

Health Informatics Development in the Hospital Authority

Dr CP Wong

Chairman, Clinical Informatics Program Executive Group
Co-Chairman, Clinical Informatics Program Steering Group

- Begin to take off in the US as medical informatics in 1950
- In Hong Kong, before 1990, the term was unheard of in healthcare field

The Hospital Authority Approach to Clinical IT

Objectives

- **Enable Reform**
 - ◆ Facilitate Virtualisation of Health Care Delivery
- **Better Governance**
 - ◆ Approval Process, IT Policies, Standards etc.
- **Value for Money**
 - ◆ Better Business Cases, ROI, Benefit Realisation
- **Reduce Costs**
 - ◆ Consolidate, Rationalise & Standardise IT
- **Improve Service**
 - ◆ Customer Focused ITD, More Communication
- **Integrate IT and Business**
 - ◆ Business to Own/Sponsor/Drive IT Solutions
 - ◆ ITD the Advisor, Custodian & Operator of IT

Hospital Authority

- 6.8 million population
 - ◆ 43 Public Hospitals
 - ◆ 46 Specialists Clinics
 - ◆ 74 General Clinics
 - ◆ 8.9m Outpatient attendances
- 28,176 Beds (90% market share)
 - ◆ 2.4m AED attendances
 - ◆ 1.2m Inpatient Discharges
- 52,000 Staff
 - ◆ 4,800 Doctors
 - ◆ 19,000 Nurses
 - ◆ 4,800 Allied Health Staff
- Annual Allocated Budget
 - ◆ HK\$30 billion
- Annual IT budget 1.5%

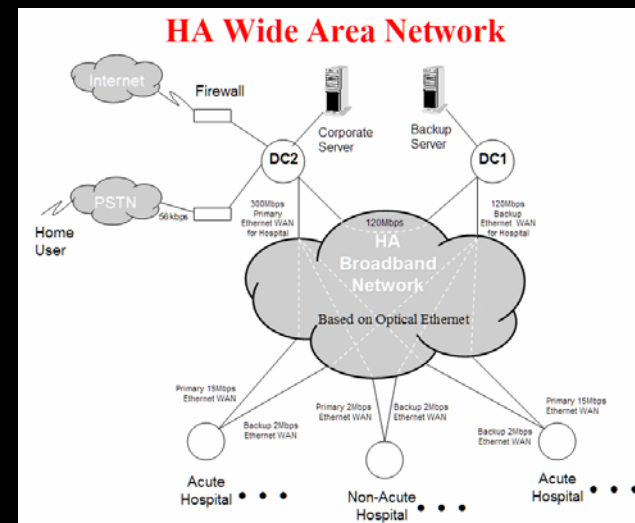

A long journey of development

- 1990 "Green field" – no legacy system
- 1991 Patient Administration only
- 1992 Pharmacy System added
 - ◆ Dispensing & Labeling
- 1993 Lab results online
- 1994 Radiology Information System
- 1995 Clinical Management System
 - ◆ Order Entry & Outpatient Progress Notes
- 2000 Electronic Patient Records
 - ◆ Territory wide retrieval of information
- 2004 Radiology Images online

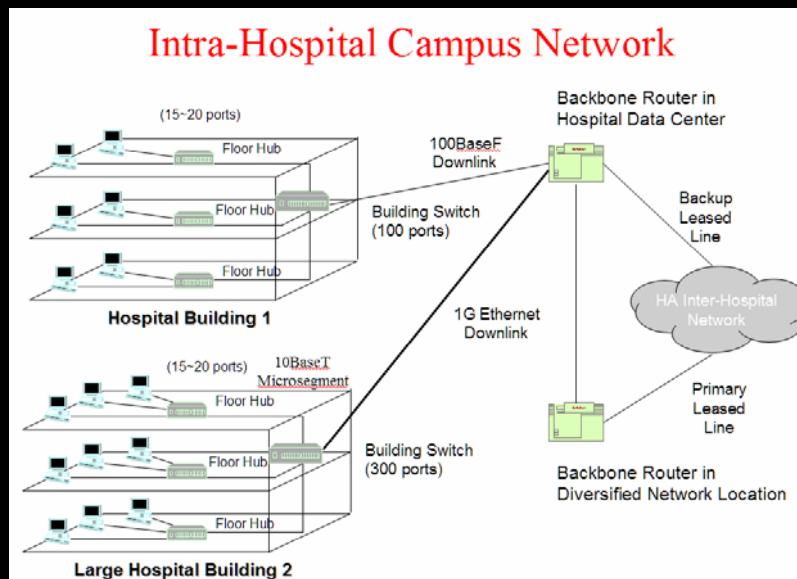

The First IT/IS Strategy 1992-2002

- Stage 1 -- Wide Area Network linked all HA institutions electronically
- Established the core operational systems that enabled the collection of data for the 4 key databases of Patients, Staff, Finance and Assets

The First IT/IS Strategy 1992-2002

- Stage 2 -- clinical support systems at the hospital and clinic levels
- Local Area Networks built in all major hospitals

Diagnosis

Last Entry	Description
03/12/2004 (x14)	End Stage Renal Failure
31/12/2003 (x4)	Chronic renal failure
13/08/2003	Vomiting alone
21/07/2003	Peritonitis related to continuous ambulatory peritoneal dialysis
23/06/2003	Kidney dialysis as the cause of abnormal reaction of patient, or of later complication
14/03/2002	Hypotension
31/10/2001	Other specified surgical operations and procedures causing abnormal patient reaction, or later complication
31/10/2001	Wound bleeding, postoperative

Procedure

Last Entry	Description
03/12/2004 (x12)	Haemodialysis
16/12/2003 (x2)	Tenckhoff catheter removal
14/11/2003	Creation of arteriovenous fistula
16/09/2003 (x2)	Insertion of Tenckhoff catheter
13/07/2003	Bone marrow examination
13/07/2003	Echocardiography
13/07/2003	Ultrasongram of abdomen
13/07/2003	Whole body scan, gallium
13/07/2003	CT abdomen with contrast
13/07/2003	Removal of haemodialysis catheter
13/07/2003	Insertion of haemodialysis catheter

Drug Allergy

HA Integrated Hospital Information Systems

Stage 1
 Stage 2
 Stage 3

HA Intranet - communication within HA and within Hospitals

Internet - communication with organizations and individuals external to HA

HA Website

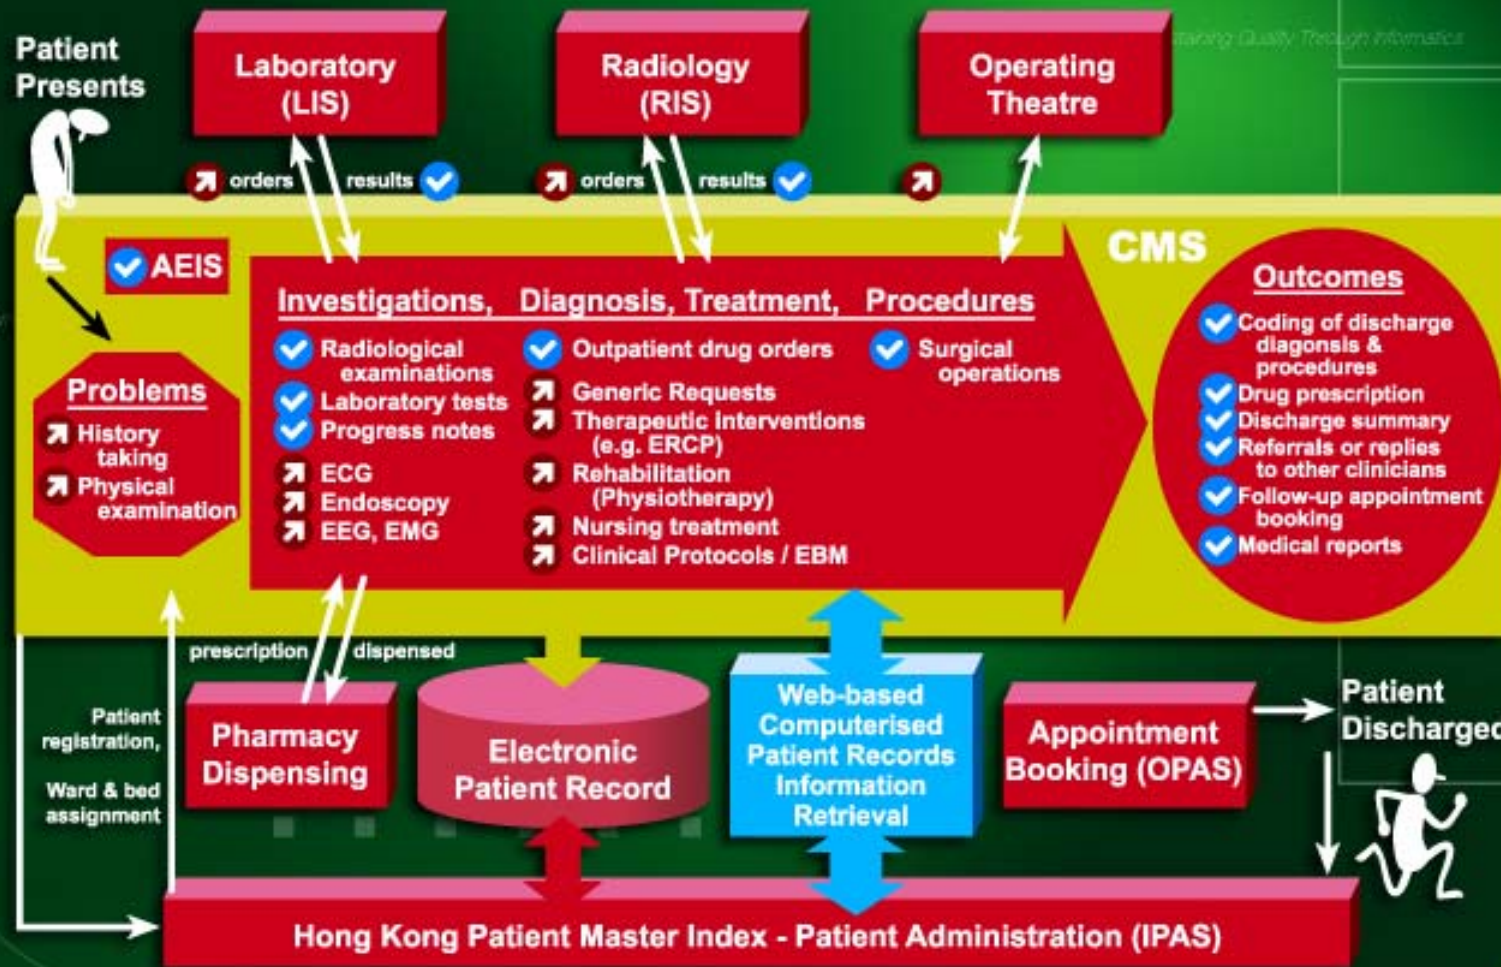

Electronic Data Interchange with suppliers

Partnership with healthcare providers

Electronic Transactions (PKI)

E- Knowledge Gateway

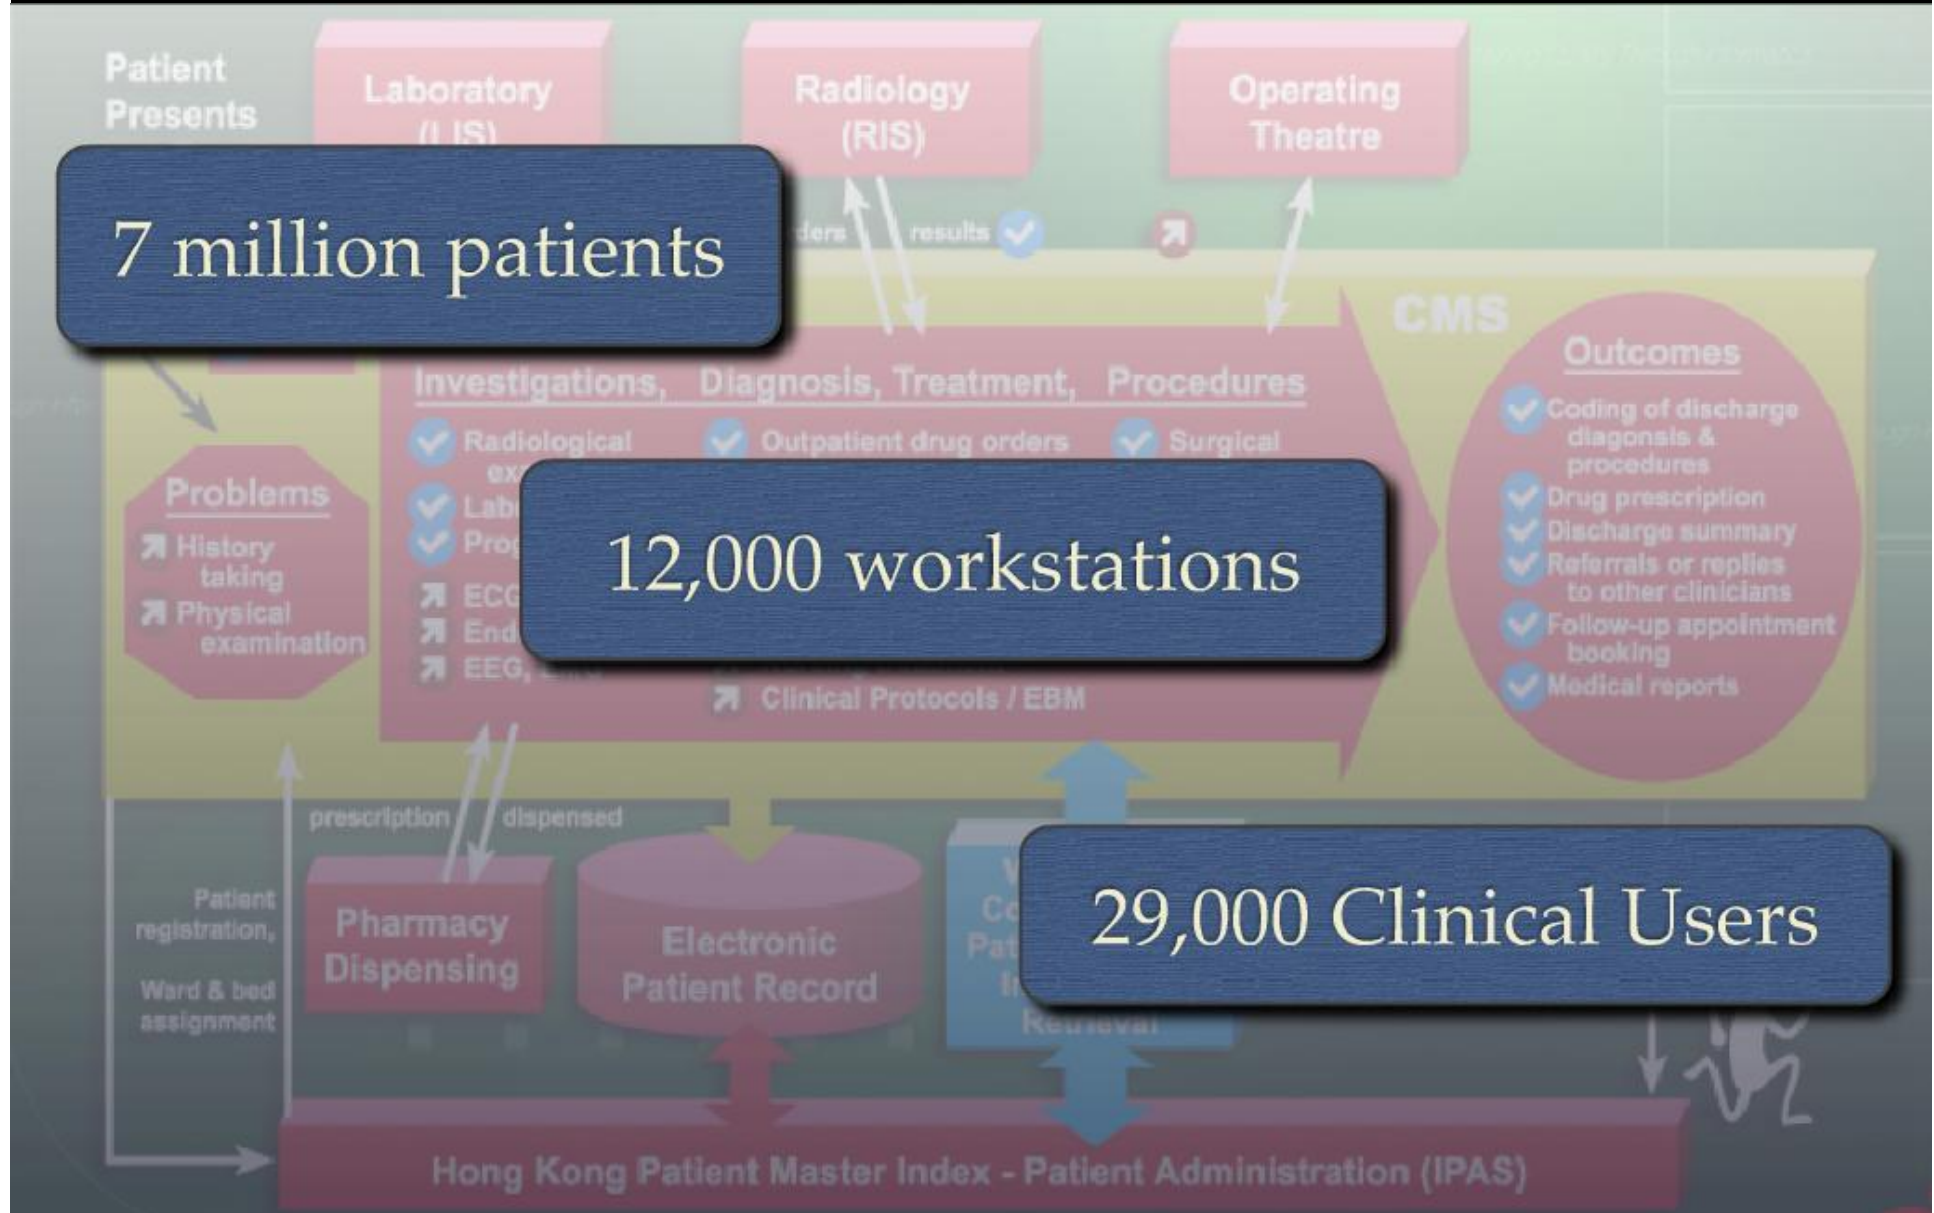

On a Single Platform

Note: = Completed functions in Phase 1 | = New functions to be developed in Phase 2 | = CMS implemented in 14 major hospitals | = available at all HA Hospitals

The 2nd Largest IT Network in HK

Characteristics

- Wide range of Applications in use
- Enterprise PMI and Unique Patient ID (HK ID)
- Only 1.5% of Budget per annum
- Technology Standardisation Focus
- Clinical Management System that is used by most Clinicians
- Centralised Management Focus
- Single Platform
- Built in-house

Last Updated Date: 10/01/2005 17:19

Last Endorsed Date: 10/01/2005 17:19

Content:

URGENT PLAIN CT BRAIN.

Clinical History:

Head injury with LOC and vomiting. (history from ePR: patient has history of NPC and Ca lung).

Technique:

- 5mm non-contrast axial CT scans of the posterior cranial fossa.
- 10mm non-contrast axial CT scans of the rest of the brain.

Findings:

There is a hyperdense subdural haematoma in the left frontoparietotemporal region. It measures 9mm in thickness.

There is mild mass effect with ipsilateral sulcal, ventricular effacement and mild midline

Standard Based

- Where possible, international health IT standards are used:
 - ◆ HL7, ICD-9CM, LOINC, SNOMED, DICOM
- Where necessary, local standards are developed:
 - ◆ Clinical Data Framework, EntityID

Security Measures: Network

- Security consultant to review security architecture
- Network based IDS & Corporate Firewalls
- VPN gateway with SSL encryptions
- 2-factor user authentication using SecureID
- Enable server-farm firewall service

Privacy Measures

- Role-based access control
- Need to know / patient under care basis
- Detailed audit trail logging
- Audit checking
- SMS codes and notifications
- Privacy ordinance

Daily Transactions

- Number of users
 - ◆ 12,000 per day
- Number of patient records accessed
 - ◆ 90,000 per day
- Number of online transaction
 - ◆ 2,000,000 per day
- System Availability
 - ◆ 99.98%

International Recognition

Best in Class Around The World

Project Implementation/
Scope Management

Hong Kong

- Focused Uniform Clinical Information Systems Project
- Focus on Ancillary Integration
- Probably not replicable anywhere else in the world

Components/
Innovations

*United States
(Kaiser)*

- CPOE/Decision Support
- Advanced Models For Clinical Documentation
- CMV and sophisticated rules engine management.

Security/Privacy

*Canada, UK
Brazil, US*

- Clear Regulations with Enforcement Mechanism
- Active Engagement of Consumer Advocacy Groups
- Smart Card Solutions For Authentication except in U.S.

Australia Healthcare Summit Conference in June 2003

Dave Garets, Executive Vice President of HealthLink Incorporated

Awards won

- 2004 Stockholm Challenge (Health)
- IT Excellence 2005
- APICTA 2005

Critical Success Factor

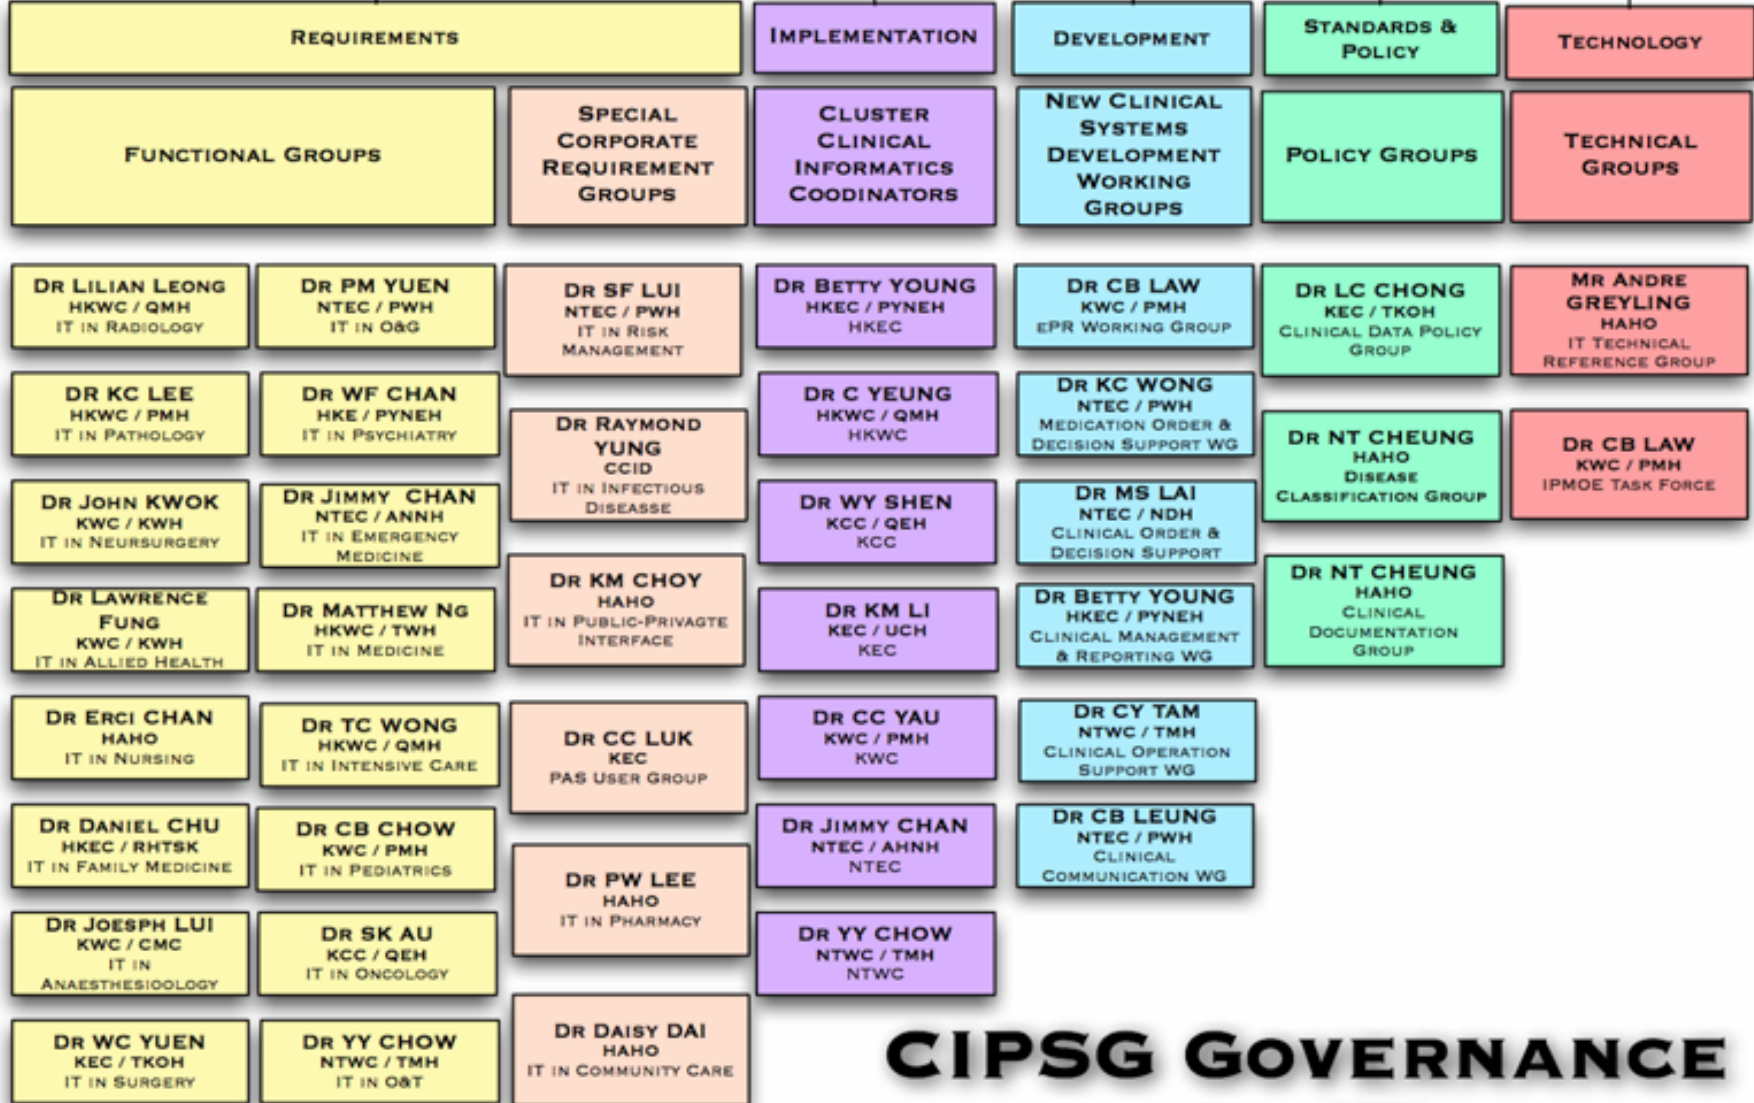

- Clinicians engagement
- Requested by the clinicians
- Designed by the clinicians
- Built for the clinicians
- Used by the clinicians
- Governed by the clinicians

Make the users the owners

- ◆ Deliver value to the users
- ◆ Make the system bend to the user, not *vice versa*
- ◆ Build up an informatics culture
- ◆ *“Driven by clinicians, built for clinicians”*
- ◆ 80% data entry by clinicians

Laboratory Order Entry

GCR-LRS Utilization Report - In-Patient

Other Success Factors

- Unique citizen identity card
- Non-Big Bang Approach
- Home-built system
- Careful implementation policies
- Pilot sites
- Dedicated User training teams

Clinician benefits

- Speed up Work Flow
- More efficient clinical practice
 - ◆ No need to search for data elsewhere
- Make decisions with comprehensive clinical information
- Avoid errors associated with paper records
- Access data and images at home or remote sites for expert consultations

Improved Service to the Community

- Scheduled appointments and faster admissions
- Reduced need to queue for each service
- Drug labels and drug history
- Test results available sooner
- Less duplication of tests
- Allergies and chronic conditions known
- Menu choice in some hospitals
- Consolidated medical records and shared access
- Medical records more available at time of treatment

Data Available for Performance Review

- Corporate databases and corporate systems enable the HA to construct the Enterprise Data Warehouse
- The DW feeds the Executive Information System (EIS)
- The EIS allows all users to view standard or ad hoc reports on both operational data and performance indicators
- Each hospital or specialty can compare their performance against other similar hospitals
- Subject specific decision support systems are also being constructed for more detailed reviews

Data Available for Planning & Research

- The Data Warehouse and the EIS provides data required to
 - ◆ Plan health services
 - ◆ Review fees and charges
 - ◆ Plan for new medical equipment and its location
 - ◆ Manpower planning
- The Clinical Data Repository provides data for
 - ◆ Clinical Audit and Quality Assurance Reviews
 - ◆ Medical Research
 - ◆ Drug Efficacy Research
 - ◆ Epidemiological studies

Data Marts

User Access

Huge Data Warehouse

- 80+ Terabytes
- 7.6 million patient records
- 57 million episodes of care
- 540 million lab results
- 34 million radiology results
- 400,000 image studies
- Sub-second response time
- Near real time update

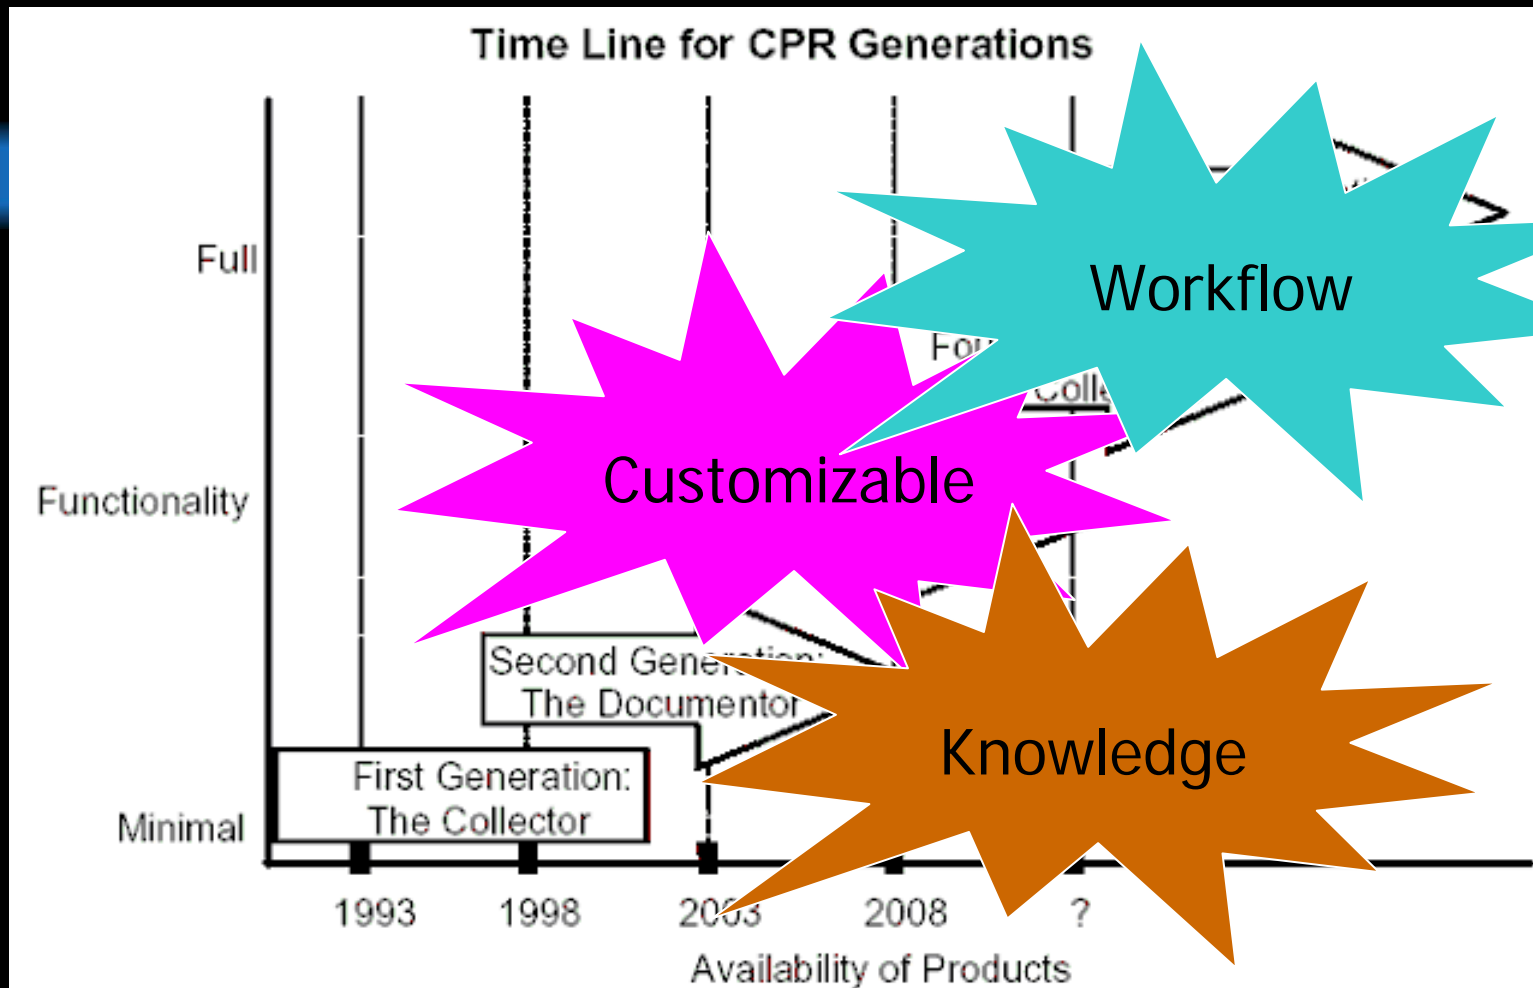

The Future CMS Phase III

The Clinical Systems Strategic Plan

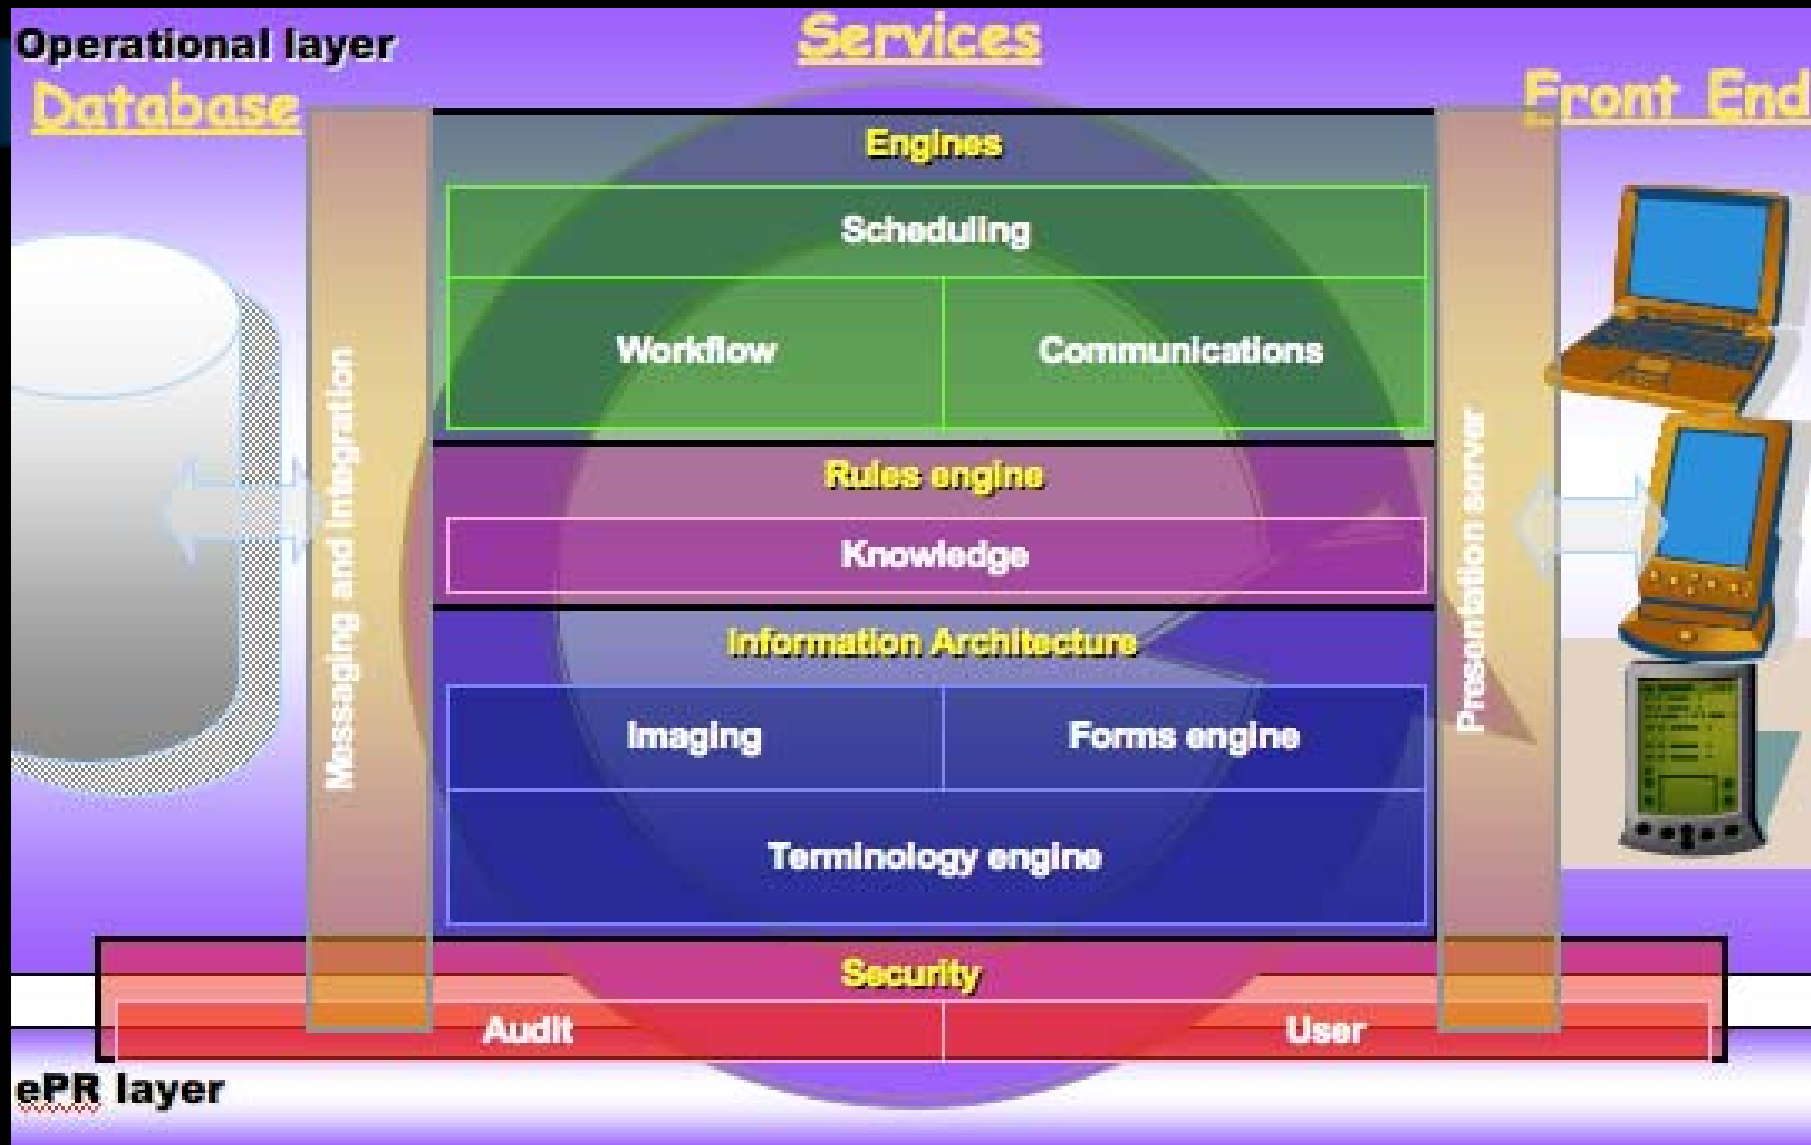

2003-2008

- **Access to clinical information**
- **Support for patient care processes**
- **Knowledge management and decision support**
- **Internal governance and decision making**
- **Information management and standards**
- **Strengthening the technical infrastructure**

HEALTH INFORMATICS

ORGANIZATION CHART W.E.F. 1 APRIL 2006

In Conclusion

- All the developed economies of the world are striving for an interoperable electronic health record.
- The Hospital Authority has already achieved this for 90% of Hong Kong Citizens.

In Conclusion

- Innovative technology and implementation strategies have created 100% user acceptance and 100% reliability at an affordable cost.
- Gaps needs to be filled in the decision support, in-patient transactions & nursing informatics

In Conclusion

- Research & Development of expertise programs calls for capacity building & partnership with vendors.
- The future lies in sharing of electronic patient records between public and private sectors.

Thank You !
