

GCSE GEOGRAPHY 8035/3

Paper 3 Geographical Applications

Mark scheme

June 2019

Version: 1.0 Final

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts. Alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this mark scheme are available from aqa.org.uk

Point marked questions marking instructions

The mark scheme will state the correct answer or a range of possible answers, although these may not be exhaustive. It may indicate how a second mark is awarded for a second point or developed idea. It may give an indication of unacceptable answers. Each mark should be shown by placing a tick where credit is given. The number of ticks must equal the mark awarded. Do not use crosses to indicate answers that are incorrect.

Level of response marking instructions

Level of response mark schemes are broken down into levels, each of which has a descriptor. The descriptor is linked to the Assessment Objective(s) being addressed. The descriptor for the level shows the average performance for the level.

Before you apply the mark scheme to a student's answer read through the answer and annotate it (as instructed) to show the qualities that are being looked for. You can then apply the mark scheme. You should read the whole answer before awarding marks on levels response questions.

Step 1 Determine a level

Descriptors for the level indicate the different qualities that might be seen in the student's answer for that level. When assigning a level you should look at the overall quality of the answer and not look to pick holes in small and specific parts of the answer where the student has not performed quite as well as the rest. If the answer covers different aspects of different levels of the mark scheme you should use a best fit approach for defining the level and then use the variability of the response to help decide the mark within the level, ie if the response is predominantly Level 2 with a small amount of Level 3 material it would be placed in Level 2 but be awarded a mark near the top of the level because of the Level 3 content. For instance, in a 9 mark question with three levels of response, an answer may demonstrate thorough knowledge and understanding (AO1 and AO2) but fail to respond to command words such as assess or evaluate (AO3). The script could still access Level 2 marks. Note that the mark scheme is not progressive in the sense that students don't have to fulfil all the requirements of Level 1 in order to access Level 2.

Step 2 Determine a mark

Once you have assigned a level you need to decide on the mark. The descriptors on how to allocate marks can help with this. The exemplar materials used during standardisation will also help. There will generally be an answer in the standardising materials which will correspond with each level of the mark scheme. This answer will have been awarded a mark by the Lead Examiner. You can compare the student's answer with the example to determine if it is the same standard, better or worse than the example. You can then use this to allocate a mark for the answer based on the Lead Examiner's mark on the example. You may well need to read back through the answer as you apply the mark scheme to clarify points and assure yourself that the level and the mark are appropriate.

Indicative content in the mark scheme is provided as a guide for examiners. It is not intended to be exhaustive and you must credit other valid points. Students do not have to cover all of the points mentioned in the indicative content to reach the highest level of the mark scheme.

An answer which contains nothing of relevance to the question must be awarded no marks.

Assessment of spelling, punctuation, grammar and use of specialist terminology (SPaG)

Accuracy of spelling, punctuation, grammar and the use of specialist terminology will be assessed via the indicated 9 mark questions. In each of these questions, three marks are allocated for SPaG as follows:

- **High performance** – 3 marks
- **Intermediate performance** – 2 marks
- **Threshold performance** – 1 mark

Assessing SPaG when students use a scribe or word processor

- Students using a scribe or word processor can access some, or all, of the marks available for SPaG provided there is sufficient evidence that it is their work. The JCQ scribe cover sheet attached to their scripts must show what was dictated or which facilities were disabled on the word processor.
- Students using a scribe can access marks for SPaG as follows.
- Students who dictate their answers are eligible for marks awarded for grammar. This is a third of the total marks awarded for SPaG.
- Students who dictate their answers and indicate punctuation are eligible for marks awarded for punctuation and grammar. This is two thirds of the total marks awarded for SPaG. The cover sheet must indicate that both punctuation and grammar were dictated.
- Students who dictate their answers, indicate punctuation and spell out every word are eligible for all SPaG marks. The cover sheet must indicate that spelling, punctuation and grammar were dictated.

General guidance

- Mark schemes should be applied positively. Examiners should look for qualities to reward rather than faults to penalise. They are looking to find credit in each response they mark. Unless the mark scheme specifically states, candidates must never lose marks for incorrect answers.
- The full range of marks should be used. Examiners should always award full marks if deserved, ie if the answer matches the mark scheme.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked unless the candidate has replaced it with an alternative response.
- Do NOT add ticks to level-marked questions – use the highlight tool/brackets to signify what is relevant.
- Sometimes there are specific “triggers” in the mark scheme that enable higher level marks to be awarded. For instance, an example or case study may be required for Level 3 if it is stated within the question.
- Where a source, such as a photograph or map, is provided as a stimulus it should be used if requested in the question, but credit can often be given for inferred as well as direct use of the source.
- Always be consistent – accept the guidelines given in the mark scheme and apply them to every script

- If necessary make comments to support the level awarded and to help clarify a decision you have made.
- Examiners should revisit standardise script answers as they apply the mark scheme in order to confirm that the level and the mark allocated is appropriate to the response provided.
- Mark all answers written on the examination paper.

Description of annotations

Annotation	Meaning/Use
?	Unclear
[Left square bracket
]	Right square bracket
^	Omission mark
L1	Level 1
L2	Level 2
L3	Level 3
DP	Developed point
DEV	Development
EG	Example / reference
EVAL	Evaluation
HLINE	Horizontal Line
JUST	Level or point just awarded
MAX	Max
Vertical Wavy Line	Not relevant
NC	Nothing Creditworthy
NAQ	Not answered the question
REP	Repeat
SEEN	Reviewed but no marks awarded
Tick	Correct point
TV	Too vague
Highlight	Highlight Box

Level	Marks	Description																
3 (Detailed)	5–6	AO3 – Offers detailed evaluative observations as to why the chosen location for the human geography enquiry was suitable. AO3 – Makes a detailed judgement about why the chosen location for the human geography enquiry was suitable.																
2 (Clear)	3–4	AO3 – Offers some clear evaluative observations as to why the chosen location for the human geography enquiry was suitable. AO3 – Makes a clear judgement about why the chosen location for the human geography enquiry was suitable.																
1 (Basic)	1–2	AO3 – Offers limited evaluative observations as to why the chosen location for the human geography enquiry was suitable. AO3 – Makes a basic judgement about why the chosen location for the human geography enquiry was suitable.																
	0	No relevant content.																

		<ul style="list-style-type: none"> • Level 1 – Basic identification of a small number of factors which made the location suitable for the human geography enquiry OR offers an advantage and/or a disadvantage in terms of the suitability. <p>Max Level 1 for reference to suitability of physical geography location.</p> <p><u>Indicative content</u></p> <p>The command is “assess the suitability” so there is an expectation of a judgement which is supported by evidence. So the focus of the question is an evaluation of the degree to which the location of the human geography enquiry was suitable.</p> <ul style="list-style-type: none"> • Students may adopt an approach which assumes suitability and identifies evidence in order to support this view. • Students may adopt a more evaluative approach by considering both advantages and disadvantages of the location. • There should be an expectation that students will consider the question in relation to the enquiry process, for example: <ul style="list-style-type: none"> ○ the scale of the enquiry ○ links to geography ○ availability of data ○ reliability and accuracy of data ○ capacity to collect sufficient information to draw reasoned conclusions. <p>AO3 = 6 marks</p>	
--	--	---	--

05	4	To what extent did the data collected for one of your enquiries allow you to reach valid conclusions?		9 + 3 SPaG	
		Level	Marks		Description
		3 (Detailed)	7–9		AO3 – Demonstrates a detailed evaluation of the data in relation to the needs of the enquiry. AO3 – Makes an informed judgement about the extent to which the data provided sufficient evidence to make valid conclusions. AO3- Makes an informed judgement about the extent to which the enquiry allowed valid conclusions to be reached.
		2 (Clear)	4–6	AO3 – Some clear evaluative observations about the data in relation to the needs of the enquiry. AO3 – Makes a clear judgement about the extent to which the data provided sufficient evidence to make valid conclusions. AO3- Makes a clear judgement about the extent to which the enquiry allowed valid conclusions to be reached.	

		<p>1 (Basic)</p>	<p>1–3</p>	<p>AO3 – Some basic evaluative observations about the data in relation to the needs of the enquiry. AO3 – Makes a basic judgement about the extent to which the data provided sufficient evidence to make valid conclusions. AO3- Makes a basic judgement about the extent to which the enquiry allowed valid conclusions to be reached.</p>	
			<p>0</p>	<p>No relevant content.</p>	

- **Level 3** – Detailed reference to the usefulness of the data in relation to the aims of the enquiry with some appreciation of whether it provided sufficient evidence to draw effective conclusions. If it is felt that the data did provide sufficient evidence/did not provide sufficient evidence there needs to be evaluative observations supporting this view.
- **Level 2** – Clear reference to the usefulness of the data in relation to the aims of the enquiry with some appreciation of whether it provided evidence **in relation to the aims of the enquiry** to draw effective conclusions. If it is felt that the data did provide sufficient evidence/did not provide sufficient evidence there needs to be **some reference** expressing this view.
- **Level 1** – **Outlines methods which are linked to the enquiry and suggests reasons for the data collection with implied appreciation of its value.**

Indicative content

The command is “to what extent” so the focus of the question is an evaluation of the degree to which the data collected allowed the student to reach valid conclusions. So there is an expectation of a judgement which is supported by evidence.

- ‘Valid conclusions’ can be interpreted in different ways.
- The response should be seen in relation to the title of the enquiry and the relative challenge of obtaining data.
- Students might consider the amount of data or the spread of data (across time).
- Students might consider the question in terms of reliability/accuracy.
- The question can be considered in relation to both primary and secondary evidence.
- It is expected that students will consider “sufficient evidence” in relation to the aims of the enquiry and the extent to which the data allowed conclusions to be valid.
- **Credit reference to additional data as implied evaluation.**

AO3 = 9 marks

	<p>Spelling, punctuation and grammar (SPaG)</p> <p>High performance</p> <ul style="list-style-type: none"> • Learners spell and punctuate with consistent accuracy. • Learners use rules of grammar with effective control of meaning overall. • Learners use a wide range of specialist terms as appropriate. <p>Intermediate performance</p> <ul style="list-style-type: none"> • Learners spell and punctuate with considerable accuracy. • Learners use rules of grammar with general control of meaning overall. • Learners use a good range of specialist terms as appropriate. <p>Threshold performance</p> <ul style="list-style-type: none"> • Learners spell and punctuate with reasonable accuracy. • Learners use rules of grammar with some control of meaning and any errors do not significantly hinder meaning overall. • Learners use a limited range of specialist terms as appropriate. <p>No marks awarded</p> <ul style="list-style-type: none"> • The learner writes nothing. • The learner’s response does not relate to the question. <p>The learner’s achievement in SPaG does not reach the threshold performance level, for example errors in spelling, punctuation and grammar severely hinder meaning.</p>	<p>3</p> <p>2</p> <p>1</p> <p>0</p>
