Cynthia and I always pretend we're _____ interested in group games at recess. I think it's because our sense of belonging is _____ activated. You see, we're twins and this is our first year at this school, Guadalalaglass Elementary. We're _____ sensitive to heights and equally allergic to words over four syllables. You heard me right: Guadalalaglass, Guadalalaglass, Guadalalaglass, Guadalalaglass... It's easy to _____ pronounce if you say it seven times fast! Cynthia and I have tried. Oh yeah, I almost forgot to mention that our campus buildings are made entirely of transparent plexiglass snap-together bricks! Totally. You'd think somebody could _____ assemble Guadalalaglass in a day or two. Cynthia's always suggesting we get all _____ focused one day and give it a go.

I remember when we first entered our classroom and Cynthia projected a look of complete _____ trust. She was skeptical as I was a cynic. Upon our first glimpse of Guadalalaglass, we giggled at the thought that some poor architect had completely _____ managed her construction budget. Our parents had heard about Guadalalaglass' school district's building rules being _____ regulated. It had been all over the news how Guadalalaglass recruited an army of cutting edge eco-building designers from the across the globe. Our parents, every bit of the eco-building warrior type designers, were impressed enough to demand we become learned Guadalalaglassians. However, Cynthia and I think Guadalalaglass Elementary could easily be _____ taken as a shatterproof terror box learning experiment with kids involved! Case in point: Our first week in attendance, Cynthia and I spent each morning trying our best not to _____ ventilate while looking down at our classroom floor; on Guadalalaglass Elementary's thirty-fifth floor!

Add a suffix to each root word so that it matches the new definition below.

Root words	Suffixes
part real bicycle hurt	-ist -ful -ly

A person who rides a bike _____ extremely _____

Something said in anger is _____ almost as much _____

Circle words with suffixes from the list above.

Under a sunless sky, it's impossible for a plant to make sugar. However, on a sunny day a plant is plenty capable of making sugar using carbon dioxide and water. Green plant cells are where the business of making sugar takes place. Extra sugar moves from the plant cells constantly along a highway of phloem tubes. It's along these pathways where water mixes successfully with water to form a sweet liquid called sap. If you've ever tasted maple syrup, then you probably know how delicious a byproduct of the sun can be!

The Descriptive Detectives: Again!

The Descriptive Detectives view a mystery as a story with the key-words and details missing. **Adverbs** are words that provide more information about verbs: how something is done or when it occurred.

Example: The salesperson of the town hybrid auto dealership, Ms. Greenlease, **exquisitely** displays luxury automobiles in her showroom. Ms. Greenlease **kindly** greets customers when they come in, except when she is **completely** involved in a phone conversation while drinking coffee.

A hybrid SUV is missing from Ms. Greenlease's dealership! Below are adverbs and sentences from the detectives' descriptive report written after closely investigating the scene of the crime and interviewing Miss Greenlease. Match the appropriate adverb with the verb it would be best suited to describe.

1. promptly

3. intentionally
4. longingly
5. quietly
6. loosely
7. hurriedly
8. slowly
9. discreetly
10. sadly

Ms. Greenlease noted that she _____ opened the auto dealership at 8:00 a.m.. _____, she parked the new 500 horsepower golden hybrid in the display window at the front of the store. Her cell phone then _____ vibrated within her pocket. Ms. Greenlease shared that she _____ answered it since it was her sister, who she was anxious to tell about the latests flagship hybrid high-performance models. As she was talking on the phone, she _____ put the keys for the new vehicle next to the _____ opened envelope that contained packaging material for the smartkey. Ms. Greenlease said she _____ stuffed the envelope into the lower left drawer of her desk. She then _____ described the new fleet of vehicles expected to arrive later that day, savoring all the details while finishing her coffee. She recalls _____ staring at the photograph of a fire-engine red coupe on her desk. At 9:00 a.m. she _____ strode back into the showroom to find there was no fresh coffee prepared and noticed that the new 500 horsepower golden hybrid smartkey was no longer on her desk! What did the Detectives deduce might have also been stuffed in the lower drawer of Ms. Greenlease's desk?

Identifying Abstract Nouns

Is the noun something you can see, hear, touch, taste, or smell? If not then it is abstract. Circle only the abstract nouns.

Multiplication and the Associative Property

Name: _____

Date: _____

One of the multiplication properties is associative, which means you can group the factors in a multiplication equation differently and still get the same product.

$$\mathbf{A \times (B \times C) = (A \times B) \times C}$$

Find the missing factor according to the associative property.

1. $5 \times (4 \times 3) = (5 \times 4) \times \boxed{}$

2. $7 \times (3 \times 6) = (7 \times 3) \times \boxed{}$

3. $(30 \times 5) \times 12 = (30 \times 12) \times \boxed{}$

Find the product of these numbers.

4. $6 \times (3 \times 4) = \boxed{}$ $(6 \times 3) \times 4 = \boxed{}$

5. $10 \times (2 \times 5) = 10 \times \boxed{}$ $= \boxed{}$

6. $(10 \times 2) \times 5 = \boxed{} \times 2 = \boxed{}$

Think About It:

7. When you group the factors differently, do you get a different product? Explain.

8. How could you change two out of three factors in an equation and still have the same product?

Multiplication and the Distributive Property

Name: _____

Date: _____

One of the multiplication properties is distributive, which means you can multiply a sum or difference by multiplying each number separately and then adding or subtracting the products.

$$A \times (B + C) = A \times B + A \times C$$

$$A \times (B - C) = A \times B - A \times C$$

Find the product.

1. $5 \times (4 + 3) = 5 \times (\underline{\quad}) = \boxed{\quad}$

2. $(7 \times 3) + (7 \times 6) = (\underline{\quad}) + (\underline{\quad}) = \boxed{\quad}$

3. $3 \times (15 - 12) = 3 \times (\underline{\quad}) = \boxed{\quad}$

4. $(3 \times 15) - (3 \times 12) = (\underline{\quad}) - (\underline{\quad}) = \boxed{\quad}$

Rewrite the equations. An example has been provided for you.

5. $6 \times (7 + 1) = (6 \times 7) + (6 \times 1)$
 $= (42) + (6)$
 $= 48$

6. $9 \times (5 + 3) = \boxed{\quad}$
 $= \boxed{\quad}$
 $= \boxed{\quad}$

7. $10 \times (10 - 3) = \boxed{\quad}$

 $= \boxed{\quad}$

Think About It:

How could you change two out of three factors in an equation and still have the same product?

Multiplication and the Commutative Property

Name: _____

Date: _____

One of the multiplication properties is commutative, which means that you can multiply numbers in any order and get the same product.

1. $5 \times 4 = 4 \times \square$ 2. $7 \times 3 = 3 \times \square$

3. Jenny has five sacks of baby socks. Each bag contains eight socks. Draw the items in each bag. How many socks does Jenny have?

4. Raoul has seven sacks of baby mittens. Each sack contains four mittens. Draw the items in each bag. How many mittens does Raoul have?

5. Write the multiplication equations for each Jenny and Raoul's baby clothes using the commutative property.

ANGLE STEERING

Steering a ship requires practice and precision. It also requires you to think about math and angles.

Turn the ship's wheel according to the angle measurements given. See the examples below. With each new turn, indicate the ship's new direction by drawing a line towards it. Turn clockwise if the angle is positive, counterclockwise if it is negative. Use a ruler to help you draw straight lines.

Directions: Read the following passage and answer the questions that follow.

School ended last week and tomorrow we're buying our season tickets to the local amusement park! I told my brother that I was going to go every day this summer. I wanted to beat my record from last summer when I went every weekday. Every time I entered the park, I took a picture with a different costumed character. My camera was a little clunky, but entirely reliable. It worked every time!

I kept the portraits in my online summer journal. I couldn't keep my mind from racing about all the new memories I was going to make with a trusted companion. All I needed to do was find my digital camera that my grandfather bought for me two years ago. When I found it, I couldn't believe my eyes.

The lens looked crusted over in dust and the camera case looked like it had water damage! The buttons couldn't be pushed down and nothing would turn on. I even couldn't open the memory card compartment as it felt like it had been sealed by dried saltwater. I suspected that one of my brothers must have used my camera, damaged it, put it back and thought I might not have noticed. How could I not?! But I thought about something my grandfather used to say: "There's no need crying over spilled milk." Maybe it was time I ditched the idea of taking a camera with me. Nowadays my phone takes better pictures than that old camera ever did and it's more com-pact!

1. What was the trusted companion the narrator spoke of?

2. What new memories did the main character have in mind?

3. What made the 'companion' so reliable?

4. Who did the main character suspect was involved in the mishap?

5. What do you think happened to the camera?

Sing Song of Old Man Kangaroo by Rudyard Kipling

Directions: Read the following passage and choose the best answer to the questions that follow.

A long time ago, the Kangaroo looked very different than he does now. He was grey and woolly, with four short legs. He was very boastful, and wanted nothing more than to be the most important and well-loved animal in Australia.

One day, his pride really got the better of him. The old Kangaroo went to the Little God Nia, who was known for granting wishes.

"Make me different from all the other animals," demanded the old Kangaroo, "it must be done by 5 o'clock this afternoon."

Up jumped Nia from his seat on the rocks and he shouted, "Go away!"

So the old Kangaroo went to the Middle God Nialu, and commanded, "Make me different from all the other animals, and make me very popular too! It must be done by 5 o'clock this afternoon." Up jumped Nialu from his seat in the bushes and he shouted, "Go away!"

So the old Kangaroo went to the Big God Nialuwa and stated, "You must make me different from all the other animals, and very popular, and very wonderfully run-after. It must be done by 5 o'clock this afternoon."

Nialuwa was tired of the old Kangaroo's shenanigans, and so he proceeded to grant his wishes. Nialuwa called the yellow dog Dingo and said, "See that Kangaroo?" The Dingo nodded. "Well, he wishes to be different from all the other animals, and very wonderfully run-after. Make him so! You have until 5 o'clock this afternoon."

And with that, the Dingo began to chase the grey and woolly Kangaroo for miles and miles. The old Kangaroo ran and ran on his four legs, through the desert, through the mountains, through the salt-pans, the reed-beds and the blue gums... he had to! Soon they came

to a river, and the Kangaroo didn't know how to cross. He began to hop through the river. Then he hopped through the forest, and soon his back legs began to get stronger. He tucked up his front legs, hopped on his hind legs and stuck out his tail for balance as he hopped away from the Dingo.

Eventually the sun began to set. The tired old Kangaroo hopped and hopped, and suddenly realized that the Dingo was no longer chasing him. It was 5 o'clock in the afternoon! And low and behold, the old Kangaroo was now different from all the other animals, not to mention, he'd been run-after all day.

The Road Not Taken

Two roads diverged in a yellow wood,
And sorry I could not travel both
And be one traveler, long I stood
And looked down one as far as I could
To where it bent in the undergrowth;

Then took the other, as just as fair
And having perhaps the better claim,
Because it was grassy and wanted wear;
Though as for that, the passing there
Had worn them really about the same,

And both that morning equally lay
In leaves no step had trodden black
Oh, I kept the first for another day!
Yet knowing how way leads on to way,
I doubted if I should ever come back.

I shall be telling this with a sigh
Somewhere ages and ages hence:
Two roads diverged in a wood, and I,
I took the one less traveled by,
And that has made all the difference.

A Minor Bird

I have wished a bird would fly away,
And not sing by my house all day;

Have clapped my hands at him from the door
When it seemed as if I could bear no more.

The fault must partly have been in me.
The bird was not to blame for his key.

And of course there must be something wrong
In wanting to silence any song.

(Think on your favorite insect.)

Fireflies in the Garden

Here come real stars to fill the upper skies,
And here on earth come emulating flies,
That though they never equal stars in size,
(And they were never really stars at heart)
Achieve at times a very star-like start.
Only, of course, they can't sustain the part.

(Who won your last staring contest?)

A Look At Two

Love and forgetting might have carried them
A little further up the mountain side
With night so near, but not much further up.
They must have halted soon in any case
With thoughts of a path back, how rough it was
With rock and washout, and unsafe in darkness;
When they were halted by a tumbled wall

With barbed-wire binding. They stood facing this,
Spending what onward impulse they still had
In One last look the way they must not go,
On up the failing path, where, if a stone
Or earthslide moved at night, it moved itself;
No footstep moved it. 'This is all,' they sighed,
Good-night to woods.' But not so; there was more.
A doe from round a spruce stood looking at them
Across the wall, as near the wall as they.
She saw them in their field, they her in hers.
The difficulty of seeing what stood still,
Like some up-ended boulder split in two,
Was in her clouded eyes; they saw no fear there.
She seemed to think that two thus they were safe.
Then, as if they were something that, though strange,
She could not trouble her mind with too long,
She sighed and passed unscared along the wall.
'This, then, is all. What more is there to ask?'
But no, not yet. A snort to bid them wait.
A buck from round the spruce stood looking at them
Across the wall as near the wall as they.
This was an antlered buck of lusty nostril,
Not the same doe come back into her place.
He viewed them quizzically with jerks of head,
As if to ask, 'Why don't you make some motion?
Or give some sign of life? Because you can't.
I doubt if you're as living as you look.'
Thus till he had them almost feeling dared
To stretch a proffering hand and a spell-breaking.
Then he too passed unscared along the wall.
Two had seen two, whichever side you spoke from.
'This must be all.' It was all. Still they stood,
A great wave from it going over them,
As if the earth in one unlooked-for favour
Had made them certain earth returned their love.

There will be more ice cream shops than coffee shops! The Chamber of Commerce is considering changing the city nickname to, 'Ice- cream-ville'. The Chamber of Commerce is hoping to attract even more ice cream vendors.

"With all this ice cream consideration, maybe we'll attract shops that specialize in different flavors or have different themes," said Mr. Huckbuckle, a local fiduciary clerk. "It sure would be nice to get folks out and about, spending more money on sweet treats!" he added.

The latest ice cream shop is expected to open in two weeks. Every shop sells ice cream but no two retailers are the same. Every shop has earned a five-star rating for customer service. Every shop is also hiring new employees!
