Many American Autowire spark plug wire sets are available in two categories. Please refer to the detailed descriptions below to determine the correct set for your vehicle.

Factory original reproduction spark plug wire sets (Date Coded):

Date coded wires are exact replacements for what would have been in the vehicle when it shipped from the factory, and will have the original GM date code printed on each wire lead. Use the chart at right to help determine the correct code for your vehicle.

Non-date coded replacement spark plug wire sets:

Our replacement wire sets are assembled using Packard wire, and use currently available replacement spark plug boots. Replacement sets do not have date code information printed on the wire. Fit, appearance and function are substantially better than current GM replacement sets. These are a great option for the budget-minded restorer.

**American
Autowire**

Car Year	Vehicle Build Date	Date Code
1961	Sep 60 - Feb 61	Not Dated
