

# IF IT'S WATER, INC. EVERYTHING FOR YOUR POOL

**Chemistry, Mechanical Room Equipment, Deck Equipment,  
Safety Gear, Maintenance Equipment and Service!**

**Look for Timmy Dog  
inside to show you  
what's new and cool!**

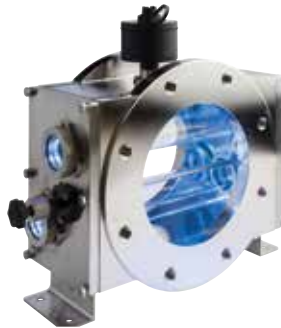

**CHECK IT  
OUT!**

Our all new lineup of chemical controllers on page 9.

True PPM control, remote access, precise dosing. Many new benefits with the same reliable support you expect from the leader in chemical automation.

Coming in 2020 - The Wafer UV. Our new ETS Ultraviolet disinfection system packs a lot of power into a very small footprint. Secondary disinfection, chloramine destruction and an easier blueprint for retrofit installations.

**Stay tuned for  
more details.**

**AFM! Activated Filter Media.**

Check out page 12 to learn about this new filter media which is the talk of the industry.

A direct replacement for sand that filters better and never needs replacing!

Wave 150 – The all new Wave 150 joins our lineup of commercial vacuums and delivers stellar performance at a great price.

Check out the new Wave 150 and our other offerings on page 31. We've got a cleaning solution for your facility.

From NCAA powerhouses to neighborhood swim clubs, we've got a starting block to meet your program and budget.

Check it out on page 41. We handle it all, from concept to installation; we partner with you to deliver a one-stop solution.

## THE FINE PRINT

We're not "fine-print" kind of guys, but we did want to point out a couple of things.

**Pricing:** The pricing in this catalog is current as of April 15, 2020 – the day we sent it to the printers. In an effort to save a couple of trees we've decided to publish a new catalog every 2-3 years rather than every year. Please keep in mind that there may be some items that are subject to a price increase during this period. To keep the lawyers happy here is our fine print. "Pricing subject to change without notice". If you need exact pricing, please don't hesitate to call us.

**Payment Terms:** Most items are sold on Net 30 terms from date of invoice. If you have special circumstances that would require something different, please call us and we'll be glad to work with you. If you want to use a Credit Card (VISA, MC, AMEX, Discover) when phoning in your order that'll work, too. Please note: credit card payments made more than 10 days after invoice issuance may be subject to a 3% convenience charge.

**Shipping:** Prices shown in our catalog **do not** include any shipment charges. These will be added to the invoice.

**Credit:** If you would like to establish an account we can usually do it in less than five minutes. Give us a call and order something: we'll activate your account over the phone.

**How to buy from us:** Phone, fax, e-mail – whatever is easiest for you.

Terry

Tim and Rhys

### MEDIUM PRESSURE UV SYSTEMS

For the best results you need to partner with the best.

If It's Water has installed hundreds of UV solutions in pools ranging from 500 to one-million gallons. Our clients are diverse, ranging from small swim schools to NCAA powerhouses – and everything in between. Our diverse product lineup, and partnership with the leading manufacturers of UV products, ensures that we can provide an answer that will solve your problem, ensure patron comfort and safety and meet your budget needs.

**Give us a call. Ask for our installation list and feel free to call other end users who have experienced the impact of our secondary disinfection solutions. You will discover that leading technology, coupled with If It's Water premier service and support allows you to make a big decision that much easier.**

#### UV SIZING CHART

PIPE SIZE	MODEL	LAMPS	POWER REQUIRED	DESIGN FLOW RATE
2.5"	ECP-113-5SPV	1*1.3kW	220V 1PH	176 gpm
4"	ECF-210-4V	2*1.0kW	208/220V 1PH	350 gpm

Alternate voltages available - contact us for details.

Call for a free evaluation and comprehensive proposal on any of our UV disinfection systems.

#### FAST FACTS

UV systems are the ultimate sanitizer. They destroy chloramines. Seriously, no more super-chlorinating, no more breathing problems, no more destruction of the steel components in your natatorium.

UV instantly destroys chlorine resistant bugs like cryptosporidium, MRSA, Legionella, Pseudomonas, Streptococcus, Hepatitis and more!

Our all-new Spectra Touch interface simplifies operation.

Validated systems that are designed to meet NY State's code requirements.

UV systems are chemically free, promoting a healthier and greener environment.

UV systems require little maintenance.

All of our staff are factory trained and certified.

We stock parts!! No long lead times!!!

There are several different models to choose from. We have UV units to fit virtually any size pool or spa.

ULTRAVIOLET DISINFECTION

LOW PRESSURE UV SYSTEMS

Our Sentry ultraviolet light systems are leading the way to better and safer water. Their unique, forward-thinking design employs high output amalgam technology for better chloramine control and inactivation of chlorine resistant bacteria. Our systems are designed for commercial pools and spa's, and they pay for themselves through lower cost of operation in a long lasting system.

Our SAG models are available in schedule 80 PVC with 316L stainless steel interior, or full 316L stainless steel chambers, and flange sizes range from 2" – 8".

All models operate at 120v with a maximum of 12amps, making this line of UV systems very cost-effective to operate and maintain.

**Benefits of Sentry UV.**

- Amalgam technology
- Improved water and air quality
- Reduction in chlorine consumption
- Reduction in water born bacteria
- 13,000 hour EOL lamp life
- Patent pending quick disconnects
- 316L stainless steel chambers
- Schedule 80 chambers for small pools and hot tubs
- 120v power supplies on all models
- 254nm wave length for sterilization
- 185nm wave length for oxidation

OZONE + UV SYSTEM FOR SPAS

DEL Ozone introduces the first Advanced Oxidation Process (AOP) sanitation system designed specifically for commercial spas. Ozone and Germicidal UV are integrated in one simple and compact unit providing the benefits of both technologies, plus the advanced oxidative reaction known as AOP, for optimal water clarity and increased removal of contaminants in the pool water.

**About AOP**

The defining characteristic of AOP systems is the production of hydroxyl free radicals, the most powerful oxidizer available to disinfect your water. The Solar Eclipse uses DEL's proprietary corona discharge combined with high output, low-pressure germicidal UV lamps to make a potent AOP system small enough (and budget friendly) for commercial spas.

## CHEMICAL CONTROLLERS

### WHY YOU SHOULD BUY YOUR CHEMICAL CONTROLLER FROM IF IT'S WATER:

- If It's Water is the region's leader in chemistry controller sales and service. For over 30 years we've installed and supported thousands of units in all types of commercial aquatic environments.
- Every item we sell - we have in stock. That includes complete systems, spare parts and all accessories. There is no long lead times when placing your order.
- Every member of our staff is factory trained and certified on all of the chemical controllers we offer.
- We offer professional installation services and end-user training with all controller purchases.
- Our controllers can be used on any size pool, spa, fountain, aquarium and even zoo exhibits! Price includes flow cell, safety flow switch and sensor probes.

### THE ACUTROL AK-110

**Please note:** In 2019 the manufacturing of the AcuTrol AK-110 chemical controller was discontinued. We evaluated its replacement and, frankly, we weren't impressed. This led to our reaching out to several different manufacturers to check out their units and select our new "flagship" product. Our selection criteria was stringent. Our foremost concerns were reliability, accuracy, ease of use, parts availability and expandability. After months of research we selected two units to provide to our customers.

Keep in mind, If It's Water has undertaken the steps required to continue supporting the AK-110 lineup for many years to come with on-site service, spare parts and technical assistance.

### THE POOL WARDEN

Easy to use but very advanced. The PoolWarden is a water chemistry control system with capabilities to control the pH, sanitizer and temperature of any sized body of water. In addition to pH and sanitizer feeding, the PoolWarden has 2 auxiliary dry contact relays that can be used to control a heating system, backup sanitizer or enzyme feeders.

For remote access, the PoolWarden has advanced communication and comes standard with Ethernet, WIFI, USB and Bluetooth which allows for operation via a smart phone, tablet or PC from anywhere an internet connection is available.

Optional Gold ORP probes and the TrueDPD Colorimetric sensor make the PoolWarden ideal for saltwater pools & spas.

ITEM	PRICE
PW Cont	\$2,995.00

### BLUE SENTINAL SE

The Blu-Sentinel SE controller is a state-of-the-art disinfection controller that measures the pool water free chlorine concentration, temperature as well the ORP and pH values. The controller provides chemical feed outputs to a variety of chemical feed devices to control and maintain sanitizer and pH setpoints.

Four analog 4 – 20 mA outputs and five digital inputs are standard. Six freely assignable relay contacts are also available that can be configured as chemical feed outputs or alarm contacts. The SE comes standard with Ethernet port for network connection and remote monitoring.

The intuitive user interface with its 4" glass panel color touch display makes setup and operation of the controller much easier when compared to conventional LED displays.

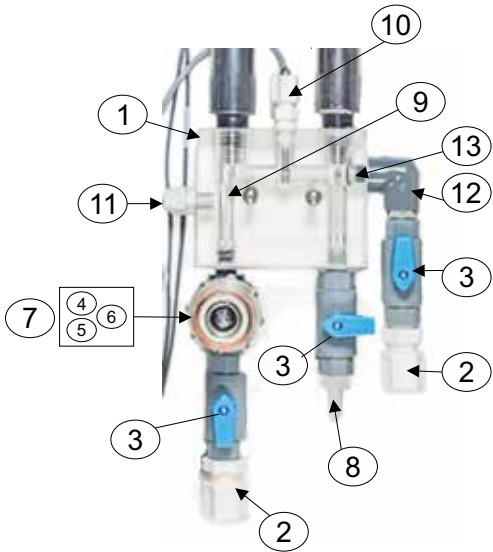

The SE includes a pressurized flow cell with 3 sensors, pH, ORP and PPM. The flow cell includes an LED light stick (blue, yellow, red) which indicates the pool water chemistry status from a distance.

## WHY IS FILTER MEDIA IN THE WATER CHEMISTRY SECTION? READ ON...

AFM stands for Activated Filter Material, a revolutionary filter media made from green glass developed and manufactured by Dryden Aqua. The raw material used for AFM must have a very specific glass quality. AFM is only made from pure green glass which is the only glass that has the necessary metal oxides to make it self-sterilizing.

AFM exceeds the performance of quartz and glass sand by filtering about 30% more organics. At 12 gpm/square foot filtration speed a nominal filtration of 5 microns is achieved. That's DE performance without the labor and cost!

AFM is bio-resistant and self-sterilizing which means no biofilm is formed in the filter bed. This important feature makes the pool system healthier, ecological and more economical. Sand is a good mechanical filter but it's also an ideal breeding ground for bacteria. Within just a few days every grain of sand is colonized by bacteria. They immediately form mucus to protect themselves against the disinfectant. In this so-called "biofilm" live entire communities of bacteria and other pathogens.

AFM has successfully been used in over 100,000 public and private swimming pools worldwide.

The chemistry of the glass, the particle shape and especially the activation process give AFM these important properties to clearly outperform sand and glass sand filters. The large surface has a strong negative charge to absorb organics and small particles. The surface also has metal oxide catalysts which produce free radicals and thus a high redox potential. Therefore, AFM is self-disinfecting and prevents bacteria from settling to make it a unique, bio-resistant filter material.

WATER TESTING

**FAST FACTS**

- It's what we use. Our field service staff carries the Taylor Professional Test Kit (the big blue suitcase). In fact, Taylor is the ONLY water testing product we use – and as such – that's all we sell. Why? Because we know it works.
- Taylor Technologies has been recognized as the leading "authority" in water testing products for over 75 years. Proven products deliver dependable results every time.
- If It's Water has been a stocking distributor of Taylor products for over 30 years. We not only stock the most popular pool and spa test kits – we also stock the replacement reagents, comparators, vials, etc..
- If you don't see what you need on these pages give us a call. Our relationship with Taylor allows us to create drop ship orders directly to you from their Maryland factory.

TAYLOR TEST KITS

PROFESSIONAL CHLORINE (K-1741)

Uses slide comparators. Tests for Free & Total Chlorine 1.0-10 ppm, Free & Total Chlorine 0-3.0 ppm, pH 6.8-8.4, Total Alkalinity, Calcium Hardness.

CODE	PRICE
TLK-1741 (Each)	\$412.87

STARTER-HIGH (K-2000)

The test kit for the pool deck. Tests for Free & Total Chlorine .5-5 ppm, Bromine 1-10 ppm, pH 7.0-8.0, Acid & Base Demand.

CODE	PRICE
TLK-2000 (Each)	\$40.20

SERVICE COMPLETE-HIGH (K-2005C)

Tests for Free & Total Chlorine .5-5 ppm, Bromine 1-10 ppm, pH 7.0-8.0, Acid & Base Demand, Total Alkalinity, Calcium Hardness, Cyanuric Acid 30-100 ppm.

CODE	PRICE
TLK-2005C (Each)	\$126.20

SERVICE COMPLETE FAS-DPD CHLORINE (K-2006C)

Same as K-2005 except uses 9058 comparator. Sanitizer tests are titrations to improve accuracy and eliminate color-matching problems. Free & Combined Chlorine is 1 drop = 0.2 or 0.5 ppm.

CODE	PRICE
TLK-2006C (Each)	\$152.50

SALT TEST KIT (K-1766) FOR SALTWATER POOLS

Drop Test, Chloride (salt water), 1 drop = 200 ppm (.75 oz)

CODE	PRICE
TLK-1766 (Each)	\$27.36

ALGAE'S FAVORITE MEAL??? PHOSPHATES.

Keeping phosphate levels low will help reduce pool problems. It is important to consistently test for phosphates and maintain levels below 125ppb. Algae must be treated prior to testing for phosphates and chlorine levels should be below 5ppm

CODE	PRICE
CH-NC00081(Each)	\$16.00

## WATER TESTING

### YOU ASKED FOR IT AND WE LISTENED

Introducing the Taylor K-5106-C test kit, designed by and sold exclusively through If It's Water. This kit is intended for the pool deck to test chlorine and pH levels. What makes this kit unique is that we cleared up the "clutter" of unnecessary reagents that go to waste. We supply what is needed for the daily tests. Also, the K-5106-C uses 2 oz. commercial reagents and is stocked with enough spare reagents to last a full season. Chlorine test is titration to improve accuracy and pH test uses the 2000 series comparator.

K-5106-C	The Lifeguard Kit	\$110.00

## CHEMICAL FEEDERS

### STENNER FIXED RATE PUMPS

Single Head Fixed Rate Feed Pump

Double Head Fixed Rate Feed Pump

The perfect pump for use with our automatic chemical controller, these pumps are available in 50 Gallon Per Day (GPD), 85 GPD and 170 GPD configurations. Additionally, by simply changing the feed tube you can easily change your pumps output capacity. See the Feed Rate Tables below for specifications.

#### SERIES 45 / SINGLE HEAD

PART #	TUBE SIZE	GPD / GPH	PRICE
STP-45MP1	#1	3.0 / 0.1	\$337.19
STP- 45MP2	#2	10.0 / 0.4	\$337.19
STP- 45MP3	#3	22.0 / 0.9	\$337.19
STP- 45MP4	#4	35.0 / 1.5	\$337.19
STP- 45MP5	#5	50.0 / 2.1	\$337.19

#### SERIES 85 / SINGLE HEAD

PART #	TUBE SIZE	GPD / GPH	PRICE
STP- 85MP1	#1	5.0 / 0.2	\$337.19
STP- 85MP2	#2	17.0 / 0.7	\$337.19

STP- 85MP4	#4	60.0 / 2.5	\$337.19
STP- 85MP5	#5	85.0 / 3.5	\$337.19

#### SERIES 170 / DOUBLE HEAD

PART #	TUBE SIZE	GPD / GPH	PRICE
STP- 170MP5	#5	170.0 / 7.08	\$477.28

#### BENEFITS

- Self priming / retains prime.
- Can run dry without damage
- Inexpensive and durable – in one product.
- Output can be changed by simply replacing the feed tube. See output tables for specifications.
- Chemical does not come in contact with the pump or any pump parts.
- Adjustable and fixed rate models to choose from.
- Simplicity. Keep it simple silly.
- Outputs ranging from 3.0 gallons per day to 170 gallons per day.
- Use your Stenner pump to feed chlorine, acid or enzymes.

#### HELPFUL HINTS

- Ensure your tubing runs and injection points are clear of mineral deposits.
- Replace pump tubes twice a year.
- These pumps are so inexpensive that you should keep a spare pump on the shelf. As reliable as these pumps are – don't they always fail the Friday night of July 4th weekend?
- Size your pump for your pool – call us for assistance.
- Once per year send your pump to If It's Water for factory authorized service. Our technicians will inspect your pump, replace worn parts, lubricate the gear and shaft assembly and install a new tube. This inexpensive preventative maintenance usually can be accomplished within 24 hours.

CHEMICAL FEEDERS

STENNER ADJUSTABLE RATE PUMPS

Single Head Adjustable Feed Pump

Adjustable pumps are ideal for conditions where manual control is required. The patented mechanical feed rate control allows the pump's output to be scaled from 5% to 100% with a simple turn of the dial. Consult output charts below for specific settings.

### STENNER INJECTION FITTINGS

#### 1/4" INJECTION CHECK VALVE

STA-UCDBINJ 1/4" Inj. Check Valve (Each) \$17.20  
 STA-MCDBINJ 1/4" Inj. Check Valve (5-Pk) \$65.00

#### 3/8" INJECTION CHECK VALVE

STA-UCINJ38 3/8" Inj. Check Valve (Each) \$21.20  
 STA-MCINJ38 3/8" Inj. Check Valve (5-Pk) \$45.08

#### 1/4" INJECTION FITTING (NO CHECK VALVE OR DUCKBILL)

STA-UCAK300 1/4" Inj. Fitting (Each) \$1.00  
 STA-MCAK300 1/4" Inj. Fitting (5-Pk) \$30.00

### POLYETHYLENE TUBING

#### 1/4" OD polyethylene tubing,

Used with Stenner Pumps for chlorine and acid lines.

**STA-TUBE14 (Roll 100') \$35.00**

#### 3/8" OD polyethylene tubing,

Used with CO2 feed systems. Sometimes used for chlorine feed with Stenner pumps.

**STA-TUBE38 (Roll 100') \$40.00**

#### 1/2" OD polyethylene tubing,

Used for sample stream lines to and from the controller's flow cell. Can also be used for chlorine injection on large pools.

**STA-TUBE12 (Roll 100') \$45.00**

#### 1/2" PVC BALL VALVE THREAD X THREAD

PVC Ball Valve used when installing a Stenner Injection Point.

Prevents back flow when servicing or changing your Stenner injector.

#### 1/2" NIPPLE

Schedule 80 PVC nipple used in conjunction with the 1/2" Ball Valve..

CODE	DESCRIPTION	PRICE
STA-1/2BV	1/2" Ball Valve Thd (Each)	\$28.00
STA-1/2NIP	1/2" Nipple (Each)	\$3.00

#### 1/4" BALL VALVE MT X FT

Used on flow cells and injection points for pipe 2" and less.

CODE	PRICE
AKBV	\$34.50

### STENNER SOLUTION TANKS

Rugged construction for indoor or outdoor applications, Stenner solution tanks are ideal for storing ancillary chemicals like enzymes.

Tanks are manufactured from polyethylene and are approved to NSF/ANSI 61 standards. Included is a polypropylene lid with child resistant lock.

All tanks include screws and grommets so you can easily mount a 45 or 85 series Stenner pump directly to the tank.

CT-ST-S15NC	15 Gallon Tank	\$194.18
CT-ST-S30NC	30 Gallon Tank	\$297.56

CHEMICAL FEED

We stock all the tubing and fittings that you'll need for your chemical lines, CO2 lines and sample stream lines. Call today before noon and you'll have them tomorrow.

CHEMICAL FEED

**FAST FACTS** 

- If It's Water is very proud of the fact that we were one of the early pioneers using CO2 as a safe alternative to acid. Since 1989 we have installed over 2,000 units to date without a single accident reported.
- When dissolved in water, carbon dioxide reacts to form a carbonic acid and other reactive compounds. These react with alkaline solutions to reduce the pH to a more desired level. It's that simple, and that safe.
- CO2 allows you to control your pool's pH safely. No handling of acid, no mixing or pouring of chemicals, no safety equipment required, no eyewash stations and no fumes! CO2 will not corrode your mechanical room equipment the way acid can corrode.
- CO2, because it increases total alkalinity, is an ideal solution for facilities where the source water has low alkalinity.

CO2 FEED UNIT

Our CO2 feeder incorporates a time proven design and a state-of-the-art valve to provide quality and reliability at a competitive price. Available in 0-30 SCFH models this feeder is perfect for any body or water using CO2 for pH control. The feeder can be coupled with

our Cross Over Switch for the ability to easily and quickly switch between CO2 and acid feed systems.

CO2-3	CO2 Feed Unit with Injection check Valve	\$750.00
CO2-4	CO2 Injection Check Valve Kit	\$55.00

CO2 SINGLE TANK REGULATOR

Our single tank regulators connect to your CO2 cylinder to deliver a constant pressure of gas to your feeder. Output pressure rating is adjustable and is shown on one gauge. The second gauge shows tank level in PSI.

CO2-5	Single Tank Regulator	\$150.00
-------	-----------------------	----------

CO2 SWITCH

The COS - pH Control Crossover Switch was specifically designed to be used in application where both CO2 and acid are used to control pH. The COS allows for a simple flip of switch to change from using acid to CO2. There is no need to unplug one feeder and plug in a different feeder.

CO2-SWITCH	Acid/CO2 Switch Over	\$180.00
------------	----------------------	----------

CO2 DUAL TANK REGULATOR W/AUTO SWITCH OVER

Our dual tank switchover (with regulator) is a completely automatic gas cylinder changeover system that is non electric, foolproof and designed for easy installation and everlasting performance! You will never run out of CO2 again!

Eliminate the need for expensive, bulk CO2 systems, our system allows you to connect to and feed from multiple CO2 tanks. Our unit senses an empty tank and automatically switches to the next connected tank, allowing the operator ample time to switch out empty tanks.

CO2-DTR	Dual Tank Regulator w/ Auto Switch Over	\$1,035.00
---------	---	------------

## CHEMICAL STORAGE

The storage of chemicals should not be taken lightly. Why use a single wall tank and risk a chemical spill? Why use a tank manufactured from materials that degrade when storing chlorine?

Our tanks are designed and built to contain any spill within the outer tank in the unlikely event the inner tank fails. Additionally, our tanks are manufactured from materials that are tested and approved for storing pool chemicals.

In addition to our double wall series of tanks we also offer single wall tanks ranging in size from 20 - 15,000 gallon capacity. These single wall tanks are ideal for use as backwash holding tanks or storing non-hazardous chemicals.

### FAST FACTS

- Our double wall storage tanks offer 110% spill containment.
- The fully enclosed design is suitable for indoor or outdoor use. This design also prevents rain, snow and debris from collecting in the tank.
- These tanks are manufactured from linear polyethylene which is rated for storage of both chlorine and acid.

SALT GENERATOR

**FAST FACTS**

- Salt Water Pools are very bather friendly.
- Saline chlorination reduces or eliminates the storage of hazardous chemicals (chlorine). No need for the delivery, handling or storage of chlorine compounds.
- Saline chlorination is an environmentally friendly, renewable resource. Go Green while you save some green.
- Our saline systems carry both NSF 50 listing and UL 1081 certification.
- Residential salt generators work great on residential pools. We've seen they can't keep up with the heavy demand required of commercial installations.
- We have a line-up of systems to fit virtually any size pool or spa.
- These systems are easy to install and will work easily with your present equipment.
- Perfect for hard to reach delivery locations.

CHLOR KING COMMERCIAL SALT GENERATOR

Our line-up of commercial salt generators produce chlorine "on-site" within the pools' circulation system.

Systems operate using the salinity in the water to produce hypochlorous acid. Because salt is continuously recycled during this process, the only salt makeup required is when water is lost due to backwashing or splash out.

Call us today and we'll do an onsite survey to see if your facility is a good candidate for salt water chlorination.

## METAL TRAP FILTER SYSTEMS

### METALTRAP X2 SYSTEM

Now you can protect your pool and spa from unsightly brown or green stains commonly associated with source waters containing metals like iron and copper. MetalTrap products are unique, patent-pending, water filtration units that selectively filter out stain-causing metals found in water used for filling swimming pools and spas. Unfiltered water can damage finishes, equipment, PVC fittings, and other surfaces.

With MetalTrap, the difference is clear. MetalTrap products utilize new "filtration media materials" that don't just treat water—they chemically react to physically trap metals, removing them permanently!

The MetalTrap can be installed in-line with your domestic water fill to capture metals before they reach the pool. It can also be installed in a bypass loop in your pool's circulation system to continually remove copper and iron.

The Metal Trap X1 Commercial Filter System contains the Media Canister and a supplemental pleated filter.

Each MetalTrap filter Commercial System will filter up to 100,000 gallons of water between Media Canister replacement.

**Installation services available - call for pricing.**

Case of (4) one-gallon containers. Disposable jugs are great for shocking and easy to handle..

CODE	DESCRIPTION	PRICE
CH-SH-4x1	Case/ 4 (1 Gal)	Market

**Calcium Hypochlorite.** Note: Cal Hypo is a Class III oxidizer and as such, you need to check local fire regulations for storage restrictions and environmental requirements (i.e.: sprinkler system).

Cal Hypo by the Case. Case of (24) one-pound bags. Easy to handle and store. Great for shocking and also makes a great emergency backup.

CODE	DESCRIPTION	PRICE
CH-CH24	Case/ 24 (1 lb.)	\$100.00

Cal Hypo by the Pail. Twenty-five pound pail. Bulk bleach running late? Add some of this directly to the pool, making your other chlorine last longer.

CODE	DESCRIPTION	PRICE
CH-CH25	Pail / 25 lb. (each)	\$90.00

**Bromine.** Bromine tablets packaged in 50 lb. drums.

CODE	DESCRIPTION	PRICE
CH-BR50	Drum / (50 lb.)	\$245.00

**Chlorine Neutralizer - AKA Sodium Thiosulfate.** No facility should be without a bag of sodium thiosulfate. No one knows how it happened, but your pool is now hovering close to 15-ppm of chlorine. No need to bleach bathing suits and kids - just add some "thio". This product removes chlorine quickly. Note: Do not add too much at one time because you could accidentally remove all chlorine from the pool.

CODE	DESCRIPTION	PRICE
CH-STH50	Bag / (50 lb.)	\$57.00

BULK CHEMICALS

PH AND TOTAL ALKALINITY

**Muriatic Acid** - Five Gallon Carboy. A container deposit is required and will be refunded upon return.

CODE	DESCRIPTION	PRICE
CH-MA-5GAL	5 Gallon Drum	\$24.00

*Muriatic Acid - Case of (4) One-Gallon Containers.* Easy to handle, perfect for column pouring when lowering Total Alkalinity.

CODE	DESCRIPTION	PRICE
CH-MA-4X1	Case/ 4 (1 Gal)	\$25.00

**Dry Acid AKA** - Sodium Bisulfate. Dry Acid is used in place of muriatic acid to lower pH. Dry acid is a convenient alternative to liquid acid and is easy to store.

CODE	DESCRIPTION	PRICE
CH-BU-DA55	Bag / (50 lb.)	\$40.00

**pH Increaser** - AKA Soda-Ash. (Also great for neutralizing acid spills and waste water after acid washing).

CODE	DESCRIPTION	PRICE
CH-SA50	Bag / (50 lb.)	\$34.00

**Total Alkalinity Increaser.** - AKA Sodium Bicarbonate. (Remember: Alkalinity should be maintained between 80 and 120 ppm).

CODE	DESCRIPTION	PRICE
CH-SBC50	Bag / (50 lb.)	\$33.00

CALCIUM HARDNESS

**Calcium Chloride Flake.** Most tap water is calcium deficient. Most swimming pools and spas should be maintained with a calcium hardness level between 200 ppm and 400 ppm. Test and see where your reading is. Don't forget - any leftover calcium chloride can be used during wintertime as ice-melt.

CODE	DESCRIPTION	PRICE
CH-CCF50	Bag / (50 lb.)	\$33.00

SALT

**Granular Salt** - Quick dissolving granular salt for use with chlorine generators.

CODE	DESCRIPTION	PRICE
CH-GS40	Bag / (40 lb.)	\$13.00

SPECIALTY CHEMICALS

Specialty chemicals shown on these pages are in stock and can be shipped UPS.

ENZYMES

NATURAL CHEMISTRY PROZYMES POOL

Breaks down filter clogging grime and grunge caused by sunscreens, lotions, body oils and more. Reduces scrubbing and brushing of tile line. Reduces overall pool maintenance.

CODE	DESCRIPTION	PRICE
CH-NC20301	Case/4 (1 gallon)	\$239.00
CH-NC20305	Each (5 Gallon)	\$260.00

NATURAL CHEMISTRY PROZYMES SPA

Same benefits of our ProZymes Pool product but specially formulated for warmer water.

CODE	DESCRIPTION	PRICE
CH-NC20401	Case/4 (1 gallon)	\$223.00
CH-NC20405	Each (5 Gallon)	\$255.00

CLEAN UP

THE STUFF

Powerful scouring powder cleans and brightens stainless and plated surfaces. Removes corrosion from plated surfaces. Widely used on stainless swimming pool surfaces. Removes weld and heat stains from stainless.

CODE	DESCRIPTION	PRICE
CH-STUFF	Case/6 (16 oz.)	\$68.00

CLEAN AND PERFECT

Clean & Perfect is a unique blend of powerful natural enzymes and citrus-based surfactants. It cleans even the toughest grease, dirt and grime with ease, yet won't harm any surface and does not affect the water chemistry.

CODE	DESCRIPTION	PRICE
CH-NC00176	Case/12 (22 oz.)	\$120.00
CH-NC86350	Each (5 Gallon)	\$245.00

SPECTRA CLEAN STAINLESS STEEL CLEANING SYSTEM

Stainless steel is a corrosion resistant alloy; however, it may display rusting characteristics under certain conditions. Routinely wiping down rail surfaces and rinsing with non chlorinated water minimize the potential for corrosion. In the event stainless steel equipment displays stubborn rust stains or heavy deposit build-up, specialized cleaning materials are needed to remove these foreign substances and to restore the original rail finish.

CODE	DESCRIPTION	PRICE
CH-47906	SpectraClean System 1 - Daily Use Case/4 (22 oz)	\$226.00
CH-47905	SpectraClean System 2 - Extreme Use (gallon)	\$201.00
CH-47904	SpectraClean System 3 - Severe Use (gallon)	\$226.00
CH-57373	Spectra Shield (1 GAL)	\$228.00

SPECIALTY CHEMICALS

METAL TREATMENT

NATURAL CHEMISTRY STAIN & SCALE CONTROL

Stain & Scale Control protects pools from the damaging effects of scale buildup and staining due to excessive calcium, iron, copper and other minerals. It works without the use of phosphates or harsh acids. Also assists in preventing/reducing scale from forming on chlorine generator cells and UV crystal lenses and sleeves.

CODE	DESCRIPTION	PRICE
CH-NC20701	Case/4 (1 gallon)	\$272.00
CH-NC20705	Each (5 Gallon)	\$284.00

GLB SUPER SEQUA-SOL

No pool should be started up without first "sequestering" the metals in the pool. After each drain-and-fill, Super Sequa-Sol should be added to avoid metal staining.

Super Sequa-Sol should also be added on a routine basis as fresh water is being introduced to the pool.

Super Sequa-Sol is not affected by high chlorine levels and is your best insurance against staining.

CODE	DESCRIPTION	PRICE
CH-GLBSS	Case/12 (2lb)	\$392.00

NATURAL CHEMISTRY STAINFREE

StainFree is an ascorbic acid product, similar to everyday Vitamin C. It is ideal for treating stains on all pool surfaces. A safe and people friendly alternative to harsh chemicals typically used to treat stains.

CODE	DESCRIPTION	PRICE
CH-NC07390	Case/12 (1.75 lb.)	\$434.00

SPECIALTY CHEMICALS

FILTER CLEANERS

GLB FILTER CLEANSE

Have you ever wondered where all the lotion, oils and Coppertone end up? Some of this sticks to your pool tiles but most ends up inside your filter bed. Yuck! What's even worse is that backwashing doesn't remove these oils. Double Yuck!

In short order, your sand or DE filter becomes a grease-trap rather than a filter. Once or twice a year you need to "de-grease" the filter using GLB Filter Cleanse. It's not hard to do, and you will be impressed by the improved flow rates and water clarity.

CODE	DESCRIPTION	PRICE
CH-GLFC	GLB Filter Cleanse - Case/12 (2lb)	\$260.00

PRO SERIES

PRO SERIES Filter Cleaner is a highly concentrated deep cleaning solution that removes buildup caused by: oils, grease, non-living organics and more on filters. It is very effective on cartridge elements, D.E. filter grids, sand filters and regenerative media filters.

CODE	DESCRIPTION	PRICE
CH-NC203201	Filter Cleaner - Case/4 (1 gal)	\$236.00

PRO SERIES PIPE PURGE

PRO SERIES Pipe Purge attacks the root cause of most pool maintenance problems, the buildup of non-living organic waste contamination. Unlike filter cleaners, Pipe Purge cleans the entire circulation system. Contaminants like oils, lotions, sunscreen, cosmetics, and hair products, are the underlying root cause of many pool issues. High non-living organic loads can cause cloudy water, hard to maintain water chemistry, clogged filters, foaming and nasty waterline rings are a thing of the past.

CODE	DESCRIPTION	PRICE
CH-NC03125	Pipe Purge case /4 (1 gal)	\$175.00

CHEM-CLEAN EXPRESS

Chem-Clean Express – a fast-acting, non-toxic, environmentally safe cleaning agent approved for use on all sand and regen filters.

CODE	DESCRIPTION	PRICE
CH-NB-13250	Chem Clean Express - 25 lb. pail	\$225.00

SPECIALTY CHEMICALS

ACCESSORY CHEMICALS

NATURAL CHEMISTRY PHOSREMOVE

Reducing phosphate levels in swimming pools is easy with Natural Chemistry's PhosRemove. This product is formulated from lanthanum (rare earth compounds). PhosRemove effectively and efficiently removes phosphates and reduces pool problems!.

CODE	DESCRIPTION	PRICE
CH-NC20501	Case/4 (1 gallon)	\$350.00

POOL FIRST AID

When a quick clean up is needed! Pool First Aid combines powerful concentrated enzymes with an organic clarifier that is ideal for big clean ups. Gets rid of scum-lines, waterline ring, cloudy water, clogged filters and chemical odors with no scrubbing.

CODE	DESCRIPTION	PRICE
CH-NCPFA	Case/6 (1litre)	\$153.75

ALGIMYCIN 2000

You went on vacation and Bob forgot to add the chlorine! Now you've got a garden growing on the bottom of the pool. Time to use Algimycin.

This product is concentrated (not 80% water and 20% product), so you know it's strong. GLB Algimycin works on all kinds of algae including black, green, mustard and yellow.

Algimycin will not stain or foam up and does not irritate your skin.

Use Algimycin every couple of weeks as a preventative maintenance program. Also, works great as an end-of-year treatment on outdoor pools.

CODE	DESCRIPTION	PRICE
CH-GLA2000	GLB Algimycin 2000 - Case/12 (1qt)	\$385.00

NATURAL CHEMISTRY SPA DEFOAMER PLUS

Climb in the spa, fire up the jets and watch the foam flotilla surround you and then cling to your skin. Yuck! That foam is the body oils that haven't yet been trapped in the filter.

Foam Out is a fast acting, concentrated solution that can be used to eliminate existing foam or as a part of your preventative maintenance program.

CODE	DESCRIPTION	PRICE
CH-NC04212	Spa DeFoamer Plus- Case/12 (33.9 oz.)	\$166.00

Our sister company, **O'Neill and Sons, Inc.**, was founded specifically to meet the demand for timely and professional sales and repair services for automatic pool cleaners - or what we like to call "robots." This operation allows the staff of **O'Neill and Sons, Inc.** to focus 100% on your robot to get him or her (people love to name them!) back to you as soon as possible. Honestly who wants to vacuum their pool by hand?

We are a factory authorized service center for Maytronics, Dolphin, Aquaproducts and Aquatron lines of vacuum cleaners. In our warehouse we stock an extensive supply of parts for these robots - so much that we can build most of them from scratch. An ample supply of parts, coupled with knowledgeable service personnel virtually guarantees a very quick turnaround.

In addition to servicing units, our firm has an extensive inventory of new robots for sale. We stock not only the most popular commercial units - we also stock and sell a line-up of residential units. So if you happen to have a back yard pool and need a robot - give us a call.

**O'Neill and Sons, Inc.** • Devin F. O'Neill • Phone: (610) 269-6712, Fax: (610) 269-2068 • [ONeillAndSons@gmail.com](mailto:ONeillAndSons@gmail.com)

ADA ACCESS

For close to two decades, If It's Water has been recognized as one of the leading authorities on assisted access lifts for pools and spas. In this time we've installed hundreds of lifts. Most of these installations have been straight-forward, but some were a little tricky. Regardless of the type of pool or spa you have, we have a lift that will suit your needs.

Our staff has received extensive training on our entire ADA product line as well as the law and its requirements. You'll have the assurance of full compliance with unmatched product and service.

Not all pools are created equal and the needs of your patrons can be very diverse. That's why it's important to purchase an assisted access lift from us. Our staff can make a site visit to determine the best lift for your pool's dimensions while still meeting the needs of your clients.

If It's Water offers installation services for all of our assisted access products.

BATTERY POWERED LIFTS MOTION TREK SERIES

Our Motion Trek lifts are designed from the ground up to perform and are an ideal solution for facilities needing to comply with ADA regulations.

Each lift has a 350 lb capacity and is powered by a low voltage battery (charger included). The battery averages 90 uses between charges.

Both lifts use the 2-3/8" anchor and can accommodate an anchor setback ranging from 6" to 22" from the pool wall.

While the "super-structure" of both lifts is identical, the Deluxe model provides an upgraded footrest and headrest.

SWIM LIFT TRAVELER BP500

The most versatile lift on the market today. The 500 pound capacity has no equal and the optional attachments make the Traveler the #1 choice for facilities that demand the best.

The Traveler is designed for use on in-ground and above ground pools and spas.

The Traveler uses a standard 1.90" OD anchor (sold separately) and can accommodate an anchor setback ranging from 6" to 33" from the pool wall. Longer setbacks are available - call for details. The Traveler also has the ability to lift "up and over" raised walls.

## ADA ACCESS

### ADA COMPLIANT POOL STAIRS

The ideal solution for secondary access on pools greater than 300 linear feet.

The Aquatrek stair case meets all requirements of the ADA and can be easily adapted to virtually any pool.

Available in 4, 5, 6 or 7 tread (step) models. This unit is built for heavyweight durability but maintains lightweight portability. The reinforced siderails provide strength and stability for use in a commercial pool. Each tread comes with a nonslip safety surface in two colors, yellow and black. The AquaTrek Ladder can be easily removed for swim meets or other programming.

PART #	DESCRIPTION	PRICE
SL-ADA-4000	ADA Compliant AquaTrek 4-Tread Ladder	\$4,420.00
SL-ADA-5000	ADA Compliant AquaTrek 5-Tread Ladder	\$4,700.00
SL-ADA-5600	ADA Compliant AquaTrek 6-Tread Ladder	\$4,985.00
SLA-ADA-5700	ADA Compliant AquaTrek 7-Tread Ladder	\$5,270.00

### BOZEMAN THERAPY STAIRS -

The Bozeman Therapy Steps provide swimming pool access for physically challenged individuals. These units are custom designed to ensure proper fit in your swimming pool. The frame assembly is fabricated from 1.50-inch x 0.120-inch wall thickness, 316L-stainless steel. Step treads are non-slip Duradeck.

Because of its heavy duty design the Bozeman will last for years to come and we consider it to be a permanent solution for assisted access.

CODE	DESCRIPTION	PRICE
SL-57920	Bozeman 3-Step Unit	\$5,235.00
SL-57921	Bozeman 4-Step Unit	\$6,627.00
SL-57922	Bozeman 5-Step Unit	\$7,289.00
SL-57923	Bozeman 6-Step Unit	\$7,953.00

### AQUATREK WHEELCHAIR

Uniquely designed for aquatic use, the AquaTrek Wheel Chair can be used in and around swimming pools, spas and showers. The standard wheel chair comes equipped with a swing arm, moveable footrest and stainless

steel handrims on the rear wheels. Additional options include the seat belt and the shoulder harness, which are available upon request. Constructed from furniture grade PVC and the finest stainless steel fasteners, the wheel chair is both durable and noncorrosive. The AquaTrek Wheel Chair is totally submersible.

CODE	DESCRIPTION	PRICE
SL-AQ350WC	AquaTrek Wheelchair	\$1,675.00

## COMPETITION

For nearly 20 years If It's Water has been providing "turnkey" starting platform solutions for our clients. We have completed projects for dozens of aquatic facilities where we partnered with the client and worked with them from initial design to final installation. There is no other firm that can match our service and product offerings – nor our track record of success. Our goal, regardless if you are a small swim club or a NCAA powerhouse, is to make the process as easy as possible.

Our relationship with all of the leading manufacturers ensures that we have a platform to fit your needs and budget, but more importantly, that your project is going to receive the attention-to-detail it deserves.

## A LOOK AT A FEW OF OUR TOP SELLING MODELS.

## PARAGON QUICKSET

- Each Paragon top is made from solid sheet of 1-1/4" high density (UV Inhibited) polypropylene with a patented, cross-grooved, non-skid, white sand finish.
- Track Start size (24" x 32") Standard size (24" x 20") also available.
- Cross groove pattern enhances drainage and is crucial to a solid start.
- Dual-Wedge Tool-Less Clamping Anchors creates a simple, zero-movement installation.
- Each pedestal is a single weldment of high-grade Certified T304L stainless steel, polished and buffed to a consistent, high-quality finish.
- Track Start Plus+ Adjustable Backplate Kit Quickly adjusts to 5 numbered set-points using the spring-loaded indent pins.
- Available with custom logo on the top and/or backplate, color options for the top, side step or backplate and powder coating are all available.

## SR SMITH LEGACY

- High-impact footboards with laminated cores reinforced with fiberglass in a gelcoat skin with a non-slip tread
- The 2.5" square, 304 stainless steel tubing is powder-coated for added corrosion resistance
- Choose from 4 different backstroke handle designs
- Patented RockSolid anchoring system
- Field upgradable to accept starting platform side handles.
- Side mount or rear mount access step.

## COMPETITION

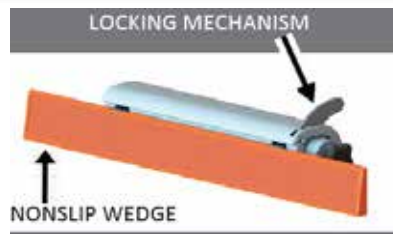

## SPECTRUM AQUATICS XCELLERATOR

- Large 32" x 24" stainless steel top sloped at a 10° angle for optimal starting stances
- Covered in a superior non-slip material
- Easy-to-adjust track start footrest attachment with 12 setting options to accommodate all heights and levels of flexibility
- Uses single post anchor with patented anti-wobble design allowing for easy removal
- Side handles included to enhance speed and quick takeoffs
- Non-slip side access step
- Backstroke handles with versatile 18" H bar
- Stainless steel construction
- Available in black, with upgrade of custom colors and logos available.
- Powder coating options available.

## BACKSTROKE START DEVICE

- Backstroke swimmers routinely risk a slip start when pushing off a pool wall or slippery touchpad. The backstroke start device (patent pending) from Spectrum Aquatics is designed to reduce slipping.
- Features a 65cm x 8cm (25.6" x 3.1") nonslip wedge with a 10° angle to secure foot placement along pool wall
- Easily adjustable and locks into place, allowing swimmers to select desired location of the nonslip wedge along the pool wall
- Automatically retracts up and out of the water so as not to interfere with flip turns and touchpad interactions, eliminating the need for manual removal
- Compatible with nearly all block types and pool configurations - it can be strapped around a starting platform for easy set up
- Custom attachment options are also available
- Our sales team can help determine the best mounting option for your pool

We ensure that your platform will meet FINA, NCAA, NFSHSA, USMS, USAS rules and regulations.

RACING LANES

AntiWave Racing Lanes have been used in multiple Olympics and selected by universities and clubs throughout the world. AntiWave's racing lanes use hydromatic propulsion to disperse the waves along the lane line then down to stop all momentum, creating perfectly tranquil water. The unique lane and disc design provide advanced wave quelling technology while having a sporty and savvy appearance. Not only will our lanes improve swimming performance in your pool, but they will also elevate your facilities appearance.

Available in 4.75" and 6" diameter, Antiwave Racing Lanes ship with the easy-to-adjust Supertensioner, the original turnbuckle tensioning device on the market.

Below is our standard Color Chart. Custom colors are available. Call us for details.

CODE	DESCRIPTION	PRICE
AW-55850	6" Maximum — 60' Line (assembled)	\$515.00
AW-55855	6" Maximum — 75' Line (assembled)	\$580.00
AW-55860	6" Maximum — 25 Meter Line (assembled)	\$615.00
AW-55865	6" Maximum — 50 Meter Line (assembled)	\$1,085.00

CODE	DESCRIPTION	PRICE
AW-55810	4" ForeRunner — 60' Line (assembled)	\$385.00
AW-55815	4" ForeRunner — 75' Line (assembled)	\$430.00
AW-55820	4" ForeRunner — 25 Meter Line (assembled)	\$480.00
AW-55830	4" ForeRunner — 50 Meter Line (assembled)	\$880.00

The "Supertensioner" is unique to AntiWave but can be used on any other racing lane as well. From its ease of use to its simple yet rugged design, the Supertensioner is a state-of-the-art solution to the age-old hassles associated with the traditional drum and ratchet systems.

CODE	DESCRIPTION	PRICE
AW-55670	Supertensioner (Specify Color)	\$105.00

COMPETITION

THE ULTIMATE STORAGE REEL

The "Ultimate" Storage Reel is the ideal piece of equipment for storing your lanes when they are not in use. When considering storage factors, the "Ultimate" passes the grade: it is lightweight, easy to use and easy to move. Best of all, it is among the largest-capacity reels on the market and is unquestionably the most reasonably priced. The Ultimate Reel will hold up to 8 - 75-foot "ForeRunner" lanes or 5 - 75-foot "Maximum" lanes.

CODE	DESCRIPTION	PRICE
AW-615	The Ultimate Storage Reel	\$1,725.00
AW-616	Mesh Cover for Storage Reel	\$159.00

PARAGON AQUATICS LANE LINE STORAGE REEL

**Large Capacity Model**

## RAILS AND LADDERS

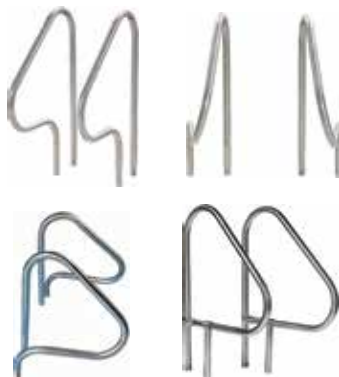

### EXERCISE RAILS

Exercise Rails may be used as wall rails for additional stability for persons entering pools, showers, locker rooms, hallways and ramps. They may also help in aiding the therapist or client by providing wall mounted support for warming and stretching exercises, as well as wall mounted in the pool for hydrotherapy sessions. Mounted with lag bolt and shield to maintain a 1-1/2" clear opening between rail and wall. 1.90" O.D. x .065" wall thickness. Heavier gauges and O.D.'s available upon request.

### LADDER GRAB RAILS

Our extensive line-up of grab rails from the leading manufacturers guarantees we've got a product to meet your needs and budget. Give us a call at 610-269-2062 and we'll be happy to assist you in selecting the best product for your facility.

### LADDERS

Thousands of ladder variations are available (i.e.: outside diameter, wall thickness, setback, # of ladder treads, etc...) from the leading manufacturers.

Give us a call at and we'll be happy to assist you in selecting the best ladder.

### LADDER PARTS

#### REPLACEMENT PARTS FOR SPECTRUM LADDERS

FUN AND GAMES

POOL CLIMBING WALLS

**Climb, Splash, Repeat.**

What's more fun than the challenge of pushing yourself to climb to the top of a wall... the rewarding splash back down into the pool afterwards!

Kersplash pool climbing walls are made by the experts. A team of climbers and aquatics professionals have put together this top-of-the line product. Made with 100% stainless steel, Kersplash was designed to outlast in harsh indoor and outdoor aquatic settings. The stainless steel is passivated and coated with Spectra-Shield and the sturdy panels and hand holds are UV treated.

Kersplash brings together two great sports, swimming and climbing. Both climbing and swimming increase fitness levels through development of strength, coordination, cardiovascular endurance and muscle endurance. Kersplash also provides participants with positive risk taking and creative problem solving.

**BUT, best of all, it's a SPLASH!**

Check out our two wall types, Crystal Clear and Color

VOLLEYBALL

The Swim N' Spike™ Volleyball game is made with commercial grade, 1.90" diameter stainless steel posts and a competition quality net. This exciting sport game is recommended for the shallow area of the pool. Each game includes posts, anchors, a competitive water volleyball, a needle and our high-quality net.

CODE	DESCRIPTION	PRICE
SRS-VOLYC32	For 32' to 40' wide pools	\$690.00
SRS-VOLYC42	For 42' to 50' wide pools	\$772.00
SRS-VOLYC52	For 52' to 60' wide pools	\$850.00

BASKETBALL

Our basketball hoops have a regulation-size, stainless steel frame designed to fit into Paragon's Quickset anchors. The unit can be installed using new anchors, included with the purchase of the hoop, or it can be used in existing starting platform anchors. Easily removed from anchors without tools for storage or location change.

The backboard is constructed of 1/2" thick clear acrylic which helps eliminate blind spots in the pool.

Order one of our 6 standard sizes or if you require a special configuration, provide the Rim Height and Anchor Setback dimensions to have one custom-built to fit your existing anchors and pool profile.

CODE	DESCRIPTION	PRICE
PGN-2700#	Basketball w/ Anchor	\$1,733.00

ANCHORS / IMBEDS

DECK ANCHORS FOR 1.9" OD RAILS

1.9" BRONZE WEDGE

Bronze wedge anchor for 1.9" OD tubing intended for commercial use. Anchor comes complete with wedge assembly and bonding screw.

ANC-100B \$25.00

1.9" ROUND ESCUTCHEON PLATE

Stainless steel "round" style escutcheon plate for 1.9" OD rails.

ANC-100F \$7.00

1.9" KEYHOLE ESCUTCHEON PLATE

Stainless Steel "keyhole" style escutcheon plate for 1.9" OD rails.

ANC-100F \$7.00

CUP ANCHORS

The Stainless Steel Cup Anchor is ideal for securing racing lines and safety ropes. This cup anchor is intended for installation into concrete and gunite pools and includes a bonding screw.

ANC-58316 \$173.00

Fitting consists of a round, chrome plated cast brass anchor cup and threaded chrome plated brass eyebolt which screws directly into the anchor cup. The anchor cup is 3.25" in diameter.

ANC-58280 \$59.00

DECK ANCHORS FOR 1.5" OD RAILS

1.5" COMPRESSION ANCHOR

This 1.5" escutcheon-less composite compression anchor offers a 6" depth. This design virtually eliminates "wobble" normally associated with bronze wedge anchors.

ANC-24094 \$80.00

Cap for 1.5" OD anchor.

Stainless Steel Wedge Anchor for 1.50" O.D. railings. Body is 6" deep and is 304L cast stainless steel, wedge is cast bronze and hardware is 304L stainless steel

ANC-24090 \$56.00

1.5" BRONZE WEDGE ANCHOR

Bronze wedge anchor for 1.5" OD tubing intended for commercial use. Anchor comes complete with wedge assembly and bonding screw.

ANC-200B \$30.00

1.5" ROUND ESCUTCHEON PLATE

Stainless Steel Escutcheon plate for 1.5" OD rails.

ANC-200F \$7.00

## FIRST AID AND RESCUE

## FIRST AID

## FIRST AID KIT

Meets many state codes. Includes all necessities such as adhesive strips, tape, first-aid cream, gauze, compresses, gloves, iodine swabs, insect sting swabs, ice packs, absorbent compress, eye dressing, etc.

FR-71530	24 Unit First Aid Kit	\$45.00
FR-71540	36 Unit First Aid Kit	\$65.00

## CPR MASK

Packaged in a compact, hard shell, pocket-sized carrying case and features a patented one-way valve with filter. Prevents mouth-to-mouth contact with victim's face. Leak-proof seal, re-inflated contoured soft vinyl cuff shapes easily to adult, child and infant facial contours. Transparent dome allows rescuer to check victim's mouth for lip color and secretions. Mask is ready to use with no need to assemble valve and filter, saving valuable time in emergencies.

FR-71781	CPR Mask	\$9.00
----------	----------	--------

## BLOOD BORNE KIT

Blood borne kits are mandated by many state agencies and are a must around a pool area. Attempting to remove blood from the pool deck using a hose is not effective. Our kits come with fluid solidifying powder, bio-scoop with detachable scraper, biohazard bag with tie, germicidal cloth, medical grade gloves, BZK towelette, trash bag with tie, and paper towels all in a sealed pouch.

FR-71775	Blood Borne Kit	\$9.00
----------	-----------------	--------

## RESCUE

## RESCUE TUBES

All of our rescue tubes are made of the highest quality closed cell foam to resist erosion. They are individually hand dipped three times instead of the customary two to ensure proper adhering of the vinyl coating and extend the useful life of the equipment dramatically. Our shoulder adjustable strap and tow line consists of durable nylon webbing and runs through the entire tube. The tubes include standard printing of GUARD in white.

FR-72000	40" Rescue Tube	\$42.00
FR-72050	50" Rescue Tube	\$48.00

## RING BUOYS

24" U.S. Coast Guard approved. Nylon vinyl skin, urethane foam core and easy-to-change rope, looped and secured inside molded core. Resistant to rot or mildew, rope stays in place and stands out for easy in-the water grasp.

FR-72310	24" White Ring Buoy	\$72.00
FR-72315	24" Orange Ring Buoy	\$72.00

## THROW ROPE

Made from heavy duty 1/4" polypropylene floating line with a "lemon foot" attached to hold the line with your foot after throwing. Standard 60' length.

FR-72360	Throw Rope	\$21.00
----------	------------	---------

FIRST AID AND RESCUE

RESCUE BLANKET

Machine washable, grey, soft, non-woven, 30% wool and 70% cotton, acrylic & polyester blend. Excellent insulation for injured patients or victims in shock. 60" x 84"

FR-71810	Rescue Blanket	\$18.00
----------	----------------	---------

LIFE HOOK

Features rugged double crook design and is made of anodized aluminum and can be used for any type of water rescue. Comes with either 8-foot or 16-foot unbreakable fiberglass pole.

FR-70120	Life Hook Only	\$23.00
FR-70080	Life Hook w/ 8-foot Pole	\$79.00
FR-70100	Life Hook w/ 16-foot Pole	\$132.00
CM-R221036	Pole hangers, ABS with screws, Set of 2	\$6.00

SPINE BOARD

Our AB spineboard is the most popular board. Economical yet strong. The shell of the board is heavy duty and is x-ray translucent. The board comes with 21 handholds. Boards come with 8 pins for your strapping needs. Board is waterproof and excellent for water rescue. The weight capacity of this board is 400lbs. Made of polyethylene.

FR-71010	Spine Board	\$175.00
----------	-------------	----------

SPINE BOARD STRAPS

Securing and restraining straps made of durable nylon webbing for fast, firm immobilization. For use with basket stretchers, spinal backboards and stretchers. 72"L x 2" W.

FR-71011	Spine Board Straps (Each)	\$8.00
----------	---------------------------	--------

HEAD IMMOBILIZER

Featuring Velcro straps, two foam pads, removable base plate, chin and head straps. Users will find this head immobilizer very user friendly and it will fit virtually any backboard.

FR-71590	Head Immobilizer	\$90.00
----------	------------------	---------

SPINEBOARD MOUNTING BRACKET

This mounting bracket fits virtually all spineboards and mounts easily to the wall with the provided screws. Use of this bracket ensures that your spineboard will avoid damage from the ground."

FR-71012	Mounting Bracket	\$58.00
----------	------------------	---------

HEAVY DUTY THERMOMETER

Chrome brass thermometer, blown glass tube secured in brass tubing, 3 ft. cord.

FR-37220	Heavy Duty Thermometer	\$20.70
----------	------------------------	---------

## FIRST AID AND RESCUE

## CHEMICAL HANDLING

## EYE WASH STATION

Designed for locations without accessible plumbing, this eyewash station can retrofit into any mechanical room or chemical storage area. Comes with double back tape and screws for installation. Stations are designed with a quick pull-out bottle for fast and easy access.

FR-71592	32 oz. Eye Wash	\$30.00
FR-71592R	32 oz. Refill Bottle	\$12.00

## VINYL APRON

Heavy-duty 20-mil vinyl apron provides long service and excellent protection against chemicals and punctures

FR-93210	Apron	\$18.95
----------	-------	---------

## PVC GLOVES

Vinyl Coated PVC Gloves provides the best protection against chemicals.

FR-93230	PVC Gloves	\$11.00
----------	------------	---------

## SPLASH GOGGLE

This goggle has a heavy duty vinyl body which offers a comfortable fit without sacrificing safety concerns

FR-91210	Splash Goggle	\$8.00
----------	---------------	--------

## RESPIRATOR

Comfo Classic Half-Facepiece Soft seal for comfort and pliability.  
Cradle-style headband

FR-91060	Respirator	\$30.00
FR-91070	Replacement Cart. (2/pack)	\$35.00

## FACE SHIELD

Headgear and full face shield, Black Frame with clear ABS visor, Visor dimensions are 16-1/2" high x 8" wide.

FR-91230	Face Shield	\$32.00
----------	-------------	---------

## ROPES AND FLOATS

## SAFETY ROPE

This polypropylene rope has low flammability and has great resistance to sunlight. Lightweight and strong with many uses. It is waterproof, rot resistant, and floats. Resists bending and flexing and has great knot-holding properties. Available in 1/2-inch and 3/4-inch sizes. Rope is sold by the foot.

FR-57110	1/2" Blue/White Rope(per foot)	\$0.50
FR-57115	1/2" Red/White Rope(per foot)	\$0.50
FR-57150	3/4" Blue/White Rope(per foot)	\$0.80
FR-57152	3/4" Red/White Rope(per foot)	\$0.80

SAFETY

HANDI-LOCK FLOATS

Made of linear polyethylene treated with chlorine inhibitors and ultraviolet stabilizers for durability and long life. These floats have a self locking feature that fixes the float on the rope without float keepers. Accommodates 1/2-inch, and 3/4-inch polypropylene rope.

FR-57204	5-inch x 9-inch Red/White/Red for 1/2-inch	\$9.50
FR-57206	5-inch x 9-inch Blue/White/Blue for 1/2-inch	\$9.50
FR-57208	5-inch x 9-inch Red/White/Red for 3/4-inch	\$12.00
FR-57210	5-inch x 9-inch Blue/White/Blue for 3/4-inch	\$12.00

CHROME PLATED BRONZE ROPE HOOK ENDS

FR-58030	CPB End for 1/2-inch Rope	\$13.00
FR-58040	CPB End for 3/4-inch Rope	\$14.00

## PUMPS AND STRAINERS

## INTELLIFLOW PUMP

IntelliFlo Variable Speed pump is the most energy-efficient pump ever, with over 10 years of proven in-field reliability. IntelliFlo Variable Speed pumps combine variable drive technology, onboard digital intelligence, and permanent magnet motors (used in hybrid cars) to reduce pump related energy costs by up to 90%. The IntelliFlo has the ability to program exact pump speeds for specific operations – filtering, heating, cleaning, spa jets, water features and more.

## WHISPERFLOXF VS COMMERCIAL PUMP

The WhisperFloXF VS Commercial Pump is the first five-horsepower variable-speed pool pump that runs on single-phase or three-phase power. It's an economical, combined motor/drive solution for both HMAC (hotel, motel, apartment, condominium) or large residential installations. The WhisperFloXF VS Commercial Pump provides sophisticated, energy-saving pump technology without the high costs typically associated with independent pump/external drive setups.

**Call for sizing and pricing.**

## PENTAIR "EQ" SERIES

EQ Series commercial pumps are designed for maximum efficiency and quiet operation in every detail. They are the only non-corrosive, all plastic pumps designed exclusively for the commercial pool and water applications market. EQ Series impellers are manufactured for true breakthrough performance, allowing for lower loads and longer motor life.

**Call for sizing and pricing.**

## GRISWOLD FLOODED SUCTION PUMPS

Griswold Pumps are used in all areas of the recreational water industry including pools, waterparks, fountains, aquariums and zoos. Upsized suction and discharge connection eliminate reducer fittings, all tri-voltage motors, safely packaged for transport make them even more attractive. Great sizing, efficiency and pricing. Straight centrifugal pumps from 3HP - 75HP. NSF Listed.

**Call for sizing and pricing.**

## PUMP BASE

**The perfect adjustable pump base replaces costly (and time consuming) concrete pads**

The 8-gauge stainless steel construction has a durable powder coated finish, providing an extra layer of corrosion protection. Stainless steel motor mounting hardware is included along with a rubber vibration isolator. Stainless steel concrete anchors for floor mounting are included as well. Allows for easy removal of motor for repair or replacement.

- Available for most motor mounting frames from 2HP to 75HP
- Two sizes of adjustment range available; 7"-11" and 12"- 24"

## PUMPS AND STRAINERS

## HAIR AND LINT STRAINER

Constructed of heavy-duty stainless steel or fiberglass, our hair and lint strainers include all the features and benefits requested by experienced pool operators: heavy duty construction, 1" thick transparent acrylic lid, easy opening securing assemblies, full face 1/8" thick sealing gasket, drain, auxiliary gauge connection, stainless steel basket and compact dimensions with flanged fittings as required, highlight the product perfectly suited for every pool. Available in standard sizes from 3"-16" and reducing strainers are available in sizes from 4" - 14".

Additionally, we can provide you with replacement parts for our strainers (and other national brands) including securing knobs, gaskets, baskets and lids.

**Give Us a Call**

## THE PRO STRAINER

**The ProStrainer system provides an excellent solution for high flow, high capacity pre-strainer applications requiring filtration down to an 1/8" particle size.**

ProStrainer is the first and only dual basket high capacity pump strainer, flow straightener, and air evacuator in one product, with patented Horizontal Laminar Flow (HLF) Technology. Our standard series comes in all flange sizes. Our reducing series allows for a flange size to match the pump.

The ProStrainer system offers many features including:

- All stainless-steel system components (excluding see-through portion of lid)
- Smallest industry footprint
- Open area ratios beat competitors by 400%
- Clog free by-pass design
- Easy to maintain
- Promotes highest industry NPSH for improved pump performance
- Multiple flow paths reduce chances for major flow blockage by large debris
- Adjustable draw latch lid clamping system
- See-through lid provides easy inspection
- Integrated mounting system built into design
- Various strainer screen openings available - 1/4" standard

VARIABLE FREQUENCY DRIVES

VARIABLE FREQUENCY DRIVE

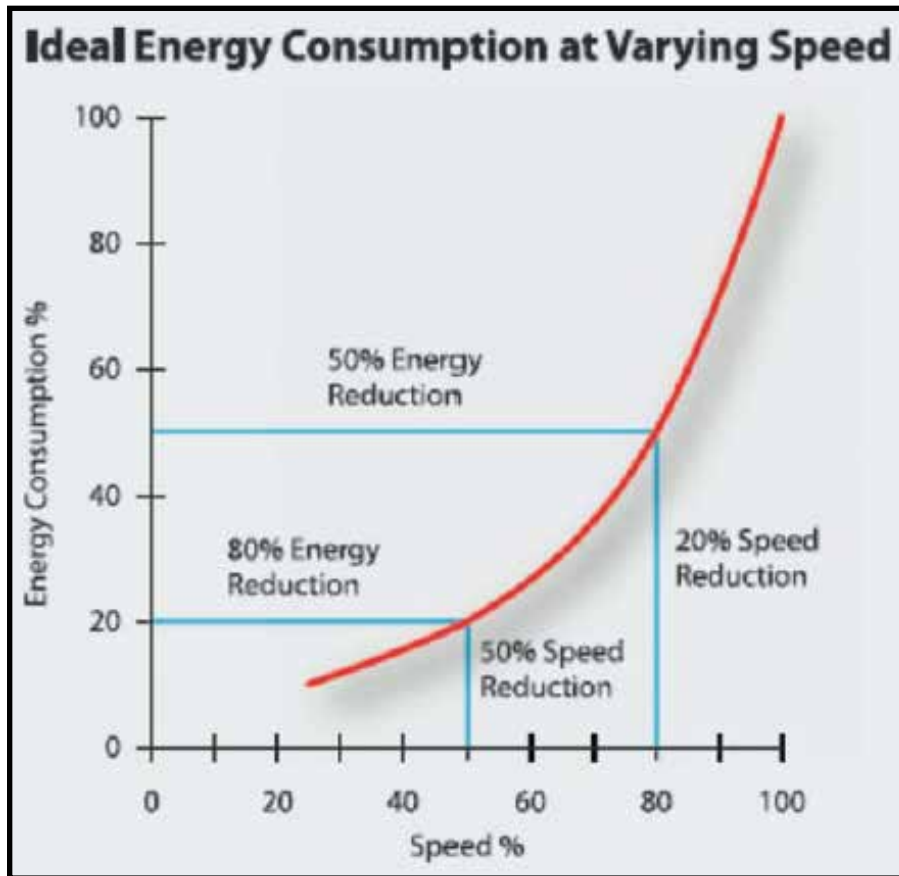

Single-speed drives start motors abruptly, subjecting the motor to high torque and current surges up to 10 times the full-load current. Variable frequency drives offer a soft start, gradually ramping up a motor to operating speed. The variable frequency lessens mechanical and electrical stress on the motors and can reduce maintenance and repair costs and extend the motor life.

Variable frequency drives also allow more control of processes with water distribution — facilities can consistently maintain desired flowrates by using automated controls.

Energy savings from variable-frequency drives can be significant. For example, with a centrifugal pump even a small reduction in motor speed can reduce a pump's energy use by as much as 50%.

**Call us today for a FREE energy audit.**

FLOW METERS

SADDLE MOUNT - F1000 SERIES

The carefully engineered Digi-Flo F-1000 series provides the performance and features of electronic meters without the electrical hookup. The F-1000RB is a battery powered meter requiring two standard "AAA" batteries which last about a year. Mounting directly to the pipe with the supplied saddle fitting the F-1000RB has an easy to read LCD display and comes factory calibrated - no programming is necessary.

SADDLE MOUNT WITH REMOTE DISPLAY - F2000 SERIES

Like the F-1000 series, the F-2000 series is a saddle mount digital flowmeter. The primary difference is the display head can be installed in an easy to read location because it's supplied with 25' of cable. An ideal solution for overhead pipes.

F300 SERIES

The F-300 series flowmeter is ideal for recirculation lines or backwash lines. Made of heavy duty machined acrylic with the flow scale permanently printed onto the body.

The F-300 Series is installed directly into horizontal piping and is supplied with two stainless steel clamps

F450 SERIES

The F-450 series flowmeter is a vertical inline flowmeter available in 3/4" size and is an ideal solution for measuring flow through tablet feeders. The polysulfone meter body contains a 316L stainless steel rod guided float with easy to read scale.

## FILTRATION

## SHFFG SERIES

Fiberglass filtration systems are both economical and long-lasting. Neptune Benson's vinylester resin construction maximizes strength and corrosion resistance against all chemicals including ozone. Like the steel filters, these custom designed systems come with a 15-year warranty.

The horizontal filter saddle base allows for stacking in filter rooms to optimize use of available space. Additionally, the deep sand bed design maximizes filter operating performances and backwash efficiency. Horizontal filters are also available in carbon steel or stainless steel construction.

**Contact If It's Water for a quotation on a horizontal filtration system designed to meet the needs of your facility.**

## ODYSSEY FILTER

Odyssey filters provide a flexible solution for projects with limited space. This includes renovations or retrofitted projects. With tank top facepiping and forward facing manway covers, Odyssey can fit into spaces traditional sand filters simply can't.

It also incorporates a clear manway cover to allow visibility into the tank and includes Neptune-Benson's automatic programmer to simplify the backwash process.

The Odyssey is also available up to 100 psi operating pressure.

**Contact If It's Water for a quotation on a Odyssey system designed to meet the needs of your facility.**

## DEFENDER REGENERATIVE MEDIA FILTER

The most revolutionary of Neptune-Benson's innovations has been the Defender™ Automatic Regenerative Media Filter. In a socio-economic climate promoting "green" building products and "sustainability", Defender™ is the earth-friendly solution for pristine pool water. Advantages include saving millions of gallons of water and waste; delivering superior pool water quality; saving on costly mechanical room space; and reducing health risks with safer media handling & disposal. From Australia to Dubai and across the US, aquatic professionals have selected and specified Defender™.

**Contact If It's Water for a quotation on a Defender system designed to meet the needs of your facility.**

**Superior Filtration**

**Decreased Backwashing = Water, Chemical and Fuel Savings**

**Space Savings = Decreased Footprint and Construction Costs**

FILTRATION

PENTAIR TRITON C SERIES COMMERCIAL FILTERS

Ideal for smaller pools and commercial spas. Triton C and C-3 sand filters are designed for high efficiency and easy maintenance in high capacity light commercial pool applications. A unique internal design levels the sand bed and produces an even water flow for the most efficient filtration possible.

The multi-diffuser system and slotted layer design gives the Triton C superior filtration capacity and flow for longer cycles between cleanings, which significantly reduces operating costs. Three-inch bulkheads (C-3 models) cut friction loss in half, and flanged connections don't require special adapters.

And the Triton C Series is engineered with single-piece tanks for superior strength, and made from the toughest materials available to withstand harsh chemicals and weather.

HARMSCO COMMERCIAL SERIES CARTRIDGE FILTERS

KEY FEATURES:

- T-316 Stainless Steel Construction.
- Epoxy coating available for salt water applications.
- NSF Certified for use in Pool or Spa/Hot Tub.
- Available in 7 different models with flow rates ranging from 63 gpm to 450 gpm.
- Multiple tanks can be installed in series for larger pools.
- No backwashing required. Ideal solution for high-rise pools or installations that have limited sanitary waste facilities.
- Requires very little space or footprint.

Harmsco Betterfilters provide sparkling clean water and save energy and space. Betterfilters are constructed of low carbon T-316 stainless steel, electro-chemically polished to deliver a ten-year, pro-rated warranty.

Harmsco filters install quickly and easily, require no costly waste disposal systems, and come ready for use with Harmsco's reusable SuperTuf/6 Polyester-plus cartridges for maximum operating performance and a long service life.

COVERS

PVC MAIN DRAINS

SuperSump™ eliminates the need for certification of field-formed sumps by a licensed design professional.

ASME-2007 and NSF LISTED, Lawson Aquatics® SuperSump™ now adds peace of mind and efficiency to its long list of benefits and

advantages. Our SuperSump™ with SuperFlow™ main drain grating are pre-certified which allows you to move forward with construction and avoid the unnecessary delay of field inspection and concrete sumps. Add to this the highest flow rate for maximum efficiency, it includes everything you need! Available in 9" x 9", 12" x 12" and 18" x 18".

**Call for Pricing**

STAINLESS STEEL MAIN DRAINS

Our made-to-order main drain and grate assemblies and suction niches help commercial swimming pool builders get each job done within budget and on time.

The stainless steel construction resists the extremely harsh conditions in swimming pools that can lead to chipping and crumbling in concrete main drains. Resistant to U.V. radiation and pool chemicals, our grate assemblies are skid-resistant Duragrid extruded glass fiber reinforced with other options available. An assortment of accessories, such as hydrostatic relief valves and collector tubes are available upon request.

**Call for Pricing**

THE VGB ACT (PART II) - MAIN DRAIN GRATES

Remember all the fuss and mayhem a few years back when all commercial pools and spas were required to replace their main drain grates with newly certified VGB grates?

Now some of you get to do it all over again.

Main drain grates exceeding their life expectancy rating must be replaced, per federal law.

**If you need product or help with replacement, give us a call.**

If It's Water has certified divers on staff who can install replacement main drain grates underwater -- without draining your pool!

LAWSON AQUATIC DRAIN COVERS

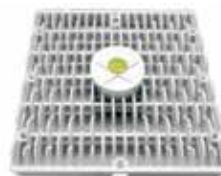

Only Lawson Aquatics, Inc. has SuperFlow — NSF LISTED and VGB-2008 certified unblockable main drain grates with a super flow rate and a unique top profile design that provides extreme comfort under foot. Easy to install and no special tools or complicated retrofitting required.

The domed SuperFlow main drain grating is unique since it has the capability to maintain a flow rate of 816 GPM, (18"x18"), 365 GPM, (12"x12") and 261 GPM ("9x9").

**Call for Pricing**

AQUASTAR DRAIN COVERS

The AquaStar series of drain covers can be installed on single or multiple-grate frames. Manufactured from superior UV-resistant engineered polymers and supplied with stainless steel hardware, they also feature the trademarked VGB compliance button which easily identifies VGB 2008 compliant cover from on deck and underwater.

All components (cover, frame, screws) meet or exceed NSF 50/ASME/ANSI A112.19.8a-2008 national standards and ASTM G154 UV testing exposure.

**Call for Pricing**

## PERIMETER GUTTER SYSTEMS

Both stainless steel and concrete continuous overflow gutter systems offer superior performance over traditional box skimmer design. The pool will be kept clean with constant skimming action over the entire pool surface as well as acting as a quell for wave action. Proper wave quell translates to a fast pool.

Either type of gutter must be designed properly and installed exactly to achieve the desired effect. The slightest defect in elevation can render either product worthless. The surge area in the gutter trough and even something as simple as the drag effect of the water transgressing through the gutter become a function of how well the gutter performs.

All things being equal (both gutters are designed properly and installed to exact tolerances) we will review the benefits of both systems.

### Construction

Concrete gutters are often difficult for commercial pool builders to bid in the North East part of the United States. The exacting concrete work required and the finish tiling discourages bids from some builders. On the other hand, stainless steel gutters are installed by factory welders with the experience to install to exact tolerances. Quite honestly the builder can build the pool an inch out of level with little or no consequence - the gutter installer will make the final product level.

Another benefit to a stainless gutter is that it can be installed in all types of weather (i.e. winter).

### Maintenance

Stainless steel can rust. Concrete can - and will - crack.

After time it may be necessary to clean the stainless gutter the same way the owner may clean the stainless handrails or starting blocks. This would require a cleaner and elbow grease. The concrete gutter would most likely have a tile finish throughout. The owner can expect the same cleaning procedure. Long term (10 -15 years) experience has shown that the tiling may require additional work. This could include grouting or tile replacement in areas. The latter can be time consuming and expensive. One recommendation we would make is for owners to consider the use of 316L stainless steel rather than the typical 304 stainless steel.

### Plumbing and Buried Pipe

The stainless steel gutter incorporates an integral supply chamber in the face of the gutter. This supply chamber is easily accessible if a repair is necessary. There is very little buried PVC pipe in a stainless system to be crushed or fall victim to "settling". The concrete gutter system requires extensive buried pipe work and shell penetrations. A typical 25-yard pool may require as many as 40 supply inlets throughout. A simple plumbing diagram would show hundreds of feet of buried pipe transgressing the pool. A leak or breach in any of this buried piping is certainly not accessible. While this is not common, anyone who ever experienced a broken line under the deck or pool shell can appreciate the severity of this problem.

## FEATURES

- Designed to handle recirculation rates for small pools and large pools up to 4,000 GPM.
- Constructed completely of 12 gauge T304L stainless steel. T316L also available)
- Pressure tube welding is completely accessible.
- Exclusive finished edge protects pool surface and conceals caulk joint.
- All face welds are recessed and reinforced with unique "V" notch design.
- Non-corrosive, strong pultruded fiber composite grating.
- Installed by manufacturer-approved mechanics.
- Provides continuous perimeter skimming for fastest evacuation of all surge waters.
- Includes desirable handhold for recreational and instructional swimming.
- Eliminates buried pressure piping from pool perimeter.
- Especially popular for therapy pools where still water is essential.
- Houses anchorage for lane lines and depth marker signage.
- Maximizes integrity of a completely level overflow lip to within 1/16".
- Structurally designed to withstand expansion/contraction caused by freeze/thaw cycle.
- Most durable to contend with diverse aquatic programming.
- Lengthy in field service history with minimal maintenance.
- Commonly used to rehabilitate deteriorated pool overflow systems.
- Many optional material and design considerations.

## SERVICE

Great!! You've made it to the end of our catalog. We produced this catalog for your convenience when purchasing equipment for your facility, but we wanted to use this page to illustrate our wide array of services.

If It's Water is not a catalog company. Since 1988 we have been - and will continue to be - a service oriented company. We just happen to have a catalog.

Throughout this catalog we've stated that we stand behind the products we sell. We also offer professional installation services for everything in this catalog. We are able to do that because our "sales force" is also our "service force". Every employee of If It's Water is factory trained and certified on every product we represent and all employees are cross-trained.

This is important to you because when you invest in equipment you need someone to help you out once in a while. Whether it be replacement parts, technical advice or an on-site repair, we've got you covered.

Doesn't matter if it's a \$300.00 chlorine pump or a \$30,000.00 UV system - you need back end support.

In addition to backing the products we sell — we also offer ancillary services that are not directly attributable to products. We wanted to make you aware of these services and encourage you to give us a call when the need arises.

- Acid Washes.
- Consulting Services (before, during and after construction).
- Sand Service / Media Exchange.
- Mechanical Room walk through and inspections.
- On-sight repairs.
- Bench services.
- Installation.
- Chemical Pump reconditioning.
- Vacuum Repairs through our sister company, **O'Neill and Sons, Inc.**,
- CPO Classes.
- Winter Cover installation.
- Training.
- And so much more!

 Check it Out!

ProStrainer – Tired of the daily cleaning of your strainer basket?

Check out our new ProStrainer on page 56.

The ProStrainer is a high capacity strainer with air evacuation. If you have a larger outdoor pool, this is a must have product.

Sentry UV – Our low-pressure Sentry UV line is a perfect fit for smaller pools and spas.

Protect your patrons against RWI's while delivering increased water and air quality.

Low cost initial investment, ease of installation, low maintenance costs and the support you expect from If It's Water delivers the protection you need.

Did you know that If It's Water stocks maintenance and safety equipment?

Skimmer nets, poles, brushes, rescue tubes, spineboards and so much more can be found in our Maintenance Equipment Section and our Safety Equipment section. We've selected products from the most reputable manufacturers and have negotiated deals to deliver the highest quality at a very good price.

**Check it out!**

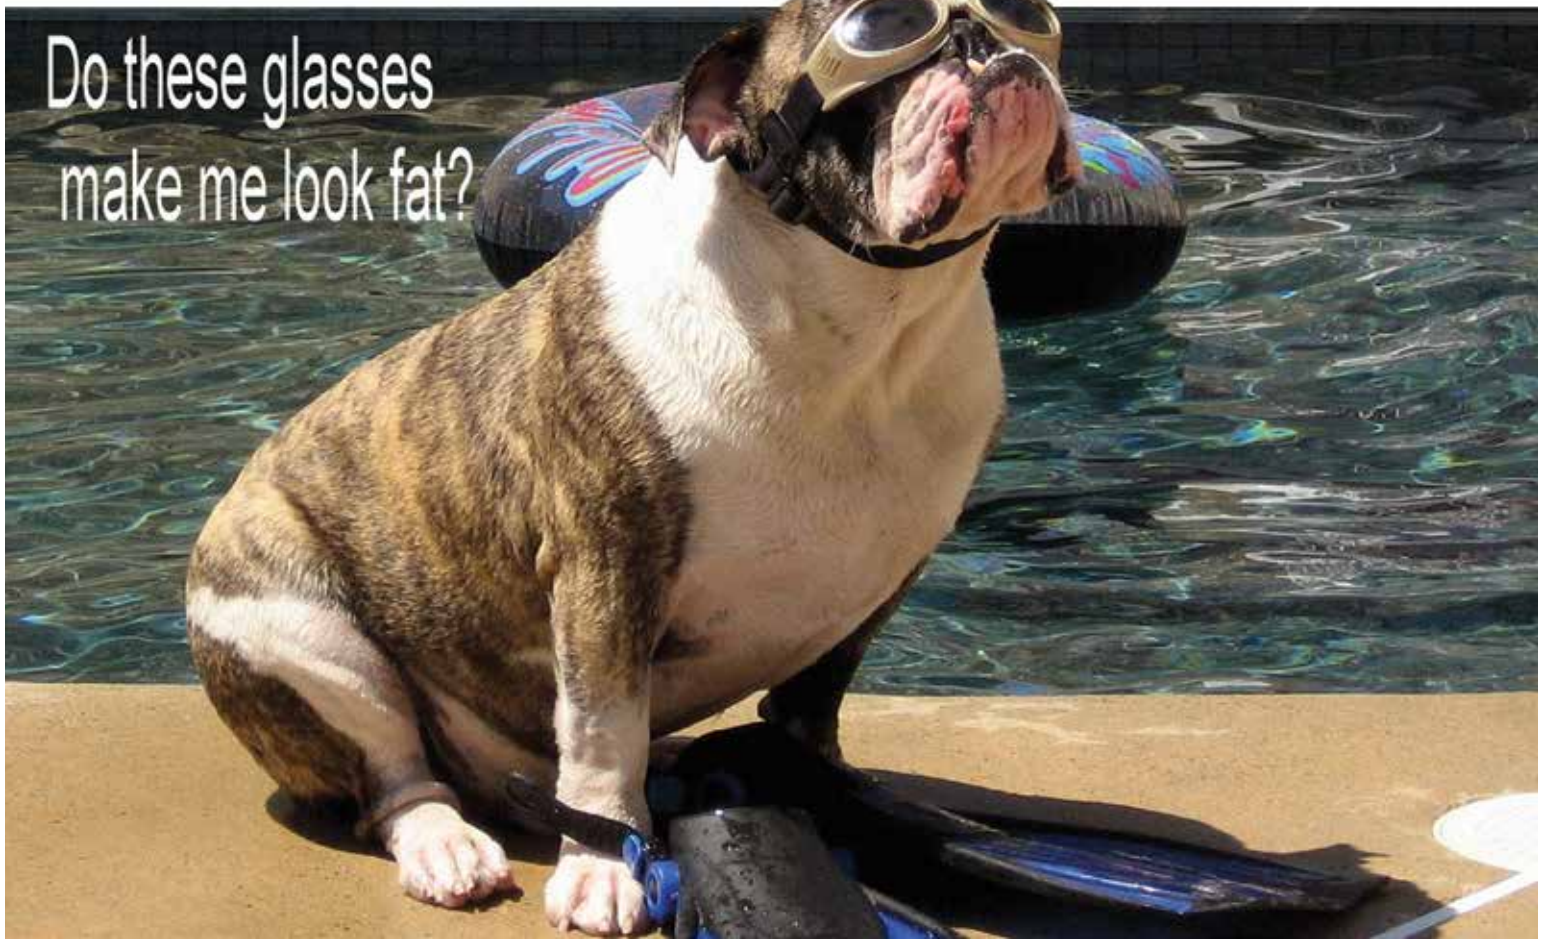

ADA Solutions. Aquatic Lifts and removable staircases are featured in our ADA section.

Check it out starting on page 37.

With over 20 years' experience, If It's Water is the leader for providing ADA solutions to aquatic facilities. We provide one-stop shopping to meet your needs.

## IF IT'S WATER, INC.

**Sales, Service, Supplies and Consulting  
for Commercial Water Applications**
