

How Ink is made?.

Inks for Writing, Printing, Offset, Inkjet.

**Raw Materials and Formulations with
Process.**

Modern Technology of Printing & Writing INKS

(with Formulae & Processes)

Information about the Book

Title: Modern Technology of Printing & Writing Inks (with Formulae & Processes) 2nd Revised Edition

Author: NIIR Board of Consultants & Engineers

Form at: Paperback

ISBN: 9788178330822

Code: EN I75

Pages: 480

Published: 2015

Publisher: Asia Pacific Business Press Inc.

Introduction

Ink is a liquid or paste that contains pigments or dyes and is used to colour a surface to produce an image, text, or design. Ink is used for drawing or writing with a pen, brush, or quill. Thicker inks, in paste form, are used extensively in letterpress and lithographic printing. Ink can be a complex medium, composed of solvents, pigments, dyes, resins, lubricants, solubilizers, surfactants, particulate matter, fluorescents, and other materials.

The components of inks serve many purposes; the ink's carrier, colorants, and other additives affect the flow and thickness of the ink and its appearance when dry.

India is among the fast growing printing & writing ink markets globally spurred by the rapid expansion of the domestic print markets.

Backed by a strong demand from key end user segments such as package printing, newsprint, publishing and other commercial printing, the printing ink market in India has registered strong growth over the years. The printing ink industry is fragmented with hundreds of manufacturers and a large number of players in the unorganised sector.

Printing ink sector in India witnessed a growth of around 7.5% per annum during the Past years. Printed packaging accounts for around 27% of the demand for printing inks in India followed by newspapers at 20%. Commercial printing/promotional and printed advertising together account for around 19% of the demand.

Other key end user segments for printing inks include books and stationery. With the print sector forecast to grow at around 8% per annum, in coming years, printing ink segment is expected to grow strongly. This handbook is designed for use by everyone engaged in the printing & writing ink industry and the associated industries. It provides all the information required by the ink technical for the day-to-day formulation of inks.

It supplies the details of the manufacturing methods, including large-scale production, and gives guidance on achieving quality assessment and total quality management specifications. The book also describes properties and uses of the raw materials used in the formulation of printing & writing inks.

The major content of the book are the colour and colour matching, raw materials, printing inks, ink formulations, applications problems, writing inks, project profile, how to estimate, order & handle ink, testing of writing & miscellaneous inks, testing of printing inks, rollers, waterborne inkjet inks. The book contains addresses of raw material suppliers, plant & machinery suppliers with their Photographs. This book will be a mile stone for the entrepreneurs, existing units, libraries etc.

Table of Contents

1. INTRODUCTION

Visual Characteristics of Inks

The colour of Inks

The Transparency and opacity of printing inks

The gloss of printing inks

The nature of Printing Inks As Determined By

The printing Process

Flexographic and gravure inks

Lithographic and letterpress inks

Screen Inks

The drying characteristics

Absorption drying

Oxidation drying

Evaporation drying

Chemical drying

Radiation induced drying

The Adhesive Nature of Printing Inks

The Resistance properties of Printing Inks

Lightfastness

Heat resistance

Abrasion resistance

Product resistance

Weathering

2. THE PRINTING PROCESSES

The Letterpress Process

Press Configurations

The Platen press

Flat-bed cylinder press

Rotary presses

Letterpress forme production

Original plates

Line Plates

Halftone plates

Duplicate plates

Make-ready:

Substrates

Applications

Rotary Ink
Quickset Ink
High-gloss Ink
Moisture-set Ink
Water-Washable Ink
New Ink
Miscellaneous Job Ink
The Offset Lithographic Process
The Printing unit
The damping system,
The offset blanket
Press Configurations
The small offset press
Larger sheet-fed presses

Web offset presses
Blanket-to-blanket press
Common-Impression drum presses
Three-cylinder presses
Oithographic platemaking
Presensitised surface plates
Wipe-on Plates
Deep-etch plates
Multi-metal plates
Electrostatic imaged plates
Chemical diffusion transfer plates
Photodirect plates
Laser exposed plates
Direct image plates

The driographic plate
Process control
Platemaking control
Control in colour printing
Inkduct pre-setting and control
Substrates and inks
Ultra-violet (UV) curing inks 25
Infra-red radiation 25
Inks for lithography
Dry offset of Letterst
Fundamentals of Lithography
Lithographic Problems
The Gravure process
The printing unit
The inking system

Doctor blades
The impression roll
Drying system
Press Configurations
Gravure cylinder preparation
Conventional etching
Single bath etching
Halftone Process
Double positive system-halftone gravure
Halftone gravure
Mechanical engraving
Lasergravure
Press control systems
Substrates and inks
Applications

Gravure Inks
The Flexographic Process
The printing unit
Press configurations
Flexographic platemaking
Rubber plates
Photopolymer plates
Plate mounting
Applications
Flexographic Inks
Flexographic Problems,
The screen printing process
Press configurations
Screen Stencil Manufacture

Mounting the Screen
Application of the stencil
After treatment
Substrates and inks
Application
Electrostatic Printing
Copper Plate and Die Stamping
Non-Impact Printing processes
Ink-jet Printing
Continuous jet
Impulse or drop on demand
Electrophotography
Print Recognition
Letterpress

Flexography
Lithography
Offset Letterpress
Gravure
Screen Printing
Non_Impact printing
Substrate Selection
General Paper properties
Runnability
Printability

3. COLOUR AND COLOUR MATCHING

The Physical nature of Colour

Light Sources

The Perception of colour

The eye

Defective colour vision

Chromatic adaptation and colour constancy

Metamerism

Dichroism

Illumination quality and levels

Additive and Subtractive Colour Mixing

The additive primaries

The subtractive primaries

The CIE System

Origins of colour in Printed Material

Pigments

Dyes

Origins of colour

Transparency and opacity

Colour Strenghtss

Substrate effects

Colour Index Classificaton

Graphic Reproduction

Three-colour printing

Four-Colour printing

Under colour removal

Masking

Half-tone dots

Dot gain

Dot Generation

The Measurement of Colour

Colorimeters

Densitometer

spectrophotometers

Optical geometry

The Recording of Colour data And the Specification of colour

Colour Difference

Colour Matching

Selection of raw materials

Matching techniques

The colour circle

Procedures

Oil Inks

Liquid Inks

Instrumental Colour match Prediction

4. RAW MATERIALS

Pigments

Yellow Pigments

Diarylide Yellows

Ironoxide yellows

Tartrazine yellow lake

Chrome yellows

Cadmium yellows

Fluorescent yellow

Orange Pigments

DNA Orange

Pyrazolone orange

Diarylide orange

Fast Orange 52G

Benzimidazolone orange HL
Ethyl lake red C
Red Pigments
Para Red
Naphthol Red (Or Permanent Red Frre)
Toluidine Red
Permanent Red 'R' (Chlorinated Para Red)
Carmine F.B.
Naphthol F4R
Naphtho Red LF
Permanent Red FRL
Bordeaux FRR (F4R)
Naphthol Red
Naphthol Red Light
Naphthol Red Dark

Lithol reds

Bon Red (Lack red C Bon)

Lake Red C

Lithol Rubin 4B

BON Maroon

PMTA Pink, rhodamine 6 G

Molybdate Orange, Chrome Scarlet, Orange Chrome

Calmium Red

BON Arylamide Red, Naphthol Red FGR

Quinacridone MagentaY

Naphthol Carmine FBB

Copper Ferrocyanide Pink

Naphthol Red F5RK

Benzimidazolone Carmine HF3C

Naphthol Rubine F6B

Benzimidazolone Carmine HF4C
Rubine Red 6B
Quinacridone Magenta B
Benzimidazolone Red HF2B
Naphthol Red F6RK
Azo Magenta G
Anthraquinone Scarlet
Quinacridone Violet
Benzimidazolone Bordeaux HF 3 R
Green Pigments
Blue Pigments
Violet Pigments
Brown Pigments
Black Pigments

White Pigments and Extenders
Pearlescent Materials
Metallic Pigments
Fluorescent Pigments
General Properties of Pigments
Acid Dyes
Basic Dyes
Solvent Dyes
Disperse Dyes
Drying Vegetable Oils
Linseed oil
Tung oil (China wood oil)
Oiticica oil
Dehydrated castor oil
Other oils

Marine oils
Non-dryign oils
News inkd oils
Non-drying vegetable oils
Resins
Natural Resins
Shellac
Manila copal
Asphalts
Starch and dextrin
Gum arabic
Synthetic resins
Pure phenolic resins
Rosin-modified phenolic resins

Pigment Interactions

Hard resin interactions

Film-forming properties

Hydrocarbon resins

Polystyrene resins and copolymers

Terpene resins

Silicone resins

Alkylated urea formaldehyde resins

Alkylated melamine formaldehyde resins

Polyamide resins

Poly (amide imide) resins

Chlorinated rubber

Cyclised rubber (isomerised rubber)

Vinyl resins

Polyvinyl alcohol

Ketone resins

Acrylic resins

Epoxide resins

Polyisocyanates and polyurethanes

Nitrocellulose, N/C (Cellulose nitrateCN)

Ethyle cellulose

Ethyl hydroxyethyl cellulose (EHEC)

Cellulose acetate propionate (CAP)

Cellulose acetate butyrate (CAB)

Sodium carboxymethyl cellulose (CMC)

Chemical constitution

Section V: Solvents

Hydrocarbon Solvents

Low boiling petroleum distillate-alipatic

White spirt

Paraffin oil (kerosene)

High boiling petroleum distillates-aliphatic

Hydrocarbon solvents- naphthenic

Aromatic hydrocarbons

High boiling aromatic solvents

Alcohols

Glycols

Ketones

Esters

Section VI : Plasticisers

Section VII: Waxes

Synthetic waxes

Polyethylene waxes

Polytetrafluoroethylene
Halogenated hydrocarbon waxes
Fatty acid amides
Petroleum waxes
Slack wax
Scale wax
Fully refined paraffin wax
Pettrolatum or petroleum jelly
Microcrystalline wax
Ceresin wax
Montan wax
Montan esters
Natural waxes
Beeswax
Carnauba wax

Miscellaneous natural waxes

Section VIII : Driers

Liquid Driers

Cobalt

Paste Driers

Section IX Miscellaneous Additives

Chelating Agents

Antioxidants

Surfactants

Anionic Surfactants

Cationic surfactants

Non-Ionic surfactants

Amphoteric surfactants

Deodorants and Reodorants

Pure Chemicals
Alkalis
Defoaming Agents
Laking Agents
Tannic Acid
Tannic acid substitutes
Raw Materials For Radiation Curing Systems
Pigment Selection
Prepolymers
Epoxy acrylates
Polyester acrylates and unsaturated polyesters
Urethane acrylates
Reactive Diluents
Photoinitiators
Additives and Inhibitors

5. PRINTING INKS

Manufacture of Inks and varnishes

General Requirements

The Manufacturig Processes

The manufacture of oleo-resinous systems

Deaeration and potting

The manufacture fo polyer/solvent systems

Varnish manufacture

Cavitation mixer

Rotor/stator mixer

Manufacture of additives

Liquid ink manufacture

Ball mills

Bead Mills

Chips

Pigment chip manufacture
Manufacture of dye-based inks
Mixing Equipment
Butterfly mixers (Change pan)
Rotor and stator high speed mixers.
The 'star' impeller type
The high-speed disperser
The fixed or on-line mixer
High-speed mixing
Milling Equipment
Three-roll mills
Floating-rolling system
Development of single cast rollers
Bead mills

Open sieve mill
Closed sieve mill
Gap separation mill
John mill
Tex mill
Dyno mill
STS mill
Electronically controlled Copra mill
Boa 500 mill (Buhler Brothers Ltd)
Co-ball mill
Microflow mill
Ball milling
Disadvantages of ball mills
Handling, Storage and manufacture of uv Inks

Manufacture of newspaper Inks
Modern production trends
Computerisation
Costs of production and related subjects
Maintenance strategy in the printing ink industry
On failure maintenance
'Fixed time' maintenance
'Condition based maintenance
Computers and maintenance
The future
Plant control system
Further plant features
Manufacturing plant

6. INK FORMULATIONS

Letterpress Ink

Platen ink for absorbent papers

Cylinder press ink of uncoated papers

Quick-set inks of cated paper

Letterpress ink dryign by oxidation

Water-reducible inks

Process inks

Newspaper Coloured Inks

Rotary black inks for newspapers

Formula A: General-Purpose low mist black

Formula B : Ink rail

Formula C : Page-Pak

Formula D : Keyless Inking (Indirect flexo)

Lithographic Inks

Typical inks and Varnishers

Inks and varnishes for sheet-fed paper printing

Sheet-feed label inks

Small -offset

Inks and varnishes for sheet-fed carbon board printing

Ink for sheet-fed impervious substrate printing

Inks for web-offset paper printing

Coldset

Heatset

Gravure Inks

Publication Inks

Inks for catalogue printing

Packaging inks for paper and board labels

Metallic lable inks
Paper wrapper inks
Carton Inks
Foil inks
Foil board laminates
Inks for polyethylene film
Inks for treated polypropylene films
Coated polypropylene films
Cellulose films
Polyester fims
Wallcoverings
Inks for paper
Vinyl coated wallcoverings
Speciality systems

Metallic inks
Aluminium-based inks
Pearlescent inks
flexographic Inks
Sye-based inks
Pigmented inks for specific substrates
Paper and board
Nitrocellulose coated films
PVdC Co-polymer coated film
Polyolefin films
Metal and metallised substrates Almunium foil
Metallic inks
Screen Inks
Inks for paper and board
Thin film screen inks

Ultra thin film screen inks
Oxidation drying gloss inks
Inks for Impervious surfaces
Metal signs
Metal containers
Inks for sheet plastic
inks for glass
Inks for Plastic containers
Polythene containers
PVC containers
Textile Inks
Daylight fluorescent Inks
Process inks
Uv and Electron Beam curing Inks
Inks for day offset application on plastics and metal

Ultraviolet curable silk screen
Ultraviolet curable varnish and coatings
Non-Mipact Printing
Electrostatic imaging
Inks for jet printing
Typical ink formulations
Inks for the Electronics Industry
Printed circuit products
Inks for Wallcoverings
Textile Transfer Inks
Sterilisation Inks
Metal Decorating Inks.
Decoratation of sheets
Printing a pre-formed container
letterset Printing

7. APPLICATION PROBLEMS

Stocking in the Pile or Rewind
picking

Fill In

Poor Binding and Rub

Setoff

Piling and Caking

Trapping

Show Through and Strike Through

Ink Not Following the Fountain

Ink flying and Misting

Ghosting, Shadow, Streaks, and Slurs

Ink Drying on rollers

Plate Wear

Crystallization

8. WRITING INKS

Manufacture of Writing Inks

Packing

Inks for writing and Fountain Pens

Ferrogalo-tannate inks

Standard Copying and Record Ink

Standard Writing ink

Iron gallate Inks : (Ink Powders and Tablets)

Manufacture of Inks Tablets

Action of Hydrochloric Acid and Sulphuric Acid in Inks

Pormulae for Various Blue-Black Inks

Manufacture fo iron gallo-tannate inks

Manufacture

Aging of writing

Dating a document
Dye based Fountain Pen Inks
Washable Inks
Quick drying Inks
Alkaline Writing Inks
blue Alkaline Writing Inks
Prussian Blue Inks
Ball Point Pen Inks
Stamp-Pad Inks
Basic dyes
Acid dyes
Method of Manufacture
Inks for Recording Instruments
Drawing Inks-Black and Coloured

Black Drawing Inks

Coloured Drawing Inks

Marking Inks

Preparation of silver Inks

Aniline black Inks

Inks containing other metals

Coloured marking Inks ;

Ink for Multiple Copies purposes

Hectograph Inks;

Method of Preparation

Stencil Duplicating Inks

Inks of Hectograph Carbon Papers, Carbon Papers and Typewriter Ribbons

Inks or Carbon Papers

Hectograph Carbon Papers
Stencil Sheets
Felt, Pen, Sign Pen, Fibre Tip Inks
Mothod of Manufacture
Alcohol Based Inks
Hydrocarbon Based Inks
Invisible or Sympathetic Inks
Inks for Special Materials
Inks for Plastics
Ink for Marking Photographs
Ink for stamping oiled stencils
Inks for Glass and Porcelain
Ceramic Inks

Ink for Metals
Time Card Ink
Meat Stamping Ink
Show Card Inks
Embossing Inks
Ruling Inks
Artist Colours
Colour Combination
a) Water Pints

9. PROJECT PROFILE

10. HOW TO ESTIMATE, ORDER & HANDLE INK

Estimating Ink Requirements

Ordering Ink

Handling Inks

11. TESTING OF WRITING & MISCELLANEOUS INKS

Writing Inks

Sedimentation Test

Hue and Intensity

Clogging Test

Stability Test
Total Solids
Iron Content
Gravimetric Method
Determination of Corrosion
Ball Point Pen Inks
Stamps pad Inks
Determination of Glycerol Content
Assessing the performance of stamp-pad ink
Drawing Inks
Opacity or Transparency
Mold Growth

Marking Inks
Stencil Inks
Viscosity
Drying time
Presence of toxic and noxious materials
Caution
Presence of Aniline Oil
Miscibility with thinner
Stability
Skinning property
Duplicating Inks
Test for Lead

12. TESTING OF PRINTING INKS

Specific Gravity

Viscosity

Penetration

Molecular Refraction

Refractive Index

Covering Power and Gloss

Evaporation Rate

Acid Number

Saponification Number

Iodine Number

Detection of Chinawood Oil
Detection of Rosins and Resins
Testing of Pigments
Light Resistance
The Resistance of Pigments of Bleeding
Resistance to Acids and Alkalies
Particle Size of Pigments 375
Wettability and Absorption
The Testing of Finished Inks

13. ROLLERS

Inks and Rollers Used

14. DIRECTORY

India Standards on Inks and Allied Products

List of Suppliers fo Printing & Writing Ink Machinery

List of Suppliers of Raw Materials to Ink Industries

List of Major Manuracturers fo Printing Inks In India

Directory of Ink % Allied Products Manufacturer's In India

▪ Detailed Project Reports

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,

Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects.....[Read more](http://www.entrepreneurindia.co)

Niir PROJECT CONSULTANCY SERVICES

An ISO 9001:2015 Company

Who are we?

- *One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services*
- *We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients' in India & abroad*

We at NPCS want to grow with you by providing solutions scale to suit your new operations and help you reduce risk and give a high return on application investments. We have successfully achieved top-notch quality standards with a high level of customer appreciation resulting in long lasting relation and large amount of referral work through technological breakthrough and innovative concepts. A large number of our Indian, Overseas and NRI Clients have appreciated our expertise for excellence which speaks volumes about our commitment and dedication to every client's success.

We bring deep, functional expertise, but are known for our holistic perspective: we capture value across boundaries and between the silos of any organization. We have proven a multiplier effect from optimizing the sum of the parts, not just the individual pieces. We actively encourage a culture of innovation, which facilitates the development of new technologies and ensures a high quality product.

What do we offer?

- *Project Identification*
- *Detailed Project Reports/Pre-feasibility Reports*
- *Market Research Reports*
- *Business Plan*
- *Technology Books and Directory*
- *Industry Trend*
- *Databases on CD-ROM*
- *Laboratory Testing Services*
- *Turnkey Project Consultancy/Solutions*
- *Entrepreneur India (An Industrial Monthly Journal)*

How are we different ?

- *We have two decades long experience in project consultancy and market research field*
- *We empower our customers with the prerequisite know-how to take sound business decisions*
- *We help catalyze business growth by providing distinctive and profound market analysis*
- *We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors*
- *We use authentic & reliable sources to ensure business precision*

Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation
