2.	2.1	cept of Vector Calculus
2.	2.1 2.2	cept of Vector Calculus
2.	2.12.22.3	cept of Vector Calculus
2.	2.12.22.32.4	cept of Vector Calculus
2.	2.12.22.3	cept of Vector Calculus

iv Contents

	2.8	Vector Integral Calculus 32
		2.8.1 Gradient Theorem 32
		2.8.2 Divergence Theorem (Gauss's Theorem) 38
		2.8.3 Green's Theorem 45
		2.8.4 Stoke's Theorem 45
		2.8.5 Helmholtz's Theorem 48
	2.9	Orthogonal Curvilinear Co-ordinate System 49
		2.9.1 Spherical Co-ordinate System 49
		2.9.2 Cylindrical Polar Co-ordinate System 54
	2.10	Computation of Elementary Displacement, Volume and Area in
		Generalized O.C.C. System 64
	2.11	Relation between Generalized O.C.C. System and Other System 64
	2.12	Formula for Gradient in Generalized O.C.C. System 65
	2.13	Formula for Divergence in Generalized O.C.C. System 66
		Formula for Curl in Generalized O.C.C. System 68
		Formula for Laplacian in Generalized O.C.C. System 71
	Sugg	ested Further Reading 85
	Probl	lems 85
3.	Elec	trostatics
	3.1	Introduction 95
	3.2	Coulomb's Law 95
	3.3	Electric Field Intensity 97
	3.4	Types of Electric Field 102
	3.5	Electric Field Intensity due to an Infinite Line Charge 107
	3.6	Electric Field Intensity due to a Finite line Charge 110
	3.7	Electric Field Intensity due to a Circular Current Carrying Element 114
	3.8	Electric Field Intensity due to a Circular Disc 115
	3.9	Electric Field Intensity due to an Infinite Surface Charge Sheet 117
	3.10	Electric Field Intensity due to Volume Charge Distribution 120
	3.11	Gauss' Law of Electrostatics 123
	3.12	Gaussian Surface 125
	3.13	Applications of Gauss' Law 125
		3.13.1 Electric Field Intensity due to Infinite Line Charge Distribution 125
		3.13.2 Electric Field Intensity due to a Surface Charge Sheet 126
	3.14	Electric Potential (Electrostatic Potential) 137
		3.14.1 Electric Potential due to an Isolated Point Charge Placed
		at the Origin 139
		3.14.2 Electric Potential due to Spherical Charge Distribution 140
		3.14.3 Potential due to an Infinite Line Charge 141
		3.14.4 Electric Potential due to Discrete Charge Distribution 141
		3.14.5 Potential due to Continuous Charge Distribution 142
		3.14.6 Electric Potential due to a Circular Ring of Radius <i>R</i> 146
		3.14.7 Electric Potential due to a Circular Disc 147

3.15	Electrostatic Work and Energy 153
	3.15.1 Work 153
3 16	3.15.2 Energy154Energy Stored in a Discrete Charge Distribution158
	Energy Stored in Continuous Volume Charge Distribution 159
	Energy Stored in a Spherical Volume Charge Distribution 157 161
	Laplace Equation 162
3.20	
5.20	and Cylindrical Co-ordinate System 166
	3.20.1 Cartesian Solution to Laplace Equation 166
	3.20.2 Spherical Solution to Laplace Equation 167
	3.20.3 Cylindrical Solution to Laplace Equation 169
3.21	Method of Images 171
	3.21.1 Properties of Method of Images 172
	Uniqueness Theorem 174
3.23	Method of Separation of Variables 188
	3.23.1 Two-dimensional Solution to Laplace Equation in
	Cartesian Co-ordinate System 188
	3.23.2 Three-dimensional Solution to Laplace Equation in
2.24	Spherical Co-ordinate System 190
5.24	Multipole Expansion 194 3.24.1 Dipole 196
	3.24.1 Dipole 196 3.24.2 Monopole 196
	3.24.3 Electric Field Intensity due to a Pure Dipole
	(Spherical Co-ordinate System) 196
	3.24.4 Potential due to a Physical Dipole 197
3.25	Electrostatics in Matter 198
	3.25.1 Polarization 198
	3.25.2 Linear Isotropic Homogeneous Media (LIH Media) 200
3.26	
	3.26.1 Electrostatic Boundary Condition for Electric Flux Density
	Vector \vec{D} 201
	3.26.2 Boundary Condition for Electric Field Intensity Vector 202
	3.26.3 Relation between Angle of Incidence θ_1 and Angle of
2 27	Emergence Q_2 203
3.27	Capacitor 207
	3.27.1 Charging of a Capacitor2073.27.2 Capacitance of a Parallel Plate Capacitor208
	3.27.3 Capacitance of a Cylindrical Capacitor 209
	3.27.4 Capacitance of a Spherical Capacitor 210

vi Contents

4.	Mag	netostatics
	4.1	Introduction 241
	4.2	Steady Electric Current 243
		4.2.1 Equation of Continuity 245
		4.2.2 Joule's Law 246
		4.2.3 Application of Electromagnetic Fields to Transformer 247
		4.2.4 Boundary Condition and Refraction of Current 248
		4.2.5 Electromotive Force (EMF) 253
	4.3	Biot Savart's Law 253
		4.3.1 Different Forms of Biot Savart's Law 254
	4.4	Magnetic Flux Density due to an Infinite Line Current Carrying Conductor 254
	4.5	Magnetic Flux Density due to Finite Line Current Carrying Conductor 257
	4.6	Magnetic Flux Density due to a Circular Current Carrying Loop 259
	4.7	Magnetic Flux Density due to an Infinite Solenoid 262
	4.8	Magnetic Flux Density due to a Finite Solenoid 263
	4.9	Magnetic Flux Density due to an Infinite Current Sheet Lying
		in the xy Plane 266
	4.10	Force and Torque in Magnetostatic Field 278
		4.10.1 Force of Interaction between Two Infinite Current Carrying
		Conductors 278
		4.10.2 Torque in a Magnetostatic Field 280
	4.11	Maxwell's Second Equation in Differential and Integral Form 284
	4.12	Law of Conservation of Magnetic Flux 286
	4.13	Expressions for Magnetic Scalar Potential and Magnetic
		Vector Potential 286
	4.14	Ampere's Circuital Law 290
		4.14.1 Amperian Loop 291
		4.14.2 Physical Significance of Ampere's Law 292
		4.14.3 Applications of Ampere's Law 292
	4.15	Magnetostatic Boundary Condition 298
		4.15.1 Magnetostatic Boundary Condition for Magnetic Flux Density 298
		4.15.2 Boundary Condition for Magnetic Field Intensity 299
		Relation between Angle of Incidence and Angle of Emergence 300
		Magnetostatics in Matter and Magnetic Materials 300
	4.18	Far Field Expression for Magnetic Vector Potential 302
		4.18.1 Potential due to a Pure Dipole 303
		4.18.2 Potential due to a Magnetized Object 305
	4.19	Modification of Ampere's Law in Matter 307
	4.20	Linear Magnetic Material 307
	4.21	Application of Magnetostatic Field to Cathode Ray Oscilloscope 308
	00	ested Further Reading 313
