### EX

### **Heatex Industrial**

Heatex Industrial Division offers a fast-track solution to industry's wide and varied requirements for electrical heating systems.

### **ATEX**

All hazardous area heaters manufactured by Heatex are certified to the ATEX Directive 94/9/EC. This directive became mandatory for all equipment put into service within the EU in July 2003. For more information on the requirements of the ATEX Directive contact sales@exheat.com.

### **PRODUCT RANGE**

Hazardous area air warmers, enclosure heaters and convector heaters.

Flameproof radiators, fan heaters, water boilers, immersion heaters and thermostats.

Safe area fan heaters, industrial convectors, in line heaters.

Vented and unvented storage water heaters, vat heaters.

Industrial, domestic, baptistry and portable immersion heaters.

Externally adjustable flameproof immersion heaters, thermostats and radiators.

Drum heaters silicone rubber and jacketed, IBC heaters, hazardous area.

Heating elements rod and core type, trace heating, thermostats, control panels.

Hazardous area safety switches and cable glands.

### **INDIVIDUAL SOLUTIONS and CUSTOM BUILT**

Because our standard range of products may not exactly meet our customer's requirements; Heatex Sales Engineers and Designers will, through consultation with their customers, design a custom built Hazardous or Safe area electric heater. This will ensure our clients procure the optimum heater for their applications.

### **FAW Hazardous Area Air Warmers**

- ► ATEX certified ⟨Ex⟩ II 2 G EEx'e' II T2 to T4
- ▶ 110V, 220 254V single phase, and 400 - 440V 3 phase
- Self colour stainless steel or painted finish
- Individually replaceable elements
- Optional wall mounting kit
- 250W to 3000W models available

### our complete range and technical datasheets @ www.exheat.com Order Heatex's latest catalogue online now

### **FLR Flameproof Liquid Filled Radiators**

- ATEX certified (Ex) II 2 G EEx'd' IIC T6
- Certified DIP B21 for dust
- Externally adjustable control thermostat
- Long life Incoloy 825 elements
- Powder coated white decorative finish
- Also available in standard, non hazardous construction
- 1kW to 3kW models available

### **FUH Flameproof Fan Heaters**

- ➤ ATEX certified **( )** II 2 G EEx'd' IIC T3
- ► Efficient liquid to air heat exchanger
- Over temperature protection
- Adjustable angle outlet louvres
- Typical applications include oil refineries, offshore platforms and munitions stores
- 6kW to 30kW models available

### **HEF Hazardous Area Enclosure Heaters**

- ► ATEX certified ⟨Ex II 2 G EEx'e' II T4
- Supply voltage 110V or 220-240V
- Self regulating
- Low surface temperature
- Can be installed anywhere within the enclosure
- 25W to 500W models available

Order Heatex's latest catalogue online now

### **FCR Hazardous Area Convector Heaters**

- ATEX certified ⟨εx⟩ II 2 G EEx'e' II T2 or T3
- Floor or wall mounting
- Small footprint
- Powder coated finish RAL7032
- Optional integral room temperature control thermostat
- 1kW to 3kW models available, 110V, 240V and 415V supply

### **STW Industrial Convector Heaters**

- Heavy duty construction
- Protective guard included
- Powder coated steel sheet construction
- Floor or wall mounting
- ▶ 110 or 240V supply
- Weatherproof to IP66
- 1kW to 3kW models available

### **ANB Fan Assisted Air Heaters**

- Wall or floor mounting
- Adjustable sweep angle
- ▶ 6kW to 17kW models available
- Factory fitted supply cable and plug
- Five position selector switch
- Integral control thermostat

### **FWD Flameproof Air Warmers**

- ATEX certified (Ex) II 2 G/D EEx'd' IIC T2-T4
- ▶ 110V or 230/240V single phase
- Self colour stainless steel or painted finish
- Individually replaceable elements
- Optional wall mounting kit
- 500W to 3000W models available

Order Heatex's latest catalogue online now

### **Unvented or Vented Storage Water Heaters**

- Glass lined steel or copper construction
- Fully insulated
- > 300 litres to 3000 litres storage volume
- Direct or indirect
- Expansion kit supplied (for unvented)

### **HFW Water Flow Heaters**

- Heavy duty copper cylinder
- Individually replaceable elements
- Lagged and clad
- Fitted with control and run dry protection thermostats
- Standard range 12kW to 54kW

### **MLH Inline Water Line Heaters**

- Mild steel or stainless steel
- Individually replaceable elements
- Lagged and clad
- Fitted with control thermostat
- Standard range 3kW to 12kW
- ATEX certified EX II 2 G EEX'd' IIC T3-T6

### **In Line Process Heaters**

- Available in safe or flameproof construction
- Rod, cartridge or removable ceramic core options
- Stainless steel, carbon steel, or copper / brass construction
- Typical uses include fuel / lube oil, water and compressed air
- Standard range 3kW to 120kW
- ATEX certified EX II 2 G EEX'd' IIC T3-T6

Order Heatex's latest catalogue online now

### **RFA-0S Flameproof Oversink Water Heaters**

- ► ATEX certified ⟨Ex⟩ II 2 G EEx'd' IIC T4
- Open outlet construction
- Easy oversink installation
- Copper cylinder
- Ideal for hand wash facilities in hazardous areas
- 2kW/240V single phase

### **FP-U Flameproof Water Boilers**

- ATEX certified (Ex) II 2 G EEx'd' IIC T4
- Stainless steel construction
- Drip proof, lever style, tap
- Dry run protected
- Ideal for tea making facilities in rest rooms located in hazardous areas
- 2kW/25 litres

### **FP-RCH Flameproof Cistern Type Water Heaters**

- ➤ ATEX certified 

  II 2 G EEx'd' IIC T4
- Integral cold water make up tank
- 25 litre to 100 litre hot water capacity
- Open vented construction
- Typical uses include washrooms and safety showers located in hazardous areas
- 2kW/240V single phase

### **HB Industrial Immersion Heaters**

- 2", 2 1/4" and 2 1/2" BSP. Brass screw plug
- Rod type 1kW to 18kW
- Removable core type 1kW to 6kW
- Bolt on flange fixing
- Rod type 12kW to 54kW
- Fitted with control and dry run thermostats

Available for order on line at www.immersionheaters.com

Order Heatex's latest catalogue online now

### **RFA Flameproof Immersion Heaters**

- 2", 2 1/4" and 2 1/2" BSP. Brass screw plug or industry standard flange
- Rod element type 1kW to 18kW
- Removable ceramic core type 1kW to 8kW
- Custom built heaters available on short delivery

### Flameproof Immersion Heaters with built in Externally Adjustable Thermostats

- ATEX certified ( II 2 G/D EEx'd' IIC T3-T6
- ▶ Built in externally adjustable thermostat
- Terminal box can be rotated to allow final cable entry position to be chosen
- Ambient or process sensing thermostat

### **FP-C Flameproof Immersion Heater**

- ATEX certified EX II 2 G/D EEx'd' IIC T3-T6 IP65
- Rod type 1kW to 150kW
- Removable core type 1kW to 120kW
- Built in process temperature sensors
- Stainless steel screw plug or industry standard flange

### **Immersion Heater Accessories**

- 7", 11" and 18" rod thermostats
- Various capillary thermostats
- Box and flat spanners
- Gaskets

Available for order on line at www.immersionheaters.com

### **PIH Baptistry/Portable Immersion Heaters**

- Stable, self supporting base
- 3kW/240V single phase
- Optional integral control thermostat
- Robust, stainless steel construction
- Long life, incoloy 825 element
- Ideal for baptismal pools, drum heating and vat heating

Available for order on line at www.immersionheaters.com

### **HSSD Side Drum Heaters (silicone rubber)**

- Silicone rubber insulated
- Double insulated construction
- 0 120°C thermostat
- 2 metre power cable

### **HV Vat Heaters**

- Single phase and three phase models
- Steel, titanium, stainless steel and PTFE coated elements
- IP55 terminal enclosure
- Optional integral control thermostat
- Custom built heaters to suit clients tank dimensions
- 1kW to 18kW models available

### **Side Drum Heaters (jacket)**

- 25L, 50L, 105L and 200L sizes
- 0 90°C or 20 220°C options
- Adjustable quick release buckles
- 3 metre braided power cable

### **HBD Base Drum Heaters**

- Even heat over platten area
- 20 150°C thermostat
- > 110V or 230V options
- 2 metre armoured power cable

### HIJD Insulation Jackets

- Polyurethane nylon jacket
- Water resistant
- Flame resistant
- **25L**, 50L, 105L, 200L sizes

### **HIDH Hazardous Area Drum Heaters**

- ATEX certified EEx'e' II T3
- Single phase 240V, 50Hz a.c.
- Suitable for 205 litre drums or smaller steel drums
- Supplied complete with 5m of galvanised steel wire braided cable

### **IBC Dual Circuit Jacket Heaters**

- Polyurethane nylon jacket
- Dual 1kW heating circuits separately controlled
- Supplied complete with 5m cable
- 0 90°C capillary thermostat
- 240V standard with 110V option

### **Electric Heating Elements**

- Rod and finned rod type available in various diameters and materials supplied straight or formed to suit
- Removable ceramic core elements built to order on short delivery. Vertical mounting option
- Cartridge heaters available in various diameters and materials. Built in thermocouple option

### **Thermostats**

**Heatex Electric Heaters & Control Systems** 

- Stem type auto reset
- Stem type manual reset
- Capillary type auto reset
- Capillary type manual reset
- Capillary type dual function
