# Thermofoil Doors

---

**GLASGOW**  
Ebony Gloss

**NIESEN**  
Maria Rose Gloss

**CESARO**  
Wenge Gloss

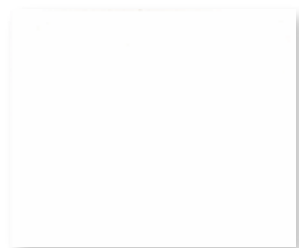

**ODESSA**  
Macassar Gloss

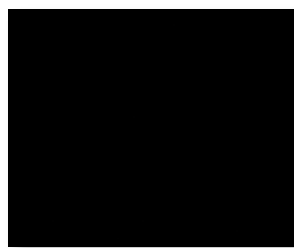

Thermofoil is constructed with durable, stain-resistant rigid thermofoil (RTF) applied to sculpted ¾"-thick medium density fiberboard (MDF). Clean, simple lines and the smooth, seamless look of thermofoil makes it a fashionable choice for contemporary designs. And now, with advancements in print technology, the wood grain thermofoils have a depth and clarity of character not previously possible. Whether you choose a solid color or an exotic wood grain, Thermofoil offers consistent high-gloss color that won't fade and resists heat & humidity. Durable. Fashionable. Sensational!

# Finish **OPTIONS**

## **STANDARD SPRAY STAIN FINISH**

Our Standard Spray Finish does not require wiping, so the stain on the wood surface gives a vibrant visual pop to the finish. That helps blend discrepancies in the wood grain and gives a smooth, consistent appearance as durable as it is beautiful.

## **GLAZE/SPRAY STAIN FINISH**

Glaze is applied on a spray finish as 'hang-up only' to accent edges and crevices on corners and profiles without affecting the base stain color. Glaze/Spray Finish accentuates designs and shapes for an aged, comforting quality.

## **DISTRESSED STAIN/GLAZE FINISH**

Distressed Finish on a spray stain has a 'hang-up only' glaze and looks best with lighter techniques such as bird pecking and random distressing for a time-worn, artistic look. For heavier distressing, we recommend hand-wiped stain and glaze.

## **STANDARD WIPING STAIN FINISH**

The Standard Wiping Finish is applied by hand to penetrate and develop the grain, resulting in a satiny finish with unique character that reveals the wood's true beauty.

## **ENAMEL FINISH**

Our enamel finishes have a primer tinted to match the finished enamel color. This gives a more consistent finished color that wears better over time. Beautiful Woodharbor enamels are true enamels and not an opaque stain.

## **GLAZE/WIPING STAIN**

The glaze of Glaze/Wiping Stain is hand-applied over the entire surface, leaving a glaze hang-up in crevices and corners for increased vibrancy, depth of color and a distinctively warm look. This process slightly tints the base stain color.

## **CLASSIC FINISH**

The Classic Finish intensifies color through a two-step staining process. This accentuates grain pattern and adds dimension for a deep, lustrous finish that suggests the look of fine furniture.

## **RUSTIC FINISH**

Rustic Finishes use various stains, glazes and hand detailing (such as distressing, wormholing and dry-brushing) for an old-world, fine-furniture look.

## **GLAZE/ENAMEL**

Glazed Enamel Finish is applied as 'hang-up only' to accent edges and crevices on corners and profiles, not the entire surface. This will not affect the base enamel color.

## **HERITAGE ENAMEL**

Heritage uses two primer coats tinted to match the enamel color with rub-through detailing, plus spatter and a matte sheen topcoat for an appealing, time-worn look.

## **BRUSHED GLAZE/ENAMEL**

Brushed Glaze/Enamel Finish uses an artistic technique that leaves brush marks in the enamel to add depth, texture and a beautiful aged look with a hand-painted feel.

## **OLDE PAINT COLLECTION**

Olde Paint has an underlying stain to give the appearance of staining prior to painting for a nicely aged look. Then we apply two primer coats tinted to match enamel color with the rub-through detailing, as well as with the spatter and matte sheen topcoat.

## **VINTAGE COLLECTION**

Vintage starts with subtle hand distressing, then an underlying stain and two primer coats to match the enamel, plus rub-through detailing. Finally we apply a brushed stroke, add spatter and add a matte sheen topcoat – all for a rich antique look.

## **SAWYER COLLECTION**

Sawyer starts with several types of distressing for a worn, aged look. Next we apply two primer coats tinted to match the enamel color with rub-through detailing, which includes random knots and knife cuts. Then comes a special brush stroke technique. Finally, a matte sheen topcoat is used to enhance Sawyer's rich appearance.

## **PAINTABLE FINISH**

Paintable finishes use hardwood on face frames and stiles & rails of doors and drawer fronts. A smooth substrate (MDF) is used for doors, drawer front panels, slab drawer fronts and plywood components. Subtle telegraphing of the grain is visible.

# Profiles & SHAPES

## DOOR STYLE PROFILES

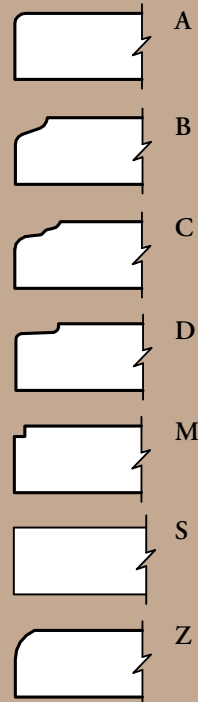

Woodharbor offers four distinctive profiles. Talk to your dealer or designer about the profiles available in the door style you select.

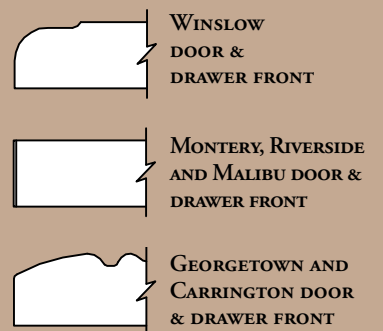

## EDGE SHAPES

An edge shape must be specified for the perimeter of most door styles. Ask your dealer or designer which edge shapes are available in the style you choose.
