Third Bridge Hong Kong Limited

Applications from non-nationals: Yes

Stand: 3

Third Bridge▲

Third Bridge is a primary research firm that helps the world's leading investors uncover the intelligence that makes or breaks investment deals. We find industry professionals who are experts in their field and can share their knowledge with our clients.

Our clients are private equity firms, hedge funds and strategy consultants. They work with us when they need to get smart fast about a market, company or product.

As a recent graduate, you will join our Connections Team, which arranges private consultations between our clients and industry experts. You will learn how to identify the most relevant people to help investors answer questions across a wide range of industry sectors. This is the intelligence that reveals the true value in their deals.

You'll be on the phone talking to industry experts in a matter of days, and our clients will be looking to you to track down the insight they need to support their next deal-making decision. You will develop a deep understanding of what matters to a hedge fund analyst when they look at a stock, what drivers impact private equity deals, and how a management consultant helps form corporate strategy.

We'll challenge you to think creatively about each client project and look at their need from multiple angles. You won't be living in Excel and PowerPoint, or out of a suitcase – you'll be on the phone having conversations about global business and sector developments. These are stories you could be reading about days or months later in the Financial Times.

As a growing company, we have many opportunities for bright people to grow their skill set and take on significant responsibility. We're proud to say that most of our Team Leaders joined us as Analysts and achieved leadership roles within two years.
