SECTION I

Directions:

Today you will be taking the Geometry End-of-Course Test. Read each question carefully and then choose the *best* answer.

Be sure that the question number on the answer sheet matches the number on the test. Then mark your answer by filling in the circle on your answer sheet. Do not write your answers in the test booklet. If you do not know the answer to a question, skip it and go on. You may return to it later if time permits.

If you need to change an answer on your answer sheet, be sure to erase your first mark completely. Do not make any stray marks on the answer sheet.

If you finish the section of the test, you may review your answers in that section only. You may not go on to the next section or return to a previous section.

There is a Formula Sheet provided for you on page 4 of this test booklet. You may refer to this sheet at any time during Section I of the test. The Formula Sheet is printed on the inside back cover for your use in Section II.

The two practice test questions below are provided to show you what the questions in the test are like. For each question, you should choose the one *best* answer and fill in the circle in the space provided on your answer sheet.
