Gmail Integration

Introduction | [Install bookmark link](#)

Gmail is a great email reader. Todoist is a great task manager. Combine them and you get the best of both worlds! Gmail + Todoist things:

- Delegate emails to Todoist directly from Gmail - with a single click!
- Sort your emails into projects.
- Assign due dates to emails. This way you won't forget to answer important emails.
- Read or answer emails directly from Todoist using Gmail's known interface.

Privacy: Todoist does not store your emails or your Gmail login information. In order to use this feature, you must be logged in to Get started by [installing the bookmark link](#).

1: Delegate emails from Gmail

When you read an email and don't have time to answer or process it you press a **Delegate to Todoist** bookmark link. This opens create a task and add it to a specific project:

The screenshot shows a Gmail email with a 'Delegate to Todoist' button. A pop-up form is displayed with the following fields: 'Todoist item' (containing the email content), 'Add', 'Date' (set to 'today'), and 'The project'.

GTD: RescueTime

Ridiculously Easy Time Management & Analytics

For Business Groups... For Individuals...

- with no data entry**, understand how your team is spending their time
- help your group get more done in less time... with no micromanaging!
- see which software is being used and which is collecting dust

- understand how you're spending your time -- **no data entry**
- clutter procrastination & beat interruption overload
- compare your productivity to your peers without giving up your privacy

SproutLiner^{Data}

Existing users enter here:

New Users, Welcome to SproutLiner!

Sproutliner is a free web service that helps you manage your projects and ideas (think of it as a supercharged structured-to-do list). It uses some rather smashing client-side technology to make things as quick and easy as possible, without forcing you to worry about hitting 'submit' to save your precious data.

• interface	<input checked="" type="checkbox"/>	approved	priority	something else
• subject on submit	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	high	call the colour
• backend	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	medium	
• charts	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	low	I like bees
• bolts	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	low	and also
• seabears	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	medium	chocolate
• addad	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		
• sproutliner pro	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		

Manage your tasks

Drag and drop realtime editing, no more hitting submit, put your ideas and plans down as fast as you can think of them.

Store data your way

Create your own columns, create checkboxes, drop-down lists, or free text fields, then recorder and rename them whenever it suits.

pfandersen - welcome!

This web application is designed to help you get things done. Account is divided in these sections:

Next Actions

To move a project forward, you must identify what your next action is. All your next actions (actions marked with a "star") from your projects will appear here.

You have: **1 next action(s)**

Projects

Your actions (to-do's) and notes are divided into projects. First you need a project and then you can add items to it.

You have: **1 out of 5 projects**

Contexts

To get your things done even faster, you can organize them into contexts like: Home, Office, Phone, Computer... etc.

[Click to find out how contexts will make you even more productive.](#)

Work in Contexts to get things done:

Print | Email | Feed

Project: Inbox New Project

This is your first project - automatically created for you by Nozbe. Inbox is more like a container or bucket where you can store your actions and move them to other projects at a later time. Of course you are free to rename this project and edit this info by clicking on 'edit description' link below.

Project Tags: *No tagged projects*

This project: [Share](#) | [Edit](#) | [X Remove](#)

Actions (to-do tasks) New Action

List of your actions

- 1 First action, click on 'NEW ACTION' for more! 5 min
- 2 Edit action - hover over it and click 'Edit' on the left... or simply double-click on it! When in 'edit mode', you can also move actions between projects. 5 min
- 3 Time-tracking - decide how much time you need to complete an action - this one - 15 minutes :-)
- 4 This action is 'starred' - it's your NEXT action! 5 min
- 5 When an action has been completed today, it stays here until midnight, later it will be removed and archived. 5 min
- 6 Reorder items by dragging the 'hand' icon on the left 5 min
- 7 Icons are symbols of contexts like Errands, Phone...

Completed: 1 / 7 Time: 0 h 5 min. / 0 h 45 min., left: 0 h 40 min.

email address

What is TaskAnyone?

TaskAnyone is a web-based task and project management service which allows you to keep track of your daily to-do's plus send tasks to anyone with an email address. Tell your colleague, supplier or spouse what to do and all details, deadlines and updates will be logged until it's completed.

With TaskAnyone you can:

- Send a task to anyone with an email address
- Monitor progress in real time as tasks are accepted, updated and completed
- Send "nags" to people who haven't yet completed their tasks
- Receive email alerts when tasks are changed
- Group tasks into folders and share folders with your team

Unlike other services:

- Task recipients don't have to sign up with the service - embedded email links let them 'accept', 'update' or 'complete' in one click
- Email reminders mean task recipients aren't required to regularly check the website to keep up-to-date
- You can create tasks with subtasks for a more detailed work-flow

GTD: GTD Reviews

What's the next action
A weblog about Getting Things Done

5 GTD systems I stopped using and why
14 01 07 - 00:34 - [Bookmark this post](#)

About
This is an article which is part of my weblog "What's the Next Action". It deals with everything **GTD** and the five phases of projectplanning as written by Dave Allen in his book "Getting Things Done".
The previous article on this blog is called ["Weekly Review on a lazy Sunday afternoon"](#).
The next article on this blog is called ["Another online listcreator hits the market"](#).
You can find all the articles on [the frontpage](#).
You can contact me via email on [punkney at gmail dot com](#).

1. OnFolio
One of the biggest reasons why especially IT-people, bloggers and geeks are drawn to **GTD** is it's possibility to tweak and play with the system. For some reason, the 5 phases of **GTD** invite to find, install and play with all sorts of online and offline applications. Because it is mainly build around lists, contexts and the notion that you have those lists with you, mobile applications talk with desktop applications, online web 2.0-esque startups built around lists and the likes.
But over the last two years I am into **GTD**. I must say I have yet to find the perfect system. And you know what? I don't think I will ever find. If I were a very literate person, I would insert some smart Buddha quote here about the journey and the destiny, but forget that. I want to talk about five systems I have tried myself and why I stopped or will stop using them.

MY STROKE OF INSIGHT

Updated Mindmap / Flowchart of Getting Things Done (GTD) by David Allen

I recently created several educational **mindmaps** with MindManager (see [here](#) and [here](#) for examples). As an experiment, this is a mindmap I created of the methodology of **Getting Things Done** by David Allen. (Click on image to enlarge.) (UPDATE: By popular request, I've also created a **printable PDF file**. If DavidCo gives me permission, I'll publish the original MindManager file; until then, I'd encourage you to create your own mindmap for personal use.) It's a detailed map, but I found it helpful to have a bird's eye view of the entire system. Please note that these are not my ideas, this mindmap is provided for educational purposes only, and I encourage you to visit [Davidco.com](#) and/or buy **Getting Things Done**. It's worth reading.

Distraction Free GTD: 32 Todo List Web Applications

iot
Internet Duct Tape

The fine folks at **LifeHacker** have forced me to tip my hand with their post on using **Web Runner** as a distraction free browser. **Web Runner** is a tiny site-specific web application that runs using less resources than Firefox or Internet Explorer.

The whole idea behind a site specific web browser is that you want to access a web application without being tempted to access other sites. You want to access a site without being distracted by the rest of the Internet. A good example is an online todo list or GTD application. You want to be able to quickly access your todo list to add or check-off items without getting caught in an Internet black-hole.

e-Learning Reloaded: Top 50 Web 2.0 Tools for Info Junkies, Researchers & Students

Published on Monday 18th of February, 2008

By **Jessica Hupp**

There's a reason why the Web is called the information superhighway—it's full of seemingly limitless resources for learning and research. And with the advent of Web 2.0, harnessing this information has never been easier. These are some of the best tools for organizing, citing, searching, and more online.

Organization

With all of the information available online, it's hard to keep track, but these tools will help you stay together.

1. **BSS**: For ongoing publications, you can subscribe to syndicated feeds and get updates every time there's new information.
2. **Backback**: Backback does what it sounds like it does—it keeps all of your stuff like notes, lists, ideas, calendar, and more all in one handy place.
3. **Remember the Milk**: Create a checklist for your project, stay on top of assignments, and more with this handy to-do app.
4. **Google Docs and Spreadsheets**: Keep all of your documents online, and even collaborate with peers using this tool from Google.
5. **Google Notebook**: Add clips, organize your notes, and even access your notes from your mobile phone with Google Notebook.
6. **openmy**: Store files up to 1GB so that you can research and save information from anywhere with an Internet connection.
7. **ThinkFold**: Create outlines that can be shared and collaborated in realtime using ThinkFold.
