# SWITCH ON TO REVOLUTIONARY DESIGN AND INNOVATION

Honeywell can draw upon a world of innovative technologies to develop the best products and solutions for every building, whether it's a home, hotel, public or commercial property.

Innovation has been the driving force behind Honeywell since 1885, and with a comprehensive portfolio of brands that cover every aspect of building services

- Power and data distribution
- HVAC
- Wiring accessories
- Water and temperature control
- Lighting control
- Building management systems

Over the past few years, Honeywell has also placed great emphasis and focus on user-centred design and contemporary, harmonised aesthetics to cater to an increasingly sophisticated market. To this end, we have now leveraged our technological and manufacturing expertise, as well as diverse product sets to offer a single, seamless solution and specification experience for the hospitality sector – limited only by your imagination.

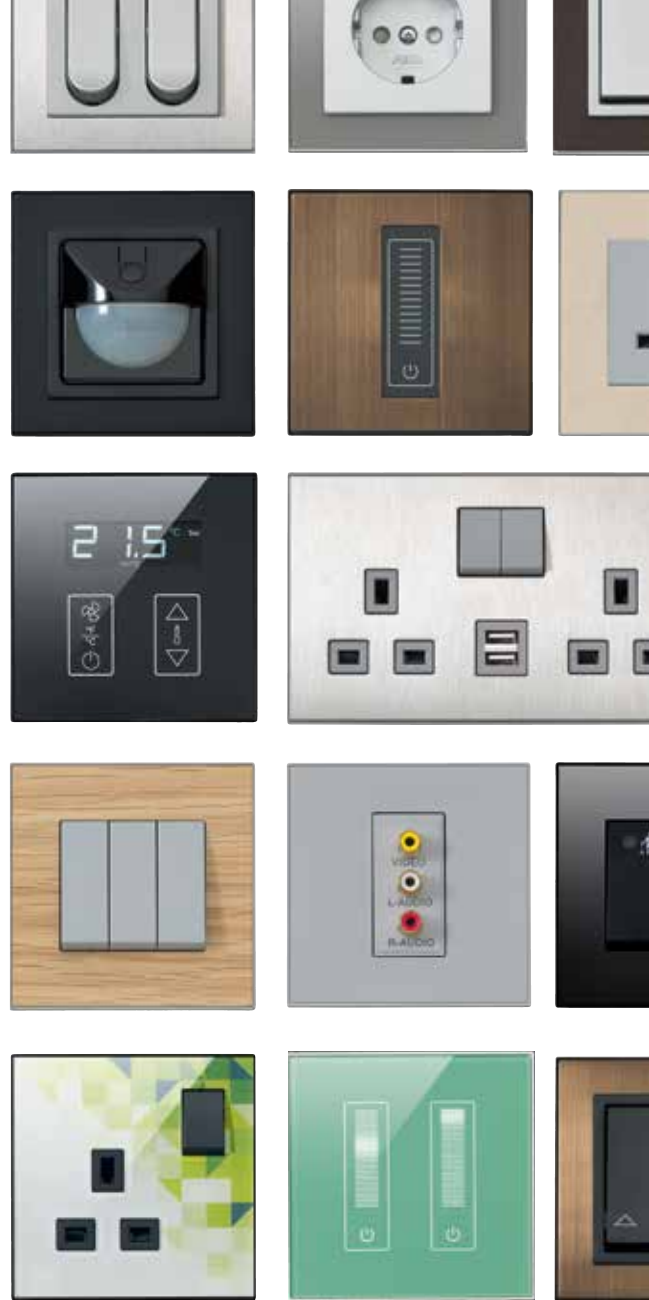

## SWITCH ON TO FORM...

One of the biggest challenges facing hoteliers and designers today is creating a consistent design scheme globally across their estate. Loyal customers and frequent business travellers want to arrive in surroundings that are familiar to them; a home away from home.

They want to know that the same amenities and appliances will be available and the furnishings and accessories are in the same luxurious finishes putting them at ease and evoking the same feeling of comfort they experienced during their very first visit.

Rejoice, because with Elements form no longer needs to be sacrificed for function. From warm, earthy tones to cool contemporary lines, the wide range of finishes and textures offer the perfect companion for any interior, from vintage villa to modern manor house, seven star resort to boutique hotel.

Our bespoke expertise also means we can create customised solutions to suit your individual need. Whether it's a control panel with both British and European standard sockets, or a completely unique metallic finish to match your door handles, our Design Service team will go the extra mile to ensure the perfect solution is designed for you.

## ...AND FUNCTIONALITY

Power, control and automation lie at the heart of every beautifully designed device and interface in the Elements range.

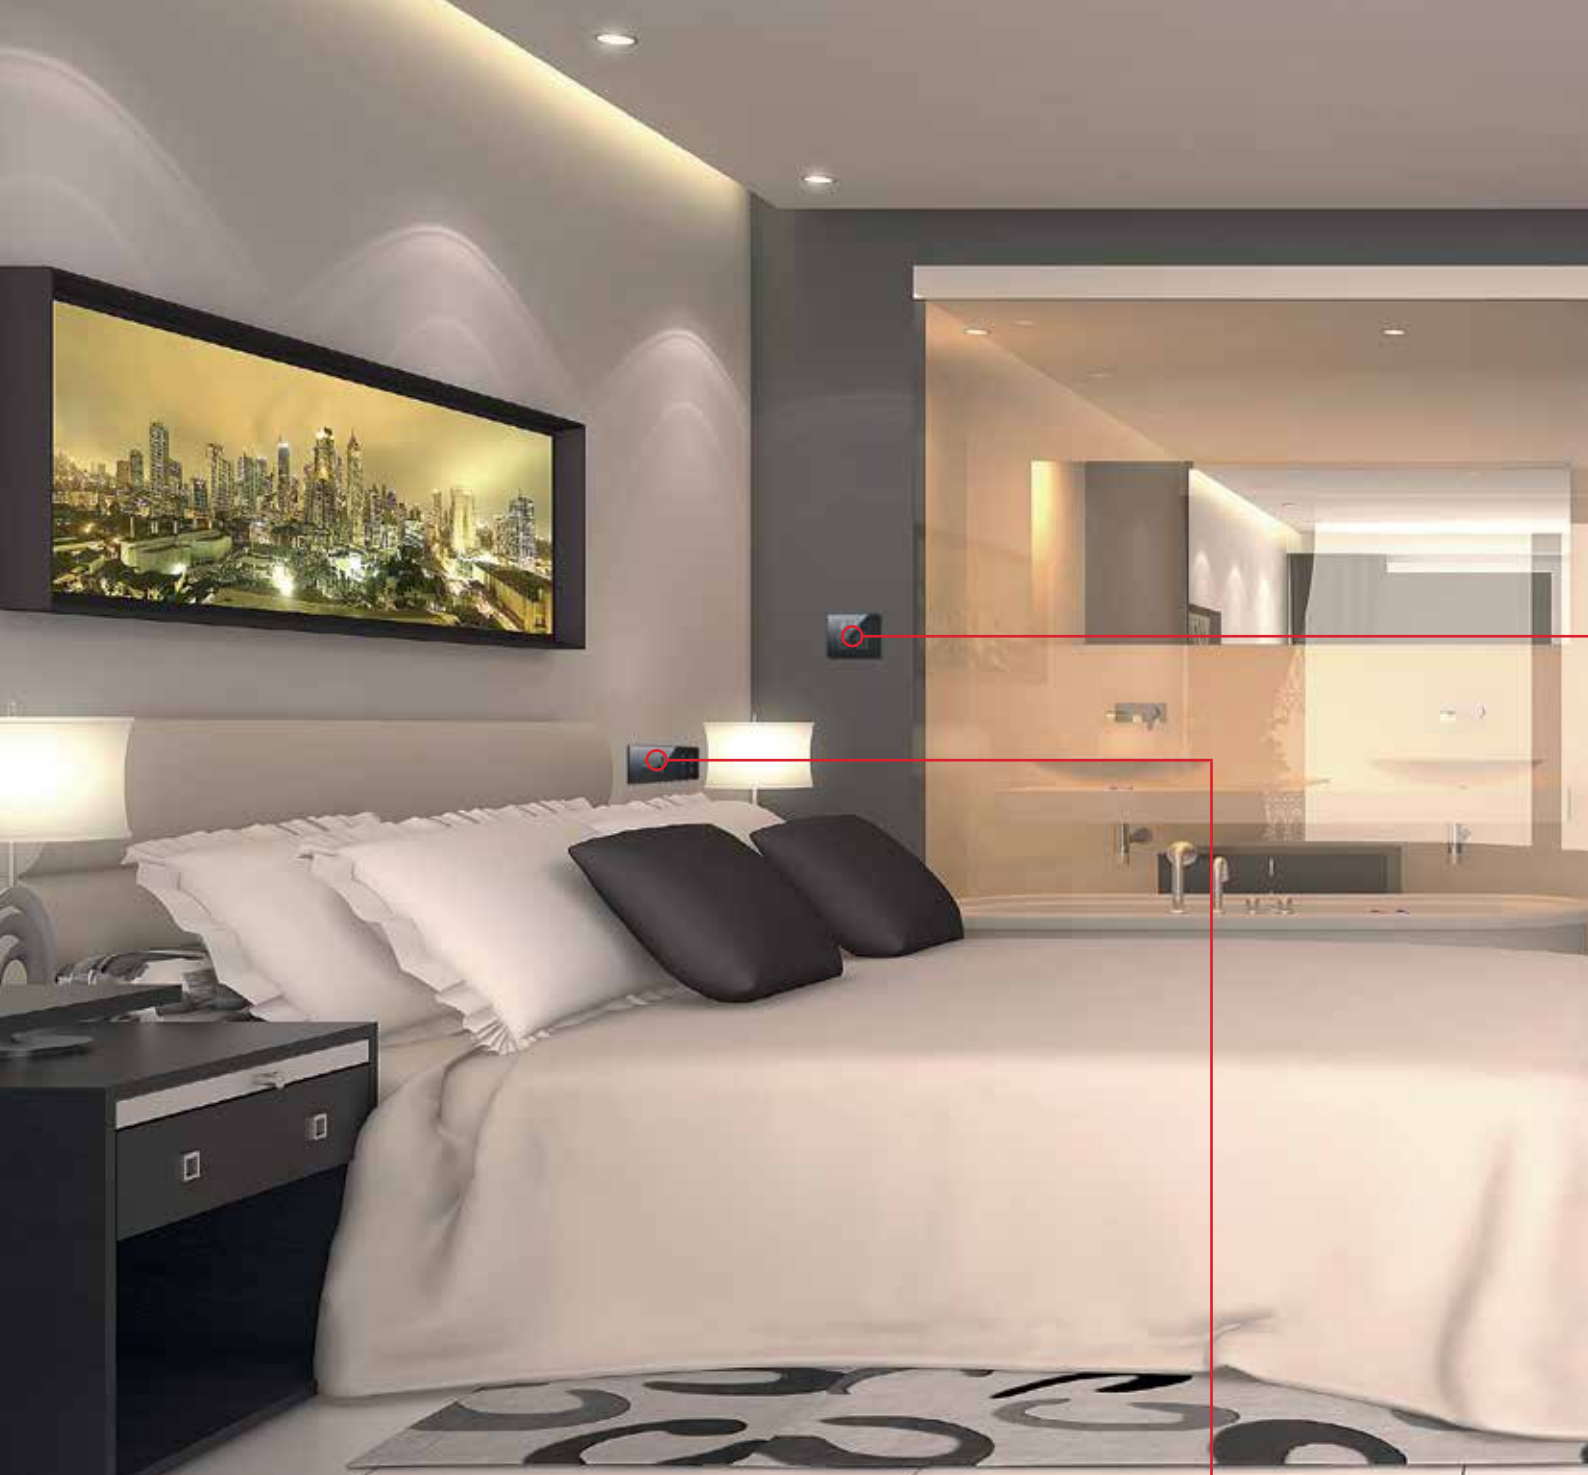

Honeywell brings together INNCOM guest room controls which provide climate, lighting and drape controls with touch interfaces and scene-

setting as well as interfaces for services such as housekeeping and room service; with wiring accessories from MK Electric and Peha which

include plug sockets, mechanical and touch-controlled light switches and dimmers, audio and video distribution and even USB charging.

All are infinitely customisable to suit your needs, both in terms of functionality, and form.

## SWITCH ON TO A COMMON DESIGN LANGUAGE

Elements is a design language that unifies products from the INNCOM, MK Electric and Peha portfolios and offers a single solution for the forward-thinking hotelier. All the products across the range feature the same contemporary design and slim profile, which include switches, sockets, and electronic touch interfaces for hotel guest room controls, inspired by materials such as wood, leather and glass.

## INNCOM

Honeywell's INNCOM solutions provide energy management, lighting control, integrated room automation and building automation systems for the global hospitality industry, as well as other multi-unit dwellings. All products are designed to provide unsurpassed smart comfort, energy conservation, safety and satisfaction while increasing the facility's profitability.

Founded in 1986, INNCOM became part of Honeywell in 2012. INNCOM systems are installed in over 1,500,000 rooms worldwide and our clients range from the most prestigious 5-star hotels to specialty limited-service properties..

## MK Electric

For over 90 years, MK Electric has led the market in electrical wiring accessories. As the pioneer of the British Standard 3-pin plug, MK's sockets are also the safest available, thanks to a "child resistant shutter system". Today, MK Electric continues to lead the way in innovation with additions to the widest range of wiring accessories such as LED Dimmers, USB Integrated Sockets, and the new luxury Elements collection of wiring accessories..

## Peha

Founded in Germany in 1922, Peha is a market leader in European (VDE) standard wiring accessories. Offering a versatile portfolio of wiring devices and controls, including a wide range of materials and custom designs.
