

# **GCE MARKING SCHEME**

## **MATHEMATICS - M1-M3 & S1-S3 AS/Advanced**

**SUMMER 2014**

## INTRODUCTION

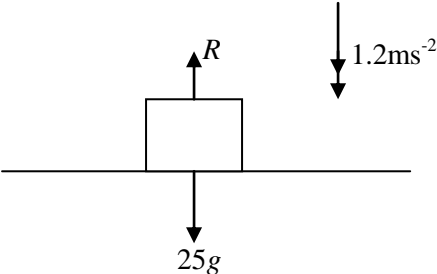

The marking schemes which follow were those used by WJEC for the Summer 2014 examination in GCE MATHEMATICS - M1-M3 & S1-S3. They were finalised after detailed discussion at examiners' conferences by all the examiners involved in the assessment. The conferences were held shortly after the papers were taken so that reference could be made to the full range of candidates' responses, with photocopied scripts forming the basis of discussion. The aim of the conferences was to ensure that the marking schemes were interpreted and applied in the same way by all examiners.

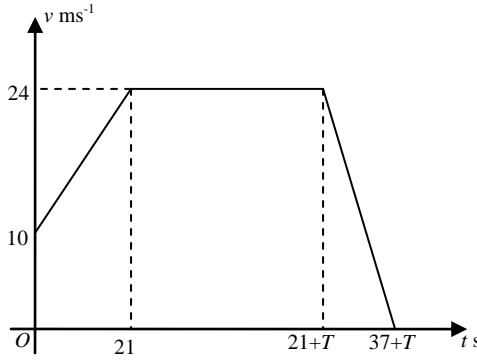

It is hoped that this information will be of assistance to centres but it is recognised at the same time that, without the benefit of participation in the examiners' conferences, teachers may have different views on certain matters of detail or interpretation.

WJEC regrets that it cannot enter into any discussion or correspondence about these marking schemes.

(ii)	$\begin{aligned} \text{Var}(Y) &= 4\text{Var}(\bar{X}) \\ &= \frac{4}{n} \text{Var}(X) \\ &= \frac{4}{n} \times \frac{\theta^2}{12} \\ &= \frac{\theta^2}{3n} \\ \text{SE} &= \frac{\theta}{\sqrt{3n}} \end{aligned}$	<b>M1</b> <b>A1</b> <b>A1</b> <b>A1</b> <b>A1</b>	FT their $k$
(b)(i)	<p>Using <math>\text{Var}(Y) = E(Y^2) - [E(Y)]^2</math></p> $E(Y^2) = \frac{\theta^2}{3n} + \theta^2$ <p><math>\neq \theta^2</math> therefore not unbiased</p>	<b>M1</b> <b>A1</b> <b>B1</b>	FT the line above
(ii)	$E(Y^2) = \theta^2 \left( \frac{3n+1}{3n} \right)$ $E\left( \frac{3nY^2}{3n+1} \right) = \theta^2$ <p>Therefore <math>\frac{3nY^2}{3n+1}</math> is an unbiased estimator for <math>\theta^2</math></p>	<b>M1</b> <b>A1</b> <b>A1</b>
