FAA Endorsements In Detail

The endorsements provided here are provided as a combination of FAA reference guidance for most areas of endorsement that instructors provide. The endorsements provided are derived from a combination of sources, primarily Advisory Circular (AC) 61.65E but also come from a variety of other FAA guidance documents and the FAR's themselves. In some cases, the endorsements provided here have been modified from those provided in AC 61.65E. They have been modified to include greater detail in the endorsement areas of training covered and required for the endorsement, rating, or certificate.

This listing also includes some endorsements that are not included AC 61.65E but are required by FAR. These are the prerequisites for practical test endorsements per FAR 61.39(a) that are required for all practical tests. It is also common and appropriate to combine these two endorsements. In some cases, a separate instructor may sign off two areas of endorsement in the same area of requirement.

Usage Notes:

- Areas that are listed in italics indicate that the instructor completing the endorsement should choose the appropriate input for the section.
- Some endorsements in this document can be combined. However, by separating each endorsement it increases the clarity of the endorsement and eliminates some of the potential for omission of a required endorsement.
- Different ratings have different numbers of endorsements that may be required. NAFI has included all the necessary endorsements for each practical test that is detailed in this document.
