- Class Leading Converters
- Advanced Headphone Output
- Low Latency Monitoring
- USB 2.0 High speed (USB-C)

THE ULTIMATE VALVE GUITAR PREAMP

Dial Up Tones Instantly

3 BAND ANALOGUE TONE CONTROL

Shape Your Sound

Fine tune your sound on the way in with Sono's 3 band analogue EQ and add body to your heavy tones or that extra bit of sparkle to your clean tones.

Combining an on board 12AX7 analogue valve and 3-band Tone control with Two notes Torpedo power amp modelling and cab simulation, Sono lets you quickly create, record and store the guitar sounds you hear in your head.

PRESET MANAGER

GREAT TONES WITH THE POWER OF TWO NOTES

Record Through Your Favourite Amps

Play and record through some of the best guitar and bass cab models including flawless reproductions of classics such as the Marshall 4x12, Fender 2x12, Ampeg 8x10 and many more.

TORPEDO REMOTE SOFTWARE

Create Your Ultimate Rig

Customise everything from the room type, microphone model to the placement and more - all from an intuitive desktop app. Once you find a tone you love, store up to 3 presets on board.

AUDIENT CONSOLE MIC PRES

Recording Made Easy

Sono provides over 20 years of analogue console design heritage on your desktop. Get studio quality recordings with two of Audient's renowned console mic preamps, whether your recording guitar, bass or vocals.

INTEGRATE YOUR EXISTING PEDALBOARD

Your Pedals, Our Cabs

Plug in your favourite reverb, delay or distortion pedals and combine your unique sound with the power of Two notes and start recording your favourite tones.

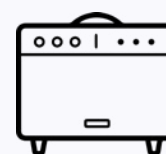

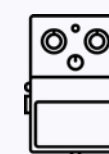

RE-AMP OUTPUT

Output Through Any Amp And Hit Record

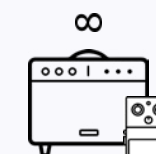

No need to buy a dedicated re-amp box. Sono always records a clean D.I signal, so you can capture your performances as creativity strikes and reamp through your favourite hardware amps later.

Run D.I through pedals

Unlimited options

DIGITAL EXPANSION

Record Your Band

Why stop at guitar? Expand up to 10 inputs via ADAT and record drums, multi-mic cabs or even capture live performances. Sono lets you take your track from start to finish.

BUILT TO LAST

Your Tone, Everywhere

Sono's all metal construction is built to last and ready to travel. Be ready to write, record or jam with the sounds you love no matter where you are.

LOW LATENCY TRACKING

Get Better Performances

Get ideas down quickly

Zero latency tracking

Don't let latency get in the way of your creativity. Monitor mix allows you to blend between the input signal from your guitar and DAW playback, letting you record and monitor without delay.

RECORD ON THE FLY

Capture Creativity Fast

Simply load up your go to sound and start recording instantly without the need to mic up and play through a noisy amp - perfect for home studios.

JAM AT HOME

Great Tones At Low Volume

No need to set up big rigs or turn on your computer, just load up your favourite preset, plug in your headphones or speakers and start jamming without the risk of annoying your neighbours.

RECORD YOUR LIVE PERFORMANCE

Your Place In History

Ever play that once in a lifetime gig but have absolutely no evidence of it ever happening? Hook up Sono to a laptop, open your DAW, hit record and share your performance with the world.
