object of the verb is stated (i.e., he), but the subject is not indicated. Therefore, the verb is conjugated to

¹² The object denotes the noun that *receives* the action of a verb.

reflect the object of the verb. As illustrated in *table 3.2*, active and passive voice conjugations use the same endings.

PRINCIPLE SIX

Placing the word “مَا” before both the active and passive voice negates the *past tense verb* (*table 3.2*). For example, *فَعَلَ* (*he did*) becomes *مَا فَعَلَ* (*he did not do*), and *فُعِلَ* (*it was done*) becomes *مَا فُعِلَ* (*it was not done*).

ESSENTIAL NOTE

The conjugations of the *past tense verb* must be memorized (*table 3.2*) before moving to the next lesson.

M=Masculine F=Feminine S=Singular D=Dual P=Plural

¹⁴ “They were done,” implies several acts were performed. Recall that the *passive verb* is conjugated to reflect its object.

Lesson Four: The Present Tense Verb

[الْفِعْلُ الْمُضَارِعُ]

The *present tense verb* (الْفِعْلُ الْمُضَارِعُ) describes actions or events that are ongoing.¹⁵ *Present tense verbs* are conjugated using prefixes and suffixes.

PRINCIPLE ONE

The pattern يَفْعَلُ (*he does*) is used as a model for the *active voice* of the *present tense verb*. Depending on the particular conjugation, one of four letters (*yā'*, *tā'*, *nūn*, or *hamzah*) is always prefixed to the three base letters (*table 4.1*).

PRINCIPLE TWO

The *active voice* of the *present tense verb* is conjugated by adding designated letters to the end of the verb. Like the *past tense*, these conjugations reflect three aspects of the verb's subject: person, gender, and plurality. Carefully study *table 4.1*, noting the differences between the various conjugations.

PRINCIPLE THREE

The *present tense verb* may express either the *active* or the *passive voice*. The pattern for the *passive voice* of the *present tense verb* is formed from the *active voice* by (1) changing the vowel of the first letter to a *dammah* and (2) changing the vowel of the second to last letter to a *fathah*.¹⁶ Thus يَفْعَلُ (*he does*) becomes يُفْعَلُ (*it is being done*).

¹⁵ The *present tense verb* includes both the continuous present tense (e.g., he is doing) and the habitual present tense (e.g., he does).

¹⁶ This second step is only necessary if the *active voice* of the *present tense verb* has a *dammah* or a *kasrah* on its second to last letter. Such patterns are covered in *Lesson Sixteen*.

PRINCIPLE FOUR

The designated suffixes used for the active voice of the *present tense verb* are also used for the passive voice. However, the conjugations of the passive voice reflect the person, gender, and plurality of the *object*, and not the *subject*, of the verb. *Table 4.2* illustrates both active and passive conjugations of the *present tense verb*.

PRINCIPLE FIVE

Placing the word “ لا ” before both the active and the passive voice conjugations negates the *present tense verb* (*table 4.2*). For example, *يَفْعَلُ* (*he does*) becomes *لَا يَفْعَلُ* (*he does not do*), and *يُفْعَلُ* (*it is being done*) becomes *لَا يُفْعَلُ* (*it is not being done*).

PRINCIPLE SIX

The *present tense verb* may also describe a future event or action.¹⁷ For example, *يَفْعَلُ* may be translated as, “he will do.” Placing either the letter “ س ” or the word “ سَوْفَ ” before active and passive voice conjugations of the *present tense verb* explicitly indicates future meaning (*table 4.3*). For example, *سَيَفْعَلُ* and *سَوْفَ يَفْعَلُ* are both translated as, “he will do.”

ESSENTIAL NOTE

The conjugations of the *present tense verb* must be memorized (*table 4.2*) before moving to the next lesson.

¹⁷ Throughout this book, *الْفِعْلُ الْمُضَارِعُ* has been translated as “the *present tense verb*.” More accurately, however, this Arabic term refers to the *imperfect tense*. *Imperfect* implies that the actions referred to are not yet complete. Thus, it includes both the present tense, “he does,” and the future tense, “he will do.”

Lesson Five: The Present Tense Verb in the State of *Rafa'* [رَفْع]

INTRODUCING GRAMMATICAL STATES

Like people, Arabic words experience states. Human emotional states occur as a result of our daily interactions and are indicated by our facial expressions. For example, meeting a friend makes us happy, which is then expressed on our faces by smiling.

Arabic words behave in a similar manner. In a sentence they interact with surrounding words and, as a result, experience *grammatical states*. These *grammatical states* are then expressed on the end of the word. Just as a person's face indicates his emotional state, the last letter of a word reveals its *grammatical state*. While people experience many emotional states, Arabic words experience only four *grammatical states*:

- 1) *rafa'* (رَفْع)
- 2) *nasb* (نَصْب)
- 3) *jarr* (جَرْر)
- 4) *jazm* (جَزْم)

PRINCIPLE ONE

Of the four *grammatical states*, Arabic *verbs* only experience three¹⁸:

- 1) *rafa'* (رَفْع)
- 2) *nasb* (نَصْب)
- 3) *jazm* (جَزْم)

¹⁸ The fourth state, *jarr* (جَرْر), is experienced only by nouns.

PRINCIPLE TWO

All *present tense verbs*, active and passive voice, are in the *state* of *rafa'* (رَفَع). Conjugations of the *present tense verb* end with either (1) a *dammah* (ُ) on the last letter or (2) a *nūn* (ن) as the final letter (table 4.2). Both of these endings are signs of the *grammatical state* of *rafa'* (رَفَع).

PRINCIPLE THREE

When considering the *grammatical states* of words in general, and verbs in particular, three questions must be asked.

- 1) What is the *grammatical state* of the word?
- 2) What *caused* it to enter this *grammatical state*?
- 3) How does it *reflect* its *grammatical state*?

Asking these three questions helps illustrate the principles of this lesson. Consider for example, *يَفْعَلُ* (*he does*):

1. What is the *grammatical state* of the verb?
The verb *يَفْعَلُ* is in the *state* of *rafa'* (رَفَع).
2. What *caused* it to enter this *grammatical state*?
Rafa' (رَفَع) is the *default state* of *present tense verbs*.
3. How does it *reflect* its *grammatical state*?
The *state* of *rafa'* (رَفَع) is *reflected* by the *dammah* (ُ) on the last letter of *يَفْعَلُ*.

As a second example, consider the verb تَفْعَلُونَ (you [masculine, plural] do):

1. What is the *grammatical state* of the verb?

The verb تَفْعَلُونَ is in the *state of rafa'* (رَفْع).

2. What *caused* it to enter this *grammatical state*?

Rafa' (رَفْع) is the *default state* of *present tense verbs*.

3. How does it *reflect* its *grammatical state*?

The *state of rafa'* (رَفْع) is *reflected* by the *nūn* (ن) at the end of تَفْعَلُونَ.

PRINCIPLE FOUR

As an exception to the principles of this lesson, a subset of Arabic words never enter *states*. These are called *stateless* (مَبْنِي) and are similar to a stoic person who is indifferent to emotional situations. Just as such a person does not experience emotion, *stateless* (مَبْنِي) words do not enter *grammatical states*.

PRINCIPLE FIVE

By definition, two conjugations of the *present tense verb* are *stateless* (مَبْنِي). They are the third person feminine plural (يُفْعَلْنَ) and the second person feminine plural (تَفْعَلْنَ). The final *nūn* on each of these conjugations is not a reflection of *grammatical state*; instead, it indicates the subject of the verb (i.e., a group of women). The importance of recognizing these two conjugations as *stateless* (مَبْنِي) will become apparent in the next lesson where changes in *grammatical states* are discussed.

PRINCIPLE SIX

All *past tense verbs* (lesson three) are also classified as *stateless* (مَبْنِي).

Lesson Six: The Present Tense Verb in the State of Nasb [نَصْب]

PRINCIPLE ONE

Certain words when placed before a verb alter its meaning. These are called *particles*. For example, the particle “ مَا ” negates the *past tense verb*, and the particle “ لَا ” negates the *present tense verb* (*lessons three and four*).

PRINCIPLE TWO

Particles that change the meaning of a verb often affect its *grammatical state* as well. The following four particles, when placed before the *present tense verb*, cause it to enter the *state of nasb* (نَصْب)¹⁹:

- 1) أَنْ
- 2) لَنْ
- 3) كَيْ
- 4) إِذَنْ

PRINCIPLE THREE

Changes in *grammatical state* are reflected at the end of a word by either (1) changes in vowelings or (2) changes in lettering. If the *present tense verb* ends with a *dammah* (ُ) in the *state of rafa'* (رَفْع), the *dammah* is changed to a *fathah* (َ) to reflect the *state of nasb* (نَصْب). If the verb ends in a *nūn* (ن) in the *state of rafa'* (رَفْع), the *nūn* is dropped to reflect the *state of nasb* (نَصْب) [table 6.1].

¹⁹ These particles do not have independent meaning. When placed before the *present tense verb*, they act to alter its meaning. Refer to higher-level books of Arabic grammar for a discussion of how each of these particles changes the meaning of a verb.

PRINCIPLE FOUR

The two *stateless* (مَبْنِي) conjugations of the *present tense verb* (i.e., the second and third person feminine plurals) never enter *states* (*lesson five, principle five*). The four particles that cause the *state* of *nasb* (نَصْب) do not alter these two conjugations, and the final *nīm* on each of these conjugations does not drop from the end of the verb (*table 6.1*).

PRINCIPLE FIVE

The particle كُنْ is used as a model to illustrate the *state* of *nasb* (نَصْب). This particle changes the verb from its default *state* of *rafa'* (رَفْع) to the *state* of *nasb* (نَصْب). Furthermore, it alters the meaning of the verb by (1) limiting the present tense to the future tense and (2) negating it. Thus يَفْعَلُ (*he does*) becomes كُنْ يَفْعَلُ (*he will never do*).

ESSENTIAL NOTE

The conjugations of the *present tense verb* in the *state* of *nasb* (نَصْب) must be memorized (*table 6.2*) before moving to the next lesson.

Lesson Seven: The Present Tense Verb in the State of Jazm [جَزْم]

PRINCIPLE ONE

The following five particles, when placed before the *present tense verb*, cause it to enter the *state of jazm* (جَزْم)²⁰:

- 1) اِنَّ
- 2) نَمَّ
- 3) لَمَّا
- 4) ل²¹
- 5) لَا²²

PRINCIPLE TWO

Recall that changes in *grammatical state* are reflected at the end of a word by either (1) changes in vowelizing or (2) changes in lettering. If the *present tense verb* ends with a *dammah* (ُ) in the *state of rafa'* (رَفْع), the *dammah* is changed to a *sukūn* (ْ) to reflect the *state of jazm* (جَزْم). If the verb ends in a *nūn* (ن) in the *state of rafa'* (رَفْع), the *nūn* (ن) is dropped to reflect the *state of jazm* (جَزْم) [table 7.1].

PRINCIPLE THREE

The two *stateless* (مَبْنِي) conjugations of the *present tense verb* (i.e., the second and third person feminine plurals) never enter *states* (lesson five,

²⁰ These particles do not have independent meaning. When placed before the *present tense verb*, they act to alter its meaning. Refer to higher-level books of Arabic grammar for a discussion of how each of these particles changes the meaning of a verb.

²¹ This particle is called, “*lām al-amr*” (the *lām of command*).

²² This particle is called, “*lām al-nahy*” (the *lām of prohibition*). It differs in meaning from the لا used to negate the *present tense verb*, which is called “*lām al-nafy*” (the *lām of negation*).

principle five). The five particles that cause the *state* of *jazm* (جَزْم) do not alter these two conjugations, and the final *nīm* on each of these conjugations does not drop from the end of the verb (*table 7.1*).

PRINCIPLE FOUR

The particle *لَمْ* is used as a model to illustrate the *state* of *jazm* (جَزْم). This particle changes the verb from its default *state* of *rafa'* (رَفْع) to the *state* of *jazm* (جَزْم). Furthermore, it alters the meaning of the verb by (1) changing the present tense to the past tense and (2) negating it. Thus *يَفْعَلُ* (*he does*) becomes *لَمْ يَفْعَلْ* (*he did not do*).

ESSENTIAL NOTE

The conjugations of the *present tense verb* in the *state* of *jazm* (جَزْم) must be memorized (*table 7.2*) before moving to the next lesson.

Lesson Eight: The Emphatic

[التَّكِيدُ]

The *emphatic* describes, with emphasis, future actions or events. For example, **لَيَفْعَلَنَّ** means, “verily he will do!”

PRINCIPLE ONE

The *emphatic* is formed by: (1) adding the particle “لَ” to the beginning of active and passive voice conjugations of the *present tense verb* and (2) adding a “نَّ” to their end.²³ (table 8.1). Depending on the particular conjugation, the “نَّ” is voweled with either a *fathah* or a *kasrah*. The particle “لَ” is called the *lām of emphasis* (لَامُ التَّكِيدِ) and it causes the verb, originally in the state of *rafa'* (رَفْعُ), to become *stateless* (مَبْنِي). It also alters the meaning of the verb from the present tense to the future tense with emphasis. Thus, **يَفْعَلُ** (*he does*) becomes **لَيَفْعَلَنَّ** (*verily he will do!*).

ESSENTIAL NOTE

The conjugations of the *emphatic* must be memorized (table 8.1) before moving to the next lesson.²⁴

²³ A second pattern for the *emphatic* is formed by (1) adding the particle “لَ” to the beginning of the *present tense verb* and (2) adding a “نَّ” to its end. This pattern is less common than the form presented above and is not discussed in this text.

²⁴ Detailed rules exist for constructing each of the *emphatic* conjugations from their corresponding *present tense* conjugations (e.g., **لَيَفْعَلَنَّ** from **يَفْعَلُونَ**). For the beginner emphasis is placed on memorizing patterns. A comprehensive discussion of these rules is present in higher-level books of Arabic grammar.

Lesson Nine: The Command

[الأمر]

The *command* (الأمر) is used to demand an act. For example, افعل means, “do!” and ليفعل means, “he must do!” All conjugations of the *command* are derived from the *present tense verb* in the state of *jazm* (جزم). Active voice conjugations of the *command* reflect the person, gender, and plurality of the individual commanded. For example, ليفعلوا means, “they must do!” Passive voice conjugations of the *command* reflect the person, gender, and plurality of the *object* of the command. For example, ليفعلوا means, “they (e.g., those tasks) must be done!”

PRINCIPLE ONE

The *command* is formed from the *present tense verb* in two distinct ways. In the case of the active voice of the first and third person, the *command* is made by placing the particle “ل” before the *present tense verb* (table 9.1). This particle is called the *lām of command* (لام الأمر) and it is one of five particles that cause *present tense verbs* to enter the state of *jazm* (جزم) [lesson seven, principle one]. For example, يفعل (he does) becomes ليفعل (he must do!).

PRINCIPLE TWO

Active voice conjugations of the second person *command* are created by (1) placing the second person *present tense verb* in the state of *jazm*, (2) replacing the initial *tā'* of the second person with a *hamzah* (seated on an *‘alif*), and (3) vowelizing this *hamzah* with a *kasrah*²⁶ (table 9.2). For example, تفعل (you do) becomes افعل (do!).

²⁶ In some cases, the *hamzah* is vowelized with a *dammah*. This occurs when the letter at the ‘*ain*’ position of the *present tense verb* is also vowelized with a *dammah*. Such patterns are covered in *Lesson Sixteen*. For example, ينصر (he helps), becomes انصر (help). See table 16.3, *verb form I*, types A and E.

PRINCIPLE THREE

All passive voice conjugations of the *command*, including the second person, are formed by placing the *lām of command* (ل) before passive voice conjugations of the *present tense verb*. For example, تُفَعَّلُ (you are being done) becomes اِتَّفَعَّلْ (be done!) [table 9.3].

THE EMPHATIC COMMAND

The *emphatic command* is used to forcefully demand an act. For example, اِفْعَلَنَّ means, “verily do!” and لِيَفْعَلَنَّ means, “verily he must do!” All conjugations of the *emphatic command* are derived from the *emphatic*. Active voice conjugations of the *emphatic command* reflect the person, gender, and plurality of the individual commanded. For example, لِيَفْعَلُنَّ means, “verily they must do!” Passive voice conjugations of the *emphatic command* reflect the person, gender, and plurality of the *object* of the command. For example, لِيُفْعَلُنَّ means, “verily they (e.g., those tasks) must be done!”

PRINCIPLE FOUR

The *emphatic command* is formed from the *emphatic* in two distinct ways. In the case of the active voice of the first and third person, the *emphatic command* is formed by (1) removing the *lām of emphasis* (ل) from the *emphatic* and (2) replacing it with the *lām of command* (ل). Because all forms of the *emphatic* are *stateless* (مَبْنِي), this *lām* does not change the state of the verb. However, the verb’s meaning changes from the *emphatic* to the *emphatic command*. For example, لِيَفْعَلَنَّ (verily he will do!) becomes لِيَفْعَلَنَّ (verily he must do!).

PRINCIPLE FIVE

Active voice conjugations of the second person *emphatic command* are formed by (1) removing the “ ل ” from the beginning of the *emphatic*, (2) replacing the initial *tā’* of the second person with a *hamzah* (seated on an

‘*aliif*), and (3) vowelizing this *hamzah* with a *kasrah*.²⁷ For example, **لَتَفْعَلَنَّ** (*verily you will do!*) becomes **اَفْعَلَنَّ** (*verily do!*).

PRINCIPLE SIX

All passive voice conjugations of the *emphatic command*, including the second person, are formed by replacing the *lām of emphasis* (لَ) with the *lām of command* (لِ). For example, **لَتَفْعَلَنَّ** (*verily you will be done!*) becomes **لِتَفْعَلَنَّ** (*verily be done!*) [table 9.3].

ESSENTIAL NOTE

The conjugations of the *command* and the *emphatic command* must be memorized (table 9.3) before moving to the next lesson.

²⁷ In some cases, this *hamzah* is vowelized with a *dammah*. See footnote 26.

Lesson Ten: The Prohibition

[النَّهْيُ]

The *prohibition* (النَّهْيُ) is a form used to prohibit an act. For example, لَا تَفْعَلْ means, “don’t do!” All conjugations of the *prohibition* are derived from the *present tense verb* in the state of *jazm* (جَزْم). Active voice conjugations of the *prohibition* reflect the person, gender, and plurality of the individual who is being prohibited. For example, لَا يَفْعَلُوا means, “they must not do!” Passive voice conjugations of the *prohibition* reflect the person, gender, and plurality of the *object* of the prohibition. For example, لَا يُفْعَلُونَ means, “they (e.g., those tasks) must not be done!”

PRINCIPLE ONE

Placing the particle “ لَا ” before all conjugations of the *present tense verb* creates the *prohibition* (النَّهْيُ) [table 10.1]. This “ لَا ” is called the *lām of prohibition* (لَام النَّهْيِ) and it is one of five particles that cause *present tense verbs* to enter the *state of jazm* (جَزْم) [lesson seven, principle one]. It also alters the meaning of the verb from the present tense to a prohibition. For example, تَفْعَلُ (you are doing) becomes لَا تَفْعَلُ (don’t do!).

THE EMPHATIC PROHIBITION

The *emphatic prohibition* is used to firmly prohibit an act. For example, لَا تَفْعَلَنَّ means, “verily don’t do!” All conjugations of the *emphatic prohibition* are derived from the *emphatic*. Active voice conjugations of the *emphatic prohibition* reflect the person, gender, and plurality of the individual who is being prohibited. For example, لَا يَفْعَلَنَّ means, “verily they must not do!” Passive voice conjugations of the *emphatic prohibition* reflect the person, gender, and plurality of the *object* of the prohibition. For example, لَا يُفْعَلَنَّ means, “verily they (e.g., those tasks) must not be done!”

PRINCIPLE TWO

The *emphatic prohibition* is formed by (1) removing the *lām of emphasis* (لَ) from all conjugations of the *emphatic* and (2) replacing it with the *lām of prohibition* (لَا). Because all forms of the *emphatic* are *stateless* (مَبْنِي), this does not change the *grammatical state* of the verb. However, the verb's meaning changes from the *emphatic* to the *emphatic prohibition*. For example, كَتَفْعَلَنَّ (verily you will do!) becomes لَا تَفْعَلَنَّ (verily don't do!).

ESSENTIAL NOTE

The conjugations of the *prohibition* and the *emphatic prohibition* must be memorized (table 10.1) before moving to the next lesson.

Lesson Eleven: The Active Participle

[اسْمُ الْفَاعِلِ]

Most Arabic words are derived from three base letters that join together to establish a meaning. Placing these letters on various patterns produces different, but related words. *Lessons Eleven through Fifteen* cover several commonly encountered noun forms.

PRINCIPLE ONE

The *active participle* (اسْمُ الْفَاعِلِ) refers to a person who does the action described by the base letters. For example, the letters ف-ع-ل mean, “to do” and its active participle فَاعِل refers to “one who does.”

PRINCIPLE TWO

The *active participle* has both masculine and feminine forms.²⁹ Placing the three base letters on the pattern فَاعِل produces the masculine form of the *active participle*. For example, replacing the fā’ (ف), ‘ain (ع), and lām (ل) positions in this pattern with ع-ب-د (to worship) creates عَابِد (a male who worships) [figure 11.1].

PRINCIPLE THREE

The feminine form of the *active participle* is constructed by placing the base letters on the pattern of فَاعِلَة. Thus, ع-ب-د (to worship) becomes عَابِدَة (a female who worships).

²⁹ All Arabic nouns, both living and non-living, are classified as either masculine or feminine. For example, the word شَمْس (sun) is feminine while the word كِتَاب (book) is masculine. The masculine form is used to refer to *male beings* or *masculine objects*. The feminine form is used to refer to *female beings* or *feminine objects*.

FIGURE 11.1

FORMING THE MASCULINE *ACTIVE PARTICIPLE*

PRINCIPLE FOUR

Arabic words enter four *grammatical states* (lesson five). Of these, nouns enter three³⁰: (1) *rafa'* (رَفَعٌ), (2) *nasb* (نَصَبٌ), and (3) *jarr* (جَرٌّ).

Nouns express these *states* through either (1) changes in vowelings on the last letter of the word or (2) changes in lettering at the end of the word.

PRINCIPLE FIVE

Most *singular* Arabic nouns, whether masculine or feminine, express changes in their *grammatical states* through changes in vowelings on the last letter of the word. Two *dammabs* (ُ) indicate the *state* of *rafa'* (رَفَعٌ), two *fathabs* (َ) indicate the *state* of *nasb* (نَصَبٌ), and two *kasrabs* (ِ) indicate the *state* of *jarr* (جَرٌّ).³¹ This is illustrated in *table 11.3* (the final table of this lesson) for both masculine singular and feminine singular forms of the *active participle*.

PRINCIPLE SIX

Like verbs, Arabic nouns also have a dual form.³² The dual is produced from the singular by (1) altering the vowelings of the last letter and (2) adding a designated ending. This ending reflects the *grammatical state* of the word. If the word is in the *state* of *rafa'* (رَفَعٌ) then the suffix “أَنْ” is added; whereas if the word is in either the *state* of *nasb* (نَصَبٌ) or *jarr* (جَرٌّ), the ending “يْنِ” is added. These endings are used for both the masculine and the feminine as illustrated in *table 11.1*. For example, عَابِدٌ

³⁰ These grammatical states result from the interactions of nouns with other words in a sentence. For example, if a noun is the subject of the sentence, it takes on the *grammatical state* of *rafa'* (رَفَعٌ). The goal of the beginner is to realize that *grammatical states* exist and to memorize their various forms. A discussion of the roles of words in sentences and what causes their *grammatical states* is found in advanced Arabic grammar books.

³¹ The presence of a double vowel is known as *tamwīn* (تَمْوِينٌ).

³² The dual is used to refer to *two individuals* or *two objects*.

(a male worshiper) becomes عَابِدَانِ (two male worshipers) in the state of *rafa'* (رَفْع) and عَابِدَيْنِ (two male worshipers) in the states of *nasb* (نَصْب) and *jarr* (جَرّ). While the feminine, عَابِدَةٌ (a female worshiper) becomes عَابِدَاتَانِ (two female worshipers) in the state of *rafa'* (رَفْع) and عَابِدَاتَيْنِ (two female worshipers) in the states of *nasb* (نَصْب) and *jarr* (جَرّ).

PRINCIPLE SEVEN

The plural form of Arabic nouns is produced in two distinct ways: the “broken plural” and the “sound plural.” The “broken plural” is formed by (1) “breaking” apart the singular word, (2) inserting or removing letters, and (3) changing voweling. A set pattern for these changes does not exist. Therefore, each broken plural must be individually memorized. For example, the broken plural for the singular كِتَابٌ (book) is كُتُبٌ (books), while the broken plural for the singular مَسْجِدٌ (mosque) is مَسَاجِدٌ (mosques). In each case the singular form was separated, letters were inserted or removed, and voweling was changed.

PRINCIPLE EIGHT

The second type of Arabic plural is called the “sound plural,” and it is used by the *active participle*.³³ The “sound plural” is formed from the singular by (1) making slight alterations to the last letter of the singular and (2) adding a designated ending. This suffix varies between masculine and feminine forms and reflects the *grammatical state* of the word (table 11.2). In the case of the masculine sound plural, if the word is in the state of *rafa'* (رَفْع), the suffix “وْنَ” is added; whereas if the word is in either the states of *nasb* (نَصْب) or *jarr* (جَرّ), the ending “يْنَ” is added. For example, عَابِدٌ (a male worshiper) becomes عَابِدُونَ (many male worshipers) in the state of *rafa'* (رَفْع) and عَابِدِينَ (many male worshipers) in the states of *nasb* (نَصْب) and *jarr* (جَرّ).

³³ Some singular words only use the broken plural, others only use the sound plural. Rarely, a singular word will use both the sound and broken plurals. For the most part, *active participles* use the sound plural.

In the case of the feminine sound plural, if the word is in the *state* of *rafa'* (رَفْع), then the suffix “أَتٌ” is added; whereas if the word is in either *nashb* (نَصْب) or *jarr* (جَر), the ending “أَتٍ” is added. For example, عَابِدَةٌ (*a female worshiper*) becomes عَابِدَاتٌ (*many female worshipers*) in the *state* of *rafa'* (رَفْع) and عَابِدَاتٍ (*many female worshipers*) in the *states* of *nashb* (نَصْب) and *jarr* (جَر).

ESSENTIAL NOTE

The conjugations of the *active participle* must be memorized (*table 11.3*) before moving to the next lesson.

Lesson Twelve: The Passive Participle

[إِسْمُ الْمَفْعُولِ]

PRINCIPLE ONE

The *passive participle* (إِسْمُ الْمَفْعُولِ) refers to a person or thing upon which the action described by the base letters is enacted. For example, the letters ف-ع-ل mean “to do” and its passive participle مَفْعُولٌ refers to “that which was done.”

PRINCIPLE TWO

The masculine form of the *passive participle* is constructed by placing the three base letters on the pattern of مَفْعُولٌ. For example, replacing the *fā'* (ف), *‘ain* (ع), and *lām* (ل) positions in this pattern with ض-ر-ب (to strike) forms مَضْرُوبٌ (a male who was struck or a masculine object that was struck) [figure 12.1].

PRINCIPLE THREE

The feminine form of the *passive participle* is constructed by placing the three base letters on the pattern of مَفْعُولَةٌ. For example, ض-ر-ب (to strike) becomes مَضْرُوبَةٌ (a female who was struck or a feminine object that was struck).

PRINCIPLE FOUR

The dual and the sound plural for the *passive participle* are constructed in a manner similar to that outlined for the dual and the sound plural of the *active participle* (lesson eleven). For the most part, *passive participles* do not use the broken plural.

ESSENTIAL NOTE

The conjugations of the *passive participle* must be memorized (table 12.1) before moving to the next lesson.

Lesson Thirteen: The Noun of Time and Place

[إِسْمُ الظَّرْفِ]

PRINCIPLE ONE

The *noun of time and place* (إِسْمُ الظَّرْفِ) describes either the *time when* or the *place where* the action described by the base letters occurs. For example, the letters ف-ع-ل mean “to do” and its *noun of time and place* مَفْعَل refers to a *place* or a *time of doing*.

PRINCIPLE TWO

The *noun of time and place* is constructed by placing the three base letters on the pattern of either مَفْعَل or مَفْعِل (table 13.1). A given set of base letters will use only one of these two patterns. For example, replacing the *fā'* (ف), *‘ain* (ع), and *lām* (ل) positions in this pattern with س-ج-د (to prostrate) forms مَسْجِد (a place of prostration).

PRINCIPLE THREE

The *noun of time and place* does not have a feminine form.

PRINCIPLE FOUR

The dual for the *noun of time and place* is constructed in a manner similar to that outlined for the dual of the *active participle* (lesson eleven).

PRINCIPLE FIVE

Unlike the previously discussed noun forms, the *noun of time and place* uses the broken plural. As mentioned in *Lesson Eleven*, the broken plural for any given singular noun must be memorized. *Table 13.1* illustrates a common pattern of the broken plural for the *noun of time and place*.

PRINCIPLE SIX

Recall that nouns express their *grammatical states* through (1) changes in vowelings on the last letter of the word or (2) changes in lettering at the end of the word. As a general rule, broken plurals express their *grammatical states* through changes in the vowelings of their last letter. Two *dammabs* (ُ) indicate the *state of rafa'* (رَفْع), two *fathabs* (َ) indicate the *state of nasb* (نَصْب), and two *kasrabs* (ِ) indicate the *state of jarr* (جَرّ).

PRINCIPLE SEVEN

The broken plural for the *noun of time and place* varies from the above principle and allows only a single *dammab* (ُ) or a single *fathab* (َ) on its last letter (*table 13.1*). Such words are classified as *ghair munsarif* (غَيْرُ مُنْصَرِفٍ). They neither permit double vowels (*tanwīn*) nor a single *kasrab* on their last letter. Therefore, for the *ghair munsarif*, a single *dammab* (ُ) indicates the *state of rafa'* (رَفْع), and a single *fathab* (َ) indicates the *states of nasb* (نَصْب) and *jarr* (جَرّ).

ESSENTIAL NOTE

The conjugations of the *noun of time and place* must be memorized (*table 13.1*) before moving to the next lesson.

Lesson Fourteen: The Noun of Usage

[إِسْمُ الْآلَةِ]

PRINCIPLE ONE

The *noun of usage* (إِسْمُ الْآلَةِ) indicates a tool used to produce the action described by the base letters. For example, the letters ل-ع-ف mean “to do” and its noun of usage مَفْعَلٌ refers to a tool used to perform an act.

PRINCIPLE TWO

The *noun of usage* is produced by placing the base letters on one of three patterns: (1) مَفْعَلٌ, (2) مَفْعَلَةٌ, and (3) مَفْعَالٌ. These are designated as short, medium, and long according to the number of letters in each pattern (table 14.1). A given set of base letters may use one, two, or all three of these patterns. For example, the letters ف-ت-ح mean, “to open” and its noun of usage مِفْتَاحٌ refers to a tool used to open (i.e., a key).

PRINCIPLE THREE

The *noun of usage* does not have a feminine form.

PRINCIPLE FOUR

The dual for the *noun of usage* is constructed in a manner similar to that outlined for dual of the *active participle* (lesson eleven).

PRINCIPLE FIVE

The *noun of usage* uses a broken plural that is *ghair munsarif* (غَيْرٌ مُنْصَرَفٌ). Recall that *ghair munsarif* words neither permit double vowels [tanwīn] nor a single *kasrah* on their last letter (lesson thirteen).

ESSENTIAL NOTE

The conjugations of the *noun of usage* must be memorized (table 14.1) before moving to the next lesson.

Lesson Fifteen: The Superlative Noun

[إِسْمُ التَّفْضِيلِ]

PRINCIPLE ONE

The *superlative noun* (إِسْمُ التَّفْضِيلِ) indicates the *highest degree* or the *comparative* of the quality described by the base letters. For example, the letters ف-ع-ل mean “to do” and its *superlative noun* أَفْعَلُ refers to “one who does the most” or “one who does more.”

PRINCIPLE TWO

The masculine singular of the *superlative noun* is constructed by placing the three base letters on the pattern of أَفْعَلُ (table 15.1). For example, replacing the *fā*' (ف), *‘ain* (ع), and *lām* (ل) positions in this pattern with ك-ب-ر (*to be big*) forms أَكْبَرُ (*a male who is biggest or a male who is bigger*). This pattern is *ghair munsarif* (غَيْرُ مُنْصَرَفٍ) and therefore neither permits a double vowel [*tanwīn*] nor a single *kasrah* on its last letter.

PRINCIPLE THREE

The masculine form of the *superlative noun* uses the standard dual, and it uses both the sound plural and the broken plural (table 15.1). The broken plural of the masculine *superlative* is *ghair munsarif* (غَيْرُ مُنْصَرَفٍ).

PRINCIPLE FOUR

The feminine form of the *superlative noun* is constructed by placing the three base letters on the pattern of فُعْلَى.³⁴ For example, replacing the *fā*' (ف), *‘ain* (ع), and *lām* (ل) positions in this pattern with ك-ب-ر (*to be big*) forms كُبْرَى (*a female who is biggest or a female who is bigger*). This form undergoes changes in *grammatical states* without reflecting a change at the

³⁴ Although the final letter of this word resembles a *ya*, it is an *‘alif maqsurah*. This letter, like the standard *‘alif*, causes extension of the letter before it. Thus, the feminine form of the *superlative noun* is pronounced *fu’lā*.

end of the word. Therefore, the pattern of the word is the same for all three *grammatical states* (*table 15.2*).

PRINCIPLE FIVE

The feminine form of the *superlative noun* uses the standard dual, and it uses both the sound plural and the broken plural (*table 15.2*).

ESSENTIAL NOTE

The conjugations of the *superlative noun* must be memorized (*tables 15.1 and 15.2*) before moving to the next lesson.

Lesson Sixteen: The Six Types of Verb Form I

PRINCIPLE ONE

Lesson Three illustrated فَعَلَ as a model pattern for the active voice of the *past tense verb*. This is only one of several possible patterns. Some patterns involve vowelizing the base letters alone while others involve adding designated non-base letters.³⁵ Patterns containing the base letters alone (i.e., without additional letters) are classified as *verb form I*. The active voice of the *past tense* of *verb form I* has three possible vowelizing patterns:

- 1) فَعَلَ
- 2) فَعِلَ
- 3) فَعُلَ

Note that the *fā'* (ف) and *lām* (ل) positions are always vowelized with a *fathah* (َ); however, the vowelizing of the *'ain* (ع) position varies.

PRINCIPLE TWO

A given three-letter base, with rare exception, uses only one of these three *form I* active voice *past tense* patterns. For example, the base letters ع-م-س (*to hear*) use the pattern فَعِلَ to form سَمِعَ (*he heard*). On the other hand, the base letters ك-ر-م (*to be noble*) use the pattern فَعُلَ to form كَرُمَ (*he was noble*). The particular pattern used by any given set of base letters must be memorized.

PRINCIPLE THREE

The passive voice of the *past tense* of *verb form I* always uses the pattern فُعِلَ. This pattern was covered in *Lesson Three*.

³⁵ Verb forms that involve the addition of non-base letters are not covered in this volume.

PRINCIPLE FOUR

All patterns of the *past tense verb*, whether active or passive voice, are conjugated using the suffixes illustrated in *Lesson Three* (table 3.2). When conjugating each of the three active voice *past tense* patterns of *verb form I*, the ‘ain (ع) position retains its particular vowelning (table 16.1).

PRINCIPLE FIVE

Lesson Four illustrated **يَفْعَلُ** as a model pattern for the active voice of the *present tense verb*. This is only one of several possible patterns. The *present tense* always begins with one of the following four letters: *hamzā'* (أ), *tā'* (ت), *yā'* (ي), and *nūn* (ن). In *verb form I*, this prefixed letter is always vowelned with a *fathah* (َ). However the vowelning of the ‘ain (ع) position varies. Thus the active voice of the *present tense* of *verb form I* has three possible patterns:

- 1) **يَفْعَلُ**
- 2) **يَفْعِلُ**
- 3) **يَفْعُلُ**

PRINCIPLE SIX

The passive voice of the *present tense* of *verb form I* always takes the pattern **يُفْعَلُ**. This pattern was covered in *Lesson Four*.

1st	Masculine and Feminine	Singular	فَعِلَ	+	تُ	⇒	فَعِلْتُ
1st	Masculine and Feminine	Plural	فَعِلَ	+	نا	⇒	فَعِلْنَا

PRINCIPLE SEVEN

All patterns of the *present tense verb*, whether active or passive voice, are conjugated using the suffixes illustrated in *Lesson Four* (table 4.2). When conjugating each of the three active voice *present tense* patterns, the ‘ain (ع) position always retains its particular vowelizing (table 16.2). This holds true for the states of *nasb* (نَصَب) and *jazm* (جَزْم), and with the active voice conjugations of the *emphatic*, the *command*, and the *prohibition*.

The passive voice always uses the pattern يُفْعَلُ. The *fathah* on the ‘ain (ع) position is retained in the states of *nasb* (نَصَب) and *jazm* (جَزْم), and with the passive voice conjugations of the *emphatic*, the *command*, and the *prohibition*. The *appendices* include complete conjugations of the base letters ض-ر-ب (to strike) as illustrative models.

PRINCIPLE EIGHT

Each set of base letters uses only one of the three active voice *past tense* patterns and one of the three active voice *present tense* patterns. For example, the base letters ض-ر-ب use the pattern فَعَلَ for the active voice *past tense* and يُفْعَلُ for the active voice *present tense*. Combining all variations allowed for the vowelizing of the ‘ain (ع) position in both the active *past* and active *present tense* results in nine combinations (figure 16.1). However, in practice, only six of these combinations are used. These are called the six types of *verb form I*.

FIGURE 16.1

COMBINATIONS OF ACTIVE VOICE *VERB FORM I* PATTERNS

PRINCIPLE NINE

Table 16.3 provides sample verbs for each of the six types of *verb form I*. The first line includes the active voice (third person masculine) of the *past* and *present tense verbs*, the active *masdar*,³⁶ and the *active participle*. The second line includes the passive voice (third person masculine) of the *past* and *present tense verbs*, the passive *masdar*, and the *passive participle*. The third line includes the *command* and the *prohibition*. The fourth line includes the *noun of time and place* and the *noun of usage*. Finally, the fifth line includes the masculine and feminine forms of the *superlative noun*. This complete model is illustrated in *figure 16.2*.

PRINCIPLE TEN

Verb form I, type E (كَرُمَ) differs from the other types in two ways. First, its *active participle* is formed on the pattern *فَعِيلٌ*. Second, it forms neither passive voice verbs nor a *passive participle*. All verbs that follow the pattern of *كَرُمَ* differ from the other types in these two ways.

ESSENTIAL NOTE

Each type of *verb form I* presented in *table 16.3* must be memorized and completely conjugated. For example, *نَصَرَ* and *نُصِرَ* should be conjugated through the *past tense* conjugations illustrated in *Lesson Three* while *يَنْصُرُ* and *يُنْصَرُ* should be conjugated in the states of *rafa'* (رَفَعٌ), *nasb* (نَصَبٌ), and *jazm* (جَزَمٌ) as illustrated in *Lessons Four, Six, and Seven*. Similarly, practice in conjugating the *emphatic*, the *command*, the *prohibition*, and all noun forms is required. The *appendices* include complete conjugations of the base letters *ض-ر-ب* (*to strike*) as illustrative models.

³⁶ The *masdar* represents the verbal noun of the base letters, usually translated as a gerund ending in “ing” or “ion.” For example, *نُصِرًا*, from *ن-ص-ر* (*to help*), means, “helping.” In order to preserve the rhyme of the model, the *masdar* is presented in the state of *nasb* (نَصَبٌ).

<p>فَهُوَ نَاصِرٌ</p> <p>The <i>active participle</i> is, “a helper”</p>	<p>نَصْرًا³⁷</p> <p>Helping</p>	<p>يَنْصُرُ</p> <p>He helps</p>	<p>نَصَرَ</p> <p>He helped</p>

<p>وَ النَّهْيُ عَنْهُ لَا تَنْصُرُ</p> <p>And the <i>prohibition</i> for this form is, “Don’t help.”</p>		<p>الْأَمْرُ مِنْهُ أَنْصُرْ</p> <p>The <i>command</i> for this form is, “Help!”</p>	
<p>وَ الْآلَةُ مِنْهُ مِنْصَرٌ</p> <p>And the <i>noun of usage</i> is, “a tool used for helping.”</p>		<p>الظَّرْفُ مِنْهُ مَنْصَرٌ</p> <p>The <i>noun of time and place</i> is, “a place <i>or</i> time of helping.”</p>
