

Gannon University 2014-2015 Post-Graduate Outcomes Undergraduate Programs

Career Exploration and Development

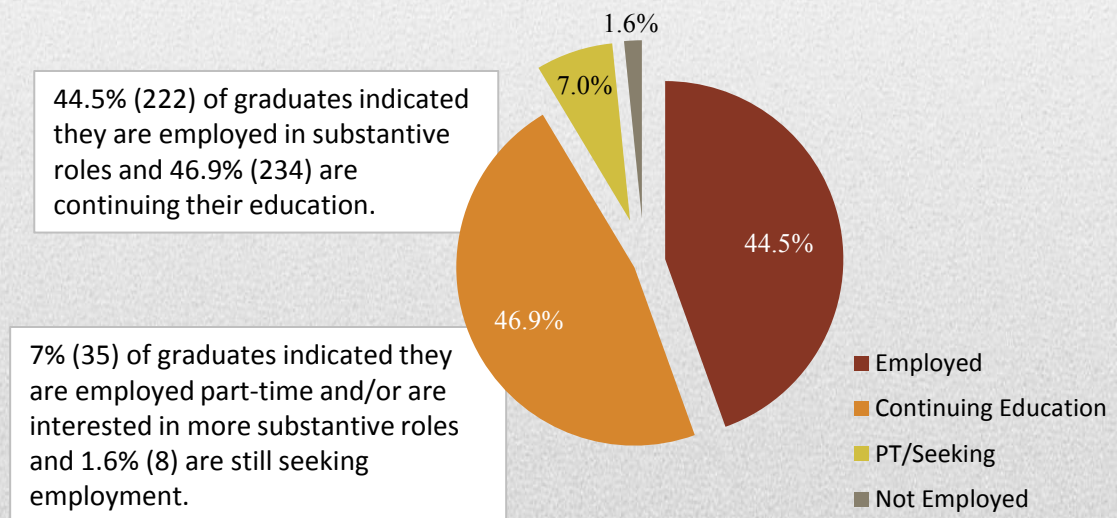

SUMMARY

This update was generated based on voluntary responses from recent graduates representing the 2014-15 academic year. Career Development, Experiential Education and Employment Services solicited graduates directly by mail, by email, by phone, and partnered with faculty to gather post-graduate information. In order to further increase the knowledge rate associated with graduate outcomes, LinkedIn.com was leveraged in an attempt to identify the statuses of any remaining graduates. This annual practice of collecting outcomes begins in July and concludes after the winter break.

After a period of several months, a snapshot of post-graduate outcomes was established as a result of these noted efforts. From a roster of 604 graduates, **83% (499)** shared information.

Within the scope of those who responded, over **91%** of graduates are either employed in substantive roles or are continuing their education.

Employed – employed in substantive roles

Continuing Education – enrolled in continuing education, including both certification and degree programs

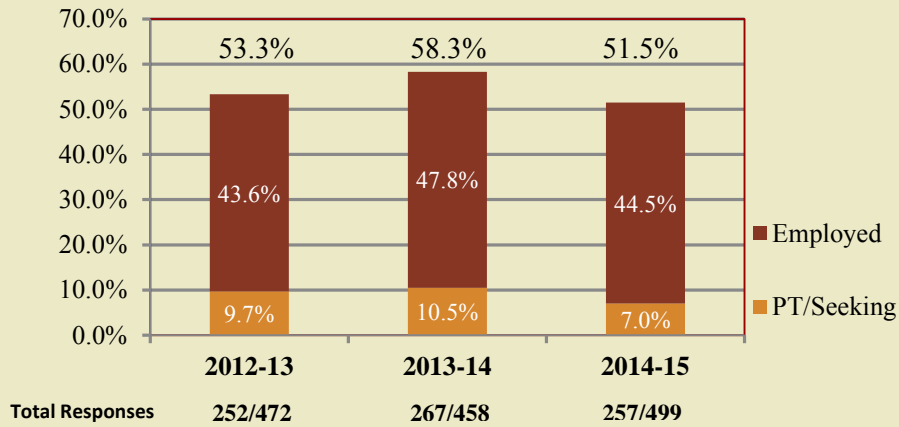

PT/Seeking – employed part-time or interested in more substantive roles

Not Employed – without a reported role or not seeking

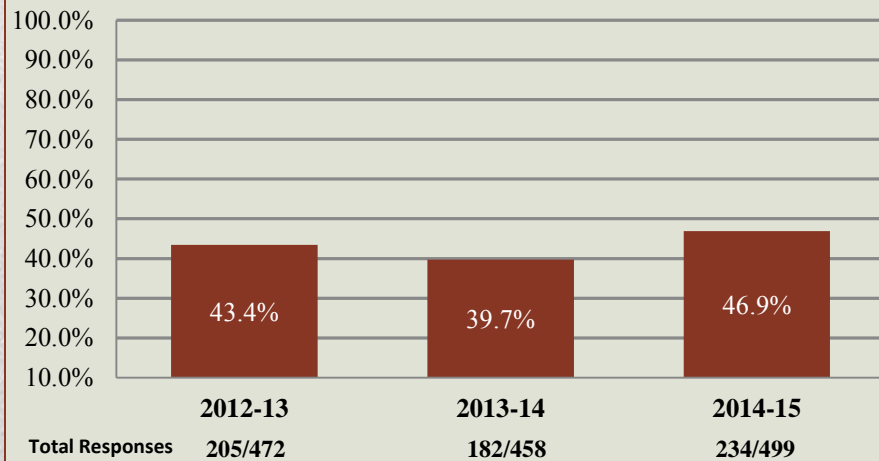

THREE YEAR OVERVIEW

Total Employment

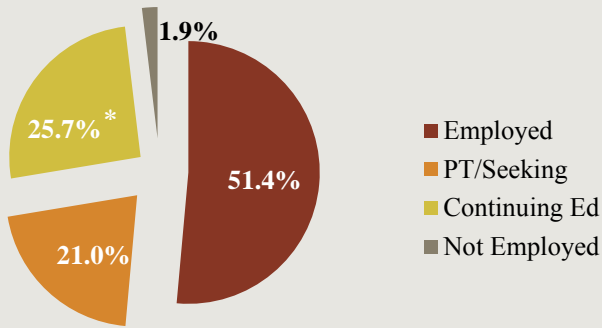

Continuing Education
