

**Good Environmental  
Choice Australia**

**The GBCA's  
Green Star Program**

**GECA standards and where they contribute to Green Star**

## How do GECA certified products contribute to Green Star and their credit Points?

### A strong history...

Good Environmental Choice Australia (GECA) was the first ecolabel recognised under the Green Building Council of Australia's Green Star program, back in 2001. And today, we still remain strong partners in collaborating in pursuit of a sustainable future.

The GECA ecolabel has provided architects, building industry professionals, procurement managers and consumers with an independent, reliable and credible way to make environmentally preferred choices since 2001.

GECA is recognised under the GBCA's criteria for Evaluating Product Certification Schemes.

### What Green Star Categories and Credits apply?

The following pages detail each of our standards, recognised by GBCA's Green Star program and detail the tools and credits they apply to. Making it easier to specify for all Green Star projects.

This enables GECA certified products to earn Green Star points for Green Star projects certified under the previous Green Star legacy rating tools as well as under the recently launched new suite of Green Star rating tools for a high level of categories and credits.

For the Green Star Sustainable Products credit, all GECA standards (with the exception of our Furniture & Fittings standard at level B) are considered to be at the highest performance level (Level A). Please note we also have a Furniture, Fittings & Foam standard at Level A.

## Recognised GECA standards under the Green Star scheme, include:

- Adhesives, Fillers and Sealants
- Carpets
- Cleaning Products
- Floor Coverings
- Furniture and Fittings
- Furniture, Fittings & Foam
- Hard Surfacing
- Panel Boards
- Paints and Coatings

### JARDAN

*"GBCA Green Star projects are a fantastic way of promoting environmentally aware developments that benefit all parties involved. Jordan is committed to the advertisement of eco-labelling as a means of encouraging sustainable practice,"*

Andy Collins, Jordan  
(GECA Licensee)

# Carpets (Level A), GECA standard & the available GBCA Green Star credit points

This standard is applicable to natural fibre carpets such as wool; synthetic polymer fibre carpets comprising of nylon and nylon blends, olefin (polypropylene), polyester, acrylic and polyamide; and blends composed of materials that fit into the above fibre types.

greenstar

Green Star - Design & As Built

Building design and construction

V1.1

**Credit 13: Indoor Pollutants - IEQ Category**

**13.1.2A Carpets**  
Where at least 95% of all internally applied paints, adhesives and sealants and carpets meet stipulated total VOC limits. The product is certified under a recognised Product Certification Scheme (listed on the GBCA website). The certificate must be current at the time of project registration or submission and list the relevant product name and model.

**1 Green Star credit point**

**Credit 21: Sustainable Products - Materials Category**

**21D Third Party Certification**  
Third party certifications schemes assessed and recognised by GBCA as on their website at Levels A, B & C. Sustainability Factors (highest SF=1.0, i.e. 100% weighting) used in calculations for the various levels. Level A – 1.0 (100% weighting) Level B – 0.75 (75% weighting) Level C – 50% (50% weighting).

**Up to 3 Green Star credit points**

GECA certified Modulyss Carpet

# Floor Coverings (Level A), GECA standard & the available GBCA Green Star credit points

Is applicable to a range of floor coverings and carpet underlays that are laid on top of a foundation of concrete or wooded beams, and are not part of the building structure. Includes materials such as parquet, wooden planks, engineered wood products, bamboo, cork, rubber, vinyl and linoleum that are fixed to the floor and laid on top of an underlying foundation of concrete or wood beams. It does not include floor coverings that are applied in a liquid state.

# Floor Coverings (Level A), GECA standard & the available GBCA Green Star credit points

Is applicable to a range of floor coverings and carpet underlays that are laid on top of a foundation of concrete or wooded beams, and are not part of the building structure. Includes materials such as parquet, wooden planks, engineered wood products, bamboo, cork, rubber, vinyl and linoleum that are fixed to the floor and laid on top of an underlying foundation of concrete or wood beams.
