About Us

3ET - Emergency Evacuation Equipment and Training are based in Leicestershire. 3ET are a specialist UK supplier and manufacturer of emergency evacuation equipment and training.

All of 3ET's products are of a new modern ergonomically friendly design to aid mobility impaired people who require assistance when evacuating a building.

Gary and Alison are highly knowledgeable and pride their selves in their excellent customer service, they have a combined 40 plus years working in the Emergency sector with the NHS, Fire Service, Ambulance service, Care Homes, Schools, Councils and much more.

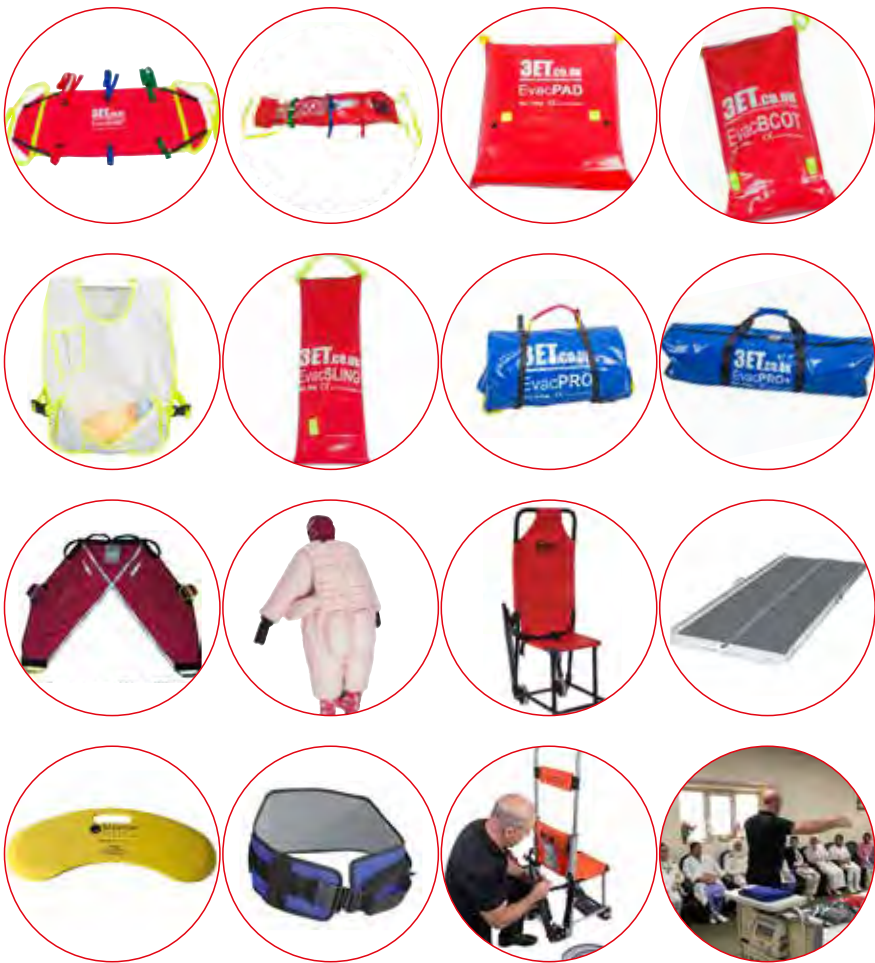

On site demonstrations, drills and exercises can be provided free of charge. Gary and Alison welcome the opportunity to present their products to your colleagues and yourself which enables them to identify your specific needs and requirements.

3ET offer a professional training service and can taylor this to your individual requirements. 3ET offer practical training that certifies your staff members either in Product Training or Train the Trainer.

3ET also offers "Total Care Packages" where they include Training, Maintenance and Service of your evacuation equipment.

EvacSHEET

The EvacSHEET allows non-ambulant individuals to be safely evacuated in the event of an emergency. Once fitted the sheet remains in place under the mattress allowing it to be immediately accessible should an evacuation situation occur.

Once the straps have been accessed and secured the individual can then be slid off the bed and moved to a point of safety.

EvacONE

The EvacONE is a flexible lightweight stretcher that can be used to evacuate immobile people in an emergency situation.

The webbings are colour coded and the adjustable cross straps are secured with quality buckles.

The integral foot pocket also stores the folded and rolled up EvacONE in a compact position ready for immediate deployment in an emergency situation.

EvacPAD

The EvacPAD has a durable plastic base that allows it to move easily over any floor types, the hard wearing PVC upper is cleanable and the 5cm firm inner pad protects the patient.

The EvacPAD comes with "soft touch" high visibility yellow ergonomic pull straps and colour coded securing straps.

OPTIONAL EXTRA

The EvacPAD can be fitted with a thermal blanket which protects the patient from external weather and environment conditions.

EvacBCOT

The baby EvacBCOT is designed for the safe evacuation of small babies in the event of a fire or similar emergency. The design allows the carer hands to be free to administer urgency care whilst evacuating safely. The cot is easily adjusted with high visibility shoulder straps and side carry handles, it is compact and stores in a wall mountable bag.

EvacTAB

The baby EvacTAB is designed for the safe evacuation of a small baby or babies whilst allowing the wearer to be “hands free” to administer urgent care.

The EvacTAB folds into a wall mountable bag for storage.

EvacSLING

The baby EvacSLING is designed to be worn by the evacuee carrying one baby to safety.

The sling is made of high quality PVC and bound with high visibility webbing and secured and adjusted by a plastic buckle.

The sling is compact and is stored in a wall mountable bag.

EvacPRO

The EvacPRO is designed to facilitate the manual movement of immobile patients in an emergency situation by maximising the use of sliding techniques where possible and minimising the impact on the person performing the movement through the use of its ergonomic features. Safely tested to 400kg with a working load limit of 250kg it is designed to stabilise and hold the patient securely. If needed a medical long board can be inserted into the built in long board pocket.

EvacPRO+

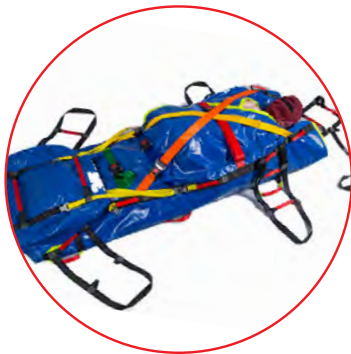

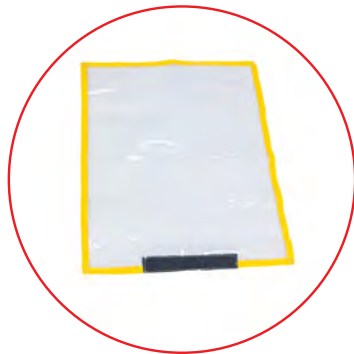

The EvacPRO+ is a flexible lightweight stretcher for use in an emergency to evacuate and move an immobile Plus size person.

The EvacPRO+ is designed to facilitate the manual movement of the larger person by maximising the use of sliding techniques and minimising the impact of the movement through the good use of its ergonomic features.

All of the handles and anchor points are colour coded, the base is replaceable if worn and a medical long board can be inserted into its pocket if required.

Additional accessories are available which included a replacement base board, hoisting kit and a waterproof head protection cover. The mat comes complete with two extra ladder handles and a slide sheet.

Safety tested to 600kg and a working load limit of 400kg.

The Bari - Kit includes

Evacuation Sling (ES): suitable to move and handle a child from approximately 12 years of age to a large obese adult.

Bariatric Sling (BS): suitable to move and handle a bariatric individual

Super Bariatric Sling (SBS): suitable to move and handle a large bariatric individual

Bugg strap (green): to reposition and assist in placing sling, not for lifting.

Padded belt (red / grey): to provide gentle support for limbs.

Slide sheet (blue): use with sling to slide patient.

Extension handles (orange): add to sling or green Bugg strap to provide added hand holds.

Any of the above slings can be purchased individually if required

Emergency Sling (ES)
SWL: 45stone, 630lb, 285kg

Super Bariatric Sling (SBS)
63stone, 882lb, 400kg

Emergency Evacuation Chair & Product Training

Emergency Evacuation Chair & Product Training is vital to prepare your staff for an emergency.

3ET provide onsite chair & product training so that your staff are trained to use the chairs & products in their own building. This practical Emergency Evacuation Chair & Product Training gives the trainees the necessary skills and confidence to safely use the chairs & products in the event of an emergency.

3ET Provide Train the Trainer Evacuation Chair & Product Training.

We offer a practical Emergency Evacuation Chair & Product Training Course that gives staff members attending everything they need to train their colleagues in the use of the evacuation chairs & products required in an emergency.

3ET Provide the maintenance and servicing of your Emergency Evacuation Chairs & Products.

This could be combined with the yearly Refresher Training to obtain a discount for both.

3ET Provide Refresher Training Sessions.

To ensure your staff always have the skills to safely use their emergency evacuation chairs & products it is advisable to have a yearly refresher training session which will keep you up to date with any new training techniques or changes in training and ensure your staffs ongoing competency with the equipment.

Evacuation Equipment Training and Maintenance – TOTAL CARE PACKAGE.

3ET's Total Care Package

The Fire Service is not responsible for evacuating persons from a building. It is your responsibility to ensure that the persons in your care and your colleagues can safely evacuate a property.

Staff member's need to be trained on how to do this and how to use the equipment provided especially if they are responsible for vulnerable persons in their care. This may include the EvacSHEETs, EvacONEs, EvacPADs, Chairs and many more pieces of equipment supplied from our team or from other manufacturers.

3ET Provides a yearly service and maintenance package where depending on the quantity and number of staff we will come to your site inspect and maintain your products, label the product with a date of inspection, provide a written report and a certificate to say that the inspection has been carried out.

Inclusive in this package is the refresher training on the product's inspected and maintained to ensure your staffs competency.
