Caring for your product

Keep your new product looking fresh with these handy tips.

DECOLAV is proud of the vast range of materials and finishes that we use in all of our products to give you the quality and style that every bathroom design deserves. All of our products are easy to care for and require minimal attention to keep them looking as new as the day you installed them.

Installation

When installing your vanity it is recommended that you keep it out of direct sources of extreme heat (such as sunlight or a radiator) and extreme cold. Allowing this to happen may cause warping or cracking of the wood or the countertop. Also, it is a good idea to think about using felt, leather or cork pads under the legs of certain products to stop them from damaging wooden or tile flooring; it also isn't recommended that you slide the product over such surfaces.

Maintenance

Dusting the pieces frequently keeps them looking smart. Remember to dust along the grain to preserve the wood's distinct characteristics. Try to make sure you only use products that are made for cleaning wood, avoid using products that apply oily polishes, waxes or silicone as this will detrimentally change the finish of your product. If you are unsure of the effect that your cleaning product may have, try using it on a discrete location such as the inside of a door to test it out.

Immediate Care

For spills onto wooden areas or countertops it is best to clean them up immediately. It is recommended that you dry them off right away with a soft cloth to prevent waterspots being left behind.
