US Army Corps of Engineers
 BUILDING STRONG,
 and Taking Care of People!

Welcome to “Doing Business With Us”

It is my honor to present the U.S. Army Corps of Engineers (USACE) Great Lakes and Ohio River Division Fiscal Year 2018 Contracting Opportunities Forecast. The Great Lakes and Ohio River Division is comprised of seven (7) districts: Buffalo, Chicago, Detroit, Huntington, Louisville, Nashville and Pittsburgh. This week, we afford you *over 100 opportunities* to help the “Nation’s Engineers” execute our mission, and achieve established small business goals. We depend on you as competent, responsible contractors to help us bring value to the Nation, and abroad.

Doing business with USACE is simple. Once a requirement is identified, we conduct market research through outreach events such as this week’s SAME Small Business Conference and district Business Opportunities Open House, and project specific industry days. We rely on ‘Sources Sought’ notices posted at the Federal Government’s Point of Entry website, FedBizOpps.gov (www.fbo.gov), and use the Small Business Administration’s Dynamic Small Business Search (<http://dsbs.sba.gov/dsbs>) to identify businesses interested in performing the work.

For your convenience, our forecasted contract opportunities for Fiscal Years 2018 & beyond are displayed by district. We invite small business, women-owned small business, veteran-owned/service-disabled, veteran-owned small business, small disadvantaged, historically underutilized business zone, and historically black colleges and universities/minority institutions to work with us. If you have questions about an opportunity within a district, do not hesitate to call or e-mail any point of contact beginning on page 20.

Sincerely,

Lenneia R. Jennings, Acting Assistant Director
Office of Small Business Programs
U.S. Army Corps of Engineers
Great Lakes and Ohio River Division

Mission Statement

To sustain the Corps of Engineers as a premier organization in developing small businesses and maximizing their opportunities to participate in our procurements, thereby ensuring a broad base of capable suppliers to support the Corps of Engineers’ mission and strengthen our Nation’s economic development.
