1 Smash the telephone in the left corner to find the first of five hidden phones in the level. Down the nearby alley, pull the lever on the wall to open the gate. Assemble the pieces on the ground into a grappling area you can

use to reach the ledge above. Run along the ledge and pull the next lever to open a gate below. Climb the ladder to reach a LEGO canister above; then drop to the ground and enter the now-open gate for another LEGO canister.

2 Grapple to the building's upper walkway, then use the zip line on the right to cross to the next building. Run along the walkway and drop to the ground. Put the loose parts back on the vehicles involved in the accident in the street. Dispose of the goons trying to shoot you on the mean streets.

FREE PLAY AREA

3 There is a LEGO canister behind the glass window on the street. Use the Sonic Suit to bust the glass and grab your prize. Access the security checkpoint on the wall of the building on the right to open the door on the

building's right side. Run inside and grab the LEGO canister.

4 Grapple to the walkway above, then assemble the loose LEGOs you find to create a zip line. Cross to another building where you find a Demolition Suit changer. Using your new suit, destroy all the shiny metal equipment on the ground below. Destroy the telephone on the building where the road crumbles; this is the second phone of five located on the level.

FREE PLAY AREA

5 Have a super-strong character pull the heavy container off the manhole cover on the ground. Use the Demolition Suit to blow the top off, then jump inside for a LEGO canister.

6 Use the Demolition Suit to destroy the large tank on the truck blocking your path, then jump in and move it out of the way. Destroy the telephone booth in the right corner at the street's end to find the third phone. Next, use the Demolition Suit to clear the big rig blocking the road, then head down the cleared street.

FREE PLAY AREA

7 Use a super-strong character to toss the heavy containers out of the alley. Grapple to the ledge above, then zip-line to the building on the left. Use the Demolition Suit to break the windows, then grab the LEGO canister inside.

1 Use the Sonic Suit to smash the barrels and assemble the LEGOs into metal siding on the wall. Use the Magnet Suit to climb to the ledge above for some studs.

2 Use a character who isn't affected by toxic sludge and break the equipment on the wall as you run through the stuff on the road. On the other side, switch to a character who can bypass the security on the wall and open the red door. Once inside, pull the lever on the wall to open the small garage door you just passed. Later in the level, you'll open a door to an area containing some red cars. Drive one of those cars back into this area, and the garage door next to it will open. Get another car and drive it into this second garage; the garage door to the left will open, so grab the LEGO canister inside.

FREE PLAY AREA

3 Use a super-strong character and pull the heavy box out of the wall. Head inside a passageway that leads you to a balcony above, where you can add another LEGO canister to your collection.

4 On the wall where the road dips is the fourth telephone you must smash. Demolish the objects in the next courtyard and assemble the pieces into a Technology Suit changer. Access the tech panel on the

back wall to take control of a remote-control car. Steer it over the yellow and green ramp to the right and enter the building. Once inside, drive along the switches on the back wall and turn the three red lights to green; the main door now opens for you.

FREE PLAY AREA

5 Use the Sonic Suit on the glass fence in the back right corner to access an Attracto canister. Destroy all the objects around the area, and use the Attracto Suit to gather 25 LEGOs. Fill up the Attracto canister machine with 25 pieces, and it makes a LEGO canister for you.

6 There's Clayface!

A few good hits and he runs off to hide. Smash the fifth and final telephone booth on the right building to get another LEGO canister. Use the Demolition Suit to destroy all the silver equipment in the area. Place bombs along the black gate to bust more equipment on the other side. Keep placing bombs along the gate and you'll hurt Clayface, who is trying to hide behind the gate. When you eventually destroy part of the black gate blocking your path, head through it. Use the Demolition Suit on the silver wall in the back to reveal a red power brick for your collection. After you hit Clayface a certain number of times, he retreats to the top of a back cell. Use your Batarang on the three switches on the back wall. After you hit all three, Clayface gets sprayed with a gas and falls into a cage. Your first prisoner!

WAVE AFTER WAVE OF GOONS CHARGE IN TO STOP YOU. TAKE THEM OUT BEFORE YOU GO AFTER CLAYFACE TO AVOID GOING TO PIECES.

MISSION BRIEFING

A scientist specializing in cryogenics, Dr. Victor Fries froze his wife to prevent her death from a rare disease — but he was injured in the lab, and found himself unable to survive outside a sub-zero environment. As Mr. Freeze, consumed by anger, he uses frozen weaponry in a battle against the city of Gotham, and wears a refrigerated suit which gives him remarkable strength.

- 1 Assemble the objects on the ground into two separate cannons. After you complete each cannon, jump multiple times on the circle switches behind each one to make them fire on the vehicles in the distance, destroying them. Smash some objects on the left and use the loose LEGOs to fix the ice-cream truck. Drive it over all the metal objects in the area and then park it on the large circle at the area's center. Assemble the remaining pieces nearby to form a lever. Pull the lever to make the truck drop down and a giant ice-cream cone come up. Smash the cone for a LEGO canister.

FREE PLAY AREA

- 2 Use a super-strong character to pull the panel off the left wall and grab the LEGO canister hidden behind it.

FREE PLAY AREA

3 Use a character who can bypass security at the left building. Use a super-jump character to leap onto the platform against the back wall. From there, super-jump up the wall, going from bar to bar until you reach the LEGO canister at the top.

5 Smash the objects in the corner and assemble the LEGOs into a Magnet Suit changer. Break the hinges on the gate with your Batarang to clear the way to the other side of the fence. Use the Magnet Suit to climb

the metal siding to the left of the giant mouth, and keep pulling the lever on the platform above until the giant ice-cream cone turns red. Drop to the ground and pull another lever until the giant ice-cream cone next to you turns blue. This opens the giant mouth door to the right; enter it.

FREE PLAY AREA

4 Break the container along the right building and assemble the pieces into a bar high overhead. Use a super-jump character to leap up and grab it. From there, jump to the ledge nearby.

Travel up the building's side until you reach another LEGO canister to add to your stash. While you're up there, smash the boards covering the window and head inside for another LEGO canister.

WALKTHROUGH

- 1 Destroy the objects on the ground and assemble the leftovers to form a Glide Suit changer and a turnstile. Push the turnstile to lower a gun on the wall that was blocking your way so you can glide to the walkway in

the distance, following the line of studs through the air. Assemble the gears on the ground to fix the footbridge so Robin can cross.

CAUTION

DON'T TOUCH THE PINK ICE CREAM, BECAUSE IT WILL GIVE YOU AN ICE-CREAM HEADACHE YOU WILL NEVER FORGET.

- 2 Use a Batarang to drop the hanging ice blocks and assemble the pieces to form some stairs. Climb up them and jump onto the yellow circle switches; this makes it safe to cross over the pink ice cream. Use the Magnet Suit to climb the metal wall. Assemble the pieces at the top to create a grapple line so Batman can cross.

FREE PLAY AREA

- 3 Glide over to the platform against the back wall. Access the security panel on the wall to open a small door. Head inside and use a bomb to blow up the silver equipment in the back left corner. Follow the pink hallway to the right; pick up a LEGO canister at the end. Use the Joker's hand buzzer on the generator on the right wall, and a giant ice-cream cone forms on the ground for you to smash.

- 4 After you pass the large fan in the ground and the coil heading to the ceiling, glide toward the screen to find a score-multiplier platform that contains some valuables. Next, using the Magnet Suit, walk up the metal grating near the right wall; assemble the pieces at the top to form a box. Push the box over the edge, breaking it apart again. Assemble the new pieces to create a moving platform, then jump on for a ride. Use the Magnet Suit again to walk up the metal side; pull the lever you find to open the door below you.

FREE PLAY AREA

- 5 Use a super-jump character to reach the walkway against the back wall; then use a super-strong character to pull the grate off the floor. Drop down to the next floor and smash everything. Your partner will jump on the circle switch to raise a crate to your left; grab the red power brick that is hidden underneath.

FREE PLAY AREA

- 6 Use a character who can withstand toxic substances and step onto the orange floor switch to stop the deadly gas. Destroy the shiny equipment with a bomb to reveal a LEGO canister.

- 7 Glide through the air, following the line of studs. Push the turnstile's green side to send a grappling hook over to Robin. Once he jumps on, push the turnstile's red side to bring him over to you. Jump onto the large circle switch to turn the ramp into stairs. Your partner will run up and step on another circle switch so you can join him.

CAUTION

QUICKLY JUMP ACROSS THE FLOATING PLATFORMS BEFORE THEY DROP INTO THE HOT STEAM, KILLING YOU.

8 Use a Batarang to break the equipment above the two mixing bowls, and they fill with a purple liquid. Get inside the ice gun on the platform, and blast the liquid to freeze it so you can cross. Use the Magnet

Suit to climb the metal wall, and pull the lever at the top. Drop down and use the grapple line to reach a walkway above.

FREE PLAY AREA

9 Glide through the air, following the line of studs to the next platform. Break the equipment and assemble the pieces to form a zip line so Robin can cross. Destroy a grate in the wall with a bomb, then head into the duct that was behind it. Ride the breeze from the fan in the ground up to a LEGO canister. Pull the lever on the wall to shut off the fan so you can get out. Use your mind control to force the thug in the booth to pull the lever on the wall and open the door. Head inside and grab the LEGO canister.

10 Push the cart along the checkerboard-pattern floor until you hit the white equipment. Jump on the brown switch on the right, and your partner will jump on the red one. This stops the steam that was blocking your exit; now you can leave.

1 It's time to take on Mr. Freeze. Give him some punches as he travels back and forth across the room. Eventually a large fan starts blowing and blocking you from the back of the room. Assemble the LEGOs in the room's center to form a gun. Jump multiple times on the circle switch to fire across the room and break the powerful fan. Next, use the Magnet Suit to climb up the metal wall on the room's side. Cross to the other side of the mixing bowl and pull the lever to make some LEGO pieces appear on the floor below. Repeat this process for the other mixing bowl on the room's other side.

2 Assemble those LEGOs to form some carts you can push across the floor to the room's other side. This causes a hanging ice block to move over Mr. Freeze, crashing down on his head, which forces him down to your level. Give him a few punches, until he is all out of health and you win.

TWO-FACE CHASE

MISSION BRIEFING

Former District Attorney Harvey Dent, AKA Two-Face, is a villain with a split personality. His every decision is dictated by a double-headed coin, scarred on one side, which he flips to decide if he'll act for good, or for evil. His truck is a heavily-armored vehicle painted with his distinctive black-and-white livery.

1 It's time to clean up the streets of Gotham. Head down the street, blasting everything in sight. Shoot out the fence along the buildings on the right and destroy the vegetable cart to uncover the level's first of three secret items.

2 Head down the street toward the screen, and shoot the last red manhole cover on the ground to receive the LEGO canister hidden underneath.

3 As you drive along the street, destroy the three large blue Dumpsters. After you obliterate the last one, you get a LEGO canister. With the canister in hand, roam the streets blasting the enemy vehicles, knocking the largest one onto its side. Use your tow line and drag it to the police so you can move on to the next area.

2 Head straight down the first street, going to the right. Take out the scaffolding along the building to receive a LEGO canister. Head north along the streets and cross the broken road. Take out more scaffolding for another LEGO canister. Hit the vegetable cart in the back right corner to find the level's second secret item.

3 As you drive around the streets, shoot the blue and white cars. After you destroy all three, you get a LEGO canister. Continue along the mean streets and blast the three enemy vans in the area. Drag them behind your car to the authorities, who are waiting in the map's back right corner; then head to the next area.

1 Plant the four sets of seeds in the back garden to grow some super-large carrots. Destroy the new crop; when the last carrot is gone, a LEGO canister appears for you to snatch. Destroy the bottom garden and assemble the pieces to form a tractor.

2 There are two more gardens. Destroy the bottom one and assemble the leftover pieces to create a mower that takes off mowing. Now tear up the top garden, and assemble the loose LEGOs to create a sprinkler and fix the tractor. Ride the tractor over some newly sprouted flowers to make them bloom; then smash them to pieces.
