Hidden Holes Surcharge	\$8	8	8	9	11	12	12	13	13	16	16	17	19	23	24	29	30	33	36	37

NOTE: Smallest width available 18" exact. See color chart on page 26 for color availability. Not available with perforated slats. Cannot exceed 6400 sq. inches as a single blind. Due to weight limitations, blinds that fall to the right of the heavy lines must be manufactured as multiple blinds on one headrail. See guidelines below.

Cordless Two or More Blinds on One Headrail (.006 and .008)

- Minimum blind width of individual blind – 18"
- Maximum finished blind width of individual blind – 60"
- Maximum finished blind width:
 - Two on one headrail – 120"
 - Three on one headrail – 144"
- Minimum finished blind height – 12"
- Maximum finished blind height – 72"
- Gap between blinds – 3/8"

Clearance for Cordless – 1"

Clearance is the distance from backside of slat stack to back of bracket. This allows the blind to be mounted above window frame for outside mount without projection brackets.

Used on all standard colors.

Horizontal Blinds

Skylights: Dual Headrail

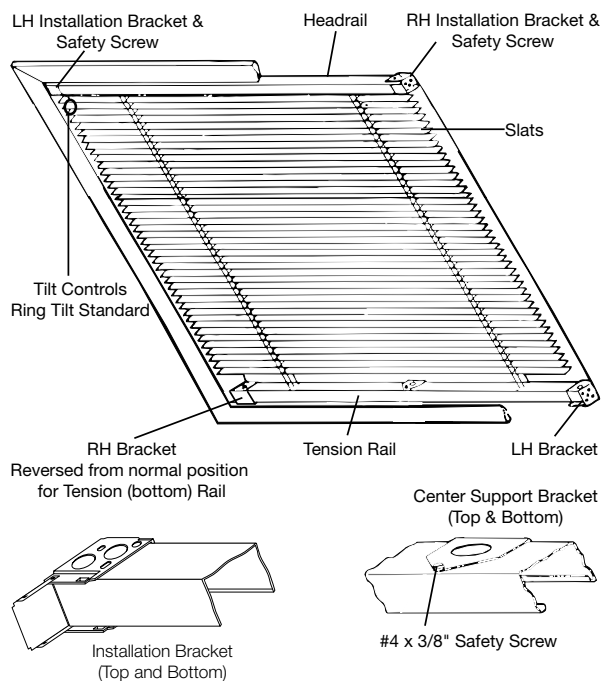

Dual Headrail Features

- For windows at more than a 45 degree angle
- Blinds are tilt only
- Choose .006 or .008 gauge 1" aluminum slat
- 1" x 1½" steel headrail, box design
- Ring tilt left (standard) or right
- Color-coordinated components provide a finished look (see page 12)
- Multi-colored striped blinds (see page 3)
- Sky Poles available for easy tilting (see page 3)

Dual Headrail Skylight

Ideal for skylights at more than a 45 degree angle.

NOTE: Blind is tilt only, no lift.

How to Measure

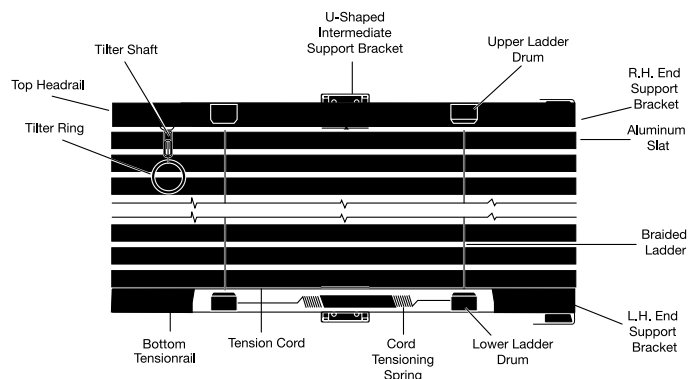

Inside Mount

Measure precise width and height dimensions and specify this as an "opening size, make allowance". Do not deduct for headrail clearance gaps. Manufacturer will make all allowances for both width and height. Headrail, tension rail and slats will be manufactured ½" less than the dimension given as width. Proper deductions will be made for blind height.

Outside Mount

Measure width and height dimensions and specify as "blind size, cut exact". The manufacturer will not make any allowances for width or height. Headrail, tension rail and slats will equal dimensions given as width. Blind height will refer to the distance from the top of the upper bracket to the lower bracket of the installed blind and will equal dimension given as height. Do not deduct for headrail and tension rail clearance gaps.

Dual Headrail Component Diagram

TILT ONLY - NO LIFT

NOTE: Blind height may measure shorter than order states due to the cord tension spring. Proper installation will increase tension and lengthen the blind to completely cover your window opening.

Size Specifications

Dual Headrail		
Minimum Width	9"	
Maximum Width	142"	
Minimum Height	10"	
Maximum Height	Blind Width	Max Height
	9" - 23"	126"
	23½" - 32"	102"
	32½" - 72"	90"
	72½" - 142"	80"

Incline Wire Features

- Degree from vertical cannot exceed 45 degrees
- Choose .006 or .008 gauge 1" aluminum slat
- 1" x 1½" steel headrail, box design
- Torque wand tilter with clear wand
- Wand tilt left (standard) or right
- Durable polyester lift cord
- Lift cord right (standard) or left
- Cord bead stops
- Almost invisible braided polyester support ladders
- Color-coordinated components provide a finished look (see page 12)
- Sky poles available for easy tilting upon request (see page 3)
- Multi-colored striped blinds (see page 3)
- Double-slatted blinds (see page 3)
- Ring tilt may be substituted for wand
- Ring pull is an option

How to Measure

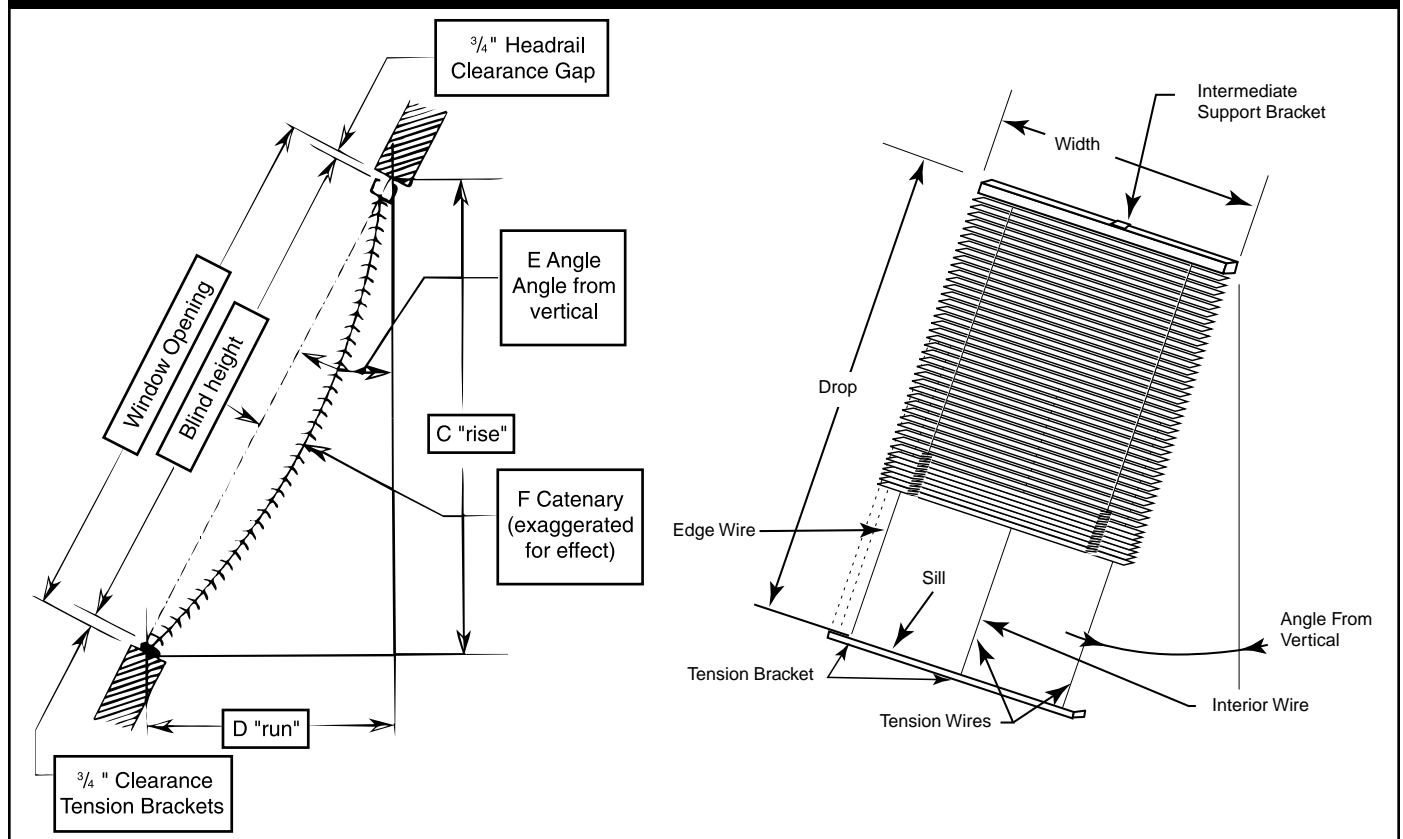

Inside Mount

Measure precise width and height dimensions and specify this as an "opening size, make allowance". Do not deduct for headrail clearance gaps. Manufacturer will make all allowances for both width and height. Headrail, tension rail and slats will be manufactured ½" less than the dimension given as width. Proper deductions will be made for blind height.

Outside Mount

Measure width and height dimensions and specify as "blind size, cut exact". The manufacturer will not make any allowances for width or height. Headrail, tension rail and slats will equal dimensions given as width. Blind height will refer to the distance from the top of the upper bracket to the lower bracket of the installed blind and will equal dimension given as height. Do not deduct for headrail and tension rail clearance gaps.

NOT RECOMMENDED FOR INSTALLATIONS GREATER THAN 45° FROM VERTICAL

- Limitations may apply within each blind type. Fax a drawing to Customer Service to determine availability.
- May require up to 2-4 weeks lead time to manufacture
- To order, fax a signed drawing with all dimensions to customer service.
- Available as Incline Wire for Skylights (see page 11)
- Available in all Classics colors (see page 26)

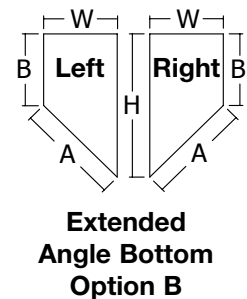

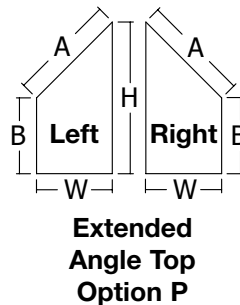

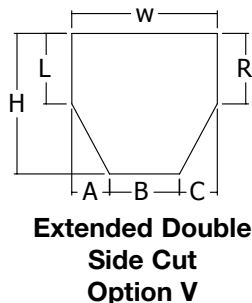

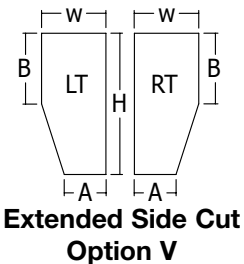

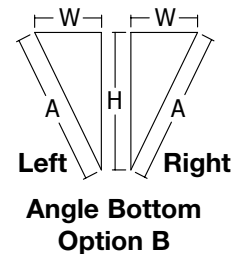

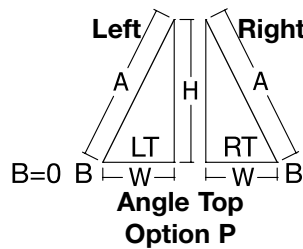

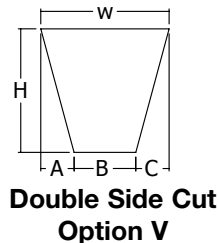

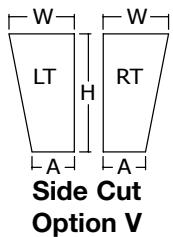

Controls

- Side Cuts: Standard, Reverse or Same Side (straight side only)
- Angle Bottoms: Standard, Reverse or Same Side (dependent on shape)
- Angle Tops & Bottoms: Cord Lock must be Low Side
- Full Tilt: Lift depends on shape
- Cord Tilt: not available
- Top Lock Cord Lock: not available
- Angle Bottoms: Bottom point will have light gap, 60° maximum angle degree

Size Considerations

	Side Cuts	Angle Top and Bottom
Minimum Bottom Rail	4½" Exact	12" Exact
Maximum Width	142"	142"
Minimum Height	6"	6"
Maximum Height	126"	126"

Side cuts, triangles, angle top and bottom

Specialty Shapes: Side Cuts, Angle Top & Bottom

Horizontal Blinds

Specialty Shapes: Octagons, Triangles

Features

- Choose .006 or .008 gauge 1" aluminum slat
- An illustration can be inverted or reversed or resized
- Angles must be greater than 30 degrees; headrail is split on many of these shapes
- Use 1" x 1½" steel headrail
- Valance not available
- Limitations may apply within each blind type. Fax a drawing to Customer Service to determine availability
- May require up to 2-4 weeks lead time to manufacture
- To order, fax a signed drawing with all dimensions to customer service.
- Available as Incline Wire for Skylights (see page 11)
- Available in all Classics colors (see page 26)

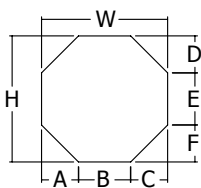

Controls

- Controls: Standard, Reverse or Same Side (straight side only)
- Full Tilt Left or Right: Lift depends on shape
- Limited Tilt: Available
- Cord Tilt: Not available
- Top Lock Cord Lock: Not available

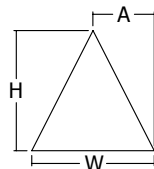

Size Considerations

Horizontal Blinds

MAKING A TEMPLATE FOR SPECIALTY SHAPE WINDOWS

1. Tape butcher paper, Kraft or construction paper over the window opening allowing plenty of overlap.
2. Being careful not to press against the template paper while tracing, draw an exact outline of the window opening. Pressing on the template paper may distort the paper and cause the wrong size to be made.
3. Remove the paper from the window opening. If the blind is an outside mount, add the desired amount of overlap to the window outline and draw a second outline around it to match the shape of the finished blind. **Be sure to erase the inside line.**
4. Mark the dimensions on the template. Check that the template dimensions match your measurements of the actual window opening.

NOTE: Make sure the template is of the window opening, not the glass only measurement.
5. **Cut the shape from the paper.**
6. **PLACE THE TEMPLATE BACK INTO THE WINDOW OPENING TO CHECK FOR PROPER FIT COMPLETELY AROUND.**
7. **Indicate on the template**
 - "room side" and "top" on the template
 - purchase order number
 - customer's name
 - your store name and account number
8. Roll up template and place in a mailing tube. **DO NOT FOLD TEMPLATE.**

NOTE: This is just a sample for illustration purposes only—other information may be needed for your order.

Mail to: Springs Window Fashions LLC
 33 West Third Street
 Suite 400
 Williamsport, PA 17701
 ATTN: Specialty Dept.

NOTE: When mailing, make sure to get a tracking number and note your return address on the mailing tube.

ACCEPTABLE MATERIALS FOR MAKING TEMPLATES:

Kraft Paper
 Butcher Paper
 Construction Paper

WE WILL NOT ACCEPT TEMPLATES MADE FROM THE FOLLOWING MATERIALS:

Newspaper	Plastic
Wax Paper	Fabric
Tissue Paper	Roofing Paper
Existing Arch Blinds	Wrapping Paper

NOTE: If the material used to make a template stretches, tears easily, will not lay flat or will mark the fabric – IT WILL NOT BE USED.

USING THE TEMPLATE SERVICE

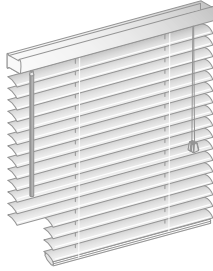

To use the template service, simply:

1. Select Template Service when entering your order online.
2. Use the template worksheet to determine what measurements you need to supply for each shape.
3. Enter the lettered measurements using line item comments. The comments have been pre-programmed to all of the measurements you need to enter for your special shape.

See note at bottom of price grids if Template Service Fees apply.

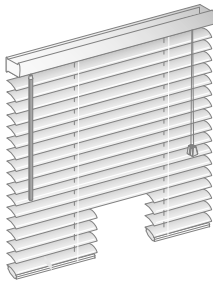

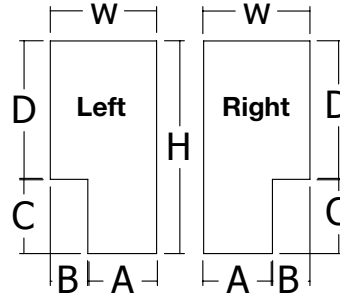

Cut-Out Options

Cut-Out Blinds

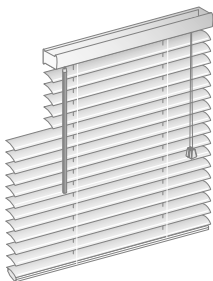

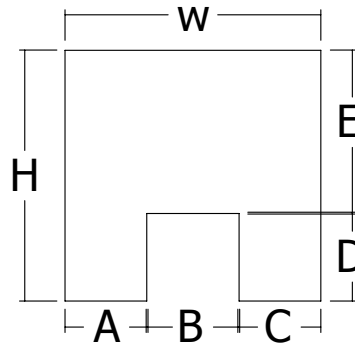

Bottom Corner:

1" and ½" Aluminum: Maximum cut-out is blind width minus 10". A cut-out over 10" requires an intermediate rail.
 2" Vinyl and Aluminum: Maximum cut-out is 1" before the route hole. NOT AVAILABLE WITH CORDLESS.
 "A" minimum is 4½".

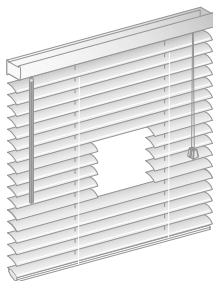

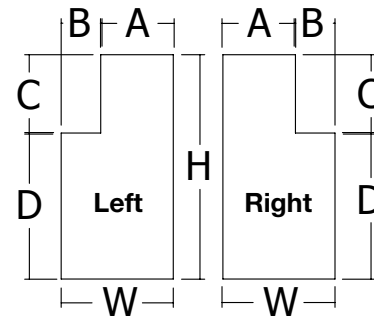

Bottom Center:

NOT AVAILABLE ON 2" BLINDS AND CORDLESS.
 "A" and "C" minimum is 5".
 If "B" is greater than 17", there will be an intermediate rail.

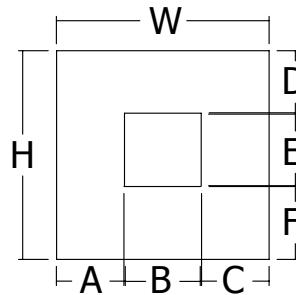

Top Corner:

Maximum cut-out is width is limited to ¼ of total blind width. NOT AVAILABLE ON 2" BLINDS AND CORDLESS.
 "A" minimum is 14".
 If "B" is greater than 8" there will be an intermediate rail.

Interior:

"A" and "C" minimum width is 7½". Maximum width for B is blind width minus 15". Intermediate rail is required if B is greater than 17". NOT AVAILABLE ON 2" BLINDS AND CORDLESS.

Note: Oversized cut-out could require an intermediate support rail. Slats will not lift below intermediate rail.

Surcharge: \$67

Valances for 2" Designer Vinyl

If requested, valances are supplied with your order in one of the following styles depending on how your blind will be mounted. For a more custom look, the valance and returns may be special ordered to your measurements.

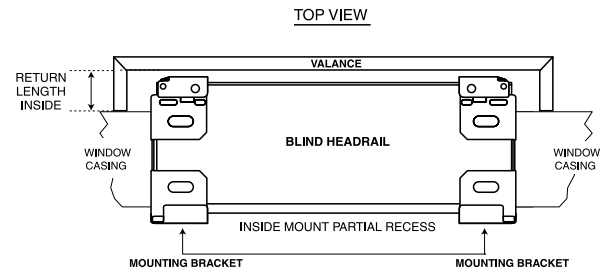

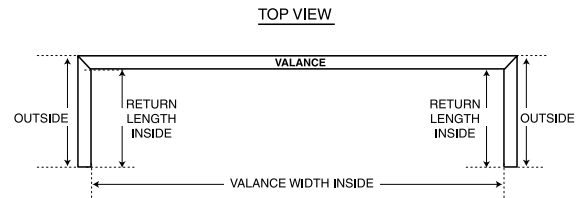

NOTE: Valances with returns are measured and cut from the **INSIDE** of the miter to ensure the most accurate fit when installed over the headrail or window frame.

Blinds ordered as an Outside Mount will be supplied with returns sized to cover the end of the blind back to the mounting surface. If projection brackets are requested when the blind is ordered, longer returns will be sent automatically. Outside mount blinds are available without returns upon request. Blinds ordered as an Inside Mount are supplied without returns and look best when the blind and valance can be completely recessed because the ends of the valance are straight cut. Returns are available if requested at the time of order for inside mount blinds that are not completely recessed.

NOTE: Minimum return length is 1".

Additional ordering information:

- Please state at the time of order if the valance and return measurements are for the exact size required so that no additions or deductions are made.
- Valance projection is different if the blind has a wand tilter or cord tilter. Please refer to the following specifications chart for more information.

Valance Ordering Information

Blind Type	Valance Style	Tilter Type	Return Length	Full Recess Depth
2" Designer Vinyl	Standard	All	3 ⁵ / ₁₆ "	3 ⁵ / ₁₆ "
2" Designer Vinyl	Double	All	3 ¹⁵ / ₁₆ "	4"

Additional information: All measurements listed above are to the inside.

Valance Size Limits

Slat Size/Style	Inside Mount	Outside Mount
2" Designer Vinyl	120" FBW	120" FBW

FBW = Finished blind width

Please note: Continuous valances wider than sizes shown above will be two or more sections spliced together.

1. Full recess is from front of valance to wall.
2. Return length is from inside miter to wall.
3. Partial recess – subtract actual window recess from return length to arrive at exact return length.
