HP ScanJet

Introduction

- HP has a wide variety of devices for digitalization: A3 products, MPFs and AiOs, and scanners
- HP Scanners provide a variety of Solutions for the distributed digitalization market
 - Vertical Scanners and with ADF/flatbed
 - Personal models that can be used even for departmental offices
 - Connected to USB and network
 - Scanning to mobile devices
- HP ScanJet portfolio is the best combination in functionality, performance, reliability and value

Why vertical Scanners and with ADF/flatbed?

A3

Flow N9120

Flow 7500

Pro 4500 fn1

Pro 3500 f1

Pro 2500 f1

ADF/flatbed

- Sheet feeder “C” allows for a variety of paper
- Flatbed adds variety and versatility, so you can scan:
 - Fragile documents
 - Difficult to scan documents (very thick, very thin, very small)
 - Plastic cards (Ex. IDs, credit cards)
- High-end products count with paper trays with higher capacity (ADF)
 - Improves the efficiency of high-volume scan jobs

Vertical

- More compact, especially when closed
- The same paper tray can be used for different documents
 - Different paper thickness
 - Plastic cards
 - Business cards
- World market trend
 - Highest percentage of scanners are vertical versus ADF / flatbed
 - Improvement on speed, Price reduction

Flow 7000 s3

Flow 5000 s4

Pro 3000 s3

Pro 2000 s1

Why to sell MPFs and Scanners?

Not all customer scanning needs can be met with an MFP, or even with a Flow MFP

- Repetitive workflows
- High scan volumes
- Dedicated uses and the need to integrate with solutions
 - These are the factors that can be resolved with a scanner

Sometimes, the business needs to sell a scanner instead of an MFP

- MFPs used mainly for scanning needs, may have low Printing volume
 - The sale of toner is not financially attractive
 - Scanners have high margins
 - It is better to have that margin at the time of sale

Solutions and workflows with scanners

- Users of dedicated Scanners require different solutions
- The variety of solutions and workflows require integrating scanners in different ways
- HP scanner solutions include different components to integrate with different workflow

1

“I need to scan with whatever comes in the box. I need software with the proper functionality.”

Solution included in the box: HP Scanning software

2

“We already have a solution and we only need to integrate the scanner into the workflow.”

Integration with corporate solutions: HP drivers (TWAIN, ISIS, Kofax VRS)

3

“We need a solution beyond what's in the box. What does HP have?”

HP Solutions like HP Capture & Route and JetAdvantage solutions

4

“We have specific needs but we do not want to spend more money. What else is in the box?”

Specialized third-party solutions
