Our strength

Putting people first
At Godrej Infotech, we value people be it customers or team members. The company boasts of a well-motivated team that comprises of Domain experts who can understand business and developers who are qualified Engineers, MCAs, CAs, ICWAs from reputed institutes.

Relationship approach
A dedicated special business unit (SBUs) has been created to handle a given project or assignment, thus making us not solution provider but partners in a client's business.

Internal processes
A well-structured organization with well-streamlined internal processes makes GITL a highly reliable service provider to clients looking for quality, dependability, and stability.

Technology unit capability
Dedicated technology units have been created for Microsoft, Infor and Digital projects with solution architects, subject matter experts, professional project managers and certified consultants.

Hospitality

Professional Services

Trading & Distribution

Pricing Models

Fixed Price Model
The customer pays a pre-negotiated fixed price for the complete project, which in turn is linked to clearly defined scope and deliverables.

Time & Material Model
Define the business model & work hand-in-hand with our client. The client pays a predefined hourly/monthly rate.
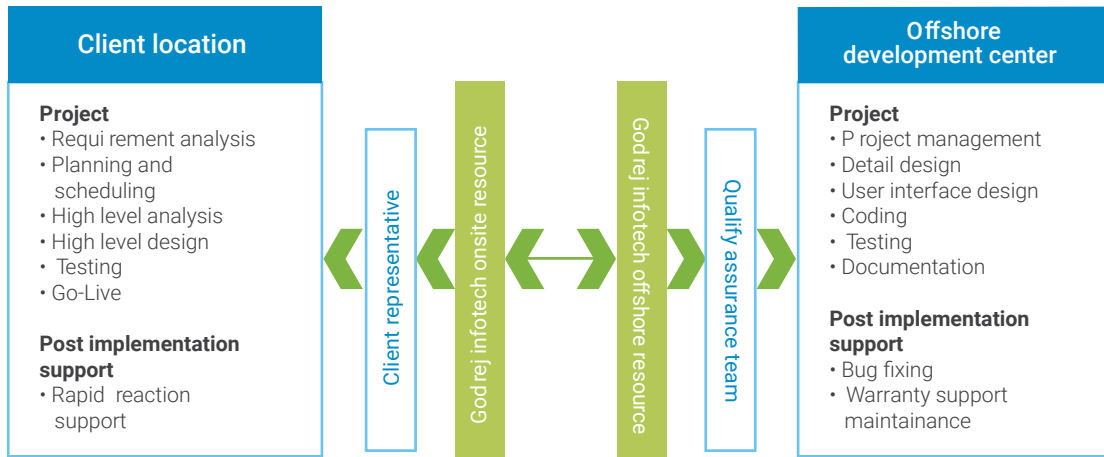

Hybrid Model
A major portion of the project is on a Fixed Price basis and at the same time resources are deployed on Time and Material basis. Adopting such a model enables the client to maximize their ROI without compromising any aspect of the project itself.
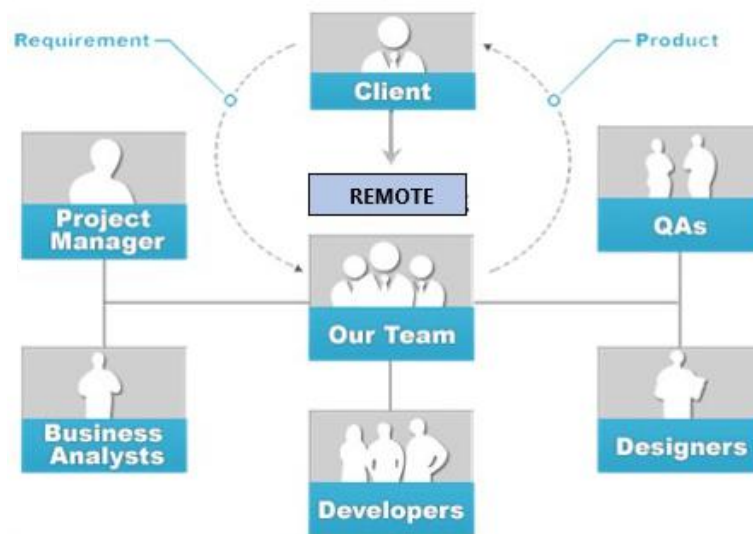

Build-Operate Transfer Model
We build an offshore facility for the Customer, Operate the offshore facility & customize it as per customer's needs & when model reaches maturity, we transfer the complete ownership of the facility & resources to the Client.

Global Delivery Models

Customer Stories

Global Provider of Engineered Solutions Selects Godrej Infotech Americas for Infor LN Value Added Services

Business Scenario

This organization was looking for experts who could add value during the rollout process of Infor LN Multi-Tenant (MT) Cloud along with testing services to ensure that all risks related to regular patch loading are mitigated.

Solution
- Successful cloud deployments of Infor LN, OS, Factory Track and PDE (Production Management System) developed in-house
- System & integration testing after patch loading

Benefits
- Support service is provided from offshore during US and Non-US hours resulting in significant cost savings for the customer
- Customer is happy with the timely response and high quality of work

Europe's Leading Manufacturer of Designer Radiators Selects LVD Godrej Infotech (LVDGI) for Multi-Country Roll-out of Infor Solutions

Business Scenario

The organization was looking for business process standardization across entities and collating group level best practices and processes using the Kernel model.

Solution
- Creation of a corporate kernel model with the standard base functionalities that are common to the group companies
- Deployment of Infor Factory Track and Infor OS at Dilsen in Belgium, Legnica in Poland, and Tubbergen in Netherlands

Benefits
- Reduced costs due to automation of shop floor, warehousing, and distribution activities
- Integration of business processes

Global Cosmetics Brand in KSA selects GITL for Magento e-Commerce implementation integrated with Business Central on Azure Cloud

Business Scenario

The organization was looking to expand their business by moving to online stores

Solution
- Implementation of B2C Omni Channel E-Commerce Portal on Azure Cloud
- Mobile application in English & Arabic
- Integration with 3rd party applications such as Google Analytics, Chat Bot Integration (Tidio) & WhatsApp Conversational Commerce

Benefits
- Enables customers for online product discovery & delivery from selected stores
- Highly robust, secure, & scalable solution

Digital Transformation at Ice-cream Retail Stores in KSA with LS Central Hospitality & Microsoft Business Central Implementation

Business Scenario
Organization was looking for automation & optimization of inventory management processes along with integration of HR & Payroll processes with their ERP system.

Solution
• Integration of Point of Sale (PoS) with the back office
• Employee Self Service Dashboard

Benefits
• Compliance with local Saudi labor rules & regulations
• Availability of real time data for quick decision making

Leading Distributor of Fruits & Vegetables in the Philippines Goes Live with D365 Finance & Supply Chain Cloud Solution

Business Scenario
The organization is a huge proponent of digital technology solutions for increasing operational efficiencies. It had been using SAP B1 for many years and decided to upgrade to D365.

Solution
• Single integrated solution covering CRM, ERP, and BI
• Localized solution for Philippines

Benefits
• Significant cost savings with the use of cloud technology
• Considerable reduction in duplicity of work

India's Innovative TV Audience Measurement Organization Goes Live with UiPath based Robotic Process Automation (RPA) Solution

Business Scenario
Customer wanted to reduce manual chores throughout the business that were taking up sizeable amounts of team member's time

Solution
• Initially the team took a proof-of-concept approach focusing on a few simple processes
• Since then, they've forged ahead with the creation of a robot for easy analysis of high volumes of data

Benefits
• Significant improvements in the stability & reliability of in-house reporting processes
• Increased data accuracy

India's Leading Construction Organization Implements IoT & ML Solution for Real Time Cement Calibration

Business Scenario
The organization was looking to reduce excess inventory carrying cost for cement

Solution
• Inventory optimization & forecast for process industry
• Business rules configured on Ki IoT Layer on AWS Cloud

Benefits
• Calibration of inventory in the silo with 98% accuracy
• Elimination of earlier manual & error prone processes
