

HEADSHOT MORPH 1000+

The Most Comprehensive 3D Head Morph System

- [INTRODUCTION](#)
- [ICON DESIGN](#)
- [FOLDER STRUCTURE](#)
- [HEADSHOT MORPH 1000+ INDEX](#)
- [KNOW MORE ABOUT HEADSHOT MORPH 1000+](#)

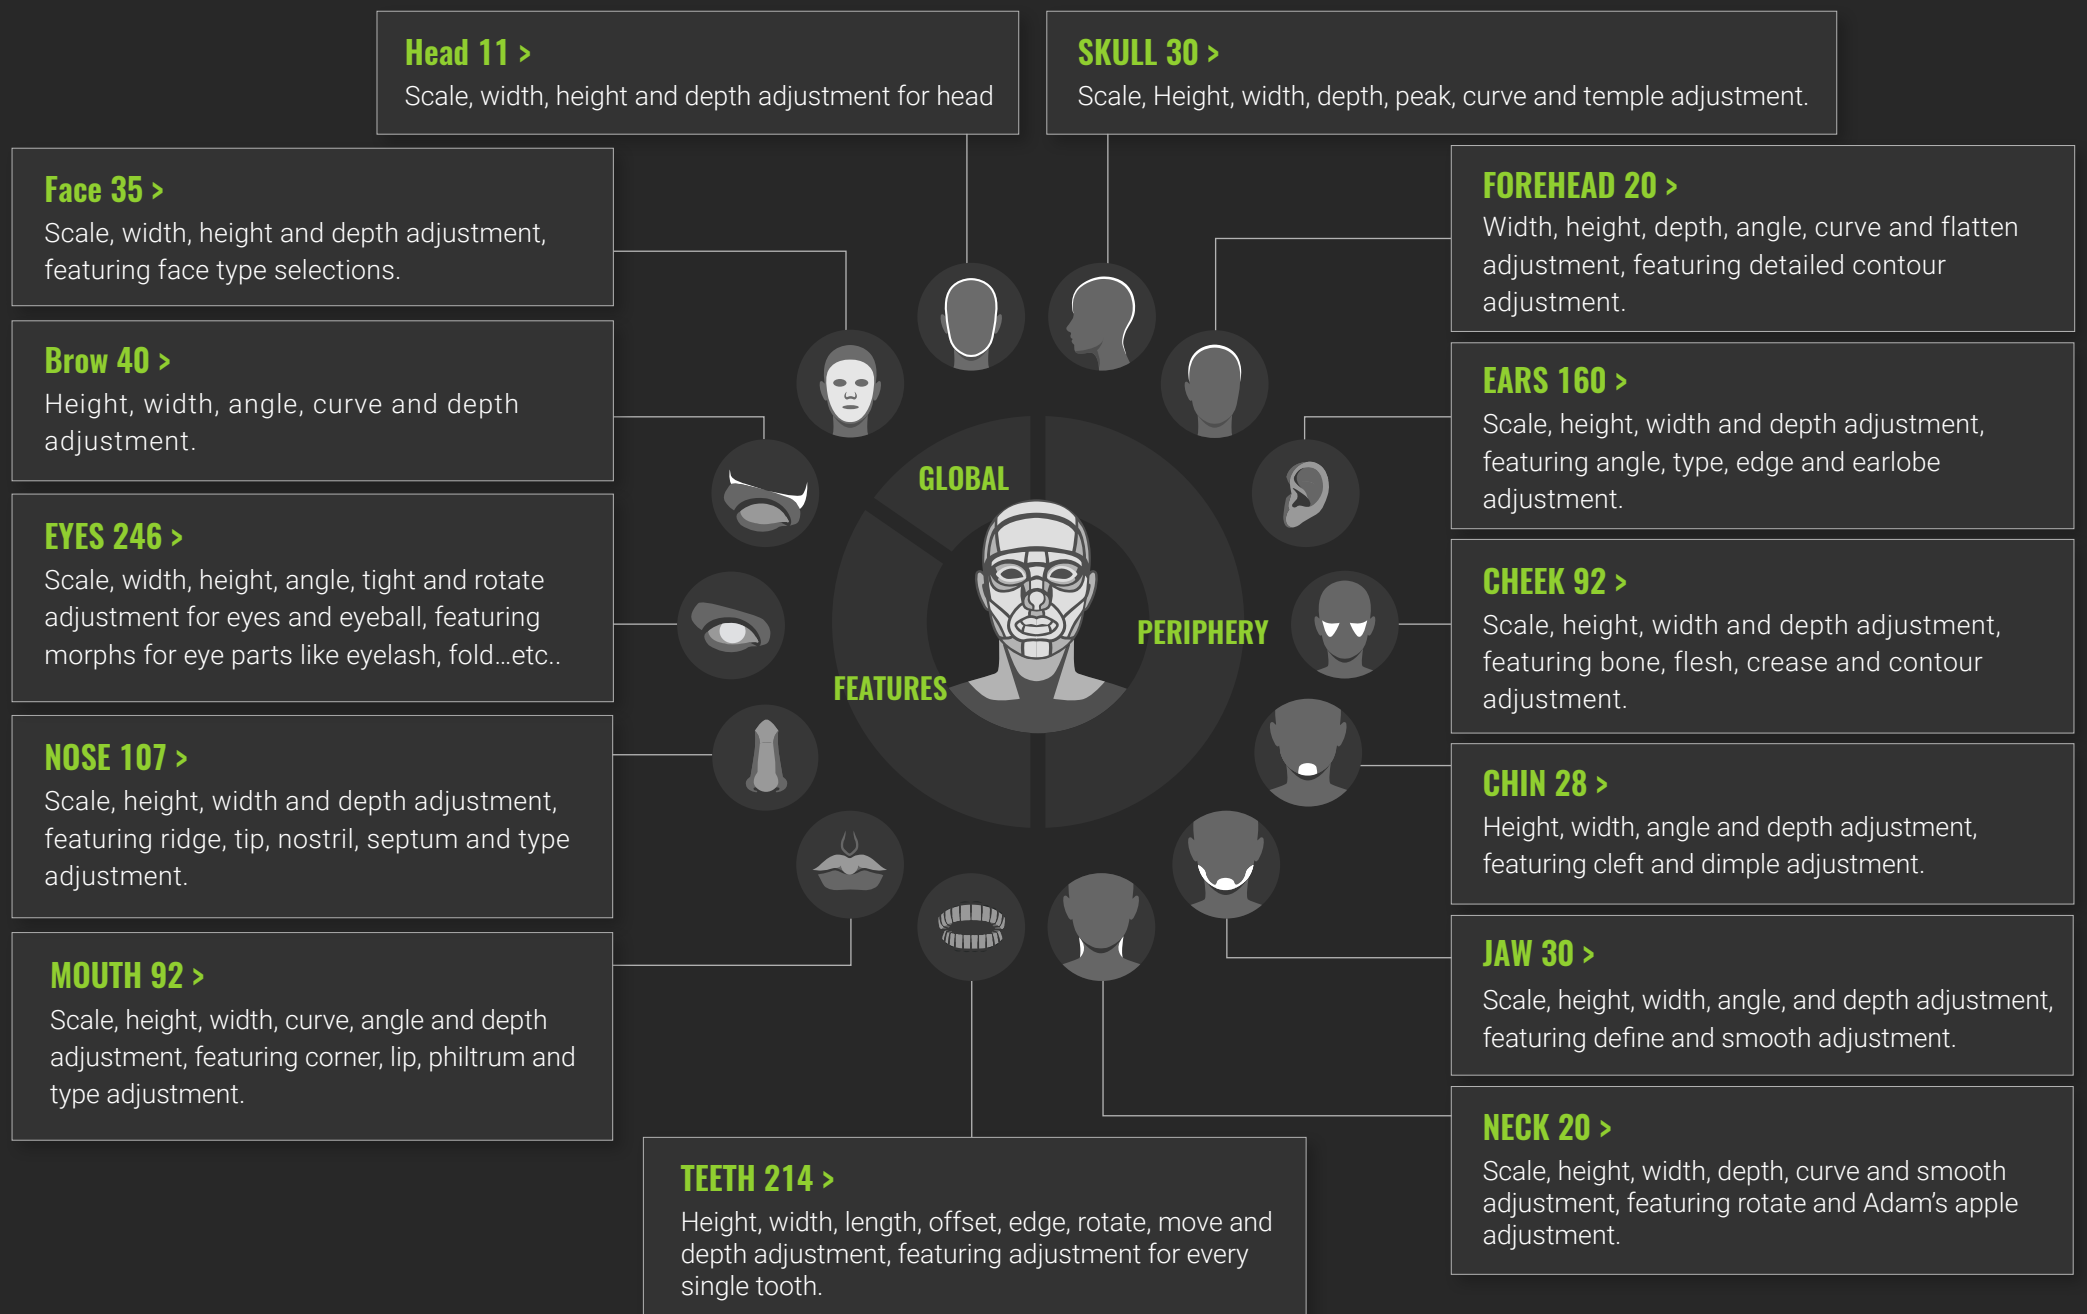

THE WORLD'S MOST COMPREHENSIVE 3D HEAD MODEL MORPH SYSTEM

Headshot Morph 1000+ is the world's most comprehensive facial morph system. Specially designed for photo-modelling and controlled modification of Headshot photo-generated models, they can be used to produce virtually scan-level results. Headshot morphs can also be used for general modelling, and in tandem with existing Character Creator morphs.

The morphs allow you to control virtually every aspect of the face and head, from global adjustments to the smallest details - to give your character a completely unique look or to more accurately resemble the source photo used to create a Headshot model. More than 1,000 head morphs are categorized in a logical order separated by a visual icon and intuitive naming. Additionally, Character Creator's search function can be used to locate any of the morph within seconds.

THREE MAIN MORPH TYPES

The morphs are organized to suggest a simple, logical workflow: from global morphs which address the head and face in general terms - to peripheral morphs affecting the skull, ears and jaw - followed by more detailed feature morphs (Click a facial part below to view the detailed morph information)

ICON DESIGN

The Headshot Morph 1000+ icon design is user-oriented and easy recognizable, check out and follow the following icon design introduction to make modelling work easier:

Visible Angle

Observe the morph change from the suggested view angle

-  Front and Side View
-  Front View
-  Side View
-  Right View
-  Left View

Adjustable Area

Highlight the targeted morph area for easy morph slider selection

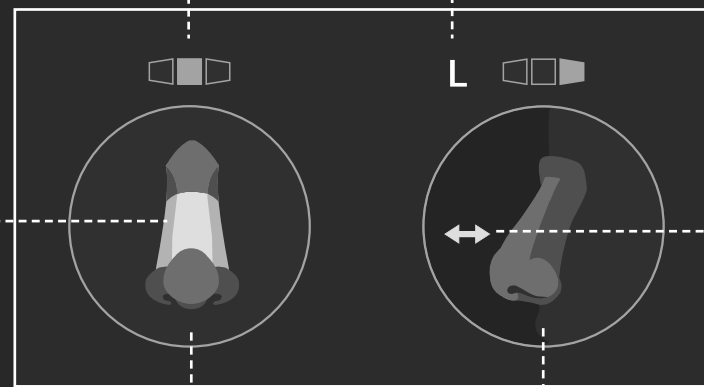

Adjustable Side

The L and R indicator marks which side can be changed by this specific morph

Adjustable Direction

-  Scale
-  Left and Right
-  Up and Down
-  Push Forward
-  Rotation

Front Facing
Planar Morph

Side Facing
Depth Morph

Isolate Front Planar and Side Depth Morphs

Front facing morphs do not affect the face depth morphs and vice versa.

FOLDER STRUCTURE

All facial morphs in Headshot Morph 1000+ are separated in 3 main folders. The folders take a top-down approach and guide you from the more general to the most detailed morph sliders for individual features. The morph folder structure is arranged by mimicking the logic of character modeling: Start with the general morphs to adjust broad areas and go further down to the Details and Parts Morphs to edit the smallest features for each facial part.
