Generation E-760

Access Control Solutions for the Lodging Industry

Total Access

You want your guests to feel as comfortable staying with you as they do in their own home. You offer them comfort and hospitality and are attentive to their needs. But what about the peace of mind that comes from security? Make no mistake: it's at the top of their list. You need a lock system that works with your team, not only to guarantee security, but also to save you time and let you remain in control. Your lock system has to be easy to install, easy to use, durable, and flexible enough to respond to whatever challenges arise. Plus you don't want to compromise on great style!

Generation E-760

- Designed with security and comfort in mind
- Worry-free installation and maintenance
- Loaded with security and tracking features
- Solid, reliable construction

Everything You Want in a Lock

ILCO has been listening hard to what hotel management and guests want. The result: our Generation E-760 lock system delivers unparalleled security and versatility. Simple to install and maintain, it's the dream system for hotel staff and managers, and your guests will love its reliability and convenience. The Generation E-760 combines the ultimate in hotel security with a sleek design and a choice of finishes to fit your hotel's unique style.

Features and Benefits

Designed with Guest Security and Comfort in Mind

- Operates with easy-to-use and reliable magnetic stripe keycard
- Lock provides visible and audible feedback
- Includes one-inch solid metal deadbolt for added protection and privacy (available with auto-deadbolt)
- Features automatic cancellation of previous guest keycard to ensure guest privacy and security
- ADA-compliant for physically disabled guests and staff
- Shabbat-compliant lock available

Worry-Free Installation and Maintenance

- Simple to install, learn and use
- Stand-alone functionality, no wiring required
- Foreign objects are easily removed from open reader slot
- Three AA standard alkaline batteries yield 50,000 insertions (or last two to three years, based on 10 insertions per day)
- Low battery indicator alerts staff - data is retained during battery replacement
- Upgradeable lock software on-site
- All electronics and batteries are located in front housing. No need to disturb guest.

Security Features and Advanced Tracking System

- Audit trail records last 200 lock transactions
- Lock reads magnetic stripe during removal of keycard, ensuring that cards are not left in the lock
- In the event of an emergency, there are three system override options to open the lock: the original, fully electronic by-pass system OR two new mechanical key override systems, including a recodable cylinder option
- Lock can be integrated into master key system
- Programming options allow for limited access to staff and guests in restricted areas or during specified times

Solid, Reliable Construction

- All-metal, heavy duty electronic mortise and cylindrical lockset
- Precision-engineered mechanics and circuitry - Coated Control Board
- Infrared communication link
- Tested to rigorous ILCO and industry quality and performance standards
- Two-year warranty
- Superior finish technology resists extreme environmental conditions (Supreme finish)
- Drainage system designed to prevent internal condensation build-up

Finish, Lever and Override Options

Finish Options

Decorative as well as durable, these finishes are designed not only to complement, but also to beautify any hotel decor.

**Warning: Chrome polisher should not be used with this finish

The Supreme and Powder Coat Finishes

Ideal for Ocean-front properties and severe environmental conditions like high pollution and harsh winters, these finishes, exclusive to the Generation E-760, are more durable than a Physical Vapor Deposition finish and resist severe acid-salt spray.

Lever Options

Two lever options are offered for the Generation E-760 lock:

- Standard Long Lever
- Standard Short lever

Override Options

The override is the feature that gives you access to a guestroom in the unlikely event of mechanical or electrical lock failure.

Control Boards

Control Boards are coated with a proprietary solution to seal out moisture and contaminants.

BHMA Certification

ILCO's Generation E-760, is now listed in the BHMA Certified Products Directory for ANSI/BHMA A156.25 and A156.13 2002 Electrified Locking Devices Grade 1.

ILCO is an ISO 9001-2000 certified facility.

A Retrofit for System 700 Customers

It's the most cost-effective and least disruptive security system upgrade for hotel renovation projects. Installing ILCO's Generation E-760 lock is simple. Re-use the same System 700 mortise and strikes so that doors can remain completely intact. You can replace one door lock, one full floor or your entire hotel locking system without interruption to hotel security or service.

With minimal set-up, your front desk staff will be programming and issuing keycards in minutes. A Generation E-760 retrofit upgrade ensures low capital expenditure and high customer and staff satisfaction.

Call your ILCO representative now to benefit from the Generation E-760 retrofit upgrade.

Remote Access Controller

Remote access controllers are used to regulate access to restricted areas including executive floors, spas, health clubs or parking areas where it is impractical to mount a standard electronic door lock.

Exit Device Operators

Pleasant your guests by providing easier access to remote parts of the hotel. Equip back doors to parking lots or stairwell doors to other floors with exit devices that allow them easy access with a simple swipe of their keycard. Exit devices can also be placed on fire doors equipped with a panic device as well as access-controlled doors.

Front Desk Unit

The Front Desk Unit (FDU) is the "all-in-one" self-contained brain of the stand-alone lock system. Your staff will use the FDU to perform multiple functions. This flexible system can be used as both an encoder unit and a lock-programming unit. The fully portable unit contains an internal battery backup in the event of a power failure. The FDU can be hooked up to any standard parallel port printer to provide a system audit report.

ATLAS

Driving Hotel Connectivity

Uncompromising security meets maximum flexibility: ATLAS Advanced Technology Lodging Access Solution delivers state-of-the-art security for guests, staff and property, while accommodating the particular needs of your operation. Essential features include hotel systems integration, time zones and comprehensive reporting capabilities. ATLAS accommodates single-station operations to networked, large-scale, full-service facilities.

Protect your investment: ATLAS has been designed using the latest open architecture technology, making the best use of current application standards such as .NET/Remoting, Winform and Webform, Windows Services and SQL Database. This means you get maximum flexibility and maximum choice.

Add value: ATLAS easily integrates with PMS and POS systems, without the need to add equipment, using the existing network infrastructure.

Minimal training required: Using an intuitive and familiar web browser user interface, hotel staff can operate the ATLAS system efficiently with minimal training.
