### Powerful. Dynamic. Portable.

Construction Office provides the tools you need for managing your construction firm, like Estimating, Contracts, Specifications, QuickBooks Integration, Scheduling, and Mobile Integration for Pocket PCs and Tablet PCs. Advanced integration and synchronization puts the data you need at your fingertips, so it's easy to build your business.

### A smart decision for your business.

Since Construction Office is designed for the way you work, it's easy to learn and easy to use. Available Construction Office applications extend the power of familiar products like Microsoft Office, including Word, Excel, Outlook, and Project, Intuit QuickBooks, Tablet PCs, and Pocket PCs. You won't have to change the way you do business to implement a new system. Your team can use Construction Office to benefit your business right away.

### California versions available.

Construction Office California versions include contracts and forms to meet the requirements of the California Contractors State License Board (CSLB).

## ConstructionOffice: ESTIMATING

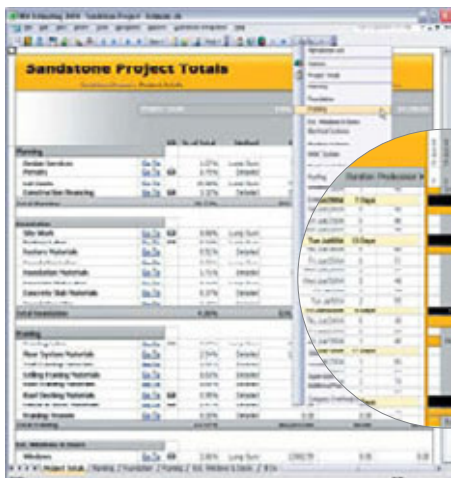

### Know Your Costs.

Increase your profits. Estimate for projects quickly and accurately with powerful UDA Estimating. Start with comprehensive frameworks for CSI, residential, light commercial, and remodeling that you can customize to fit your project needs.

//Construction Office helped us bring all of our data together...Estimating ties in directly with proposals, so I can't leave anything out of the total price. Then as the build progresses, the strong estimating and scheduling integration make it easy to keep our cash flow on track. //

David Lesser

Windstar Homes, Inc. - Tampa, Florida

Automatic schedules.  
Save time by automatically creating a project schedule from an estimate. The new schedule will include the project task list estimated costs, and notes.

Accurate estimates.  
Reference sample estimates for new construction and remodeling jobs and compare item estimates against national average costs.

Excel supercharged.  
Take advantage of powerful, time-saving features designed for construction estimating with the click of a button.

Detailed reporting.  
Analyze estimated expenses by generating charts and reports directly from UDA Estimating.

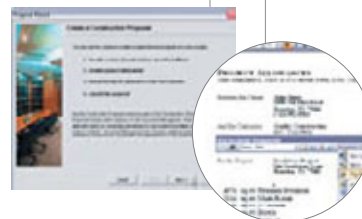

Complete control.  
Stay organized and in control with bid notes, field notes, images, and schedule information for each category, subcategory, and item.

## ConstructionOffice: ESTIMATING

- Reduce risk and increase profits with comprehensive, precise estimates that include the entire scope of the project
- Keep estimates and schedules updated as projects progress with quick synchronization tools
- Create customized reports and proposals that integrate seamlessly with UDA Document Management
- Calculate true margins that consider all your costs and increase your profits with advanced, industry-recommended margin calculating methods
- Access crucial estimating information like project allowances and budgets on the jobsite with Mobile Integration
- Import customized estimating accounts and costs directly into QuickBooks (QT, XT, and NT versions)

Quick, professional proposals.  
Launch complete construction proposals directly from UDA Estimating with just a few clicks.

ESTIMATING  
is included  
with all  
Construction  
Office systems

## ConstructionOffice: SCHEDULING

### Plan For Increased Profits.

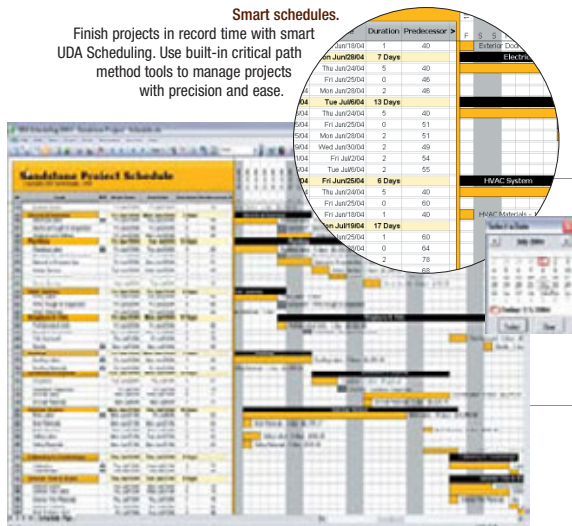

Time is money. Use UDA Scheduling to manage projects, increase productivity, and increase cash flow—a productivity increase of as little as 5 to 10% can save your business thousands of dollars on a typical project.

//Construction Office...saves our company time everyday. It eliminates all the questions. We can avoid the flurry of phone calls, messages, and wasted trips to the jobsite. Instead, anyone in our office can open up Construction Office and get the information they need. //

*Kevin Vonderhorst*  
S.L. Vonderhorst & Sons, Inc. - Keene, New Hampshire

**Smart schedules.**  
Finish projects in record time with smart UDA Scheduling. Use built-in critical path method tools to manage projects with precision and ease.

**SCHEDULING** is included free with Construction Office Professional versions. Or, add to any Construction Office system for \$100\*

**Visible progress.** See your progress with rich, colorful Gantt charts. View details like task name, duration, and estimated dollar amount synchronized from UDA Estimating.

**Proven critical path.** Set predecessors and lag time to quickly locate critical paths for ultimate schedule control. Shift project start date forward or back with the click of a button.

**Automatic work orders.** Create detailed work orders for crews and subs that integrate with UDA Document Management.

**Clear communication.** Communicate plans and progress quickly with reports generated directly from UDA Scheduling.

- UDA Scheduling provides you with the construction-specific tools to quickly create a schedule plan that maximizes the efficiency of your time and resources
- Compensate for unexpected changes in your schedule and keep all your tasks in line with just a few clicks
- Maximize your resources with the ability to manage multiple projects in one schedule (XT and NT versions)
- UDA Scheduling integrates with UDA Estimating, UDA Document Management, and Microsoft Outlook as part of a total project management system
- Access crucial scheduling information on the jobsite like materials delivery and crew schedules with UDA Scheduling for Pocket PCs
- Export schedules to Microsoft Project (XT and NT versions)

\* Special offer valid only when purchased with Construction Office.

## ConstructionOffice: QUICKBOOKS INTEGRATION

### Revolutionize QuickBooks Accounting.

Take the next step. Create a comprehensive project estimate with UDA Estimating, then import estimating data into QuickBooks using UDA QuickBooks Integration.

*// It is fully integrated with our business. It's improved our project flow, it's allowed us to build more homes faster, and we're able to track our costs better which helps us save money. We save money and time, and that's all the building business is - money and time. //*

*Richard Morgan*  
 North American Development - Knoxville, Tennessee

**QUICKBOOKS INTEGRATION** is included with all QT, XT, and NT versions. Or, add to any Construction Office system for \$100\*

**Powerful, dynamic integration.**  
 Benefit from the most powerful QuickBooks Integration available for construction. Export your customized chart of accounts, items, and costs to QuickBooks directly from UDA Estimating.

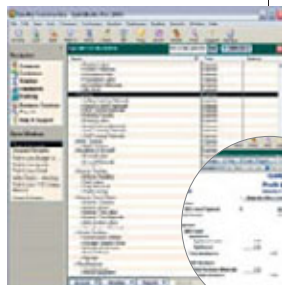

**Smooth data transfer.**  
 Transfer data from UDA Estimating to QuickBooks with the step-by-step QuickBooks Integration Wizard.

**Complete control.**  
 Apply custom markups to invoices and include company overhead and margin.

**Detailed cash flow reports.**  
 Track estimates, budgets, costs, and profit vs. loss for all projects with advanced reporting.

## ConstructionOffice: PROJECTSYNC

### Synchronize Your Business.

Desktop. Laptop. It's all there. Keep all computers and team members up to date with automatic data synchronization. Plus, keep data at your fingertips with advanced synchronization for desktop and laptop computers.

## ConstructionOffice: NETWORK SERVER

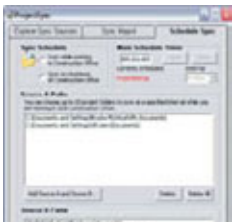

### Connect Your Business.

Make it easy to work as a team. Streamline business operations with Construction Office NT, the easiest way to keep your team informed of new projects, schedule adjustments, change orders, and other critical project information.

## Extend the value of Construction Office.

### PROJECTSYNC

is included with all Construction Office NT systems or additional site licenses\*

**Information in hand.**  
Synchronize information on your desktop and laptop computers so you have the data you need whether you're at the office or on the jobsite.

**Multiply the Power.**  
Connect your office with ProjectSync – bundled with additional licenses of Construction Office.

**Up-to-date data.**  
Automatically update multiple computers and team members with the latest information.

**No server required.**  
Install on your existing peer-to-peer network or a dedicated server.

### NETWORK SERVER

is included with all Construction Office NT systems

**Tools for your team.**  
Give your team the tools they need with Construction Office NT for 5 to 25 users starting at \$299.<sup>95</sup> per user.

**Fresh information.**  
Store project data on a network and share information company-wide.

**Schedule agreement.**  
Keep your team informed of change orders, schedule adjustments, and more with a shared set of project files.

- Designate up to 20 synchronizations at specified intervals
- Know where your data is and what computers, folders, and files were updated with detailed Sync Reports
- With flexible synchronization, choose which projects to synchronize, choose what computers to include, and schedule multiple synchronizations
- Choose automatic file synchronization when you close Construction Office at the end of the day

\* UDA ProjectSync is included with NT versions of Construction Office or the purchase of multiple licenses of Construction Office.

- Set company standards and ensure professionalism with a master set of Construction Office files that your entire team can access
- Control user access with password-protected documents
- Instantly update your entire team with changes to master Construction Office files
- Synchronize data across the network and eliminate costly miscommunications

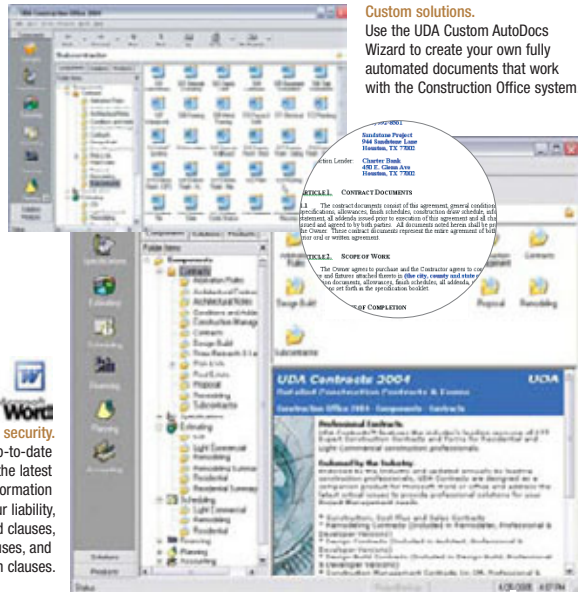

## ConstructionOffice: CONTRACTS

### Streamline Project Management.

Protect your business. Limit your liability with a complete library of over 120 construction contracts and forms that you can modify to fit your company and project needs.

**CONTRACTS**  
and forms are included with all Construction Office systems

**Custom solutions.**  
Use the UDA Custom AutoDocs Wizard to create your own fully automated documents that work with the Construction Office system.

**Dependable security.**  
Over 120 up-to-date contracts include the latest clauses and information designed to limit your liability, including toxic mold clauses, hold harmless clauses, and optional arbitration clauses.

- Limit your liability with a library of over 120 detailed, professional contracts fit for the job
- Use UDA Contracts together with UDA Specifications, UDA Estimating, and the rest of the Construction Office system to ensure seamless communication between you and your clients
- Quickly define and document project allowances, change orders, draw requests, stop notices, requests for price, and more
- With complete document control, modify contracts and forms as needed to fit your company and project needs

## ConstructionOffice: DOCUMENT MANAGEMENT

### Deliver Professional Documents.

Unite project information. Streamline the process of customizing, sharing and publishing your important documents by integrating directly with Microsoft Outlook and the UDA Project Database.

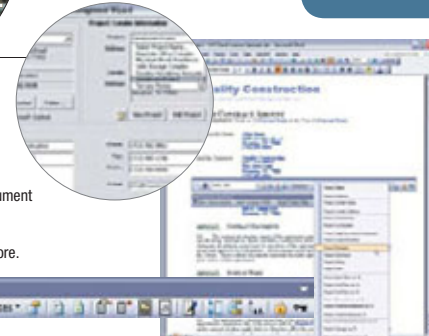

**Powerful Outlook Integration.**  
Update documents quickly with powerful UDA Document Management and Microsoft Outlook Integration. Automatically import company, contact, and project information and easily send documents by email.

**DOCUMENT MANAGEMENT**  
is included with all Construction Office systems

### Outlook

Quick, professional documents.  
Employ the advanced features of UDA Document Management to customize and deliver UDA contracts, proposals, change orders, specifications, work orders, reports, and more.

- Access and import company and job information from the UDA project database
- Import contact information from Microsoft Outlook directly into documents
- Quickly create supplemental documents like transmittals and memos with correct contact, company, and project information
- Enjoy advanced formatting features like company letterhead, headers and footers, page numbering, signatures, automated table of contents, and password security
- Automatically email documents to clients, subcontractors, suppliers, and more
- Increase security with password protection

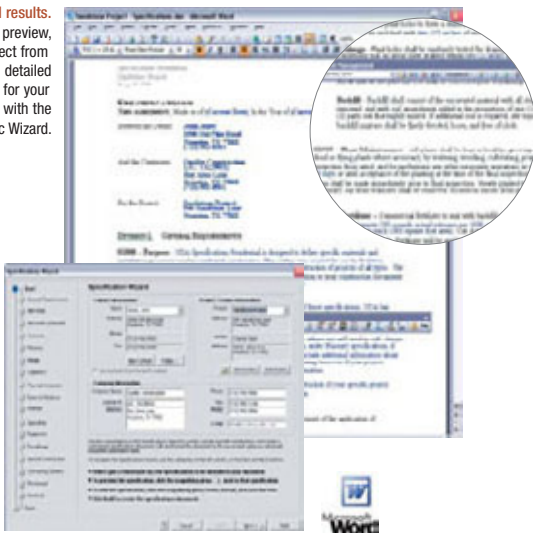

## ConstructionOffice: SPECIFICATIONS

### Protect Your Bottom Line.

Define project success. Cover the entire project scope with comprehensive, easy-to-use specifications based on the CSI MasterFormat numbering system, available for residential and light commercial construction and property development.

**SPECIFICATIONS**  
are included with  
all Construction  
Office systems

**Automated results.**  
Quickly preview,  
edit, and select from  
over 300 detailed  
specs for your  
project with the  
UDA Spec Wizard.

**Comprehensive CSI specs.**  
Use UDA Specifications to  
define projects with clarity  
and accuracy. Start with a  
detailed 70 to 100 page  
specifications book based on  
the CSI MasterFormat and  
customize the specs to fit  
your project needs.

- Protect your bottom line with comprehensive specifications to ensure that your estimate covers the entire scope of the project
- Edit, format, and add to the specifications book with advanced UDA Document Management
- Automatically import contact, project, and company information
- Use Specifications together with UDA Contracts and the rest of the Construction Office system to ensure seamless communication between you and your clients, subcontractors, suppliers, and financial institutions
- Create customized spec templates for specific project types and quickly update specs for new projects using UDA Document Management

## ConstructionOffice: MOBILE INTEGRATION

### Access Project Information Anywhere.

Take it with you. Bring crucial project information to the jobsite on a Pocket PC or Tablet PC. View project estimates, schedules, and customer contacts on site. Plus, add contacts and synchronize new Outlook data with your computer.

### Tablet PC: Now Construction Office Certified.

**Stay connected.**  
Manage your projects  
from the jobsite with  
Construction Office,  
now Tablet PC ready.

**Total Compatibility.**  
View and edit estimates,  
schedules, contracts, specs,  
and more Construction  
Office data on a Tablet PC.

**Mobile Practicality.**  
Combine the convenience of  
a laptop with the ruggedness  
of a Tablet PC.

**Information mobility.**  
Add Outlook contacts on your  
Pocket PC and send new Outlook  
data back to your computer.

**Portability is Key.**  
Hold the tablet PC like a pad  
of paper and input information  
with a pen-like stylus.

- Stay on-time and on-budget with easily accessible project information
- Quickly create Pocket PC versions of all Construction Office files
- Create Outlook tasks from Scheduling and send to your Pocket PC or Tablet PC
- Synchronize Outlook tasks between your Pocket PC, Tablet PC, and computer\*\*

\* Pocket PCs® and Tablet PCs® are not included with Construction Office.

\*\* ProjectSync and additional license required for synchronization with Tablet PC. See pg 12 for details.

## ConstructionOffice: PROJECTBACKUP

### Protect Valuable Project Data.

Secure success. Guard your company against data loss and massive profit loss with a regular back up procedure to removable media or another computer on the network.

## ConstructionOffice: MARKETING TOOLS

### Shorten Your Sales Cycle.

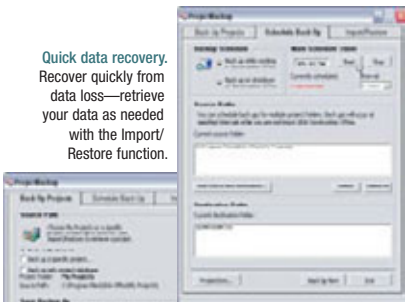

Marketing made easy. Quickly create an effective, professional sales look using Microsoft Word and boost sales of your residential construction projects.

Safeguard data. Protect profits. Ensure success.

Increase sales with expert marketing campaigns.

**PROJECTBACKUP** is included with all Construction Office systems

**Quick data recovery.**  
Recover quickly from data loss—retrieve your data as needed with the Import/Restore function.

**Protect your business.**  
The average small business loses \$3,000 each time data is lost as a result of stopped work, technical support costs, and recovery time.

**Unfailing backup solutions.**  
Quickly back up all of your project folders and project database with customized locations, schedules, file naming system, and more.

**Reliable data protection.**  
U.S. businesses lost approximately \$200 billion dollars in 2004 due to hard drive failure, viruses, stolen computers or data, and other causes of data loss. Protect your business with UDA ProjectBackup.

- Relax. Backing up your project files has never been easier - a few clicks will enable automatic back ups so your data is always protected

- Manage mountains of project data with the Archive function - for example, store finished projects in a different location than current projects

**MARKETING TOOLS** can be added for \$60 - \$180 to any Construction Office system\*

**Professional marketing.**  
Start with a library of templates professionally designed for marketing construction projects. Leverage sample marketing campaigns and choose from four coordinating color schemes.

**Good publicity.**  
Broaden your customer base by promoting your most impressive project.

**Shorten your sales cycle.**  
Attract new clients, reduce your overhead, and generate new customer references.

**Complete control.**  
Modify marketing templates to fit your company and project needs using Microsoft Word.

- Sales Brochures and Project Literature
- Open House Marketing Tools
- Marketing Handouts
- Postcards and Mailout Templates
- Professional Marketing Campaigns
- Company Newsletters
- Press Releases
- Company Background Brochures
- Letters to Clients
- Continuing Interest and Thank You Letters

\* Special offer valid only when purchased with Construction Office.

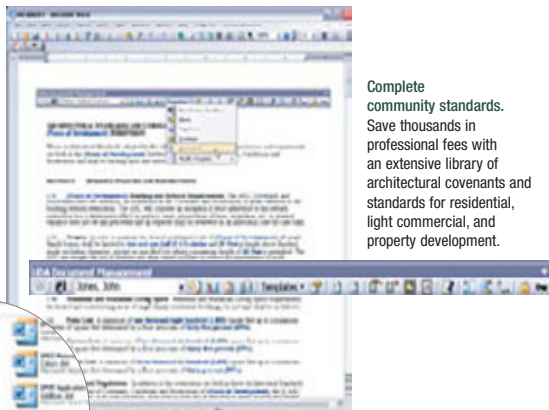

## ConstructionOffice: DEVELOPER TOOLS

### Increase Property Values.

Maximize return on investment. Improve your community with standards, covenants, and guidelines for residential, light commercial, or mixed use property development. Achieve your vision with a specialized toolset designed for the way you work.

Achieve your vision. Expand your reach.

Complete community standards. Save thousands in professional fees with an extensive library of architectural covenants and standards for residential, light commercial, and property development.

Designed for property developers. Comprehensive project specifications are complete with specialized categories for property development including utilities, stormwater, and infrastructure specifications.

- Complete library includes commercial and residential covenants; application forms; condo, golf, ski, and timeshare covenants and forms; homeowner's association bylaws; and complete specifications
- Control and increase property values with the tools to develop, document, and set appropriate standards for your community
- Keep your community development on track with automated Microsoft Outlook reminders linked to specific documents and tasks
- Enjoy the full professional toolset of UDA Document Management, designed to help you manage information flow and customize documents

\* Developer Tools are available as standard (residential) versions and mixed-use (residential and light commercial) versions.

## ConstructionOffice: TOTALCARE

### Extend Your Investment.

Comprehensive coverage. Extend the benefits of your Construction Office investment with UDA TotalCare. You'll have everything you need - from fast technical support to effortless product upgrades - all for an affordable price.

#### Priority Support

**Maximize your potential.**
