### DID YOU KNOW?

TIME SAVINGS		WATER SAVINGS	
Avg. time taken to load dishwasher (without pre-rinsing)	Avg. time taken for Manual Dishwashing	Whirlpool Dishwasher	Manual Dishwash
<b>8.8min</b>	<b>40min</b>	<b>13.4l</b>	<b>60.2l</b>
Time saved per load when using dishwasher: 30min	<b>2.5 weeks of work</b> day per year	Per load: Handwash uses 4x more water	

Why waste time, water and energy washing by hand when a dishwasher can do it quicker and more efficiently? Let the SaniFresh Dishwasher do the heavy lifting so you can spend more time on the finer things in life.

The aforementioned results are based on a 40 person survey study in SJTC USA (collaboration between Whirlpool and University of Michigan in 2018/2019) from washing 2 loads - 1 using a dishwasher and 1 via handwash. All soiling and testing follows American Home Appliance Manufacturers procedures.
