Hi! **Paul of** Wholesale Composite Decking here.

I've been receiving some **great questions about our wholesale wood-plastic composite decking from Flooring Franchises, Retailers, Subcontractors, Hardware Stores & Flooring Retailers, Building Companies, Developers and other people and businesses from all over Australia.**

While all the questions were great, the best question I was asked was this one:

“Why should I buy wood-plastic composite decking from you when I can get it from other suppliers?”

- *It's a great question, so I'd have to say that finding quality wood-plastic composite decking on budget without discounting quality or **your relationship with your retail customers, or the presentation of your project/s,** is getting tougher!*

With our extensive knowledge of wood-plastic composite decking and premium service, hardware stores, landscape suppliers and other similar businesses come to us for expert advice, competitive pricing and quality wood plastic composite decking (WPC) at **wholesale prices.**

Not only do we provide Australia-wide delivery and a huge range of different styles and textures to suit most budgets, but you can also **receive a free wood-plastic composite decking sample.**

- With us, you're able to have your order custom made to suit your needs perfectly. We recognize that not everyone has the same business, the same resort or the same needs, **so I will call and talk directly to you to put together a tailored package that suits your needs exactly.**

On top of that, as the founder of Wholesale Composite Decking I guarantee...

- **A variety of products** with something to suit every person's taste and décor.
- **Quality standards-** Although there are no Australian standards for composite decking, our customers like knowing that all our decking is sampled and tested for quality in each production run.
- **Huge savings in maintenance cost and time** - Lastly, one of the biggest draw cards and purposes for me starting Wholesale Composite Decking was to **help people save time and money using a quality product that outlasts timber,** is more durable, and requires only a quick hosing to clean it every couple of months if needed.

All the best,

Paul Armison

Wholesale Composite Decking

“The 100% maintenance-free anti-slip solution for outdoor decking and walkways”

P.S There's many more benefits that will make your Wholesale Composite Decking profitable and simple, so please...

Hi there, I'm Paul Arnison, the head of Wholesale Composite Decking.

Before entering into the **Wood-plastic composite decking (WPC)** industry I ran a fishing company, operating and managing prawn trawlers for 20 years.

It was this business experience and my passion for perfection that helped me understand how important it is to **deliver quality products and build lasting relationships with my customers.**

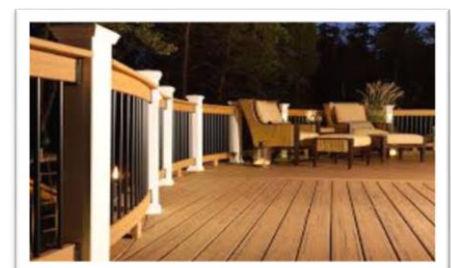

As to why I started Wholesale Composite Decking, there are quite a few reasons.

One was that composite decking has many applications. With its **anti-slip texture,** it's perfect for using on marina walkways, pool areas and anywhere water can be walked around, so it **helps people avoid slipping over and hurting themselves.**

In addition to that, my parents had their veranda and ramp replaced with it, where the draw card for them was no more staining or painting, it is made from recycled material and most of all the anti-slip qualities. They couldn't be happier with it!

Other reasons I started Wholesale Composite Decking are:

- The **maintenance-free** factor and other benefits
- **Eco-Friendly** alternative to Timber
- It's **Rot and Termite resistant**
- And so much more!

For further information and exact pricing on our Composite Decking, please contact us on 1300 979 727 or alternatively email us at office@wholesalecompositedecking.com.au

Wholesale Composite Decking Made Easy

9 Benefits Hardware Stores and Flooring Retailers, Building Companies, Developers and other similar industries expect when they do business with Wholesale Composite Decking.

#1. Easy Installation – They love **how easy our decking is to install for their retail customers** or staff, and the fact that we can provide the accessories to assist with installation and give the decking a nice, professional finish.

#2. Order Customisation – They appreciate how every order is custom made to suit **each of our customers** perfectly. Not everyone has the same business, the same resort or the same needs, so I will call and talk directly to you to put together a tailored package that suits your needs exactly.

#3. Variety of products – They love knowing that there are 11 different colours in each range and four different finishes in our wood-plastic composite decking range. So there is something to suit every person's taste and décor, **whether it's for a residential home, several five-star resorts or aged care community** villages.

#4. FREE WPC samples- They like having the option to order a **FREE WPC Sample first**, so they can see and feel the product before making a buying decision.

#5. Zero maintenance involved – A huge benefit of Wood Plastic Composite decking that our customers love is that there is no maintenance: no staining, no sanding, no oiling. The decking will appear as you installed it. If the decking is in direct sunlight, after a number of years there may be a slight colour fade, but other than that the decking will look exactly the same as the day you installed it.

#6. WPC is more environmentally friendly than timber. Our customers like knowing that WPC is made from **35% recycled plastics and 55% wood and bamboo powder**, which is a waste product from other industries.

#7. Safety Features – They enjoy the peace of mind of our anti slip textures and finishes. Being rot and termite resistant also protects against splinters and nails coming loose.

#8. Quality Standards – While there are no Australian standards for composite decking, our customers like knowing that all our decking is sampled and tested for quality in each production run.

#9. We offer more than just a replacement warranty - Our customers appreciate that in addition to a 10-year replacement warranty the product is free from material defects.

And they're just some of the benefits and reasons customer's love about our WPC products and services which you have to look forward to.

With gratitude,

Paul Swinson
