Dr. Tabanella Giorgio DDS, MS
Diplomate Of The American Board Of Periodontology

Giorgio Tabanella DDS,MS

Diplomate Of The American Board Of Periodontology

Dr. Tabanella is a Diplomate of the American Board of Periodontology and Active Member of the Italian Academy of Esthetic Dentistry. He graduated from the University of Southern California-Los Angeles-USA where he obtained the Certificate in Periodontics as well as the Master of Science in Craniofacial Biology. He is Director of O.R.E.C.-Oral Reconstruction and Education Center (WWW.TABANELLAOREC.COM), reviewer and author of original articles published in peer-reviewed journals. Dr.Tabanella lectures worldwide on soft and hard tissue reconstruction around natural teeth and implants as well as the re-treatment of failures. His research focuses on tissue regeneration, peri-implant and dental bone loss, novel protocols for the repair of ailing dental implants. He maintains a private practice in Rome, Italy where he also holds advanced courses and live surgeries on tissue regeneration and re-treatment of implant failures for a limited numbers of participants.

Program Highlights

While dental implants are being used in a more extensive way in daily practice, the unaesthetic outcomes are progressing too. Biomechanical implant complications are the main cause for these failures. A good understanding of hard and soft tissue behaviors and the limitations of the implant therapy in particular cases is needed to minimize the complications incidence. This new course will present a comprehensive overview how failures can be treated and prevented. Hands-on on pig's jaw will give participants the chance to apply novel tissue regeneration techniques to repair implant failures. Full HD videos, detailed clinical documentation and live surgeries will demonstrate how top standard technologies can be helpful to reduce the risks of treatment failure or give us valuable information for a necessary retreatment.

This program is aimed at clinicians who have already experience in placing implants and have been exposed to the principles of hard and soft tissue grafting procedures. The learning will contribute to increase their expertise in the management of complications.

This two days' course will enable participants to...

- Understand the etiology of implant failures
- Implement technology, including 3D imaging software
- Understands the concept of "buccal bone balcony" and the importance of soft tissue thickness
- clinical decision making in retreating ailing or failing dental implants
- Have a thorough knowledge of grafting techniques for coverage of mucosal recessions and implant removal in esthetic areas
- understand the value of using OSSTELL measurements for decision-making

General Information

Registration Fee: 1.900 Euros + 22% VAT - Deposit of 50% required.

The course registration fee includes: Course Material, Lunches and coffee breaks during the course, Welcome reception cocktail, Guided Tour, Dinner

Official Language: English

Confirmation: Receipt of your registration form and payment will directly be acknowledged by email. If you have not received a confirmation, please contact: info@studiotabanella.com or lorenab@libero.it

Invoice: Only digital version of invoices will be sent to participants. The invoice will be issued within one week after the registration. In case of any enquiries, please contact: info@studiotabanella.com or lorenab@libero.it

Cancellation policy: All cancellations must be made by email to: info@studiotabanella.com or lorenab@libero.it

Cancellations must be made at least 30 days prior to the course to receive a refund; otherwise the entire deposit will be forfeited. All refunds will be issued after the course
