## Grade 2

| Essential Question(s): | How do operations affect numbers? |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| How do we use addition and subtraction to solve problems? |  |  |  |  |  |
| 21st Century Theme: |  |  |  |  |  |
| Content: | Operations and Algebraic Thinking |  |  |  |  |
| Standards: | 2.0A |  |  |  |  |
| A. Represent and Solve problems involving addition and subtraction |  |  |  |  |  |
| Skills | Instructional Procedures | Assessment | Resources | Interdisciplinary Connections | Vocabulary |
| 1. Use addition and subtraction within 100 to solve one- and two- step word problems involving situations of adding to, taking apart and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem. | Concretely model and discuss a large variety of problems. Use drawings \& equations with a symbol for the unknown number to represent the problem. Construct and solve open simple sentences. Solve for results unknown: 6-2= $\qquad$ or $n=3+5$ Solve for parts unknown: 3+ =8 $\qquad$ | Formative Assessment Open- ended Problem Self Assessment Teacher Observation Benchmark Assessment Homework Review Classwork Review Project-Based Assessment Timed Drills | Counters <br> Ten Frame Base Ten Blocks Number Line Abacus Calculator Computer Software Calendar |  | Digits <br> Sum <br> Addends Ten Frame Difference Equal |

## Grade 2

|  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Essential Question(s): How do we understand place value and use properties of operations to add and subtract? | How do we understand place value and use properties of operations to add and subtract? |  |  |  |  |
| 21st Century Theme: |  |  |  |  |  |
| Content: | Number and Operations in Base Ten |  |  |  |  |
| Standards: | 2. NBT |  |  |  |  |
| A. Understand place value |  |  |  |  |  |
| Skills | Instructional Procedures | Assessment | Resources | Interdisciplinary Connections | Vocabulary |
| 1. Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones; e.g., 706 equals 7 hundreds, 0 tens, and 6 ones. Understand the following as special cases: 100 can be thought of as a bundle of ten tends-- called a "hundred". The numbers 100, 200, 300, 400, 500, 600, 700, 800, 900 refer to one, two, three, four, five, sex, seven, eight, or nine hundreds (and 0 tends and 0 ones). | Understand that the three digits of a three digit number represent amounts of hundreds, tens and ones. | Formative Assessment Open- ended Problem Self Assessment Teacher Observation Benchmark Assessment Homework Review Classwork Review Project-Based Assessment Timed Drills End of the Year Benchmark Assessment Math Software (ex. Study Island) Group \& cooperative work | District Specific Texts <br> Base ten blocks Place Value Manipulatives |  | Hundreds <br> Tens <br> Ones |
| 2. Count within 1000; skipcount by $2 \mathrm{~s}, 5 \mathrm{~s}, 10 \mathrm{~s}$, and 100 s | Count by multiples of $2 \mathrm{~s}, 5 \mathrm{~s}, 10 \mathrm{~s}$, and 100s | Same as above | Number line | Literature: Spunky Monkey Parde by: Stuart J. Murphy | Skip count |
| 3.Read and write numbers to 1000 using base-ten numerals, number names, and expanded form. | Compose and decompose multidigit numbers (including expanded form) | Same as above | Calculators Number line Abacus |  |  |

Math Curriculum

## Grade 2

| 4. Compare two three digit <br> numbers based on meanings <br> of the hundreds, tens, and <br> ones digits, using symbols to <br> record the results of <br> comparisons. | Compare and order whole <br> numbers to 1000 <br> Use $<,>,=$ to compare whole <br> numbers |  | Same as above | Ten Frame <br> Base Ten Blocks |
