Helpful Tips When Paving Your Driveway

Things to do before you start

- ✓ Make sure to contact your local municipality to determine if a permit is required to avoid delays.
- ✓ Decide who will be handling any changes to your fencing, walks, lighting or landscaping. Your contractor can help you with this.
- ✓ Make sure that the contractor has a displayed HIC# on their vehicle and on all their paperwork.
- ✓ Check out a contractor's Better Business Bureau rating.

More Tips For Homeowners

- ✓ When getting multiple quotes, make sure that everyone is quoting on the same quantities and same specifications. Take special care to note that the asphalt thickness quoted is AFTER compaction.
- ✓ For expertise, deal with a company who hires only professional, full time employees.
- ✓ Installation methods and the type of equipment used have an impact on the longevity of your driveway. Carefully check and compare!
- ✓ When a contractor offers a warranty, make sure that it is a written warranty that is signed and dated at completion of the job. All other warranties are only as good as the contractor's word.
- ✓ Without proper water drainage or a solid base, your driveway will not last. Ask your contractor to help you with this.
- ✓ Apply herbicide to the stone base at least two weeks before you want to pave.

BEWARE!

There is no such thing as leftover mix! Avoid special offers from contractors with "extra mix".

A Message From The Kreider Family

*B.R. Kreider
started the
company in 1936.*

At B.R. Kreider, we understand that your home is more than just a place to live – it's an investment. Our family has been doing this since 1936. We have been caring for our customers' properties and driveways for a very long time. Our business has been built on the core value of "Do unto others as you would have them do unto you".

That means we will treat your driveway or paving project as if it is our own. We are determined to provide you the best driveway and are willing to offer an extended warranty to prove it.

Our team of experts will guide you through every step of the process, giving you a driveway or other paving service that you will be proud of for many years to come.

*4th Generation of Kreider Ownership
Brent Kreider, Courtney Dougherty, Heidi Hollinger*

Sincerely,

The Kreider Family

5 REASONS WE'RE THE SAFEST CHOICE FOR HOME PAVING:

- 🔗 **No one has been in the business longer**
- Since 1936!
- 🔗 **OVER 20,000 driveways paved. As many as 25 homes per week!**
- 🔗 **Our depth of paving quoted is industry standard *AFTER* compaction**
Don't be fooled by others who quote depth *BEFORE* compaction!
- 🔗 **BEST warranty in the business!**
- 🔗 **"Do unto others as you would have them do unto you"**
is at the center of our core values.

*We do all sizes of
driveways!*

Why Our Installation Process Is Better

The B.R. Kreider Driveways' approach begins with a professional assessment of your driveway needs, followed by a fair and accurate quotation with a bottom line price you can rely on.

A Solid Base

We will help you determine what is needed to achieve a solid subgrade and stone base for a long lasting driveway.

Driveway Slope

One of our primary objectives is to install a minimum of 1% slope to prevent puddles and promote proper water drainage.

Transitions to Existing Asphalt

Paving notches are milled into existing asphalt and sealed to create a smooth transition and to prevent the new asphalt from getting thin.

Extended Life

For new installation, 2 layers of asphalt are recommended and for existing driveways a compacted leveling course of asphalt is recommended before repaving.

Compaction is Key

Compaction determines the longevity of your driveway which we achieve with our vibratory rollers. Our lighter 1 ton static roller is only used for the finish.

Taking Care of the Edges

We professionally hand tamp all of your driveway edges to aid in compaction and to create a clean and finished look.

We'll Make Your House Look Great By Making Your Driveway Look Awesome!

IF YOUR DRIVEWAY LOOKS LIKE THIS...

WE CAN MAKE IT LOOK LIKE THIS!

Let Your Driveway Make A Statement

B.R. Kreider Driveways can transform your driveway into an entryway that reflects your personality and taste. We offer a wide variety of decorative paving product options to provide the look and feel that's right for you.

HELPFUL TIP

Add Some Color

With savings up to 50% compared to other paving alternatives, B.R. Kreider's Decorative Paving can add charm to any driveway.

Decorative Paving

the most innovative product
in the paving industry

StreetPrint[®], imprinted asphalt, provides choice of design and color to complement your environment.

How We Do It

After paving is complete, we use an infrared technology to bring your paving back to a hot temperature to imprint the asphalt.

We then use a wire mesh grid to create the design imprint. Adjustments are made to keep the template in alignment and hand tooling is done to achieve proper depth.

Finally, a protective coating is applied providing color, protection and durability.

Your paving will be solid, sealed against water damage and worry free.

HELPFUL TIP

Spruce Up Your Home

Using Decorative Paving on the edges of your driveway is an incredibly affordable way to add some color to your home.

Solutions Built On Solid Ground

The Complete Story

Since 1936 B.R. Kreider & Son, Inc. has been sculpting land in and around Central Pennsylvania. The words we recall from our Christian principles, "Do unto others as you would have them do unto you," has been the cornerstone of the B.R. Kreider & Son, Inc. philosophy since the inception of our business. Today, as then, we are dedicated to providing our residential and commercial customers with the highest value/level of quality and service.
