Publisher's Note

V&S Publishers has recently ventured into the field of *Academic Books* with the launch of the *Gen X Series*. 'Gen X' stands for 'Excellence in Generation 'X'. The series comprises books for aspirants of various competitive examinations. Hence, following the success of our previous books in this series, we decided to launch a **series of IELTS or the International English Language Testing System books** under this series. The subject has been divided into five main parts which has been grouped into five books by the author, such as: **IELTS Tech-Academic Module**, **IELTS Tech-Writing Essentials**, **IELTS Tech-Vocal Cosmetics**, **IELTS Tech-General Module** and **IELTS Tech-Speaking Essentials** for the students, who aspire to study, work or settle abroad.

The books in this exclusive Series are written especially for the Indian students who wish to appear in the IELTS exams. Most of the foreign books available in the market on this subject have been written keeping in view the foreign readers and at times, may appear *Greek* to the students from India, primarily because of issues related to accent, grammatical aspects, spellings, etc. Therefore, the need for these books was felt by V&S Publishers and the author's extensive research on this subject was carefully moulded to present it in the form of five perfect books on IELTS, specifically for Indian students.

Each book contains **Skills, Strategies and Guidelines** written in a simple manner along with a CD that accompanies the book which is also one of the unique features of this Series. The **CDs are interactive and illustrative** and presented in a manner that even an average student can grasp the contents and master the language easily and quickly. So, V&S Publishers hopes that through these books, we can offer the IELTS aspirants – **A Smarter Way to Learn Technical English nationwide.**

Preface

The book is specially designed to investigate what skills and strategies are required in writing and speaking modules that distinguish the IELTS proficiency levels. There are a number of factors like Word Stress, Intonation, Rhythm and Cohesive Devices, which is required on behalf of the IELTS candidate in order to determine their assessment over four band scales: Fluency, Grammatical Range and Accuracy, Lexical Resource and Pronunciation. But how to attain all these skills is still a matter of discussion. Without understanding these technical aspects of English language, it is difficult for the IELTS candidate to score better in IELTS Speaking Test as this is the criteria for their oral proficiency. In non-native English country like India and China, no preference is given to learn all these skills. Only few study materials are provided to them to memorise the answers. No preference is to be laid in building of Rhetoric among the candidate. The major objective of the book is:

- Making the IELTS candidate proficient in speaking test by teaching them all the Rhetorical devices like *Word Stress*, *Intonation*, *Rhythm*, *Cohesive Devices*, *Fluency*, *Lexical Resource*, etc.
- * All these techniques should be properly designed and provided to the students in the form of study materials.
- * Sound recorder (self-created by students in mobile phones) software should be used to maintain the Rate of Speech in the IELTS Speaking Task 2
- * Speech therapies should be given to the students to twist their tongues in L2.

In 2001, the IELTS interview format and criteria were revised. A major change was the shift from a single global scale to a set of four analytical scales focusing on different aspects of oral proficiency. This study is concerned with the validity of the analytical rating scales. It aims to verify the descriptors used to define the score points on the scales by providing empirical evidence for the criteria in terms of their overall focus, and their ability to distinguish the levels of performance.

The Speaking Test Band descriptors and the criteria key indicators were analysed in order to identify the relevant analytic categories for each of the four band scales: *fluency*, *grammatical range* and *accuracy*, *lexical resource* and *pronunciation*.

Speaking Skills Checklist is as follows:

Production Skills, Pronunciation: Rhythm, Number & Length of Pauses, Stress, Intonation, Contours.

Communication Skills: Fluency, Clarity, Coherence, Confidence, Cultural Appropriateness, etc.

Language Skills: Grammatical Accuracy, Grammatical Range, Vocabulary

But how an IELTS student will build these skills is still the matter of discussion. The IELTS Books/Instructors or even the organization of IELTS are silent in this matter. No doubt, we can get this matter by netsurfing over different websites but what about the authenticity of the study material. The main problem in a non —native English country like India is that how

students twist their tongues in L2 (English language) because while learning, they automatically get the influence of L1 (Mother Tongue) because it is their native language, and this is natural, so nobody can avoid it. But learning global (English) language with the help of Vocal Cosmetics/Rhetorical Devices will improve their tongue twisting into L2 (Second Language Acquisition) which automatically improve the proficiency of the candidate in the IELTS Speaking and Writing Test.

Keeping this viewpoint in mind, I have decided to put forth some technical aspects of learning, writing and speaking English through the medium of this book. This will truly help the students to speak good and perfect English.

Ans. Yes..I do... it reflects in your personality the way you eat, the way you dress, the way you adopt different lifestyles, its values & beliefs, etc. It is the widening of minds and spirits. It teaches you how unity can be maintain in the diversities of culture.

37. Which culture is the best, 'Indian' or 'Western'?

Ans. Well... the culture never teaches you anything wrong. It is the thinking capacity of the person that allows you to think this is Indian or Western. The Indian culture is already enriched with values and that's why it is incredible and the Western culture is completely based on Facts of those values, so I think no comparison exists between both of them. Both teaches the real virtues of life.

38. How has your country'culture changed in 50 years time?

Ans. Change is the law of nature, but sometimes, it's frightening to accept the change. Culture does not change because no doubt it is accepted by the society in different ways but its values and norms always remain the same. Earlier, it was limited to customs, but now it is influencing our deportment, etiquettes, mannerisms, food habits, etc. It would not be wrong to say that it is our 'Signature's style' these days.

LIFESTYLE, HEALTH, KEEPING FIT

39. Why do some people think that modern lifestyles are not healthy?

Ans. See, people have a valid reason for thinking so. People today love comfort and luxury, and they want to satisfy their appetites at any cost. Rather than cooking at home, they love to eat out at restaurants and fast food joints. Fast food may be tasty, but contains a lot of fat that is not good for health. Previously, people used to walk or engage in some kind of manual work. That is not the case today. Personal vehicles and modern devices have made their life easy and people have a great aversion towards sweating their bodies. This lifestyle naturally invites diseases.

40. Why do some people choose to lead unhealthy lives?

Ans. The simple answer is laziness. Today many people do not have the discipline to lead a healthy life. They love comfort and convenience in everything that they do. In fact, they don't realise that their comfort and luxury are going to end soon. They need to face the reality sooner or later.

41. Should individuals or governments be responsible for making people's lifestyles healthy?

Ans. It is the individuals themselves who are responsible for making their lifestyles healthy. It is one's personal freedom to lead a healthy lifestyle. The government has nothing to do with it. No government can interfere into such personal affairs. The government can't ask people to eat this or that. The only thing that government can do is to spread awareness about this issue. Nothing more than that.

42. What could be done to encourage people to live in a healthy way?

Ans. The best way to encourage people to live in a healthy way is to spread awareness about the consequences of an unhealthy lifestyle. This can be done through the media like television and newspapers. At an early age, children should be given education about the importance of a healthy lifestyle. It should also be included in the curriculum. Moreover, sports should be made compulsory in schools. Another effective way is to give gym and sports facilities in factories and offices.

MUSIC

43. Which instrument do you like to listen most? (Why?)

Ans. My favourite musical instrument is the flute. (I love listening to the flute, the most). I have always wondered why I like flute. Maybe, it is because of its simplicity or because of its sweet sound. Flute has a very soothing music and it goes directly into your heart. I think it is very easy to learn flute, but I am not sure. Anyway, I like it.

44. Have you ever learnt to play a musical instrument?

Ans. Not really, I don't think I have the talent for it. So I have not seriously tried. When I was small, I just used to play with the harmonium, but actually, I could never play any proper notes. Even now, I love to press the keys of the electric keyboard and I like to hear the sound or the music. But I have never learnt to play any musical instrument.

Children's Games

45. How have games changed from the time when you were a child?

Ans. Games have changed tremendously over the years. When we were children, the standard of the game or the players were not as good as it is today. Moreover, newer rules have been introduced to make it more appealing to the television audiences. I think the speed of the game has considerably increased. There is much more money in sports and games today, so more and more young people are interested in making it a full time career. That was not the case when I was a child.

46. Do you think this has been a positive change? Why?

Ans. Yes, it has definitely been a positive change in all ways. Games have become more popular and players get much better rewards. Televised games have made it possible for people to watch games in the comfort of their homes rather than going to a stadium. Watching games have become a very easy affair. Overall, the standard of the game has improved.

47. Why do you think children like playing games?

Ans. Children are physically very active and you can't keep them idle for a long time. They always like to be with their friends, playing some games. Psychologically, at their age, they can't think of engaging in a serious activity for a long time. Playing games would occupy them in a very effective way; otherwise, they are going to create some mischief at home.

BOOKS

48. What kind of books do you like to read?

Ans. I mostly like to read biographies. I'm not sure why, but it is interesting to read about people's real lives, especially when they have had interesting lives and have had to deal with many problems. I do read fictions as well, but I often find it difficult to get hold of a book that I really like. I also like reading about books dealing with current affairs.

49. Do you read the same kind of books now that you read when you were a child?

Ans. Not really, no. Actually, with I didn't read that much when I was a child, but if, I did it was mainly fiction books, such as fairy tales. Things like The Lion, The Witch and the Wardrobe, and othe such fantasy books.

50. When do you think is the best time to read?

Ans. I think any time is ok, but when I read I like to concentrate, so I can't read for a short time like on a bus ride like some people do. I like to put time aside to enjoy it. So if I have some free time at the weekend, I might read for a few hours. And I nearly always read before I go to bed – this really helps me to sleep.

ABSTRACT

CUE-CARD

This part covers the most popular Cue-Cards of the IELTS test which commonly appears in the exams and collected from different resources of the IELTs Test with its solutions. Generally in this section, the instructor gives each candidate the Cue-Card with a topic written on it and the student has to prepare notes based on that topic and give a presentation for 2 minutes. So, revise all those Cue-Cards with their Follow-up Queries for Quick Presentation in the IELTS Exam.

MOST POPULAR CUE-CARDS FOR IELTS TEST

Cue-Card-1

Describe your favourite festival

You should say:

- Which festival it is
 - Why you like it
- How do you celebrate it

My favourite festival is Deepavali, the festival of lights. The word 'Deepavali'- Deep meaning 'Light' and *Avali* meaning 'row', so its a row of lights. *Lakshmi* (the goddess of wealth and prosperity) *pooja* (worship) is observed in every household and new businesses are commenced, and people exchange sweets among friends and families. They decorate their houses with beautiful, colourful *rangoli* and make awesome floral decorations. On this festival, people wake up early in the morning have oil bath and burst crackers..... This festival is celebrated on a grand scale in almost all the regions of India the other name of this festival is Diwali.

Gurudev Rabindranath Tagore has so aptly put forth the true significance of Diwali in these beautiful lines: "The night is black, kindle the lamp LOVE with thy life and devotion."

Diwali in India is full of fun and frolic and shops are buzzing with people. Almost all the shops are illuminated with colourful light or bulbs, and they offer great Deepavali discounts. So people are very much attracted towards these discounts.

Another Deepavali attraction is the new movie releases and the bursting crackers. In my colony, there is heavy competition for bursting crackers. Usually they get up at 3.30 a.m. and from then onwards the competition among neighbours begins as soon as the day light hits and finally, end after 3 to 4 hours. But to face the reality, today the price of the crackers have rose to such levels people can buy crackers, or afford to spend on crackers. Inspite of all these factors, Diwali is the best of all the festivals.

Follow up Questions

1. Do you think it is necessary to celebrate festivals?

Ans. Festivals are the mirror of Indian culture and heritage. Yes, celebrating these festivals

are very important so it is essential to celebrate it wholeheartedly, then it brings happiness and prosperity people's lives. These festivals provide more opportunities to meet our relatives and friends to strengthen their social and religious bonds.

2. How do you celebrate festivals?

Ans. I celebrate festivals with my parents, siblings and friends relatives. During festivals I keep off from my job and spend the whole day in distributing sweets to my kith and kin.

3. What is the difference between the way of celebration of the festivals in the past and the present?

Ans. In the past almost people did not celebrate festivals with pomp and show. Due to conservative and superstitious, outlook they celebrated festivals only at their houses and temples. But nowdays, people become crazy before festivals. They enjoy every festival, whether it belongs to their religion or not. Everybody enjoys it with full fun and frolic. Each new festival comes on the stage of today's world like the Valentine's day, Friendship Day, Father's Day, Mother's day, etc.

4. Do you think we waste money on the celebration of festivals?

Ans. Yes, to some extent, it is true, because I do believe that most of the people become extravagant during the festive season. No doubt one should take the necessary things for celebrating festival and performing rituals, but buying unnecessary things during festivals are useless and waste of money.

Cue-Card 2

Describe your favourite movie

You should say:

- Which is the movie
- What is its basic theme.
- How it influences the society

My favourite movie is the winner of the Oscar Award 'Slumdog Millionarire' directed by Danny Boyle. This movie won 8 Oscar awards the related to Sound mixing, Film Editing, Original song and Direction and Motion Picture. Indian music Maestro A R Rahman brought home two awards with his Jai Ho.... composition.

O Saaya is a background theme that helps in speeding up the pace of SlumDog Millionaire with its sheer energy. Heavy on orchestra, *O Saaya* moves at a fast pace and is the kind of song that has to be heard on a high volume to get the right effects. In the film, the main protagonist, a young boy, born and brought up in Mumbai slums without and formal schooling, correctly answers all questions in a popular quiz show and subsequently, is suspected by the quiz master to have won by cheating. Later, in a police lock up and under intense interrogation and torture, he insists "but I knew the answers". The film revolves

around the story of how he acquired the 'knowledge'. While the quiz is founded on the expectation of truth through instrumental rationality, Jamal, the contestant uses the strategic rationality effectively. The complete theme of the movie is an implicit critique of the pedagogical model of instrumental knowledge unquestioningly followed in our educational system. This movie is clearly an evident of a journey from 'Rags to Riches'.

Follow up Questions

1. Which type of movies are very popular in your city/country?

Ans. Well... Movies are the remarkable blueprint of every country. In my country, movies are based on social customs and conventions Some movies are dramatic and comical. But nowadays, most of the directions are focussing towards logical, empirical and practical movies which highlight the life of a common man, and is quite popular among people.

Ans. Yes... up to some extent, I must say movies influence the life of people. It teaches the masses about latest stunts, fashion etc and also makes them aware of the social and economic evils prevailing in the society. But on the other side of the coin, some stunt movies have really put a bad influence on the upon children of almost.

3. What would you like to say about the Multiplex culture in your city?

Ans. The Multiplex culture has really changed the perception of cinema. It really enhances its value by providing more services related to recreation and leisure. These multiplexes are well equipped, air-conditioned and more secure than traditional cinema halls. I really appreciate the new advent of technology in the field of cinema.

4. What do you say about Censorship?

Ans. Censorship defines the boundaries of movies. It has been initiated to maintain the customs, conventions, public secrecy and traditions of the society. It really protects the sentiments of the people living in India who are basically diverse in nature as well as culture.

Cue-Card 3 Describe your favourite bird You should say:

- Name of the bird
- Its eating habits

Well... Mornings in India are always welcomed with the chirpings of birds. My favourite bird is the Green Parrot. It is different from almost all other birds. Parrots have a strong curved bill, an upright stance, strong legs, and a clawed zygodactyls feet. Most parrots are predominantly green, with other bright colours, and some species are multi-coloured.

The most important components of parrots' diets are seeds, nuts, fruits, buds and other plant

material, and a few species also eat insects and small flower animals, and the lories and lorikeets are specialized to feed on nectar from flowers, and soft fruits. Almost all parrots nests are in tree holes (or nestboxes in captivity), where they lay their eggs from which emerge the altricial (helpless) young ones.

Some parrots have the ability to imitate human voice which enhances their popularity as pets. Trapping of wild parrots for the pet trade, as well as other hunting, habitat loss and competition from invasive species, have diminished the wild populations and parrots have been subjected to more exploitation than any other group of birds.

Follow up Questions

1. How can we protect the birds' life on this earth?

Ans. We can protect bird's: life by reducing the use of pesticides and providing elements of natural habitat. This, you can create a welcoming place for birds as well as other wildlife.

Ans. Yes, Birds are important indicators of environmental health and play a significant role in maintaining the earth's ecological balance. They also propagates plant's life as pollinators. They control insect population. Moreover, in the dispersion of seeds birds play an indispensible role.

Cue-Card 4

The internet becomes the organizing principle of the addicts' lives. They are willing to sacrifice what they cherish most in order to preserve and continue their unhealthy behaviour.

2. What causes Internet Addiction?

Ans. Internet Addiction can be understood by comparing it to other types of addictions. Individuals are addicted to alcohol or other drugs, for example, develop a relationship with their "chemical (s) of choice" – a relationship that takes precedence over any and all other aspects of their lives. Addicts find they need drugs merely to feel *normal*. In Internet addiction, a parallel situation exists. The Internet – Like food or drugs in other addictions – provides the "high" and addicts become dependent on this cyberspace high to feel normal. They substitute unhealthy relationships for healthy ones. They opt for temporary pleasure rather than the deeper qualities of "normal" intimate relationships. Internet addiction follows the same progressive nature of other addictions. Internet addicts struggle to control their behaviours, and experience despair over their constant failure to do so. Their loss of self-esteem grows, fueling the need to escape even further into their addictive behaviours. A sense of powerlessness pervades the lives of addicts.

3. What are the types of Internet Addiction?

Ans. Cybersex and Cyberporn addiction are the most common form of Internet Addictions. The widespread availability of sexual content online has given rise to a new form of sexual addiction as almost 60% of the cases of online sexual compulsivity seen result exclusively from Internet use. New problems related to online affairs have also emerged as a sub-type of Internet abuse given the widespread popularity of interactive online applications such as chat rooms and instant messaging leading to surprising new trends in divorce and marital separation. Finally addictions to eBay, online gambling, and multi-user role-playing online games are growing new forms of Internet abuse.

4. Do men and women differ in what they become addicted to?

Ans. Gender influences must be a underlying reason for Internet addiction. Men tend to seek out dominance and sexual fantasy online, while women seek out close friendship, romantic partners, and prefer anonymous communication in which to hide their appearance. Men are more likely to become addicted to online games, cyberporn, and online gambling, while women are more likely to become addicted to chatting, instant messaging, eBay, and online shopping. It seems to be a natural conclusion that attributes of gender played out in cyberspace parallel the stereotypes men and women have in our society.

5. Who is most at risk for developing Internet Addiction?

Ans. National surveys revealed that over 50% of Internet Addicts also suffered from other addictions, mainly drugs, alcohol, smoking and sex. Trends also showed that Internet Addicts suffer from emotional problems, such as *depression* and *anxiety-related disorders* and offer us the fantasy world of the Internet to psychologically escape unpleasant feelings of stressful situations. Here is your topic

Describe your favourite theatre

Name and location

How often you visit it

What you like about it

Watching or going to cinema is one of my favourite recreational activities. I like 'PVR' the most popular multiplex in my city. This is actually a first multiple which opened with grand

cinemas in our city. All six screens show different movies at different timings so that they offer a wide variety to the viewers. It has both lifts and escalators for the visitors to move easily in the complex. The whole building offers a lot of options like discotheque, games zone, shopping section, food court, book shop and so one. This building has an innovative interior design. It is constructed in such a way that we can have the visibility of all the corners of the building as we come to the central part of the building. The cinema halls are different in size, but are very good in ambience. They are well air-conditioned, have comfortable seats and excellent sound system. All these facilities make movie watching a pleasurable experience. In addition, they also offer online ticket-booking and free home delivery of tickets for customers. I think it is a complete package of recreation and entertainment.

Follow up Questions

1. Do you like to visit cinema halls regularly?

Ans. No, but I love to watch the first day first show of the latest movies.

2. If you are given a choice, what would you prefer, watching a drama or a movie and why?

Ans. Both have their own attractions. Drama is a live performance of actors on the stage, and hence it is more alive and involving. It is a challenging task for the performers because they don't get retakes in a drama. So, for lovers of acting and live performance, drama is a better choice. However, movies offer us better sound effects, cinematography and music. I often opt for movies because I like to watch different outdoor locations, newer costumes and innovative storylines.

3. Now I'd like to ask you a few more questions related to your family.

a. What changes have you seen in the family system in the last decade?

Ans. Nuclear families and small families are gaining grounds in a large proportion in the society. However, a reverse trend is also visible in some countryside areas of my nation, where all the members of the family live together under one roof.

b. What are the positive and negative points of living in a joint family?

Ans. Joint family offers love, affection, sharing warmth and unity. During trials and tribulations of life, only joint families prove to be boon. Moreover, cultural legacy can be easily passed on to the next generations in joint families. On the other hand, there is a lack of privacy in joint families at times. Moreover, these types of families are easily proned to conflicts and consensus.

c. What is the importance of family in your life?

Ans. Family is the first school where our society develops. It is a set up, where we can live a natural life without playing any psychological games with one another that we normally play outside our families. In other, words, a family is the base of our life where the pyramid of our nature stands.

d. What are the reasons behind breaking down of joint families into nuclear families?

Ans. The prime reason for this is economical development. Because of this, people started shifting to bigger and industrial cities from small towns and villages. It is obvious that when we migrate, we cannot shift as a joint family in the beginning, and hence,

families break and live in different places of the country.

e. Do you think today's family members show less warmth and feelings compared to the past?

Ans. I don't agree with this. I do accept that changes have taken place in our life styles and this doesn't allow family members to give enough time to one another. But it doesn't mean that they have less respect and feelings for one another. It is a common saying, blood is thicker than water. It doesn't need time to strengthen them. Family bindings are always stronger and are beyond such requirements.
