Vitesse

The Vitesse range of curtain tracks is one of the most comprehensive available. There is a Vitesse track for almost every application, from the lightest of net tracks to heavy-duty corded or motorised tracks for large or heavy curtains.

The hand-drawn tracks shown here are each designed to be strong, reliable, and to give years of trouble-free use. The range comprises 10 different track profiles, all manufactured from aluminium with high-grade plastic components, and complete with a choice of sturdy and unobtrusive brackets.

Hand drawn curtain tracks, as well as being economical and simple to operate, are often the preferred option in public areas where many different persons may draw the curtains. When specifying hand drawn tracks, window size, curtain weight, usage intensity, fixing requirements and aesthetics should all be assessed, allowing the most appropriate track to be selected. The details on these pages will enable the specifier to make informed decisions with reference to these requirements, thus ensuring that Vitesse hand drawn curtain tracks will give optimum performance and lasting satisfaction.

Vitesse curtain tracks are available in fully made to measure form - completely ready for installing, or in a comprehensive individual component form - for ease of use within any in-house manufacturing facility. The full range is distributed globally through a network of dealers and customers providing an unrivalled level of support, and with experienced installation and service teams to exceed your expectations.

All products in this range carry the Yewdale Bridge 5 year warranty

Maintenance

All Vitesse hand drawn curtain tracks are designed to require little or no maintenance. The tracks and components are made from durable materials that will not corrode in normal use. In the event of damage most components are replaceable. Tracks with gliders may be lubricated occasionally with a sparing application of silicone to retain sliding efficiency. Tracks with roller runners should not be lubricated. Spare parts may be obtained from the dealers.

Hand Drawn Curtain Tracks

System 5000W

- Top-fix track, normally mounted on wood
- Aluminium track with neat and unobtrusive design
- Widely used in motor vehicles, caravans, boats and aircraft
- For use with lightweight curtains and nets

Vitesse

Vitesse electric tracks represent the ultimate in curtain control. Not only do they lend support to an ambience of success and luxury, they are also eminently practical. At the touch of a button they will glide into action, smoothly, quietly, and with an effortless power that ensures lasting satisfaction. A large range of control systems is available, from a simple wall switch to radio remote handsets, or even complete integration into intelligent building control.

The electric tracks shown here are designed for strength and reliability, and will give years of trouble-free use. They are all manufactured from aluminium, with high-grade plastic components and sturdy, unobtrusive brackets. When selecting a track, window size, curtain weight, usage intensity, fixing requirements and aesthetics should all be assessed, allowing the most appropriate track to be specified.

Vitesse curtain tracks are available in fully made to measure form - completely ready for installing, or in a comprehensive individual component form - for ease of use within any in-house manufacturing facility. The full range is distributed globally through a network of dealers and customers providing an unrivalled level of support, and with experienced installation and service teams to exceed your expectations.
