Oracle's Approach - Profit-Focused Enterprise™

A Profit-Focused Enterprise™ is one that maximizes Margins from information supplied by Profit Clusters and Strategic P&Ls.

Margins
.1 to 2.5%
+

Maturity of Information

PFE™ Scorecard

Using Profit Clusters and Strategic P&Ls

The "Right" Customers

- Targeted Marketing (CPL)
- Market Basket Analysis (BPL)
- Sales Strategy (IPL, GeoPL, CPL, SPL)
- Customer Profitability (CPL, STPL)
 - Top, Middle, Bottom

Customers

The "Optimal" Product Mix

- Pricing Considerations (PPL)
- Vendor Negotiations (VPL)
- Product Rationalization (PFPL, PPL)
- Product Profitability (PPL, STPL)
 - Top, Middle, Bottom

Products

Policy Execution

- Product Substitutions (PPL, CPL)
- Sales Incentives (SPL)
- Shared Services Behaviors (SS)
- Minimal Orders (CPL, IPL)

Policies

Process Improvement

- Supply Chain Monetization (SCPL, CHP)
- Outsourcing / Procurement (VPL, RR)
- Support (SS, RR)
- Delivery / Channel (SCPL, CHPL)

Processes

Revenue Attainment

Revenue

Resource Alignment

Capital

Operations Optimization

Cost to Deliver

Align Capital

- Redirect Interest Expense (CPL, PPL, RR)
- Invest in Profitable Clusters
- Maximize ROI

Resource Alignment

- Tops Down Strategy (RR)
- Align expenses to most profitable Customer/ Product Dimensions
- Capacity / Utilization Analysis (SCPL)

Resources

What is Your Profit Decision Maturity Level?

Maturity of Information

Cluster Example:

Product

	1.0	1.75	2.0	3.0	4.0
Profit Clusters (*)	Revenue		Gross Margin	Net Margin	Stacked Clusters
Product A	\$1,000M		\$400M	\$(150)M	
Product B	\$750M		\$450M	\$200M	\$200M
Product C	\$500M		\$350M	\$250M	
Product D	\$250M		\$125M	\$75M	\$75M → \$275M
Totals	\$2,500M		\$1,325M	\$375M	\$275M
	Company Score				

(*) By any Profit Cluster including Product, Customer, Channel, Vendor, etc.

Strategic Emphasis

What is a Profit Cluster?

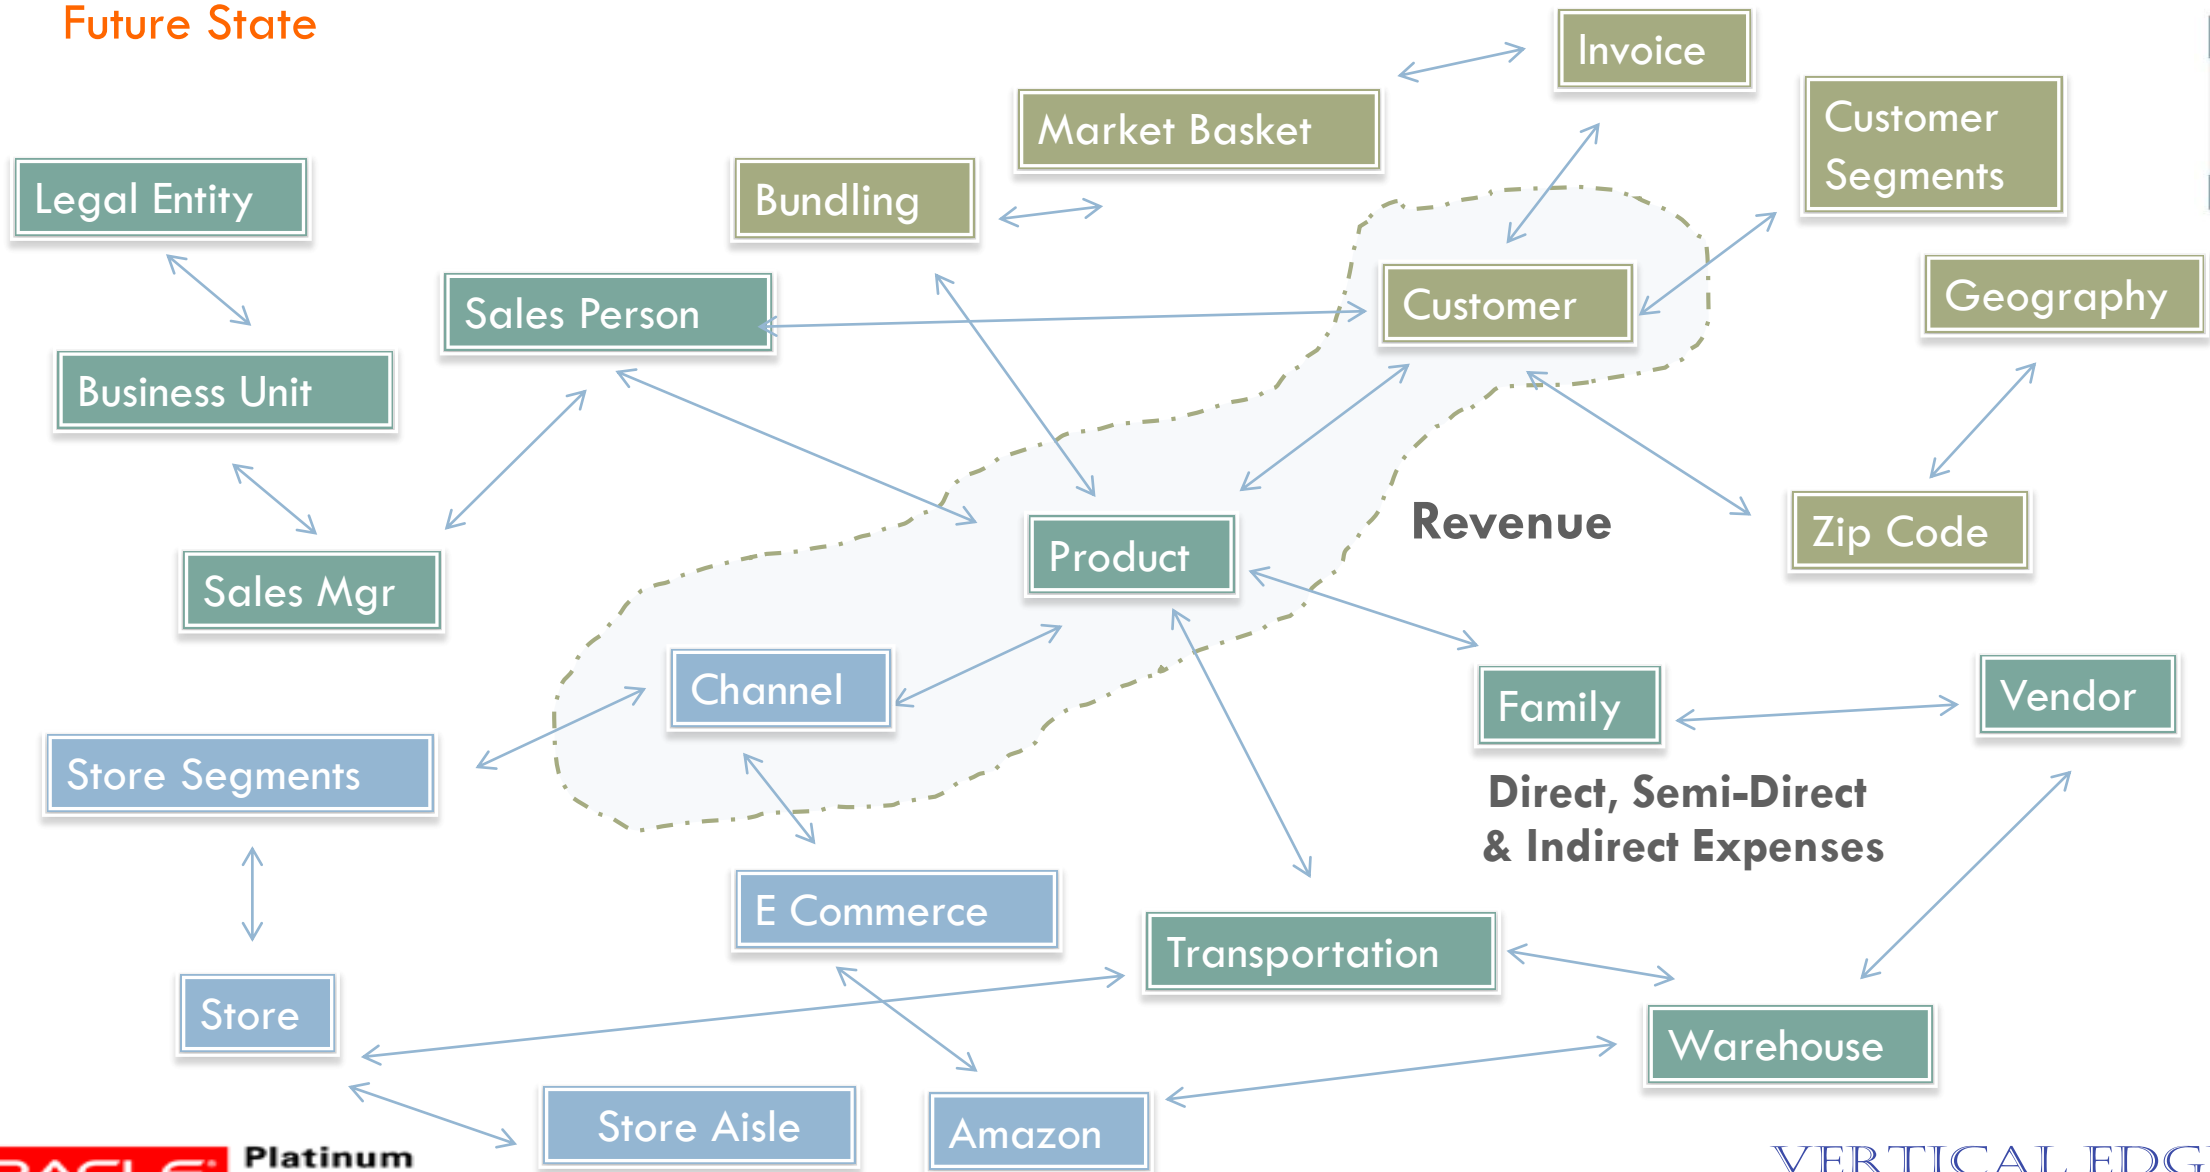

Current State

..... but usually profit decision information is only available at the revenue and gross margin level

Breadth and Depth

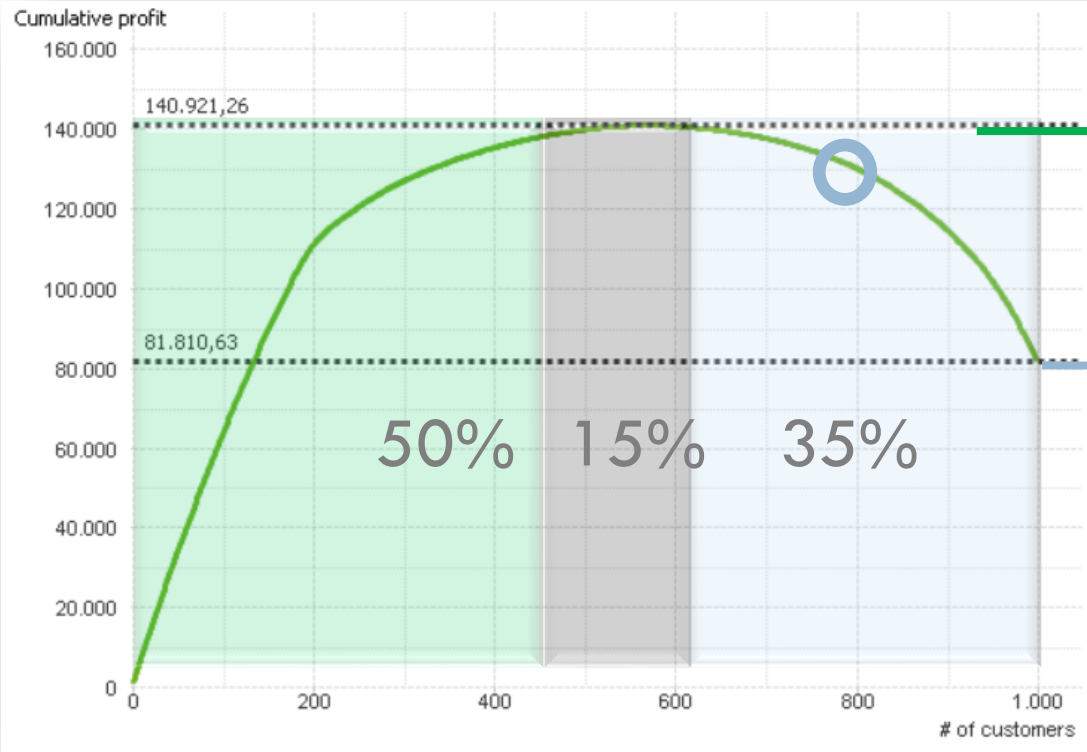

Future State

Profit Clusters – Exploiting the Whale

Service

If you can generate a whale curve by Customer, by Service, by Channel, etc, you're well on your way to being able to make intelligent decisions about your business.

What is a Strategic P&L?

Profit Clusters

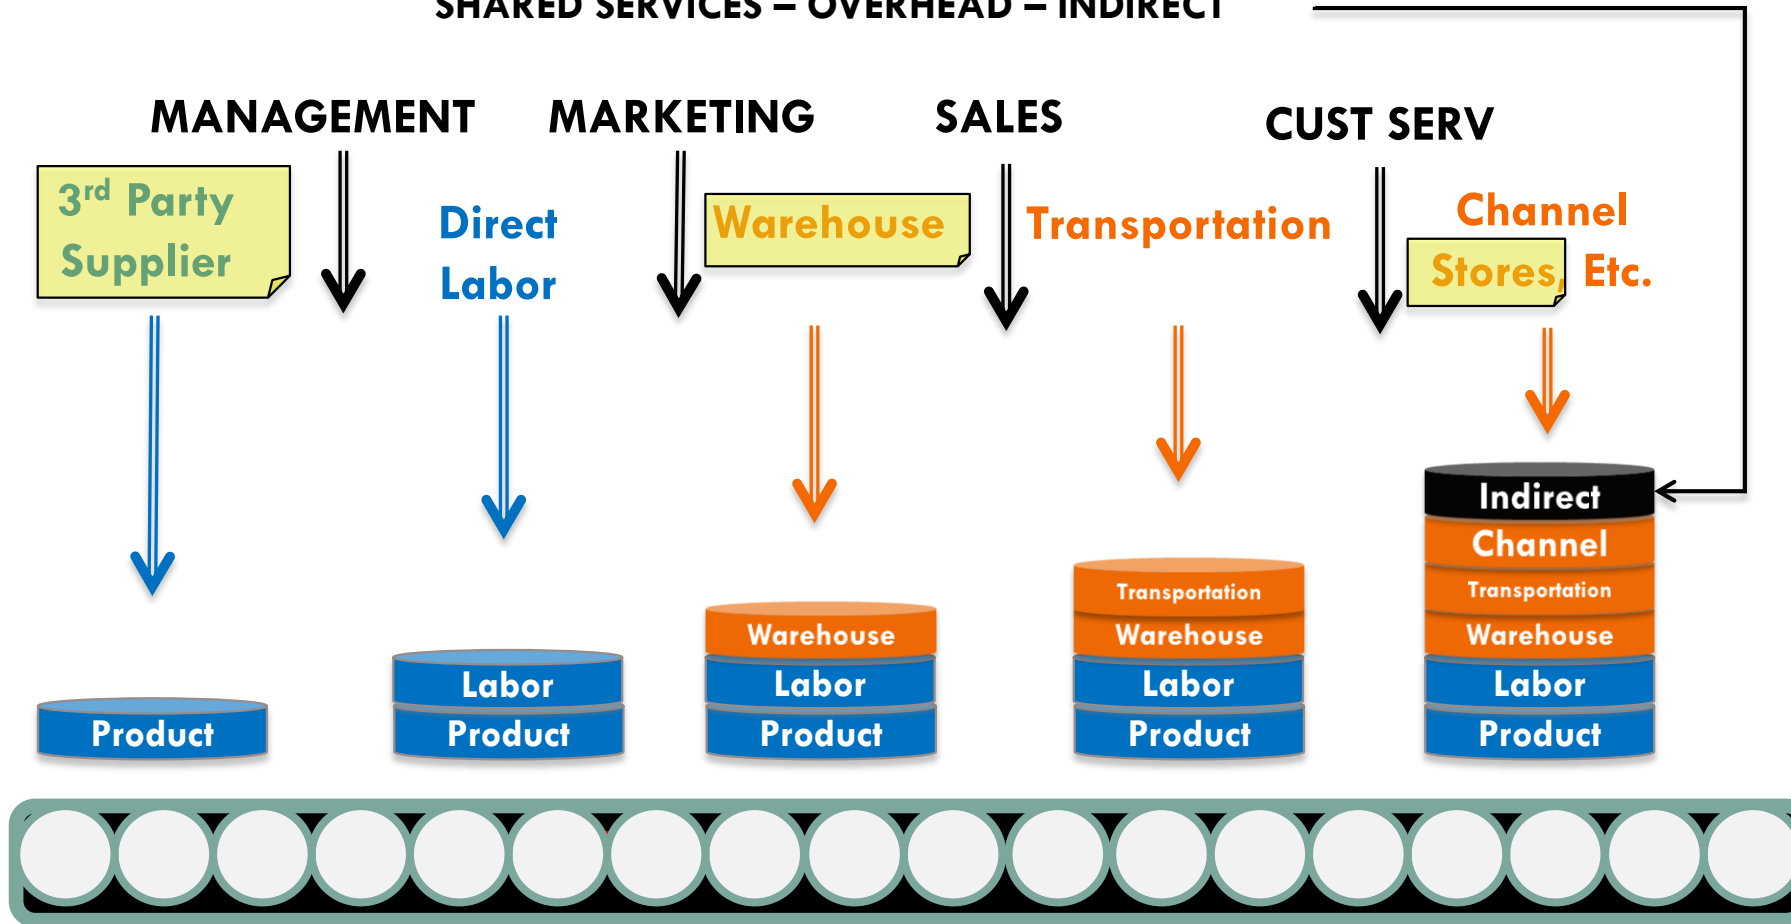

Profit Clustering

Segment

What we Hear...3 Business Needs

Allocations

- IT Chargeback
- Shared Services
- Ledger Support
- Forecasting/Budget

Profitability

- Profit Value Chain
- Profit-Focused Entity
 - Customer
 - Product
 - Channel
 - etc

Transfer Pricing

- Operational Pricing
- Tax Strategy and Compliance

Flexible Design Methodologies

Configured to Requirements

Structured Flow

Requirements

- Costing for analytical purposes
- Highly regulated costing scenarios
- Activity Based Costing
- Aggregate level Profitability

Detailed Flow

Requirements

- Bottom up profitability computation
- Highly detailed, highly dimensional cost and profit objects
- Customer event, order, or transaction costing and profitability

Free Form Flow

Requirements

- Management reporting
- Augment thin ledger efforts
- Planning and HFM allocation support
- Aggregate level Profitability

Management Ledger Applications – Genesis

- **Standard Profitability Application Challenges**
 - Built for extended ABC type modeling
 - Stage wise structure safe for user but limiting
 - Customers used HPCM for far more than it was designed for
- **New use cases require**
 - Flexible dimension structure
 - More easily maintained applications
 - More complex logic and variability
- **Standard Profitability apps could not meet these challenges**

Management Ledger Applications

- A modeling system for offline management reporting needs and allocations support for other Ledger oriented systems
- Dimensionality to support common management reporting uses and closely match HFM or General Ledger structure
- Analysis support for Profitability, Product Costing and Shared Service Charge backs, Operational Transfer Pricing
- Integration with HFM, Planning, Multi-Vendor GLs
- Addresses functionality gaps where Standard Profitability application design has been challenged in the past

Management Ledger Applications — Main Features

Unlimited Dimensions

Stage-less design allows 4 POV dimensions and unlimited business and attribute dimensions

Calculation Rules

Source side rules, iterative rule support for reciprocal allocations, flexible driver references, custom calculations, and easy clear / recalculate

Parallel Processing

Rule execution in parallel, serial, or iterations as needed, set by user

Rule Balancing

Balancing by rule with allocations sent and received as well as adjustment values detailed by rule

Model Views

User defined slices for enhanced rule balancing and trace analysis

Trace Allocations

Visual allocations trace from aggregate or granular level, detailed by rule

Reporting

Smart View links, queries, standard system and validation reports

Management Ledger Applications — Main Features

Unlimited Dimensions

Better fit with GL data, HFM, and Planning

Calculation Rules

Eliminates staging tables, very fast design and delivery, enhances business user control messaging

Parallel Processing

Scale and Performance – Advantage Exalytics

Rule Balancing

Simplifies result validation and auditing

Model Views

User defines stages and steps, analysis checkpoints

Trace Allocations

Eliminates 'black box' objections

Reporting

Flexible delivery choices in addition to BIFS

Management Ledger Application

Business User Managed

“Connect the Dots”

Free Form Flow

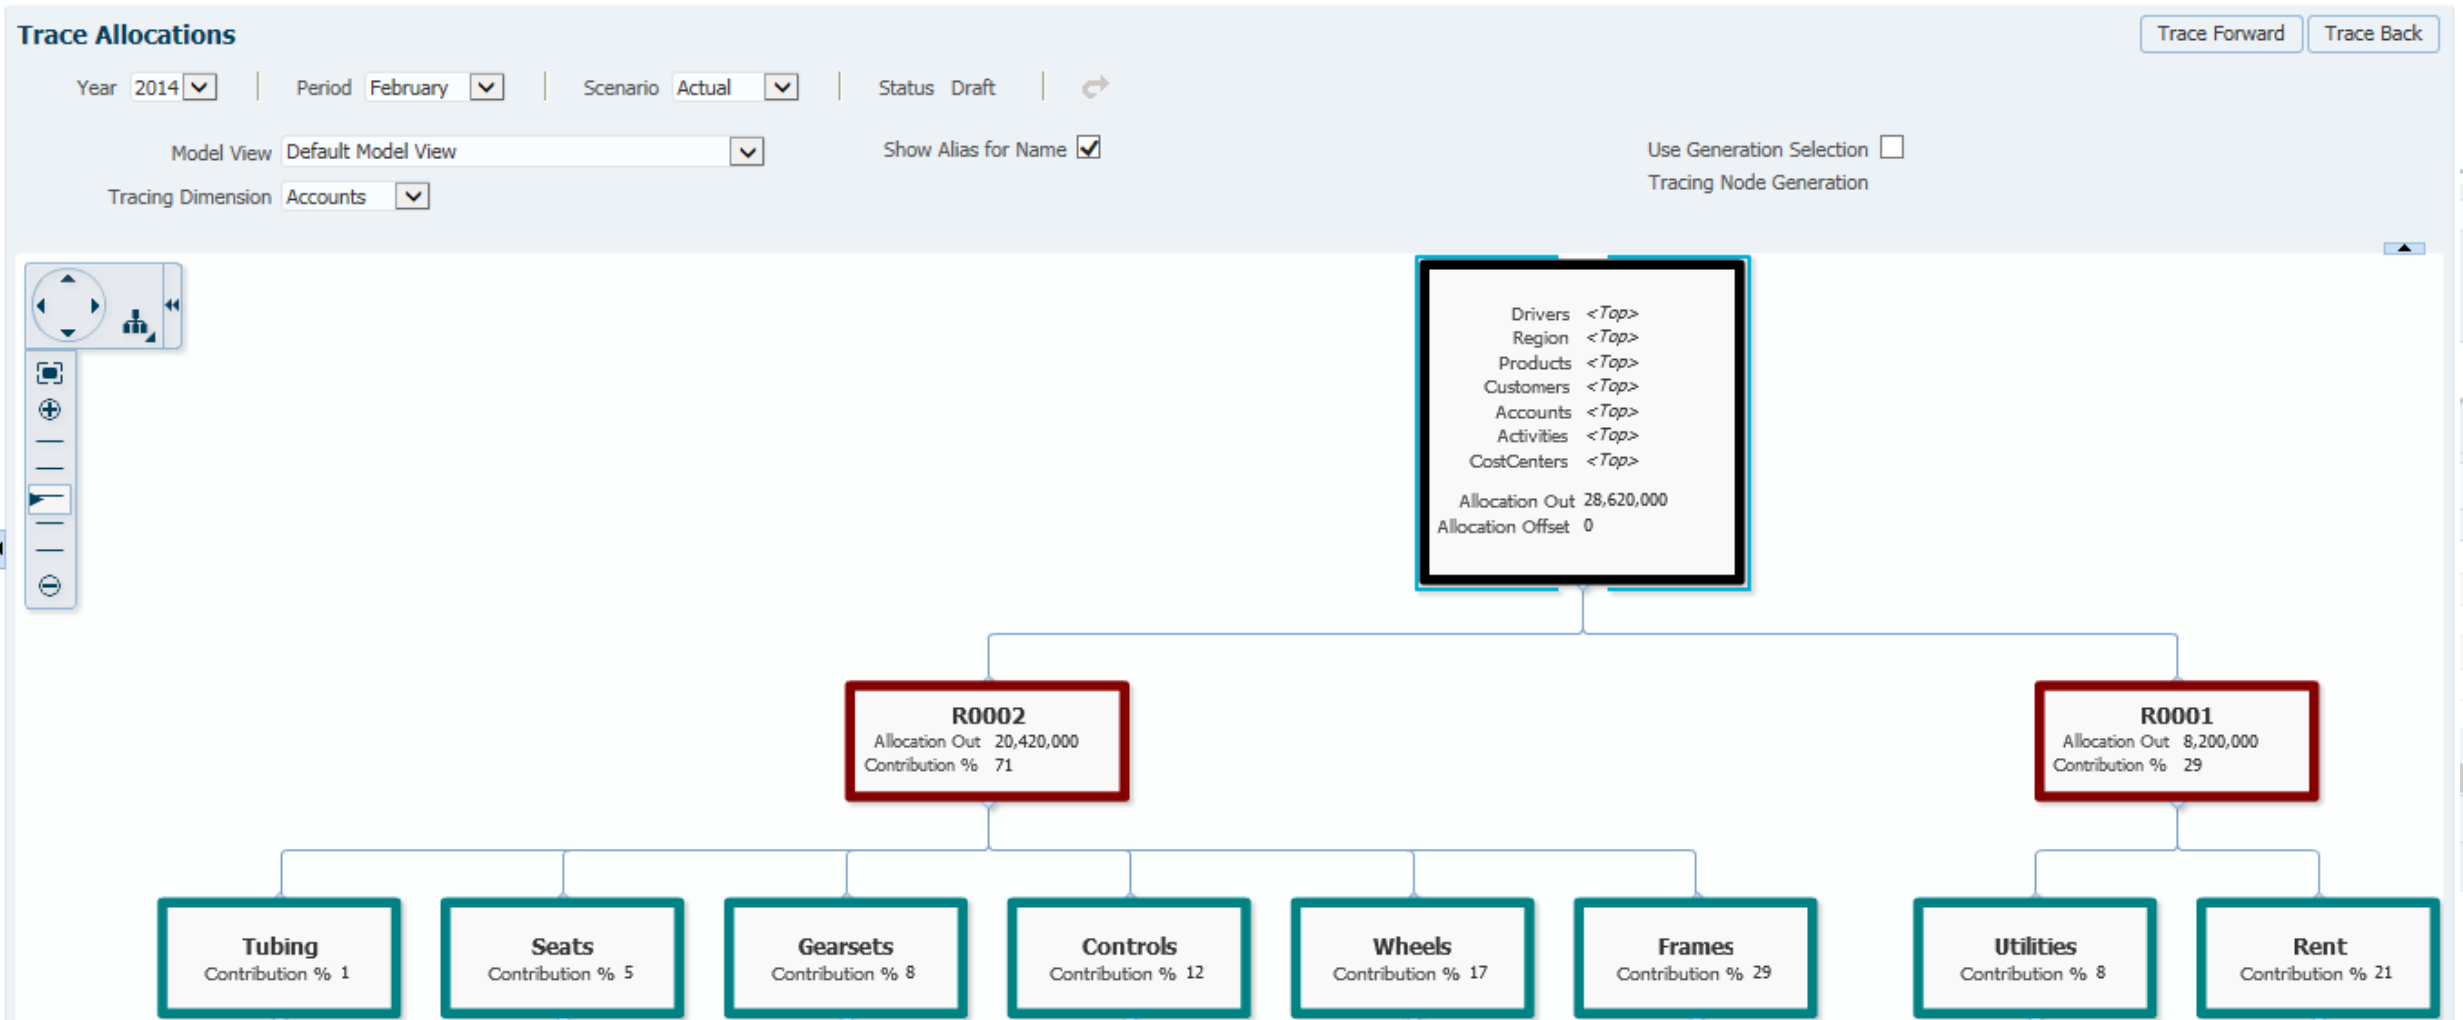

- 1 Define Rule
- 2 Select Source
- 3 Select Destination
- 4 Select Driver

A screenshot of the Oracle Financials "Task Area" sidebar. It contains a list of tasks organized into folders: "Manage Model" (Manage Model, Model Summary, Points of View Manager), "Manage Program" (Manage Rules, Trace Allocations), "Validate" (Manage Model Views, Rule Balancing, Model Validation), "Reporting" (Manage Queries, System Reports), "Calculate" (Manage Database, Manage Calculation), and "Job Status" (Job Library).

A series of screenshots showing the Oracle Financials "Manage Rules" configuration interface. The first screenshot shows the "Manage Rules" main screen with filters for Year (2014), Period (January), Scenario (Actual), and Status (Draft). The second screenshot shows the "Rule Definition" dialog for "Rent and Utilities Reassignment", with the "Source" tab selected. The third screenshot shows the "Rule Definition" dialog for "Occupancy Expense Allocations", with the "Destination" tab selected. The fourth screenshot shows the "Rule Definition" dialog for "Occupancy Expense Allocations", with the "Driver Basis" tab selected. The fifth screenshot shows the "Select Dimension Members" dialog, with a list of dimension members and a "Rows Selected" count of 1. The sixth screenshot shows a "Free Form Flow" diagram with nodes for Exec Office, IT, HR, Facilities, Finance, Sales, and Mfring, connected by colored arrows.
