The most powerful and complete treatment available anywhere for so-called incurable disease

*"I am convinced that integration of **Gerson's therapy** with the holistic immune-biological treatment will produce the best possible results."*

- **Josef M Issels MD**

*"I see in **Max Gerson** one of the most eminent geniuses in medical history."*

- **Albert Schweitzer MD**

LIVING LEGACY: THE WORKS OF GENIUS

Josef M Issels MD

Nov 21, 1907 - Feb 11, 1998

Dr. Josef Issels is regarded throughout the world as **the Father of Integrative Medicine**. His *"Hypothesis of the Pathogenesis of Cancer, Chronic, and Degenerative Diseases"* is the algorithmic template which guides the integration of alternative, complementary, and standard treatments by physicians. Two independent retrospective epidemiological reviews confirmed that Issels consistently cured many exhaustively pretreated and hopelessly advanced cancer patients during his forty years as head of a hospital for incurable cancer patients.

The focus of integrative medical care is the individual patient – the implementation is two-fold, comprising **1)** both standard and unconventional methods directed at the elimination of malignant cells as well as **2)** a system of non-specific immunological treatment modalities aimed at the restoration of the internal milieu and enhancement of the natural defense and repair mechanisms of the whole person.

According to **Roger Newman Turner, N.D. (Naturopathic Medicine – Treating the Whole Person)**, *"Dr. Issels provides what can be regarded as a 'blueprint' for our understanding of all chronic disease in his theories on the pathogenesis of disease."*

Dr. Issels was the subject of a 1970 BBC documentary entitled *"Go Climb a Mountain."* BBC researchers concluded that the results of two independent epidemiological chart reviews had confirmed the cure of many cases of advanced cancer. A.G. Audier reported a 16.6% cure rate in 252 histologically verified Stage

IV metastatic malignomas by the Issels comprehensive immunotherapy even after all conventional methods were exhausted (world-wide cure rate is 2%). Using the same exclusion criteria, **John Anderson, M.D.**, reported 17% cures of histologically verified metastatic malignomas all Stage IV, by the **Issels** comprehensive immunotherapy. The study comprised 570 patients, 87% of which were alive and disease-free after 5-years.

Josef M. Issels, MD, became internationally known for his remarkable rate of complete long-term remissions of "*incurable cancers*" in patients who had exhausted all standard treatments, such as advanced cancers of the breast, uterus, prostate, colon, liver, lung, brain, sarcomas, lymphomas, and leukemias.

After completion of **Dr. Issels'** treatment, these patients remained cancer free for up to 45 years, leading normal healthy lives. **Dr. Issels'** treatment also significantly reduced the incidence of recurrent cancer after surgery, radiation, and chemotherapy, thereby considerably improving cure rates.

Dr. Rogers states that *"it was my privilege to work with **Dr. Issels** for the last years of his life. What he taught me will remain with me as part of my practice forever. He was a genius and humanitarian and I have deep respect for him as a human being. He told me how he had always wanted to combine Issels Therapy with **Gerson** Therapy and for him this combination, as practiced by **Dr. Rogers**, 'is incredible'"*.

Max B. Gerson, M.D.

October 19, 1881 - Mar 7, 1959

Within the context of modern science and medicine, **Dr. Rogers** offers the various dietary and detoxification treatments developed by **Max B. Gerson, MD**. For

more than four decades, the medical team headed by **Dr. Rogers** has used an in-patient treatment environment as the primary venue for the study, development and refinement of the Gerson nutrition, life style change, detoxification, diet therapy. Today, **Gerson's** therapy is used as the foundation upon which other therapies are placed.

Gerson's dietotherapy for cancer is an intensive nutrition-based form of immunology. Macro-nutrient manipulation in the context of micronutrient supplementation stimulates immunity and promotes tissue integrity. It works closely with the healing forces of nature to stimulate tissue repair and normal growth through the input of more fresh, raw vegetable materials than any other nutritional intervention. Fresh, raw fruits and vegetables are the source materials of almost all micronutrients in their pristine organic composition. Although the diet includes some cooked foods in its three daily vegan meals, extraordinary amounts of unaltered foods are consumed. Specific fruits and vegetables, both raw and freshly prepared, and their raw juices supply enormous quantities of many phytochemicals currently under study worldwide for exciting anticancer and health promoting properties. Moreover, the use of raw materials ensures that patients receive even those health-promoting factors not yet identified.

Oncological dietotherapy is a medical specialty, not unlike oncological radiotherapy or chemotherapy. In many instances dietotherapy will be sufficient to cause complete regression of cancer. **Dr. Rogers** believes that complementary use of medical specialties will lead to more satisfactory overall outcomes. To this end, patients are enrolled in outcomes studies. Results will be published in future medical literature.

Dr. Dan Rogers, MD, PhD, NMD

Dr. Rogers has been treating patients using complementary, alternative, holistic medicine since the late 1970's. His practice started at the "*Jardines de La Mesa*" facility in 1978. Charlotte Gerson, **Dr. Gerson's** daughter and Norman Fritz were just reintroducing the idea of **Gerson** Therapy to the medical world, as it was just a "*book on the shelf*", from the time that **Dr. Max Gerson** passed away in 1959, until the late 1970's. Charlotte Gerson and Norman Fritz had essentially been unsuccessful except in a very limited way until that time.

Dr. Rogers along with several other physicians started using the therapy as per **Dr. Gerson's** Book. **Dr. Rogers** soon realized that the practice needed to continue to develop, just as **Dr. Max Gerson** did while he was alive. As one example, Charlotte Gerson would not allow patients with prior chemotherapy to be treated, as they did not do well in her limited experience. **Dr. Rogers** developed the treatment protocols that everyone currently practicing true **Gerson Therapy** still uses today for the treatment of cancer patients with prior treatment using chemotherapy, radiation or surgery.

Dr. Rogers continued his practice at "*Hospital La Gloria*" when the two facilities merged in the early 1980's. After a destructive fire in the kitchen area of La Gloria, the practice was moved to "Hospital Del Sol" in the beach area of Playas Tijuana. When the practice subsequently moved to "*CHIPSA Hospital*", also in the beach area in the mid 1980's, **Dr. Rogers** took over as **Chief of Staff and Director of Clinical Investigations**.

In the early 2000's, Dr. Rogers and his family established the **Baja Health & Wellness Center** where they have been using his protocols since that time. He now continues to develop and improve on what he calls "*Rogers Immunotherapy & GersonPlus Therapy – The Better Choice.*"

Dr. Rogers holds the registration in Mexico to provide medical treatment for human illnesses by means of nutritionally based Gerson Therapy (Marca Registrada # 512646). He also holds all rights reserved under the following trademarks: Marca Registrada # 512642, #512643, in Mexico. He was also granted the Registered Trademark/Service Marks in the European Union (CTM) #66563 for Classes 9, 16 and 42 for Gerson Therapy.

Cancer is a generalized disease of the body arising in the following phases:

1. Causal factors, leading to disease symptoms (including the formation of tumors).
2. Secondary damage, leading to disease symptoms (including the formation of tumors).
3. Disease milieu and lowered resistance, leading to disease symptoms (including the formation of tumors).
4. Susceptibility to infection and pathological change, leading to disease symptoms (including the formation of tumors).

Dr. Rogers' treatment program includes:

1. *Correction* of all known causal factors;
2. Desensitization to causal factors;
3. Normalization of secondary damages to host metabolism by dietotherapy and supportive treatments, correction of acid-base derailment by treatment of serum alkalosis and tissue acidosis, hyperthermia, fever therapy, oxygen/ozone treatment, ultraviolet blood irradiation, enzymes, glandulars, organ extracts, neural therapy, etc., and;
4. Natural Vaccines.

Clinical observation and statistical analyses have revealed the following:

- In incurable cancers, when all standard treatments have been exhausted, immunological modalities improve general condition, prolong life and, in a variety of cases, achieve complete long-term remissions.
- Immunological treatment following surgery, radiation and chemotherapy significantly reduces the incidence of relapse and raises the cure rates in most cancers.
- During immunological treatment, cancer patients experience relief from a vast variety of chronic conditions that have been resistant to standard treatment.

“Rogers Immunotherapy & GersonPlus Therapy – The Better Choice.”

“Dr. Josef Issels and Dr. Max Gerson based their treatments on the concept that cancer along with chronic and degenerative diseases do not develop in a healthy body with intact defense and repair functions. This is the basis that **Dr. Dan Rogers** continues to use for his medical practice.

Cancer presents in a specific internal environment that promotes malignant growth. This environment develops over a period of time due to multiple causes and conditions that persist and remain chronically active even after treatment of the malignancy (by surgery, radiation, and/or chemotherapy). These remaining causes are responsible for the formation of new disease, which occurs after conventional anti-malignancy treatment in every second cancer patient according to world statistics.

In 1996, **Dr. Issels** moved to California to become co-principal investigator and senior medical consultant with **Dr. Rogers**. He taught **Dr. Dan Rogers** his medical philosophy and protocols. Together, they worked to integrate **Gerson's therapy** and **Dr. Issels'** Comprehensive Immunotherapy. **Josef M. Issels, M.D.** joined the research team and medical practice as Senior Consulting Physician and Co-Principal Investigator in July of 1996. He led the initiative to merge his Whole Body Immunotherapy with the **Gerson Therapy**. **Dr. Issels** touched every part of the research team and medical practice with his wisdom, insight, cutting vision,

patience and humor. His gift to humanity lives on in **Dr. Rogers** practice as he furthers his quest for more cures.

Dr. Dan Rogers, a veteran of alternative medicine since 1978, is the Chief of Staff and Director of Clinical Investigations. Under his leadership, the medical team applies the new and far reaching “**Rogers Immunotherapy & GersonPlus Therapy – The Better Choice.**”

Therapy Protocols - The physicians place equal importance on the destruction of malignant cells AND on the causes and conditions leading to the body's tendency to develop cancer, chronic and degenerative diseases in the first place.

Holistic comprehensive immunotherapy as practiced by Dr. Rogers is able to reverse chronic degenerative diseases such as arthritis, lupus, Grave's disease, Sjogren's syndrome, asthma, ALS, Alzheimer's Disease, Multiple Sclerosis, Candida, allergies, Degenerative Diseases, and almost all types of advanced cancers such as cancers of the breast, uterus, prostate, colon, liver, lung, brain, sarcomas, lymphomas, and leukemias, etc.

A REVIEW OF KEY COMPONENTS OF THE

“Rogers Immunotherapy & GersonPlus Therapy – The Better Choice.”

GERSON THERAPY - **Max B. Gerson, M.D.**, may be regarded as the Father of Nutritional Immunology for his many contributions in chronic and degenerative diseases, infectious diseases, and cancer (see section on “**Gerson's Diet Therapy**”).

AUTOLOGOUS ALL NATURAL VACCINE - The patient's own plasma is cultured, following procedures that favor the development of antigenic peptides and other immunogenic compounds. These immune stimulating products are harvested to create a personalized vaccine. Experience has shown that its effectiveness is enhanced when it is administered within a comprehensive immunobiological treatment program that corrects the conditions that lead to immune suppression. The natural vaccine is non-toxic and sterile. Under medical supervision, it is

injected subcutaneously on a varying schedule from daily to once a week for 30 days to 3 months depending on each patient's individual need. Depending on response, a new vaccine may be prepared for the patient every 3 months for a year or longer.

AUTO-HEMOTHERAPY - A small amount of the patient's blood is removed, allowed to break down to release intracellular forms, and injected intramuscularly.

ULTRAVIOLET BLOOD IRRADIATION (UVB) - A small amount of the patient's blood is circulated in a closed system, by cuvette through a device which ozonates it, irradiates it with ultraviolet light, and returns it immediately to the patient's bloodstream. This procedure produces a multitude of beneficial effects with no known side effects.

OZONE - First reported in 1965 to enhance the cancer killing effect of radiotherapy, its regular application is based on the observation that patients experience enhancement of subjective sense of well being. More recently the possibility has been raised that administration of oxygen radicals may compensate, at least in part, for the failure of P-53 gene expression thereby encouraging cancer cell apoptosis (cell suicide). Ozone is administered topically, rectally, and intravenously (during UVB).

COLEY'S TOXINS/COLEY'S ALL NATURAL MIXED BACTERIAL VACCINE -

Historically, a surprisingly large number of "spontaneous regressions" of cancer have occurred during inflammatory infections. Coley's toxins are an all natural, immune stimulating, injectable (dead) bacterial reagent documented historically to have cured many cases of advanced cancer. Gerson (1958) called for an investigation of Coley's toxins within the context of his treatment. No one ever did until Dr. Rogers successfully added this to his advanced treatment protocols in the 1990's. Issels used this material safely and successfully in thousands of Patients over a period of forty years. Dr. Rogers has used this natural mixed bacterial vaccine to successfully treat many hundreds of patients to date.

IMMERSION HYPERTHERMIA - Full body, medically supervised hot tub bath with herbal teas to induce sweating. This includes full body wraps and a cool down.

Body heating has been shown to have beneficial effects in cancer treatment.

LAETRILE - Typically it is used together with hyperthermia to weaken and possibly directly kill some malignant cells.

UREA/CREATINE - Danopoulos published in respected journals many provocative reports of tumor responses to synthetic urea and creatine. Dr. Rogers has merged Danopoulos' protocols with the much higher dosages used safely by Nalbadian. This treatment is an important alternative method of tumor debulking.

GOVALLO'S VG1000 - is an experimental natural vaccine aimed at prevention of tumor recurrence. Stemming from Govallo's Russian-certified vaccination to cure chronic miscarriages, injectable placental extracts exploit similarities between tumor immune-masking and placental protection against rejection.

WOBE ENZYMES - Wolf & Benitez (Wobe®) proposed the use of a variety of enzymes in high doses to combat malignancies. Preliminary findings in Germany are encouraging.

POLARIZING SOLUTION - This is a solution of glucose, potassium, and insulin (GKI) given intravenously to reverse tissue damage (edema) in the normal tissue surrounding tumors, and to destabilize malignant growths by making them acidic. It was developed by respected cardiologist Demetrio Sodi-Pallares, M.D.

CoQ10 - CoQ10 is a fat-soluble, **vitamin-like** compound that seems to have many health benefits. It is involved in the production of cellular energy and serves as an antioxidant. These properties make it helpful in the preservation of cells and the prevention and treatment of some chronic diseases. This compound has shown a strong anti-tumor effect in a breast cancer trial (Copenhagen, Denmark). Principal investigator Karl Folkers reports regression of liver and lung tumors in a current German trial.

REOSSIFICATION THERAPIES - These treatments such as calcitonin, clodronate, pamidronate, along with various others can heal cancer-damaged bones.

CARTILAGE THERAPY - Historically, Prudden demonstrated that cartilage extracts

from the tracheal rings of young calves accelerates and strengthens surgical wound healing, provides beneficial effect in arthritis, and is curative in malignant psoriasis. He published anti-tumor effects in 1985, and is conducting a current trial showing promise in advanced kidney cancer.

Other cartilage extracts like Shark Cartilage are in various stages of development and are being used as a treatment in many medical centers around the world.

PHYSICAL THERAPY + STRESS REDUCTION are essential components of rehabilitation.

STAGING/MONITORING Conventional lab tests and scans are used to stage and monitor the progress of patients. Patients are requested to bring prior medical and radiology records if possible when coming. Some alternative diagnostic procedures are used, however, physicians typically utilize conventional lab tests and scans at the hospital and for on-going follow-up after patients return home.

LABS - Routine basic tests may include SMAC (Chemistry Panel), CBC with Differential, Urinalysis, EKG, and specific Tumor Markers as needed.

RADIOLOGY - Any standard technology, including ultrasound, x-ray, MRI, CT, radionuclide bone scan, etc. may be ordered as often as necessary to monitor progress. Other techniques such as thermography may also be used.

MAXILLOFACIAL FOCI REVIEW - This set of diagnostic procedures includes the biological dentist and oral surgeons as needed. In the mouth, root canals, devitalized teeth, and silver amalgams are considered for treatment. In the nose and throat, sinuses, tonsils, and adenoids will be examined.

BIOLOGICAL DENTISTRY & REMOVAL OF FOCAL INFECTIONS - From the first tonsillitis - causing respiratory infections of infancy - and from the first cavities in baby teeth – strep and staph bacteria and other infections smolder chronically in both tissue and bone. Issels taught and Rogers continues to teach, that infections in teeth, jawbones, tonsils and adenoids are the longest standing (since early childhood) immune suppressing influences common to almost all cancer patients.

Surgical removal of chronically infected tissue and bone frees the immune system, giving far-advanced patients another chance to fight the disease from within. For example, in 1972 a consecutive sample of 462 cancer patients underwent tonsillectomies at Issels, Ringberg Klinik. An independent and highly regarded pathology laboratory confirmed that every single pair of tonsils was diseased with infections, atrophy, hyperplasia and even malignancies. After the institution of routine foci removal (including root canal teeth), the rate of deaths due to cardiac co-morbidity in the Ringberg Klinik fell dramatically and the rate of cures increased concomitantly.

The pictures of tumors are from the beginning of treatment. The tumor free pictures are after a couple of years of treatment.

Top-John – Stage IV Non-Hodgkin’s April 10. Lower – Pictures taken July 26

Holistic comprehensive immunotherapy as practiced by Dr. Rogers is able to reverse chronic degenerative diseases such as arthritis, lupus, Grave's disease, Sjogren's syndrome, asthma, ALS, Alzheimer's Disease, Multiple Sclerosis, Candida, allergies, Degenerative Diseases, *and almost all types of* advanced cancers such as cancers of the breast, uterus, prostate, colon, liver, lung, brain, sarcomas, lymphomas, and leukemias, *etc.*

THERAPIES AVAILABLE

Individualized therapy plans are designed for each patient on medical review of the patients' needs. Therapy plans are dependent upon the patient's physical condition, optimum results desired, time, etc. The treatment schedule is very important, as are the combination of therapies. Costs vary depending on treatments provided.

FULL GERSON'S DIET THERAPY® as practiced by **Dr. Rogers** since 1978.

13 Freshly prepared fruit and vegetable juices Vegetarian meals

Abundance of fresh fruit
Extreme salt restriction
Calorie restriction
Animal protein restriction
Acceleration of metabolism
Pancreas enzymes – oral
CoQ10 – oral
Niacin – oral
Liver capsules
Vitamin C – oral
Liver/B12 injections

Castor oil day's
Clay packs

Fresh juices
Extreme fat restriction
Fluid forcing
Nutrient Hyperalimentation
Potassium compound - oral
Acidoll
Vitamin E - oral
Brewer's yeast
Thyroid - oral
Lugol's solution
Enemas of coffee and/or
chamomile tea
Castor oil packs
Herbal teas

ROGERS IMMUNOTHERAPY & GERSONPLUS THERAPY ADDITIONS

Complete enzyme therapy
Electrocardiogram
Complete Lab testing with chemistry profiles
Somatometric Measurements

Daily Poly MVA
Daily Nursing Care
Daily Medical Consultations
Opt. Companion Room & Board

ADDITIONAL ROGERS IMMUNOTHERAPY & GERSONPLUS THERAPY SUPPORTIVE THERAPIES INCLUDE:

Autologous Vaccine
Coley's Mixed Bacterial Vaccines
Dental Toxin Review
Danoupolis Oral/Rectal Urea and Creatine
I.V. Urea solution
I.V. Polarizing (GKI) solution
Treatment for Heavy Metals

Govallo Therapy
Physical Therapy
Pain Control
Stress Management
Surgical Intervention
x-ray, Ultrasound, CAT or MRI
Shark Cartilage Oral, Rectal or IV

Chemotherapy

Immunology Therapy

Ultra Violet Blood Irradiation

Autohemotherapy

Laetrile (IV, Oral or Rectal)

Neural Therapy

Kalima or Colonic Therapy

Radiation Therapy

I.V. Vitamin C Infusions

I.V. Chelation Therapy

Hydrazine Sulfate, Oral, IV

Oncological Assessment

Tumor Markers

Additional Therapies as Required

Dr. Rogers treats each patient with care, respect and understanding, using any and all modalities at his disposal, including many not specifically mentioned above. Any one or more of these modalities or protocols **may** or **may not** be given to an individual patient. Also the timing of **when** a particular treatment will be started is a decision arrived at between the treating physician and the patient or guardian. The timing and the mix of treatments given an individual patient are part of the art of medicine and require experience to be done expertly. All of these treatments and more are available at current rates.

FINANCIAL INFORMATION

ADMISSION DEPOSIT: At the time of admission, you will be asked to make full payment. Your individualized treatment plan will be designed by **Dr. Rogers** and on going financial arrangements will be made at that time.

TAXES: All services are subject to a 16% federal tax in Mexico.

PAYMENT: Only PayPal, cash and bank transfers are accepted. *Please note: personal checks, cashier's checks, bank drafts or insurance assignments cards are not accepted as forms of payment.*

COSTS: Please note that all therapy is based upon the patient's condition and will be modified depending on the assessment of hospital personnel. Discount plans are available for hospitalization of 3 weeks or longer, if the patient is medically stable.

Note: Maintaining a patient on the above listed therapies is dependent upon medical review of the patient by hospital medical personnel. If at anytime the patient is no longer medically stable enough to remain on the above listed protocols, their stay from that time on is subject to regular hospital fees currently in effect. As long as the patient is doing any form of the above therapies, and the patient is not being charged higher current hospital fees, their stay will be subject to the full fees for the above listed therapies, even though they may only be receiving a part of the stated treatments.

An important factor in the patient's treatment is whether the patient has met their financial obligations, especially for some of the more costly treatments. This is best discussed prior to treatment.

Prices are subject to change without notice.

COMPANION ROOM AND BOARD: You are strongly encouraged to bring a companion. No individual aspect of the treatment is difficult to understand, but the initial learning curve is quite steep due to the many details involved. Experience has shown that a "buddy system" is far more likely than a "solo effort" to result in accurate replication of the treatment when you return to your home. Companions will be billed \$75 per day (\$525 per week) for meals, bedding, linens, towels, and toiletries. For **Rogers Immunotherapy** and **GersonPlus Therapy** patients, companions are included in the cost of the treatment.

PLAN YOU'RE STAY: Three weeks of hospitalization is generally recommended. Those with advanced disease and complications are encouraged to stay six weeks or longer.

HOME SETUP COSTS: A three months' supply of diet medications and supplies averages about \$1450. If you are on the [Rogers Immunotherapy and GersonPlus Therapy](#), most of your first 6 months of supplies are included in the cost of the treatment and will be sent home with you.

Juicers range from \$350 to \$2700. Appropriate choices include Norwalk, K&K, Champion (with a separate press), Juiceman, Angel Life, and Tribest Slowstar.

Your ongoing food costs range from \$200 to \$500 per week depending upon your location, seasonal supplies, and cost of shipping. We suggest you designate someone to investigate local and regional suppliers of organically grown produce (food co-ops, health food stores, shipping houses, state agricultural organizations etc.), while you are in Mexico.

All evaluations and discussions regarding specific medical treatment will occur at the hospital facility.

ADMISSION INSTRUCTIONS:

TRAVEL ARRANGEMENTS

Book your flight to the **San Diego International Airport or Tijuana International Airport.**

Please **provide us with your cell phone number and a photo** of what you will be wearing before you come, and please call the driver at [**\(619\) 838.1647**](tel:6198381647) as soon as your plane lands.

The Driver is parked offsite and will need about 5 minutes to meet you. Please call again as soon as you have picked up your luggage. **Proceed to the curbside and let the driver know what curbside space you are at** so you can be met there. (The signs telling where you are will be above you mounted to the building).

Please arrange to **arrive on a weekday if possible**, mid-morning (9am) to midafternoon (3pm). **No flights in or out on Wed. or Sat.**

Return flights are best late-morning (noon) to late-afternoon (6pm). **No flights in or out on Wed. or Sat. to avoid lengthy border crossing waits.**

Fee is \$75 per trip to and from the airport and or the San Diego area.

Transportation to and from the airport is included for ROGERS IMMUNOTHERAPY and GersonPlus clients.

DRIVING IN: Please contact the **BHWC** manager for a Google map.

QUOTES FROM THE EXPERTS REGARDING OUR RESEARCH

"When I toured the alternative-cancer-therapy clinics and hospitals in Tijuana, I was impressed by the lack of statistical information on outcomes. Some had a track record of thousands of patients, but they were unwilling or unable to provide potential patients/consumers with clear statistics. Of the medical practices that I visited, only one had a published, peer-reviewed, quantitative analysis of outcomes." - **Prof. David J. Hess, "Can Bacteria Cause Cancer?" NY University Press 1997**

(Editor's note: Dr. Rogers' group has the only USA peer reviewed published results of alternative medicine in Mexico.)

"This melanoma report represents a wonderful model of how retrospective observational data can be put together to indicate whether a prospective trial might be warranted and might well serve as the model for future early field investigations." - **Alan Trachtenberg, Acting Director, Office of Alternative Medicine, Office of the Director, National Institutes of Health, March 21, 1995**

"The results of this study are most provocative and convincing I might add" - **T. Colin Campbell, Cornell University, pers. comm., 1995.**

"If it [the melanoma report] is not pursued, it will represent a betrayal of patients who have had to wait too long for genuine breakthroughs." - **Edward Lord Baldwin of Bewdley, Co-Chair Parliamentary Group for Alternative and Complementary Medicine, House of Lords, UK, in an address before the House of Lords, 74LD23-PAGV7, Jan. 10, 1996.**

"Proponents of alternative medicine should put (a randomized study of the Gerson diet) at the top of their agenda." - **Julian Peto, Royal Cancer Hospital, UK, May 15, 1996.**

PATIENT CHECKLIST:

IMPORTANT THINGS TO BRING WITH YOU

Medical records, including pathology and current lab reports, discharge summaries, X-rays , CT, MRI, and CAT scans not already provided (digital copies are preferred). If you encounter difficulties obtaining the necessary medical records, **please do not delay travel**. Upon your arrival, we will have you sign a medical release and obtain the records for you.

- **A medium empty suitcase** to transport your treatment supplies.
- **Laptop, smart phone or other Wi-Fi device** for checking and sending e-mail.
- **Blank notebooks**, pens and pencils.
- **Clock radio** or travel alarm.
- **Personal articles** (toilet/grooming).
- **Pajamas, robe, slippers, and informal clothing** for pleasant days (in the 70s) and cool evenings (in the 50s).
- **Supplies of your current prescription medications and medical supplies.**

Some medications (e.g.: pain killers, especially morphine and Demerol) and supplies (e.g.: colostomy fittings) are not internationally standard. Colostomy patients, please bring colostomy sleeves for irrigation. ***Please bring quantities adequate for your stay (min. 4 weeks supply).***

Identification Documents

- **Valid Passport** or **Valid Western Hemisphere Border Crossing Card** for all U.S. Citizens. **DO NOT DELAY TRAVEL WAITING FOR A PASSPORT.** It can be mailed to the center by a friend.

- **A Passport, visa or other documents WILL BE required** for all others. You will need these for entry and re-entry into the U.S. No papers of any kind are required of anyone to enter Tijuana, Mexico.

Dr. Rogers treats each patient with care, respect and understanding.

Our main purpose is to provide the following:

- 1) Instruction to those wanting to know;*
- 2) Healing to those in need; and*
- 3) Comfort for the spirit of all with whom I come in contact*

If you have any other questions, please contact us either by e-mail or by phone.
We are looking forward to hearing from you.

May God Bless You!
