

HIGH PERFORMANCE RACING COMPOUND

MINTEX[®]
RACING

PRODUCT APPLICATION GUIDE

Mintex Racing offers an extensive range covering road to racing brake caliper applications and can even produce bespoke and obsolete parts.

We also have a dedicated technical telephone line to help with application, compound choice and fitment. Don't buy blind, speak to the experts and get the right compound for your vehicle.

For years major vehicle manufacturers, leading racing teams and successful racing drivers have chosen Mintex. Isn't it time you did too?

M SERIES

HIGH PERFORMANCE RACING COMPOUND

M 1144

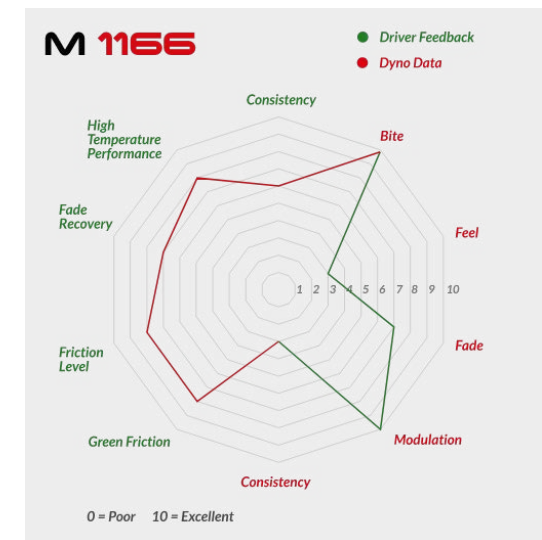

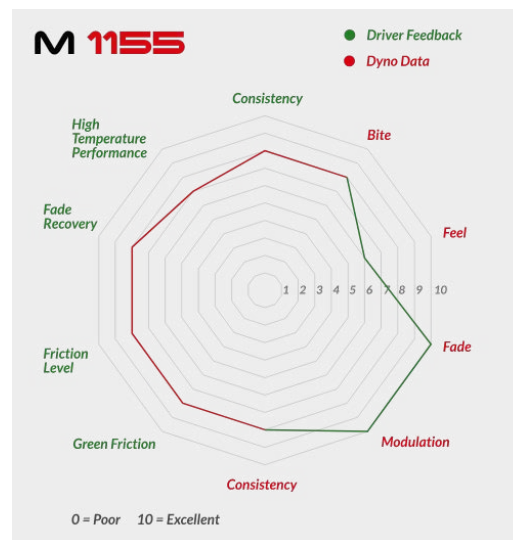

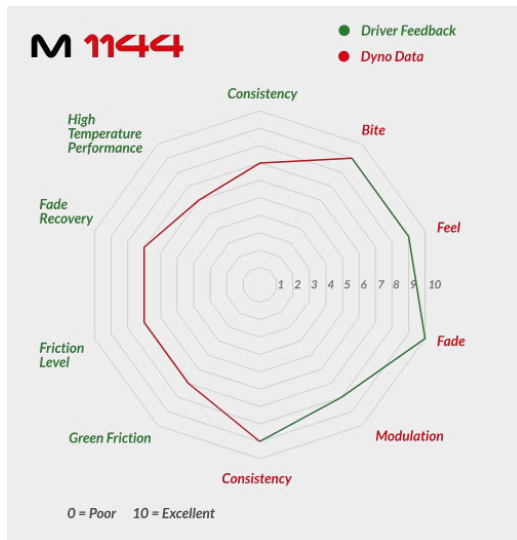

Medium-torque material with excellent low temperature performance. Ideal for fast road, track days, karts, hill climbs, off road, club motorsport and light weight open wheel racers. M1144 is Regulation 90 approved where required.

M 1155

Medium-torque material offering excellent pedal feel, greater high temperature performance and resistance to fade. Developed for loose surface rally, open wheel and light weight saloon racing. M1155 offers the driver more controllability over more aggressive high friction compounds. Perfect where trail braking techniques are used.

M 1166

High-torque material, combining a strong resistance to fade with greater performance and stability at high temperature. Extensively used over the years in saloon, rally and open wheel racing.

F SERIES

HIGH PERFORMANCE RACING COMPOUND

F2 R

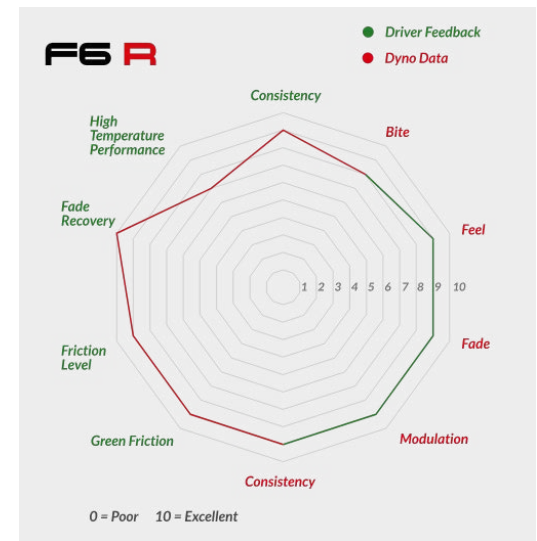

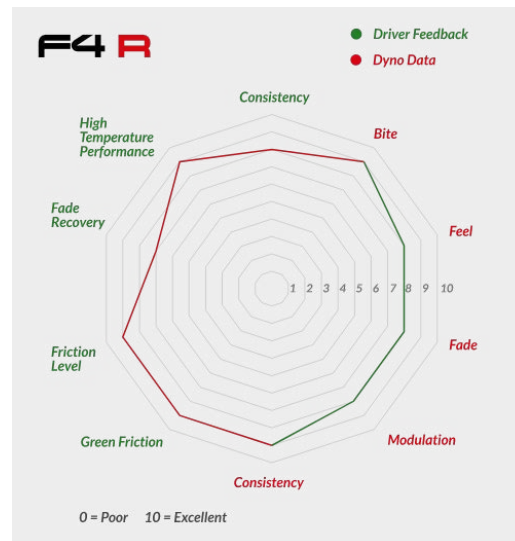

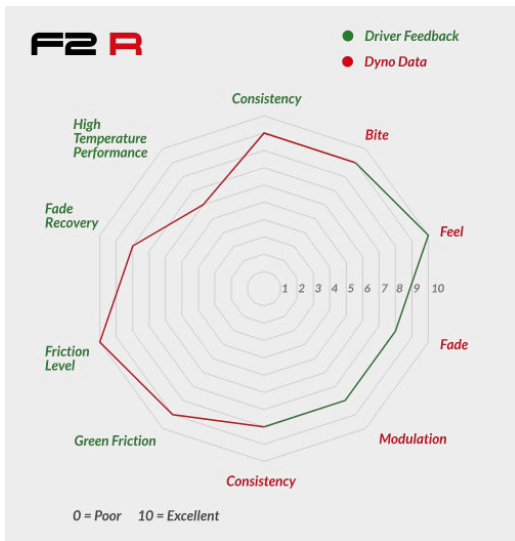

High-torque material with a lower initial bite, stable and predictable throughout the performance envelope. F2R provides increased pedal feel and improved sensitivity. Used extensively in saloon, sprint and sports car racing including shorter endurance races.

F4 R

High-torque material with high initial bite, designed for vehicles with high down force or very high grip. Particularly good when fitted to vehicles of high weight and limited disc/pad size.

F6 R

Originally developed for NASCAR, F6R is a medium to low torque material that inspires braking confidence. Ideal for low grip applications such as historic and loose surface rally.

Part Number break down

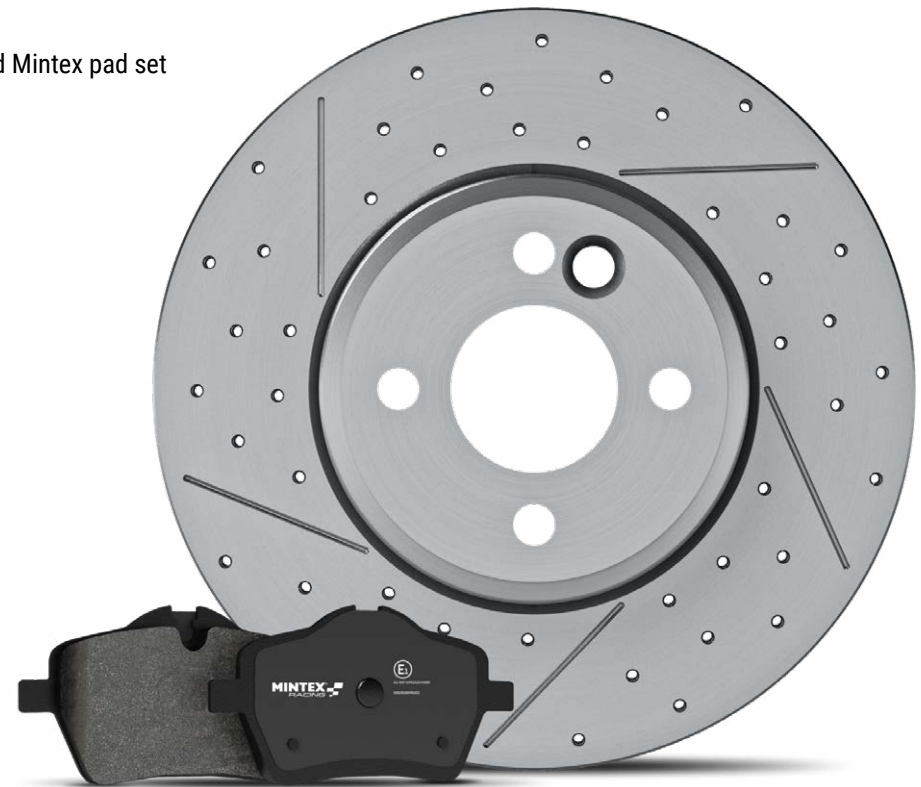

MDB reference = the Brake pad shape
 E.g MDB3322 = Standard Mintex Pad set
 For M series add M1144, M1155 or M1166
 E.g MDB3322M1144

For F series only use the numbers of the standard Mintex pad set
 E.g MDB3322 = 3322
 Then add the Friction compound
 E.g 3322F4R
 the overall thickness is then added
 E.g 3322F4R16.70
 Contact us for more information

Bespoke production, we can produce almost any new or existing.
 Brake pad shape in any Mintex compound.
 Contact us for further information.

** Regulation 90 approved for road use in M1144, M1155 or both.

Yes or Available	= In live range
MTO	= In range but made to order
TBA	= To be Available
In Prep	= In preparation
Email/Call	= Contact for further information
MFR	= Mintex Shoe reference
