Sales Pitch – why you should still use this template even through it is not mandatory

- Whether you choose to use this template or not, the TNT BAA asks you to provide all the information the template asks for:
- “The Government encourages proposers to complete an **editable MS excel budget template.**” (*DARPA-BAA-16-24, page 24*)
- (1) **“Total program cost broken down by major cost items** to include:
 - **direct labor, including individual labor categories or persons**, with associated labor hours and numbered direct labor rates
 - If consultants are to be used, proposer must provide consultant agreement or other document which verifies the proposed loaded daily/hourly rate
 - **Indirect costs including Fringe Benefits, Overhead, General and Administrative Expense**, Cost of Money, etc. (Must show base amount and rate)
 - **Travel** – Number of trips, number of days per trip, departure and arrival destinations, number of people, etc.
 - **Other Direct Costs** – Should be itemized with costs or estimated costs. Backup documentation will be submitted to support proposed costs. An explanation of any estimating factors, including their derivation and application, must be provided. Please include a brief description of the proposers’ procurement method to be used;
- (2) major **program tasks by phase**; (3) an itemization of **major subcontracts and equipment purchases**, to include: a cost proposal as detailed as the Proposer’s cost proposal; (4) an itemization of any **information technology (IT) purchase**, as defined in FAR Part 2.101; (5) a summary of **projected funding requirements by month**; (6) the source, nature, and amount of any industry **cost-sharing** ... and (7) identification of pricing assumptions of which may require incorporation into the resulting award instrument (e.g., use of Government Furnished Property/Facilities/Information, access to Government Subject Matter Expert/s, etc.).” (*DARPA-BAA-16-24, page 24*)

- Majority of cells in the “Phase” tabs are white, which means that a majority of the cells are calculated
- Asks for a breakdown of the following major cost items:
 - Labor and Benefits
 - Supplies
 - Equipment
 - Patient related/animal related
 - Subcontractors
- By:
 - Item name
 - Description
 - Page reference to supporting documentation (if applicable)
 - Cost
 - Unit description
 - How much is being applied to each task

Phase II Travel Program-Admin Costs (ODCs) Expenditures by Month Sub - University XYZ Budget Sub - University XYZ Travel Animal and Human Use Milestones and Deliverables

- The level of detail illustrated above is required for negotiations
- We understand that it is difficult to plan for DARPA-specific travel because the meeting dates, duration, and location are TBD
 - Estimate to the best of your ability
 - Meetings will be domestic, there will not be a reg fee
- Pull lodging and M&IE rates from the GSA website
- Conference attendance needs to be supported with a very strong justification of how it is in the best interest of the project

***If a subcontractor costs more than \$500,000 per phase, use the more detailed format for the subcontractor budget breakdown (as seen in the tabs titled Phase I, II & III)												
***Add other fields (e.g., Program-Admin Costs, patient related, etc.) as applicable												

Phase II | Travel | Program-Admin Costs (ODCs) | Expenditures by Month | Sub - University XYZ Budget | Sub - University XYZ Travel | Animal and Human Us ...

- In the "phase" tabs, we ask for subcontractor costs to be applied to tasks and subtasks to understand how the costs are applied to the overall tasks and subtasks for the project

- Recommended Use

- < \$500,000 per phase: use format Illustrated above
- > \$500,000 per phase: use more detailed "phase" tab format

- A few tabs are not linked to any other tab in particular, but still contain essential information
- Designed to easily display what tasking has animal and human use associated with it

- Important and very helpful for internal planning purposes within DARPA
- Try to make the data as accurate as possible
 - Consider increases/decreases in spend rate rather than simply dividing the cost for a given phase by the months in a given phase
