# Panasonic

- . Thea IQ brings comfort, convenience, and realizes luxurious life.
- . Maximizes the energy efficiency to be eco-friendly to the environment.
- . Gives flexibility to provide safety and to meet various needs.

-  Illumination
-  Monitoring Systems
-  Roller Blind - Curtain
-  Remote Access
-  Security Systems
-  Intercom
-  Heating, Ventilation, Air Conditioning Control

With its Thea IQ Home Automation Systems, Panasonic continuously develops its range of solutions and products, and manufactures systems in line with KNX, one of the world's open standard for the control in both commercial and residential buildings.

From illumination, air conditioning and blind-shutter control to integration of security systems in a building or flat, Panasonic Thea IQ offers versatile solutions. While the system can be programmed in line with your requirements and the equipment of your building, you can always make additions and modifications in time as per newly arising needs.

Panasonic Thea IQ enables you to control comfort, energy saving, safety and security systems in any kind of building. It can be controlled either fully automatically or if you wish, centrally right from your desk, and even by your smartphone from outdoors.

## User Benefits

## Comfort & Convenience

### Step into a much smarter life...

Thea IQ combines technology with human touch and realizes more comfortable and convenient life space.

- By pushing the switches, all lights can be turned on and off.
- If you forget to turn the lights off, you are able to turn them off using your smartphone from outside.
- Various types of dimming controls will make your living space more comfortable.
- Time control function can also be realized to turn the lights on/off automatically when the time comes.
- With the presence sensors, lights can be automatically turned on.

## Energy Efficiency

### What makes a building “smart”?

A smart building is based on consuming the right energy at the right time.

Thea IQ is an eco-friendly system and optimizes and minimizes energy usage.

- Sensors will save energy by turning the light off automatically.
- By setting the thermostat, temperatures are adjusted automatically so that room conditions can be maintained.
- Blind control function can support the temperature change that comes from sun position according to your windows.

# Luxury

## Beyond Luxury... It's Thea IQ.

Who wouldn't want their home to be more relaxing, peaceful and comfortable? Set your imagination free and meet Thea IQ and its high class atmosphere.

- Variety switch plate matches any kind of living space.
- TheaIQ supports the DALI (Digital Addressable Lighting Interface) to provide flexible lighting fixture control.
- With the interface that you can install in your smart phone or tablets, you may remotely connect to your Thea IQ Touch Panel.

# Security & Flexibility

## Safety is first...

No more "Have I left anything on at home?" worries... Thea IQ will also provide safe and secure environment.

- Stream video of IP camera can be shown on your touch panel. For instance, lobby could be checked from your room.
- If you have an adapted door/window opening sensor, TheaIQ will remind you the door/window still open.
- Sensor also inform you the occurrence of defect like smoke or burglar.

## User Interface

### Now all buildings are smarter with Thea IQ Switches...

From illumination, air conditioning and blind-shutter control to integration of security systems, Thea IQ offers versatile solutions for residences as well as hotels, school buildings, hospitals and business centers. It can be used in perfect harmony with the enriched color and frame types of Panasonic Modular Series.

### Frame

An exclusive and rich range of modular frame options provided by Ultima, Sistema and Optima models steer the decorations.

### Cover Plate / Rocker

Different colored switching modules are distinctively combined in Italian style to appeal to those having a hard time to choose.

### Modular Mechanism

Modular mechanisms developed for switch, socket, TV/DATA, dimmer, electronic products depending on use serve for the maximum satisfaction of the users.

### Modular Wallbox and Mounting Frames

Halogen Free modular boxes suitable for walls varying as concrete and drywall and mounting frames suitable for use draw the borders of impeccability of modular series.

# Thea IQ Touch Panel

**Stylish and functional...**

**It's Thea IQ Touch Panel**

Everything is at the fingertips with Thea IQ Touch Panel. Thea IQ Touch Panel is designed as wall mounted tablet PC for home automation systems. It allows you to control each point of your home automation system from the interfaces customizable to the user's request. With its interface that you can install in mobile phone or smart tablet, you may remotely connect to your panel, and perform control and imaging.

- KNX devices can be controlled via touch panel
- Connection with CCTV
- Scene control
- Connection with mobile phone and tablet

## Remote Access

**Everything is under control...**

Smartphone can be used as a remote controller to activate lightings, blinds, and HVAC systems. Also access from the outside is possible to turn on/off the lights, as well as controlling HVAC systems to make your return more comfortable than ever.

## Basic Functions

### ALL ON/OFF

All on and off switch allows the user to turn all lights on or off. This can be used especially when you leave your home, and come back from outside.

### DIMMING CONTROL

Several different controlling options can be used to dim the lighting including 1-10V and DALI. A DALI-Gateway serves as the interface between the KNX installation in the building and the digital DALI lighting control system, and therefore unites the two most important building automation standards.

Thea IQ combines technology with human touch...

### SCENE LIGHTING

Using lighting scenes in a smart lighting or home automation system simplifies your routine by allowing you to activate multiple settings with one-button.

### SENSOR & TIMER CONTROL

Sensors and timer control provides energy saving features and automatic control options for lighting control systems.

### Panasonic Thea IQ provides efficient heating/ventilation systems...

#### TEMPERATURE CONTROL OF THE ROOM CAN BE DONE INDIVIDUALLY USING THERMOSTAT

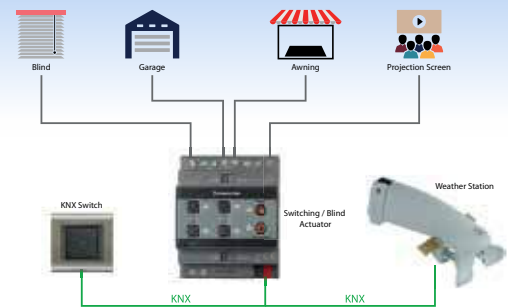

By setting the suitable temperature into your thermostat, thermostat will activate accordingly to control your HVAC (Heating, Ventilation, Air Conditioning) system.

#### PLEASANT VENTILATION

Improves the air quality of the room by activating ventilation using the presence detectors information.

#### SENSOR & TIMER CONTROL

By using the information of the presence detector, weather station, and timer control, your room can be controlled more efficiently under different environments and settings.

## Utilizing the ambient environment, shades and slats are automatically controlled

### CONTROL NATURAL LIGHTING

Roller shutters, blinds, and curtains can be controlled to prevent the room temperature to rise caused by the sunlight. Also by controlling the repositioning of the slats, this could also help decrease the brightness of the natural lighting.

### SCENE CONTROL

Curtain / Shutter control provides comfort with simultaneous control of several engines as well as privacy, security and efficient lighting control. Thanks to Day Mode and Night Mode, the system can be arranged to open and close with sunrise and sunset.

### SENSOR & TIMER CONTROL

By using the information of the presence detector, weather station, timer control and sun protection can be realized which should make your room more comfortable. Besides, it contributes to energy saving especially in commercial buildings and buildings with glass facade. It prevents the sunlight from entering inside with automated activation of the curtains or sun blinds through the data received from outdoor sensors and ensures that air-conditioners run more efficiently, consume less energy, and decreases the maintenance cost of less-operating cooling systems in long-term.

## Create your own world with Panasonic Thea IQ...

## Thea IQ 10.1" TOUCH PANEL

### Smart Building Functions

#### Manage your smart building remotely if you wish.

In home and office spaces and galleries and general sites, you can centrally manage all of the smart home / smart building / automation functions from a single point. Control points can be located in screen as sketch, picture of the location or grid. Therefore a user-friendly interface provides ease of use for all ages. All of these functions can be utilized even from a distance by your mobile phone.

- Illumination • Dimming • Curtain - Shutter • Thermostat • Alarm - Security

#### Compose your own scenarios.

You can assign smart home functions to a single button, using Thea IQ scenario editor, and activate the scenario with one touch. You can fictionalize time-dependent scenarios. It is possible to compose personal scenarios such as turn off the whole lighting system every evening at 11:30 p.m. turn on garden lightning every evening at 6:00 p.m. and turn off it every morning at 6:30 a.m.

### Camera Display

#### Monitor your cameras instantly.

Images of IP cameras within the same network can be monitored live. After a proper IP configuration, footage can be displayed from your mobile phone or your tablet.

### Alarm and Security

#### Use your own security system.

You can use indefinite security system without fee by adding products such as smoke detector, gas leak detector, flood detector and magnetic gate detector to system. It is possible to activate alarm before leaving home and then deactivate it with your personal password. In case of any alarm, the screen starts to give siren sound and security staff of the housing estate is warned. The relevant settings are sent to your mobile phone or tablet and shared as notification. In case of a proper configuration in your system, electricity, gas and water can be cut automatically. Past alarm notifications are recorded and can be monitored.

\*The brand of the Thea IQ Touch Panel is "VIKO by Panasonic". "VIKO by Panasonic" is the brand of Panasonic Life Solutions Elektrik San. ve Tic. A.Ş.

## TOUCH PANEL MASTER I/O

### Thea IQ Master I/O KNX Module

### ■ MAIN FEATURES

KNX Master Gateway converter is designed to convert RS485 to KNX/EIB for a smart home control system. It is full duplex and two-way communication (transfer and receive function work together). Through the KNX/EIB RS485 converter to connect the 485 bus system with the EIB bus system into a whole. The device on the 485 bus sends a telegram to converter according to the predefined protocol, and then the converter will the telegram convert to KNX/EIB telegram that can be sent on the EIB bus, so that the 485 device can control the KNX device on the EIB bus. It provides four digital input channels for smoke detector, fire/gas sensor, flash flood etc. However, there are four outputs to control the solenoid valves in the heating and cooling systems and cut the general energy. Via the push switches present on the device, the load connected to outputs can be controlled. This manual control has priority over the commands from the bus KNX. The button LED indicates the status of the outputs. When the green LED is on, the output relays are closed.

### ■ TECHNICAL DATA

### KNX Modular Switches

KNX Modular Switch 1 Gang-2M

KNX Modular Switch 2 Gang-2M

KNX Modular Switch 3 Gang-3M

#### ■ MAIN FEATURES

- For operating switching, dimming, blinds and recall/save light scene functions individually
- Can be used to send temperature, priority, percentage, HVAC operation mode value
- Scene functions can be saved by pressing 3-4 seconds if fold is programmed as recall/save light scene
- Setting of desired behaviour via long and short key depression is possible
- With LED status indication

- Can be located into all frames of Thea Modular Series; Optima, Sistema and Ultima

#### ■ FUNCTIONS

- Switching
- Dimming
- Blind control
- Recall/save light scene

## POWER SUPPLY & INTERFACE Power Supply Units

### KNX Power Supply Units

#### KNX Power Supply Unit 640mA

#### KNX Power Supply Unit 320mA

#### ■ MAIN FEATURES

- For supplying KNX devices with bus voltage
- One non-choked and one choked output each
- The non-choked output can be used for the supply of another line or for function devices (smart sensor etc.) which require an auxiliary voltage
- A KNX bus line can be supplied from two power supply units  
There must be at least 200m of bus line between the infeed points.

- Nominal voltage can be subdivided to outputs (choked or nonchoked) as desired.
- With reset switch for bus lines
- With short circuit protection
- With overvoltage protection

#### ■ TECHNICAL DATA

|                      | PSU 640         | PSU 320   |
|----------------------|-----------------|-----------|
| Operating voltage AC | 230V AC 50/60Hz |           |
| Operating voltage DC | 240-250V DC     |           |
| Power loss           | 5W max.         |           |
| Dimensions           | 4 modules       | 4 modules |
| Output current       | 640mA           | 320mA     |
| Output voltage       | 30V DC          |           |
| Ambient temperature  | -5°C ... +45°C  |           |
| Protection rating    | IP20            |           |

#### ■ STATUS DISPLAY

- LED display, red: bus reset
- LED display, yellow: overvoltage
- LED display, red: overload
- LED display, green: operation

| KNX Power Supply 320mA | WRKT20145NC   |

#### ■ CONNECTION

KNX Power Supply Unit

#### ■ DIMENSIONS

## POWER SUPPLY & INTERFACE Line Coupler

### KNX Area / Line Coupler

#### ■ MAIN FEATURES

- For connecting two KNX/EIB data lines and ensuring the electrical separation of these lines from one another
- Can be used as an area or a line coupler or alternatively as a line repeater depending on the assignment of the physical address and on the parameterization of the device
- With a maximum of 3 line repeaters in parallel per line, the highest max. number of 256 devices in a line can then be realized
- A separate power supply is required for each line or each line segment
- LED status indication

#### ■ FUNCTIONS

##### Used as area/line coupler

- Reduced bus load due to filter function (filter table)
- Forwarding of group telegrams can be parameterised
- Telegram repetitions in case of transmission errors adjustable
- Telegram confirmation can be parameterised

#### ■ TECHNICAL DATA

|  | Line Coupler   |
|--|----------------|
| Operating voltage KNX                  | Bus voltage    |
| Operating voltage                      | 21-30V DC      |
| Width                                  | 2 modules      |
| Current consumption superordinate line | 6mA            |
| Current consumption subordinate line   | 8mA            |
| Ambient temperature                    | -5°C ... +45°C |
| Protection rating                      | IP20           |

##### Used as line repeater

- Expansion of a line into a maximum of 4 line segments with up to 64 devices per segment
- Telegram repetitions in case of transmission errors adjustable

## POWER SUPPLY & INTERFACE USB Data Gateway

### KNX USB Data Gateway

#### KNX USB Gateway

#### ■ MAIN FEATURES

- Permits the connection of a PC to the instabus KNX / EIB
- Enables instabus devices to be addressed, programmed and diagnosed by means of the ETS
- The device electronics get their power supply completely from the USB interface of the connected PC
- The firmware of the USB data interface can be updated with the local PC so that the device can easily be adapted to future standards

#### ■ TECHNICAL DATA

|                       | USB Interface                             |
|-----------------------|---|
| Operating voltage KNX | Bus Voltage                               |
| Power supply          | Via PC USB-port                           |
| Power consumption     | 150mW max.                                |
| Width                 | 2 modules                                 |
| Length of USB cable   | 5 m max.                                  |
| Transmission protocol | Compatible with USB standards 1.1 and 2.0 |
| PC port (USB)         | USB connecting socket type B              |
| Rate of transmission  | typically 9.6 kbaud                       |
| Ambient temperature   | -5°C ... +45°C                            |
| Protection rating     | IP20                                      |

## POWER SUPPLY & INTERFACE DALI Gateway

### KNX DALI Gateway

#### KNX DALI Gateway Tunable White

#### ■ MAIN FEATURES

- For controlling of luminaries and other applications with DALI operating device in KNX installations e.g. electronic ballast
- Each group features the full scope of functions without any restrictions. Functions can be parameterized separately for each group. This feature permits independent and multi functional control of the DALI devices.
- Adjusting the limit values for brightness is possible
- Dimming response can be parameterized.

- An individual DALI device can be exchanged during operation without software
- The configuration and commissioning of the DALI Gateway takes place via a plug-in
- With short circuit, surge and overload protection

#### ■ TECHNICAL DATA

|                            | DALI Gateway           |
|----------------------------|------------------------|
| Operating voltage KNX      | Bus voltage.           |
| Power consumption KNX      | 150mW max.             |
| Width                      | 4 modules              |
| Operating voltage          | 110V...240V AC 50/60Hz |
| Number of DALI subscribers | 64 max.                |
| DALI rated voltage         | 16V DC                 |
| DALI transmission rate     | 1.2 kbit/s             |
| DALI protocol              | EN 62386               |
| Ambient temperature        | -5°C ... +45°C         |
| Protection rating          | IP20                   |

#### ■ FUNCTIONS

- Control of a maximum of 64 DALI devices in a max. of 32 groups
- Incorporation of the groups into up to 16 light-scenes possible
- Central switching function
- Manual control of the groups independent of the bus (site operation with broadcast control)
- Feedback of DALI error status or short-circuit and supply voltage failure message
- Soft-On or Soft-Off function
- Timer functions (ON-delay, OFF-delay, staircase lighting function, also with pre-warning function) **Technical**

## POWER SUPPLY & INTERFACE

### Binary Inputs for flush-mounted sockets 2/4/6 way

#### KNX Binary Inputs for flush-mounted sockets 2/4/6 way

##### KNX Binary Input 2-Way

##### KNX Binary Input 4-Way

##### KNX Binary Input 6-Way

### ■ MAIN FEATURES

- Binary input modules with 2, 4 or 6 inputs for floating switch/ push button contacts
- Can be installed in combination with conventional push buttons/ switches in flush-mounted sockets
- Inputs can be reconfigured to outputs: binary input: potential-free contact/binary output: 1mA (low current) (LED 1mA types)
- Adjustable response to restoration of the bus supply

### ■ INPUT FUNCTIONS

The following functions can be configured:

- Switch / push button input
- Dimmer control
- Control of blinds
- Value
- Up to 4 Command LED (With BI 6-way, only C1...C4)

## ACTUATOR Switching/Blind Actuators

### KNX Switching/Blind Actuator 12/6 Gang

### KNX Switching/Blind Actuator 8/4 Gang

### KNX Switching/Blind Actuator 4/2 Gang

#### ■ MAIN FEATURES

- On-site operation possible on the device (e.g. for installation testing), drives also possible without a bus voltage
- Status LED for each channel
- High switching capacity (16A with high-inrush current capacity)
- Different channel functions can be selected: Switching, On/Off Delay, Pulse, Staircase, Roller Shutter, Venetian Blind.
- Possible integration of the channels into a maximum of 8 scenes
- Adjustable response to bus failure and restoration of the bus/mains power
- Central UP/DOWN object
- 3 safety objects and function
- Flexible reaction to safety telegrams: individually adjustable for each drive for start and end of the safety status
- Adjustable response to bus failure and restoration of the bus / mains power

## ACTUATOR Dimming Actuators

### KNX 1-10V Control Unit 4 Gang

#### ■ MAIN FEATURES

- For switching and dimming of lighting circuits in combination with electronic ballasts or other dimmable 1-10V devices
- “Soft-ON”, “Soft-OFF” and time dimmer are configurable
- Time-delayed switch-off when brightness value drops below the switch-off brightness is possible
- Multi-phase connection is possible

- 1-10V output and one switch output (relay contact) per channel
- Slide switches for manual control of the relays (also without bus voltage)
- No additional power supply required

#### ■ SWITCHING CAPACITY

|   |                      |
|---|----------------------|
| Minimum load  | : 5W                 |
| Resistive load  | : 2500W              |
| Capacitive load   | : 1100W (max. 140µF) |
| Incandescent / halogen lamp load  | : 2500W              |
| Type-dependent fluorescent lamps with EVG<br>(due to varying switch-on peaks) |                      |

## ACTUATOR Dimming Actuators

### KNX Dimming Actuator

#### KNX Dimming Actuator 2 Gang 300W DM102

#### KNX Dimming Actuator 4 Gang 250W DM104

#### ■ MAIN FEATURES

- 2 channel and 4 channel versions
- Dimming range 0–100%
- For dimming incandescent lamps, low voltage and high voltage halogen lamps, Dimmable CFL and Dimmable LED Driver loads
- Device and KNX bus module can be swapped independently of each other.
- Removable KNX bus module enables devices to be changed without reprogramming.

- LED channel status indicator for each channel
- Manual operation on device (even without bus connection)
- Dimming output: 300W per channel for 2 channels version, 250W per channel for 4 channels version.
- Automatic load type detection (can be deactivated)
- For R, L and C load

#### ■ CONNECTION

#### ■ DIMENSIONS

\* The maximum load declaration is under ambient temperature 25°C, and maximum mains voltage 230V AC/ 50Hz. If ambient temperature is over 25°C, the maximum load should be reduced.

# Panasonic

## ACTUATOR Fan Coil Actuator

### KNX Fancoil Actuator

### ■ MAIN FEATURES

- For operation of ventilator convectors (fan coil units) implemented for room air conditioning
- Fan coil actuator for 2-pipe and 4-pipe systems
- Connection of one fan coil unit with up to 6 fan levels or connection of two fan coil units with up to 3 fan levels each
- Operating modes for heating, cooling or combined heating / cooling operation
- LED status indication for operation

### ■ TECHNICAL DATA

|                              | FCA                                  |

| Protection rating            | IP20                                 |

### ■ CONNECTION

1-Channel operation

2-Channel operation

- Free channels can be used for switching functions e.g. for room lighting
- Cyclical or event-oriented transmission
- Manual operation on device (fan stages, valve and switching outputs)
- Limit values can be set

### ■ FUNCTIONS

Up to 5 different fan coil systems can be set:

- 2-pipe system only heating (in 1-channel and 2-channel operation)
- 2-pipe system only cooling (in 1-channel and 2-channel operation)
- 2-pipe system heating/cooling via change-over object (in 1-channel and 2-channel operation)
- 4-pipe system heating/cooling via change-over object (only in-channel operation)
- 4-pipe system heating/cooling via command value specification (only in 1-channel operation)

### ■ DIMENSIONS

## ACTUATOR Heating Actuator

### KNX Heating Actuator With Controller 6 Gang

#### ■ MAIN FEATURES

- For switching of thermal actuators for heaters or cooling ceilings
- Can control up to 6 rooms using thermal actuators for every channel
- Up to 4 thermal valve drives can be connected per channel
- The outputs can be controlled either with switching or with PWM

- Overload-protected, short circuit-protected
- Protection against jamming valves

#### ■ TECHNICAL DATA

|                          | HA 6                   |
|--------------------------|------------------------|
| Operating voltage KNX    | Bus voltage, (<15mA)   |
| Operating voltage        | 110...230V AC, 50/60Hz |

# SENSOR & DETECTOR

Thermostat

## SENSOR & DETECTOR

### KNX Modular Thermostat

### ■ MAIN FEATURES

- Individual room thermostat for controlling heating actuators and fan coil units
- Can be used as continuous or two point control
- Continuous PI control can be configured for heating and cooling
- Can support the operating modes as comfort, night/standby, frost/heat protection, presence and window status.

- Operation mode and temperature set value can be changed by user via buttons.
- Can be located into all frames of Thea Modular Series: Optima, Sistema and Ultima

### KNX Ceiling Type Presence Detector

#### ■ MAIN FEATURES

- The PIR sensor on the product has a moving lens (mechanical adjustment) and a shade ring allow users to easily customize the coverage area and detection range.
- RGB LED can be used to indicate movements or/and one of the measurements value.
- Mixed light measurement suitable for fluorescent (FUPUESL), halogen/incandescent lamps and LEDs.
- KNX programming button of the product is under the front cover for easy access.
- Product can be flush mounted installed in ceilings with clamps.
- Ceiling installation is also possible with surface-mounted box.
- 8 independent channels can be used for presence or/and brightness dependent control for lighting, HVAC control etc...
- Test mode for checking function and detection area
- All sensors measurements can be calibrated before ETS programming by parameters or after ETS programming by communication objects.
- Alarm function for measurements
- Presence dependent channels can work in parallel (Master/ Slave or Master/Master)
- Short presence function reduces the time delay when device detects movement briefly
- Brightness switching value or set point value can be set in lux before ETS programming by parameters or after ETS programming by communication objects
- Channel's presence and brightness sources can be from internal or/and external sensors
- Independent lock function for each channel
- Channels can be programmed to work with manual switching/dimming (by push buttons for example).
- Participation to scenes

#### ■ TECHNICAL DATA

|  | KNX Ceiling Type Presence Detector |
|--|------------------------------------|
| Supply voltage   | 21 ... 32V DC via KNX Bus          |
| Ambient temperature  | -5°C ... +45°C                     |

## Ceiling

- The scope of detection is different depending on the height of the ceiling (unit:m)
- The shade ring can be used if the detection range of the motion sensor is wanted to be reduced. It can be mounted to the device by pushing it towards the lens.

|  |         |         |         |
|--|---------|---------|---------|
| Ceiling height                                 | 2.7 m   | 3.2 m   | 4.2 m   |
| Guideline height for detection scope setting   | 2.0 m   | 2.5 m   | 3.5 m   |
| Diameter of detection scope without shade ring | Ø 5.6 m | Ø 7.0 m | Ø 9.8 m |
| Diameter of detection scope with shade ring    | Ø 2.5 m | Ø 3.1 m | Ø 4.4 m |

Remark: The standard of appropriate height is 70 cm from floor or height from floor to hand of human for detection.
