CLS - Licensing of
integration product (feature)

OpenScape Voice V9

The logo for Atos, featuring the word "Atos" in a bold, blue, sans-serif font. The letter 'o' is stylized with a white circular cutout in the center.

History of Changes

Ver.	Released	RDB#	Changes
1.0	2016-01-27	5835, 5839, 6029	Initial Creation
1.1	2016-09-08		Adding F31505-K147-D10 and F31505-K147-D11 features
1.2	2016-10-03	6347,6428	OSEE Features
1.3	2016-11-07	6348	OpenScape Enterprise Express V9 add SLL V2 (Enterprise and Hosted) to OSEE V9
1.4	2016-12-05	6340	[RDB 6340] OpenScape Voice V9: Minor release V9R1 (two new user licenses - relevant for ELA)
1.5	2017-04-03	6672	OSEE V9 Crossgrade from OS 4k to OSEE v9
1.6	2017-05-02	6824	OSEE V9: SWA V2 Promo Upgrade order items changed to new structure
1.6	2017-05-02	6890	OSEE V9: update product structure for OSEE V9 (new package Identifier for User- & Resource Packages)
1.7	2017-06-05	6738	OpenScape Voice V9: release of OSV V9R2
1.8	2017-07-03	6955	OSEE V9: Crossgrade OSEE V9 from OS4k V8
1.9	2017-07-03	6946	OpenScape Voice V9 : Flex license from OS4k V8 to OSV V9

Introduction

Purpose of the document

The document describes the differences of the CLS licensing process between this product (feature) and the standard process of OpenScape License Management (see document License Guidelines).

Product Information

General

- a) Depending on the target environment either a MAC Address or the Advanced Locking ID has to be used as Locking ID. In case of a virtual environment the Advanced Locking ID has to be used. If your system does not display the Locking ID to use, you can calculate the Advanced Locking ID on CLS. For this please click on one of the "Calculate Locking ID" buttons and enter the requested system parameters.
- b) The total user quantity (Dynamic + Flex) must not exceed 100000.
- c) For systems with 5000 user licenses (or more) you have to use a standby server. After activating the main system, you have to activate feature "OS Voice V9 Redundancy" onto a second Locking ID. At this point, you will be asked also for the SIEL-ID of the main system.
- d) With feature "OS Voice V9 Pre-Production", it is possible to generate up to 2 licenses for a Pre-Production environment that equals to the production environment. Activate this feature onto separate Locking IDs and enter the SIEL-ID of main system as reference.
- e) The "OS Voice V9 OP Flex Migration HP4K <V6" feature is used to migrate from HiPath 4000 systems <V6 to OS Voice. If this feature is activated a survey question appears where the user has to enter the HiPath 4000 systems ID's (comma separated) the user migrates from. This information is used to generate a special OpenPath Flex Migration report. In the license key the OpenPath Flex feature is treated like Dynamic User licenses.
- f) With feature "OS Voice V9 OP Flex Migration HP4K V6" it is possible to migrate OpenPath Flex licenses from an existing HiPath 4000 V6 system to an OpenScape Voice V9 system. During activation you will be asked to enter the system id of the HiPath 4000 V6 system from where you want to migrate HiPath 4000 Flex to OpenScape Voice V9 Dynamic licenses.
- g) With feature "OS Voice V9 OP Flex Migration OS4K V7" it is possible to migrate OpenPath Flex licenses from an existing OpenScape 4000 V7 system to an OpenScape Voice V9 system. During activation you will be asked to enter the system id of the OpenScape 4000 V7 system from where you want to migrate OpenScape 4000 Flex to OpenScape Voice V9 Dynamic licenses.
- h) With feature "OS Voice V9 OP TDM Migration OS4K V7" it is possible to migrate OpenPath TDM licenses from an existing OpenScape 4000 V7 system to an OpenScape Voice V9 system. During activation you will be asked to enter the system id of the OpenScape 4000 V7 system from where you want to migrate OpenScape 4000 Flex to OpenScape Voice V9 Dynamic licenses.
- i) Upgrades from previous versions are available (see chapter 0).
- j) License keys for feature "OS Voice V9 Product Instance for SL" are time limited although the CLS shows them as permanent. All licenses will expire with January 31st of the following year except when generated after November 30th. In this case the expiration is extended by one additional year. For those licenses that belong to a valid contract the license keys will be deleted with November 30th. This will allow the user to regenerate the license key with the new expiration date. As this feature enables a standby server an additional Locking ID field has to be filled.
- k) Feature "OS Voice V9 Mobile V9 User Evaluation" can be used to evaluate the product OpenScape Mobile V9 for 180 days with an existing OpenScape Voice V9 system. It is not possible to use this feature together with feature "OS Voice V9 Mobile V9 User".

- l) Quantity of feature "OS Voice V9 Mobile V9 User" has to be less or equal the Voice Dynamic user quantity.
- m) Every installation (base, standby pre-production) needs one SUSE license (except Evaluation).
- n) The remaining duration of the SUSE Upgrade Protection (updates for the SUSE operating system) is shown by the features "OS Voice V9 SuSE 3 Year Upgrade Protection", "OS Voice V9 SuSE Ext. 1 Year Upgr. Protection" and "OS Voice V9 SuSE Ext. 3 Year Upgr. Protection".
When activating "OS Voice V9 SuSE Ext. 1 Year Upgr. Protection", the duration of already activated "OS Voice V9 SuSE 3 Year Upgrade Protection" is extended for further 1 year (360 days) and when activating "OS Voice V9 SuSE Ext. 3 Year Upgr. Protection", the duration of already activated "OS Voice V9 SuSE 3 Year Upgrade Protection" is extended for further 3 years (1080 days).
- o) "OS Voice V9 SuSE Ext. 1 Year Upgr. Protection" or "OS Voice V9 SuSE Ext. 3 Year Upgr. Protection" can be activated under the condition, that their amount is not exceeding the amount of already activated "OS Voice V9 SuSE 3 Year Upgrade Protection".
- p) "OS Voice V9 SuSE 3 Year Upgrade Protection" and "OS Voice V9 SuSE Ext. 1 Year Upgr. Protection" cannot be activated at the same time.
- q) Feature "OS Voice V9 Encryption User" can be added to normal base, demo and product instance systems.
- r) For more information on "how-to" processes and examples on Software Support Licensing (SSP Licensing) please see the pdf document at this link: https://www.central-license-server.com/license-management/CLS-Help/SSP_Licensing_at_CLS.pdf

Features

Feature #	Feature Name
F31505-K147-D1	OS Voice V9 Base
F31505-K147-D2	OS Voice V9 Dynamic User
F31505-K147-D3	OS Voice V9 Client Access User
F31505-K147-D4	OS Voice V9 UC Server
F31505-K147-D5	OS Voice V9 Redundancy
F31505-K147-D6	OS Voice V9 Pre-Production
F31505-K147-D7	OS Voice V9 SuSE 3 Year Upgrade Protection
F31505-K147-D8	OS Voice V9 SuSE Ext. 1 Year Upgr. Protection
F31505-K147-D9	OS Voice V9 SuSE Ext. 3 Year Upgr. Protection

OS Voice V9 Mobile V9 User		100000
OS Voice V9 Mobile V9 User Evaluation		1

* Cannot exceed the user license quantity

First Licensing

Either feature "OS Voice V9 Base" has to be used (except for evaluation, demo or Product Instance systems).

Minimum system configuration for "OS Voice V9 Base":

Feature	Min Qty Limit
---------	---------------

Handling Instructions CLS

OS Voice V9 Dynamic Users	25
OS Voice V9 UC Server	1

Add-On Licensing

Nothing special

Rehost

Please use the Rehost workflow to change values of additional input fields, e.g. a Standby Server Locking ID.

Search for the main Locking ID of the system and perform a Rehost.

Re-enter the former main Locking ID and change the value of the field you want to modify, e.g. enter a new Standby Server Locking ID.

Please note that it is not possible to search for systems using a Standby Server Locking ID or an additional input value.

We recommend to search using:

- Locking ID (only the main Locking ID if the product supports Standby Server.)
- System ID (if applicable)
- Alias Name

Shift

Partial shift is not possible.

License Transfer

Nothing special

Upgrade

OpenScape Voice V7 → OpenScape Voice V9

It is possible to upgrade from OpenScape Voice V7. Only the whole system can be upgraded.
