**igubal<sup>®</sup>**  
**Clevis Joint**

## Available Components

## Available Styles

E Series

### Clevis Joint

- Available in left- or right-hand thread
- High tensile strength
- Vibration dampening

GERI/GELI - inch  
Page 56.5

GERM/GELM - metric  
Page 56.6

E Series

### Clevis Joint with Clevis Pin and Clevis Clip

- Available in left- or right-hand thread
- Can be used in combination with Series E rod ends

GERIK/GELIK - inch

Page 56.7

GERMK/GELMK - metric  
Page 56.8

E Series

### Clevis Joint with Clevis Pin, Circlip and Rod End

- Available in left- or right-hand thread
- Universal corrosion resistance

GERMKE/GELMKE - metric

Page 56.9

E Series

### Clevis Joint with Spring Loaded Pin

- Available in left- or right-hand thread
- Easy assembly in hard to reach locations

GERMF/GELMF - metric

Page 56.10

E Series

### Clevis Joint with Spring Loaded Pin and Rod End

- Available in left- or right-hand thread
- Lightweight

GERMFE/GELMFE - metric

Page 56.11

K Series

### Spring Loaded Pin (as separate part)

### Clevis Pin (as separate part)

### Clevis Clip (as separate part)

- Easy to assemble
- Lightweight

GEFM - Spring loaded pin - metric  
Page 56.9

GBM - Clevis pin - metric

GSR - Clevis Clip - metric

# igubal® Spherical Bearings Clevis Joint Application Examples

## Typical industries and applications

- Food industry
- Heavy duty
- Packaging
- Automotive
- Disposal Engineering
- Automation, etc.

Both the housing material and the universal ball joint are made of materials that are safe in food environments

Packaging industry

A low-cost alternative to stainless steel: igubal® clevis joints combinations made of plastic

Pneumatic cylinder

## igubal® Spherical Bearings Clevis Joint

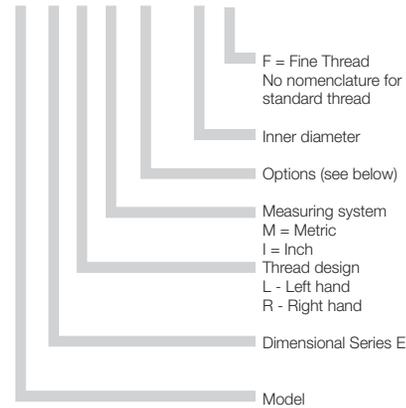

### Product Range

- Female threads
- Left hand and right hand threads
- Diameters from 4–20 mm
- With bold and clip or spring loaded pin
- Combination with dimensional Series E

### Part Number Structure

#### Part Number Structure

#### **G E R M K E - 12 F**

#### Options:

- K = with clevis pin and clip
- KE = with clevis pin, clip and rod end bearing
- F = with spring-loaded clasp pin
- FE = with spring-loaded clasp pin and rod end bearing

### Advantages

- Maintenance-free, dry running
- Self-lubricating
- High strength under impact loads
- Compensation for misalignment
- Compensation for edge loads
- Chemically resistant
- Vibration damping
- Suitable for rotating, oscillating and linear movements
- High radial loads
- Can be used in liquid media
- Space-saving design
- Easy to install
- Predictable lifetime
- Maintenance-free, lubrication-free

### General information

igubal® clevis joints are made of igumid G according to DIN 71752. The clevis joints are available in a variety of configurations. igubal® clevis joints can be used in difficult circumstances without any problems. The clevis joints are corrosion resistant in moist or wet environments and the sliding bearings are resistant to weak acids and alkalis. The operating temperatures range from -22°F to +176°F. igubal® clevis joints are made out of a high-wear resistant material which requires no lubrication.

### Loads

The load-bearing capacity of the maintenance-free, polymer clevis joints is very high at normal ambient temperatures. They absorb high forces, possess very good vibration dampening properties and yet weigh only a fifth of conventional metallic bearing housings. However, plastic specific properties, such as dependence on temperature and behavior under long term stressing, must be taken into consideration when using the clevis joints. The load-bearing capacity of the clevis joints in individual cases should therefore be checked in a practical test, particularly if they are to be used under continuously high loads and at elevated temperatures.

### Chemical Resistance

igubal® clevis joints are resistant to weak alkalis and weak acids, as well as to fuels and all types of lubricants. Please contact us if you have any questions about the resistance of our igubal® bearings.

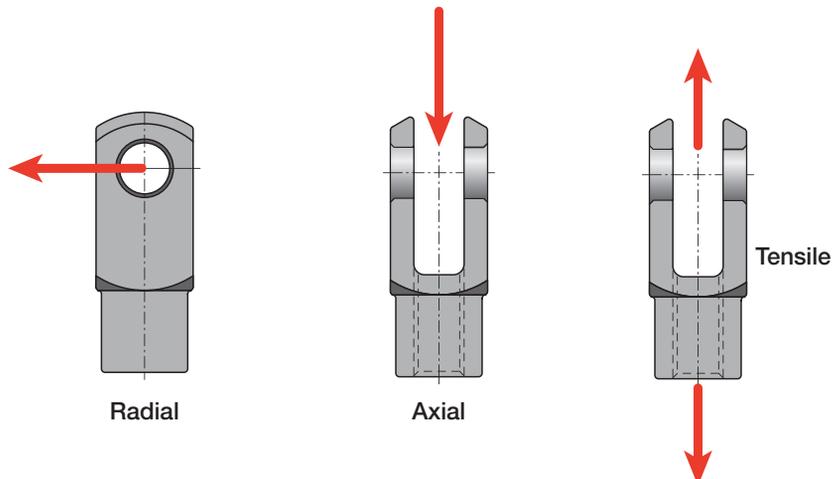

### Usage Guidelines

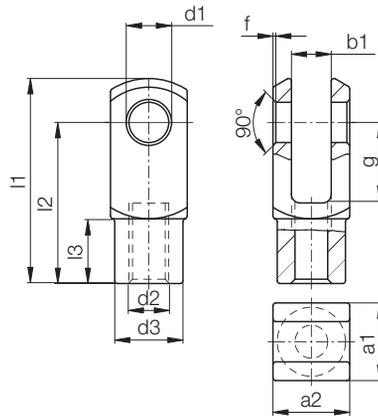

- If high rigidity is required
- If corrosion resistance is required
- In applications where lubrication could present an issue
- If simple assembly is necessary
- If a lightweight option is preferred

- If temperatures are higher than 248°F
- If dimensions above 1" or 30 mm are necessary
