2020

Fire Rescue teams at the race track and on the city streets demand rugged and dependable tools. AMKUS offers a family of high performance battery powered and line extrication tools. The tools' bodies are constructed from solid aluminum and are ready for service in the severe duty challenging first responders.

HIGH PERFORMANCE BATTERY AND LINE POWERED TOOLS

The AMKUS ION® family of battery powered tool utilize the DeWALT® FLEXVOLT™ battery platform. It is the only battery that automatically changes voltages when you change tools, so you can share batteries between ION tools and other fire-rescue tools like lights, saws, and drills. The AMKUS LINE tools deliver power, balance and a size that still allows access to even the tightest spaces.

ION®

A Family of Tools

The battery powered ION tools are all-aluminum and ready for severe duty. The tools are available in multiple sizes and speeds, yet all share a balanced design for easy tool handling. Though powerful, the tools are compact so they can access the tight spots found in crash scenes and they take up less room on the apparatus.

Share the Power

AMKUS ION tools utilize a complete DeWALT® system that includes battery, motor, and intelligent electronics to deliver maximum power and life. The FLEXVOLT™ battery operates the ION tools at 60 Volts and automatically changes to 20 Volts when paired with other tools like saws and drills. In addition, the batteries are accessible from hundreds of outlets and are substantially more affordable than proprietary battery systems.

LINE

Innovative Designs

Long recognized as leaders in power and rugged tool durability, AMKUS offers a wide range of hydraulic LINE tools. Their design begins with an extraordinarily balanced tool that provides operator comfort and safety. In addition, innovative blade designs and spreader accessories allow first responders quicker and safer rescues.

Multiple Power Options

AMKUS offers a wide range of power units for its LINE tools. Choose from Briggs & Stratton or Honda engines in multiple sizes on portable units. For a truck mounted power unit, select the 240SS Super Simo which allows for two tool simultaneous operation with only a 15kW generator.

STRUTS

RESCUESTRUT is a telescoping and hydraulic strut system that's easy to deploy and use for vehicle stabilization, structural collapse and more. The tools are fully assembled and include a single pin adjustment for rapid deployment. A wide variety of strut heads are available that work across the entire strut family.

MOTORSPORTS

In 1984, AMKUS conducted a demonstration of its extrication equipment for NASCAR and Daytona International Speedway staff in Daytona Beach at a hotel parking lot not far from the beach. AMKUS supplied rescue tools that year to the Daytona International Speedway and NASCAR ... and a winning partnership was born.

Today, Track Services Safety Teams carry AMKUS Rescue Systems tools at every NASCAR-sanctioned event. In 2014 the AMKUS racing family expanded again, adding the NHRA (National Hot Rod Association), ARCA and IMSA. These relationships continue and we believe that our relationship with professional motorsports is the ultimate proving ground for AMKUS product innovation.
